**Check-list of Czechoslovak Insects IV**  
(*Coleoptera*)

**Seznam československých brouků**

Supplementum 1

**Praha 1993**

**Check-list of Czechoslovak Insects IV**  
*(Coleoptera)*

**Seznam československých brouků**

Prepared cooperatively by specialists  
on the various groups of *Coleoptera*  
under the direction of

**JOSEF JELÍNEK**

**FOLIA HEYROVSKYANA**

Supplementum 1

Praha, 1993

## Explanations

All names of the taxa of family and genus groups are listed according to the system and distinguished by different type:

Superfamily	<b>TENEBRIONOIDEA</b>
Family	<i>Meloidae</i>
Subfamily	<i>Meloinae</i>
Tribus	<b>MELOINI</b>
Genus	<i>Meloe</i>
Subgenus	<i>Lampromeloe</i>

Within each genus and subgenus, the names of species are listed alphabetically and indented. All synonyms are printed in brevier and introduced by the mark of equation (=).

## Abbreviations and symbols used in the text:

B	- Bohemia
M	- Moravia incl. Silesia
S	- Slovakia
?B ?M ?S	- dubious or not document records
<sup>1</sup> B <sup>1</sup> M <sup>1</sup> S	- species extinct in a particular region
<sup>2</sup> B <sup>2</sup> M <sup>2</sup> S	- adventive species
<sup>3</sup> B <sup>3</sup> M <sup>3</sup> S	- adventive species acclimatized in a particular region
<sup>4</sup> (before the name of species)	- species only synanthropic in Czechoslovakia
*B *M *S	- unpublished record for a particular region

Species listed without letters (B, M, S) are listed according to the data in the literature (mostly foreign) pertaining to Czechoslovakia without specification of particular region.

## Vysvětlivky

Všechna jména taxonů skupiny čeledi a rodu jsou řazena podle systému a odlišena typem písma:

Nadčeď	<b>TENEBRIONOIDEA</b>
Čeď	<i>Meloidae</i>
Podčeď	<i>Meloinae</i>
Tribus	<b>MELOINI</b>
Rod	<i>Meloe</i>
Podrod	<i>Lampromeloe</i>

V rámci rodu či podrodu jsou jména druhů a poddruhů řazena abecedně a vytištěna při levém okraji textu. Synonyma všech taxonů jsou uvozena značkou "=".

## Zkratky a symboly použité v textu:

B	- Čechy
M	- Morava včetně Slezska
S	- Slovensko
?B ?M ?S	- pochybný nebo nedoložený údaj
<sup>1</sup> B <sup>1</sup> M <sup>1</sup> S	- druh vyhynulý na uvedeném území
<sup>2</sup> B <sup>2</sup> M <sup>2</sup> S	- adventivní druh
<sup>3</sup> B <sup>3</sup> M <sup>3</sup> S	- druh aklimatizovaný na uvedeném území
<sup>4</sup> (před jménem druhu)	- druh v Československu pouze synantropní
*B *M *S	- nález dosud nepublikovaný z uvedené oblasti

Druhy uváděné bez výše uvedených písmen (B, M, S) jsou založeny na literárních (především zahraničních) údajích, vztahujících se k Československu bez bližšího upřesnění.

**Chrysomelidae**

(J. STREJČEK)

The present list is based on data in the literature as well as on the extensive faunal research carried out by the author during last twenty years. The manuscript has been complemented also by further specialists on the family *Chrysomelidae*, namely R. Farion, F. Kantner and M. Zúber. The list contains all species found on the territory of Czechoslovakia by 1992. The species known from Czechoslovakia only from data in the literature have been included only in the case that their occurrence there comports with their known geographic distribution. Species, the occurrence of which is quite improbable were omitted.

Dubious remains the taxonomic status of *Chrysolina lapidaria* Bechyně. It is tentatively listed as a not fully resolved synonym of *Ch. rufa* Duftschmid.

Seznam je založen na literárních údajích a na rozsáhlém faunistickém výzkumu, prováděném autorem v posledních dvaceti letech. Na doplnění rukopisu se podíleli další naši specialisté na tuto čeleď, a to kolegové ing. R. Farion, F. Kantner a M. Zúber, jimž na tomto místě děkuji.

Seznam zahrnuje druhy zjištěné na území Československa do r. 1992, druhy uváděné pouze v literatuře jen pokud jejich výskyt zde odpovídá přirozenému geografickému rozšíření a současným faunistickým poznatkům. Druhy pro území Československa zcela nepravděpodobné již uváděny nejsou.

Problematickým druhem je *Chrysolina lapidaria* Bechyně, která je zde předběžně zařazena jako ne zcela dořešené synonymum k druhu *Ch. rufa* Duftschmid.

**Bruchidae**

(J. STREJČEK)

The list corresponds with the recent paper on *Bruchidae* of Czechoslovakia by Strejček (1991). Following species were previously reported from Czechoslovakia. Some of them were erroneously identified, the other ones are not documented with relevant collection specimens and their occurrence in Czechoslovakia does not comport with their geographic distributions: *Bruchus emarginatus* Allard, *B. laticollis* Boh., *Bruchidius annulicornis* (Allard), *B. bimaculatus* (Ol.), *B. nanus* (Germar).

Seznam koresponduje s nedávným zpracováním československých druhů čeledi *Bruchidae* (Strejček, 1991). V literatuře jsou z území Československa uváděny i některé další druhy, u kterých byla při revizi zjištěna chybná determinace. Dále jsou to druhy, u kterých nebyl zjištěn žádný doklad a jejichž výskyt neodpovídá jejich známému rozšíření. Takovéto druhy byly ze seznamu vypuštěny. Jsou to *Bruchus emarginatus* Allard, *B. laticollis* Boh., *Bruchidius annulicornis* (Allard), *B. bimaculatus* (Ol.) a *B. nanus* (Germar).
