

# A complex case of homonymy in the Emesinae from Madagascar (Heteroptera: Reduviidae)

E.S. Labina & I.M. Kerzhner

Labina, E.S. & Kerzhner, I.M. 2001. A complex case of homonymy in the Emesinae from Madagascar (Heteroptera: Reduviidae). *Zoosystematica Rossica*, 9(1), 2000: 226.

The valid names of the three species discussed in the paper are *Orthunga seyrigi* (Villiers, 1949), *Nesita seyrigi* (Villiers, 1953) and *Paranesita villiersi* (Wygodzinsky, 1966).

E.S. Labina, Department of Biology, St.Petersburg State University, Universitetskaya nab. 7/9, St.Petersburg 199034, Russia.

I.M. Kerzhner, Zoological Institute, Russian Academy of Sciences, Universitetskaya nab. 1, St.Petersburg 199034, Russia.

Wygodzinsky (1966) placed *Nesita seyrigi* Villiers, 1949 and *Obenbergerium seyrigi* Villiers, 1953 in the genus *Nesita* Bergr. (subgenus *Nesita*). He proposed *Nesita* (*Nesita*) *villiersi* nom. n. (p. 145) to replace the second name, but unfortunately used the same species name also for a new species, *Nesita* (*Paranesita*) *villiersi* sp. n. (p. 146). References to the two *seyrigi* and the two *villiersi* were differently and greatly confused in the two catalogues of Reduviidae (Putshkov & Putshkov, 1988; Maldonado Capriles, 1990), so that both of them listed two species instead of three.

As the two species originally named *seyrigi* Villiers are currently placed in different genera, the junior secondary homonym *seyrigi* Villiers, 1953 replaced after 1960 should be restored (International Code of Zoological Nomenclature, 4th ed., Art. 59.4). The replacement name *villiersi* given to it becomes invalid, thus giving opportunity to preserve its primary homonym published simultaneously. Acting as first revisers (International Code of Zoological Nomenclature, 4th ed., Art. 24.2.2), we give *Nesita* (*Paranesita*) *villiersi* Wygodzinsky, 1966 (p. 146) precedence over *Nesita* (*Nesita*) *villiersi* Wygodzinsky, 1966 (p. 145). The correct names of the three species and respective citations are given below.

## **Orthunga seyrigi** (Villiers, 1949)

*Nesita seyrigi* Villiers, 1949, Mém. Mus. natl. Hist. nat., n. s., 23: 337, 341.

*Nesita* (*Nesita*) *seyrigi*: Wygodzinsky, 1966: 145.

*Orthunga seyrigi*: Villiers, 1973, Ann. Soc. entomol. Fr., n. s., 9: 618.

Holotype: ♂, Madagascar, Analalava (Mus. Natl. Hist. Nat. Paris).

## **Nesita seyrigi** (Villiers, 1953), nom. valid.

*Obenbergerium seyrigi* Villiers, 1953, Mém. Inst. sci. Madagascar (E), 3: 35 (junior secondary homonym).

*Nesita* (*Nesita*) *villiersi* Wygodzinsky, 1966: 145 (nom. n.).

*Nesita* *villiersi*: Villiers, 1975, Ann. Soc. entomol. Fr., n. s., 11: 264, 279.

Holotype: ♀, Madagascar, Fort-Dauphin (Mus. Natl. Hist. Nat. Paris).

## **Paranesita villiersi** (Wygodzinsky, 1966)

*Nesita* (*Paranesita*) *villiersi* Wygodzinsky, 1966: 146 (senior primary homonym, see the first reviser action above).

*Paranesita* *villiersi*: Villiers, 1971, Ann. Soc. entomol. Fr., n. s., 7: 880.

Holotype: ♀, Madagascar, Ambontoaka (Zool. Inst. St. Petersburg).
