

Updated: 01.12.2015

CATALOGUE OF PALAEARCTIC CERAMBYCOIDEA

M.L. Danilevsky

The present Catalogue is arranged on the base of “Catalogue of Palaearctic Coleoptera” (vol. 6) by Löbl & Smetana (2010). All new names published after that edition, are included, as well as numerous additions and corrections published by Danilevsky (2010e, 2011h, 2012j, 2012k, 2012l, 2012m, 2013a, 2013c, 2014b). The taxonomy of several genera is changed. Most fragments differing from the publication by Löbl & Smetana (2010) are red, including corrections to the wrong bibliography references.

The references to the new publications see at the end of the list.

All new taxonomy remarks can be seen in a separate file with corresponding numbers.

The abbreviations of geographical divisions are same as in the Catalogue by Löbl & Smetana (2010), but Transcaucasian republics (Armenia, Azerbaijan and Georgia) are returned to Asia. The eastern limits of Europe are same as in 6th volume (Löbl & Smetana, 2010: 11, 13) with the borderline along Ural Ridge and Ural River, while the whole territories of Sverdlovsk and Chelyabinsk regions as well as Orenburg Region were included in Europe in the previous volumes (here south and east areas of Orenburg Region behind Ural River are treated as West Siberia – “WS”).

The present files will be regularly updated. All remarks and corrections are strongly desirable.

The author is very grateful to R. Ambrus, G. Georgiev, J. Kurzawa, A. Lobanov, J. Mazepa, A. Miroshnikov, Lin Meiying, A. Napolov, A. Shapovalov and T. Tichý for their remarks to the text.
