

First record of *Agramma ruficorne* (Germ.) from Belarus with notes on erroneous records of some lacebugs from Belarus and Baltia (Heteroptera: Tingidae)

L.S. Chumakov, E.L. Medved' & V.B. Golub

Chumakov, L.S., Medved', E.L. & Golub, V.B. 1997. First record of *Agramma ruficorne* (Germ.) from Belarus with notes on erroneous records of some lacebugs from Belarus and Baltia (Heteroptera: Tingidae). *Zoosystemica Rossica*, 6(1/2): 94.

Agramma ruficorne is recorded from Belarus. Some erroneous citations of Tingidae from Belarus and Baltia are corrected.

L.S. Chumakov, Republican Ecological Centre of Students, Minsk, Belarus.

E.L. Medved', Belarus State University, Minsk, Belarus.

V.B. Golub, Voronezh University, Universitetskaya pl. 1, Voronezh 394693, Russia.

Agramma ruficorne (Germ.). One female is collected in Belarus: Pripyat' National Park (27° 57' E, 51° 54' N), Pinetum eriophoroso-sphagnosum, at the margin of a sphagnum bog, 12.IX.1997 (Chumakov). It is the easternmost record of this species in Europe. Its distribution is disjunct: Europe and Far East. Citations (with doubt) from Russia and Kaliningrad Prov. (Péricart, 1983; Péricart & Golub, 1996) are not based on real records.

Agramma confusum (Put.). Records from Belarus (see Lukashuk, 1997) apparently concern *A. femorale* Thoms. or *A. fallax* (Horv.). Record of *A. fallax* (as *confusa* var. *fallax*) from Estonia (Stichel, 1926) should be referred to *A. femorale*.

Dictyonota strichocera Fieb. Citation from Estonia and Latvia (Péricart & Golub, 1996) is in error.

Stephanitis pyri (F.). Citations from Belarus (Péricart & Golub, 1996) and Lithuania (Lešinskas & Pileckis, 1967; Zajančauskas, 1984; Péricart & Golub, 1996) are not confirmed by material or records from concrete localities and apparently should be considered as erroneous (see also Lukashuk, 1997). Record of one specimen

from Finland (Helsinki, end of December!) is surely based on occasional introduction.

Tingis pauperata (Put.). Citation from Belarus (Péricart & Golub, 1996) is in error.
