

Cochylimorpha razowskiana nom. n. for *C. pallens* (Kuznetzov, 1966) (Lepidoptera: Cochylidae)

V.I. Kuznetzov

Kuznetzov, V.I. 2005. *Cochylimorpha razowskiana* nom. n. for *C. pallens* (Kuznetzov, 1966) (Lepidoptera: Cochylidae). *Zoosystematica Rossica*, **14**(1): 178.

Euxanthis pallens Lucas, 1954 and *Stenodes pallens* Kuznetzov, 1966, both placed now in the genus *Cochylimorpha* Razowski, 1960, are secondary homonyms. The name *Cochylimorpha razowskiana* nom. n. is proposed to replace the junior homonym.

V.I. Kuznetzov, Zoological Institute, Russian Academy of Sciences, Universitetskaya nab. 1, St.Petersburg 199034, Russia.

Lucas (1954: 38) described *Euxanthis pallens* from Morocco (Ifrane). The name is now placed in the genus *Cochylimorpha* Razowski, 1960 as a junior synonym of *C. straminea* (Haworth, 1811) (synonymy established by Razowski, 1970). Kuznetzov (1966: 202) described *Stenodes pallens* from the Primorsk Territory of Russia (Okeanskaya near Vladivostok). This species is also placed in the genus *Cochylimorpha*. As *pallens* Lucas and *pallens* Kuznetzov are secondary homonyms, a new replacement name *Cochylimorpha razowskiana* nom. n. is proposed here for *C. pallens* (Kuznetzov, 1966).

Acknowledgements

I am thankful to Dr J. Razowski (Kraków), who paid my attention to the homonymy discussed above.
