

New synonymy of some species from the family Dolichopodidae (Diptera)

O.P. Negrobov & O.O. Maslova

Negrobov, O.P. & Maslova, O.O. 2004. New synonymy of some species from the family Dolichopodidae (Diptera). *Zoosystematica Rossica*, **13**(1): 128.

Examination of types from collections of German museums revealed the following new synonymies: *Coracocephalus humilis* (Loew), comb. n. (*Liancalus humilis* Loew) = *C. miki* Parent, *Medetera flavicornis* Becker = *M. plumosa* Parent, *Paraclius longiciliatus* Van Duzee = *P. formosus* Parent, *Dolichopus lepidus* Staeger = *D. uliginosulus* Dyte. It is supposed that *Paraclius amasonae* Parent is a junior synonym of *P. femoratus* Aldrich.

O.P. Negrobov, O.O. Maslova, Faculty of Biology and Soil Science, Voronezh State University, Universitetskaya pl. 1, Voronezh 394006, Russia.

Examination of Dolichopodidae collections in the Universität Halle, Staatliches Museum für Tierkunde (Dresden), and Institut für systematische Zoologie, Museum für Naturkunde, Humboldt Universität (Berlin) revealed some new synonymies listed below.

Coracocephalus humilis (Loew, 1869), comb. n. = *Liancalus humilis* Loew, 1869, sec. typ. (Berlin) = *Coracocephalus miki* Parent, 1927, **syn. n.**

Medetera flavicornis Becker, 1922, sec. typ. (Dresden) = *M. plumosa* Parent, 1931, sec. typ. (Dresden), **syn. n.**

Paraclius amasonae Parent, 1929, sec. typ. (Halle). The male genitalia are figured (Figs 1, 2). The name is possibly a junior synonym of *P. femoratus* Aldrich, 1901.

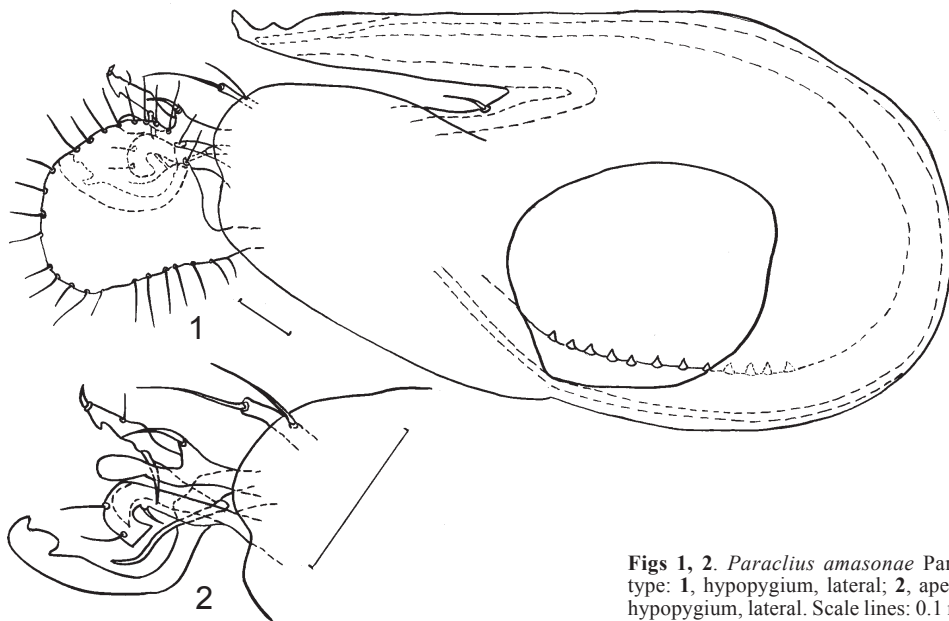

Paraclius longiciliatus Van Duzee, 1931 (11.IV) = *P. formosus* Parent, 1931 (1.VII), sec. typ. (Dresden), **syn. n.**

Dolichopus lepidus Staeger, 1842 = *D. uliginosus* Becker in Harnisch, 1925 (junior homonym of *D. uliginosus* Van Duzee, 1923), sec. typ. (Berlin) = *D. uliginosulus* Dyte, 1980 (new name for *D. uliginosus* Becker), **syn. n.**

Acknowledgements

The senior author is grateful to the curators of collections Dr. H. Schumann (Berlin), the late Dr. M. Dorn (Halle), and Dr. R. Krause (Dresden) for help. The work was supported by a grant from the Russian Foundation for Basic Research (no. 04-04-4802a).

Received 26 March 2004
