Abstract. The generic name *Bezverkhovia* Gorochov, 2018 assigned to the cricket genus from South America is a junior homonym of the generic name in Vietnamese Lepidoptera. The new replacement name *Eubezverkhovia* **nom. nov.** is proposed here instead of the aforementioned homonymic name. The following new combinations are also suggested: *Eubezverkhovia lydia* (Gorochov, 2018), **comb. nov.** and *E.? huanchaca* (Gorochov, 2017), **comb. nov.**

Резюме. Родовое название *Bezverkhovia* Gorochov, 2018, данное роду сверчков из Южной Америки, является младшим омонимом родового названия вьетнамских чешуекрылых. Здесь вместо вышеупомянутого омонимичного названия предложено новое замещающее название *Eubezverkhovia* **nom. nov.** Установлены также следующие новые комбинации: *Eubezverkhovia lydia* (Gorochov, 2018), **comb. nov.** и *E.? huanchaca* (Gorochov, 2017), **comb. nov.**

Key words: crickets, nomenclature, South America, Orthoptera, Gryllidae, Podoscirtinae, new replacement name, new combinations

Ключевые слова: сверчки, номенклатура, Южная Америка, Orthoptera, Gryllidae, Podoscirtinae, новое замещающее название, новые комбинации

Zoobank Article LSID: urn:lsid:zoobank.org:pub:FFFDC740-2845-4E04-A9B8-9ECEA980B48D

In the review of Peruvian crickets from the subfamily Podoscirtinae (Gorochov, 2018), the genus *Bezverkhovia* and its type species *B. lydia* were described. The taxa were named after the statesman and entomologist Yu.A. Bezverkhov and his wife L.E. Bezverkhova for the supporting of orthopterological research in Peru. This genus belongs to the subtribe Tafaliscina of the Neotropical tribe Paroecanthini and possibly includes also *Tafalisca? huanchaca* Gorochov, 2017 from Bolivia (Gorochov, 2017, 2018).

The identical names *Bezverkhovia* and *B. lydia* were proposed in 2009 for the Vietnamese genus and species from the lepidopteran family Lasiocampidae (Zolotuhin & Sinyaev, 2009). Thus, the above-mentioned cricket generic name is a junior homonym of the latter generic name and must be replaced by a new (replacement) name, but the identical species names in crickets and in butterflies are not homonyms (in accordance with the International Code of Zoological Nomenclature, Articles 57.8 and 60.3).

Genus ***Eubezverkhovia*** Gorochov et Izerskiy,
nom. nov.

Bezverkhovia Gorochov, 2018: 81, junior homonym of
Bezverkhovia Zolotuhin et Sinyaev, 2009 (Lepi-
doptera: Lasiocampidae).

Type species: *Bezverkhovia lydia* Gorochov,
2018: 82.

Etymology. The new replacement name con-
sists of the homonymic cricket generic name
Bezverkhovia and the Latinised Greek prefix *eu-*
(true, good).

Eubezverkhovia lydia (Gorochov, 2018),
comb. nov.

Bezverkhovia lydia Gorochov, 2018: 82.

Eubezverkhovia? huanchaca (Gorochov, 2017),
comb. nov.

Tafalisca? huanchaca Gorochov, 2017: 89.

Bezverkhovia? huanchaca: Gorochov, 2018: 82.
