

SUBORDER SYMPHYTA – SAWFLIES AND WOOD WASPS

Yu.N. SUNDUKOV

Sawflies are distinguished from other Hymenoptera by the anterior margin of the tergum 1, which appears as part of abdomen rather than thorax, though it is fused to the postnotum of the metathorax. The suborder is distributed worldwide. Number of recent taxa: World – 15 families, 45 subfamilies, about 650 genera, about 8250 species; Palaearctic – 13/24/>310/about 4400; Russia – 13/22/170/1546.

The classification used here reflects classification, derived from the “World catalog of Symphyta” (Taeger et al., 2010), taking into account the latest taxonomic changes (see the list of references).

INFRAORDER XYELOMORPHA

SUPERFAMILY XYELOIDEA

One family: Xyelidae.

1. FAMILY XYELIDAE

Xyelidae is the earliest known family of Hymenoptera according to the fossil record, with the oldest members dating from the Early Triassic some 220 million years ago (Blank, 2002b). Xyelidae is a small family of herbivorous wasps. These are small (Xyelinae) or medium sized (Macroxyelinae) insects (3–17 mm). Characterized by very long 3th antennal segment (actually formed by fusion of at least 8 segments) surmounted by a slender filament of 9 or more tiny segments. The larvae of subfamily Xyelinae live in the male cones of pines (*Pinus* spp.), where they feed on the sporophylls, or bores in the shoots of conifers (*Abies*, *Picea*). Larvae of Macroxyelinae – in the inflorescences of deciduous trees.

The family is distributed in the Holarctic, Oriental and Neotropical regions, mainly in their temperate zone. Number of recent taxa: World – 2 subfamilies, 8 genera, about 85 species; Palaearctic – 2/4/> 40; Russia – 2/3/13.

R e f e r e n c e s . Gussakovskij, 1935; Rasnitsyn, 1965; Shinohara, 1992b, 1995; Blank et al., 2005, 2013, 2017; Taeger et al., 2006, 2010; Sundukov, Lelej, 2012; Vasilenko, Korshunov, 2012; Kostyunin, 2015; Sundukov, 2015.

Subfamily MACROXYELINAE

MEGAXYELA Ashmead, 1898 (*Odontophyes* Konow, 1899; *Megaloxyla* Schulz, 1906; *Paraxyela* MacGillivray, 1912). The larvae feed on the Juglandaceae. Type species *Xyela major* Cresson, 1880. The genus is distributed in East Palaearctic and Nearctic region. Number of species: World – 11; Palaearctic – 6; Russia – 2.

Megaxyela gigantea Mocsàry, 1909 (*M. mikado* Sato, 1930). Host plant: *Juglans mandshurica* Maxim., *J. ailanthifolia* Carr., *J. regia* L. (Juglandaceae). Russia: **FE** (KH, PR). – Korean Peninsula.

Megaxyela pulchra Blank, Shinohara et Sundukov, 2017. Host plant: *Juglans mandshurica* Maxim., *?J. ailanthifolia* Carr., *?J. regia* L., *?Pterocarya* spp. (Juglandaceae). Russia: **FE** (PR). – China (NE, WP, SE), Korean Peninsula.

Subfamily XYELINAE

PLERONEURA Konow, 1897 (*Manoxyela* Ashmead, 1898). Type species *Xyela dahli* Hartig, 1837. The larvae of species bores in the shoot of *Abies* and *Picea* (Pinaceae). The genus is distributed in the Holarctic and Neotropical regions. Number of species: World – 12; Palaearctic – 7; Russia – 3.

Pleroneura dahlii (Hartig, 1837) [*Xyela*]. Host plant: *Abies* spp. (Pinaceae). Russia: **EP** (NC). – Europe (WE, EE).

Pleroneura piceae Shinohara et Hara, 1995. Host plant: *Picea glehnii* Schmidt (Pinaceae). Russia: **FE** (KU). – Japan (Hok).

Pleroneura subulata Shinohara, 1995. Russia: **FE** (KH, PR). – Korean Peninsula, Japan (Hon, Shi).

XYELA Dalman, 1819 (*Pinicola* Brébisson, 1818; *Mastigocerus* Latreille, 1818; *Tritikreion* Schilling, 1826; *Mastigocera* Berthold, 1827; *Pinicolites* Meunier, 1920; *Neoxyela* Curran, 1923; *Xyelatana* Benson, 1938; *Mesoxyela* Rasnitsyn, 1965; *Magnixyela* Rasnitsyn, 1971; *Alpigenixyela* Rasnitsyn, 1971; *Desertixyela* Rasnitsyn, 1971; *Concavixyela* Rasnitsyn, 1971; *Linsleyixyela* Rasnitsyn, 1971; *Minorixyela* Rasnitsyn, 1971). Type species *Xyela pusilla* Dalman, 1819. The larvae of most species live in the male cones of pines (Pinaceae) where they feed on the sporophylls. The genus is distributed in the Holarctic, Oriental and

Neotropical regions. Number of species: World – near 50; Palaearctic – 29; Russia – 8.

Xyela julii (Brébisson, 1818) [Pinicola] (*X. pusilla* Dalman, 1819; *X. henschii* Mocsáry, 1912). Host plant: *Pinus nigra* Arnold, *P. rotundata* Link, *P. sylvestris* L. (Pinaceae). Russia: **EP** (N, NW, C), **WS** (KM, AL), **ES** (IR). – Europe (WE, NE, SE, EE), Georgia, Turkey, Mongolia.

Xyela kamtshatica Gussakovskij, 1935. Host plant: *Pinus pumila* Pall. (Pinaceae). Russia: **FE** (KA). – Japan (Hok, Hon).

Xyela koraiensis Blank et Shinohara, 2013. Host plant: *Pinus koraiensis* Sieb. (Pinaceae). Russia: **FE** (PR). – Korean Peninsula.

Xyela longula Dalman, 1819 (*X. piliserra* C.G. Thomson, 1871). Host plant: *Pinus sylvestris* L. (Pinaceae). Russia: **EP** (NW, C). – Europe (WE, NE, EE).

Xyela pumilae Blank et Shinohara, 2013. Host plant: *Pinus pumila* Pall. (Pinaceae). Russia: **FE** (KU). – Japan (Hok).

Xyela rasnitsyni Blank et Shinohara, 2013. Host plant: *Pinus koraiensis* Sieb. (Pinaceae). Russia: **FE** (PR). – China (NE), Korean Peninsula.

Xyela sibirica Blank, 2013. Host plant: *Pinus sibirica* Du Tour (Pinaceae). Russia: **WS** (KM), **ES** (KR, IR). – Mongolia.

Xyela ussuriensis Rasnitsyn, 1965 (*X. suwonae* Ryu et Lee, 1992). Host plant: *Pinus koraiensis* Sieb. (Pinaceae). Russia: **FE** (PR). – Korean Peninsula.

INFRAORDER TENTHREDINOMORPHA

SUPERFAMILY TENTHREDINOIDEA

Head usually open without hypostomal bridge. Pronotum very short medially and strongly emarginate behind; mesopleura with epimeron divided into upper convex and lower concave portion; mesosternum trapezoidal without presternal bridge and sutures often obsolete. Male genitalia strophandrious; female saw-sheath usually abbreviated, but sometimes exserted. The larvae are polypodous or oligopodous.

The superfamily is distributed worldwide. Number of taxa: World – 7 families, 33 subfamilies, > 550 genera, > 7300 species; Palaearctic – 6/15/> 250/about 4000; Russia – 6/13/134/1318 (+ 34 spp.).

2. FAMILY ARGIDAE

Slow, heavily built insects. Distinguished from all other families by the flagellum of its antenna being fused into a single long segment; this segment is sub-clavate in the female, but in the male is either uniform in thickness with a brush of short setae below (Arginae), or bifid like a tuning-fork (Sterictophorinae). Fore wing with vein $2r$ absent. Cenchri very large. Tibiae with or without preapical spines; front tibia with two unmodified apical spurs. The larvae are free feeding, polypodous, with 6–8 pairs of abdominal legs; they feed predominantly on the leaves of various trees and shrubs.

The family is distributed worldwide. Number of taxa: World – 6 subfamilies, 60 genera, about 920 species; Palaearctic – 3/17/about 310; Russia – 2/7/88 (+ 2 spp.).

Subfamily ARGINAE

ARGE Schrank, 1802 (*Cryptus* Jurine, 1801; *Hylotoma* Latreille, 1803; *Corynia* Labram et Imhoff, 1836; *Acanthoptenos* Ashmead, 1898; *Bathyblepta* Konow, 1906; *Didocha* Konow, 1907; *Miocephala* Konow, 1907; *Calarge* Enslin, 1911; *Alloscenia* Enderlein, 1919; *Rhopalospiria* Enderlein, 1919; *Fivaldzskyiformis* Ermolenko, 1975; *Ochropusiformis* Ermolenko, 1975; *Paganiformis* Ermolenko, 1975; *Melanochroiformis* Ermolenko, 1975; *Pleuriticiformis* Ermolenko, 1975; *Ustilatiformis* Ermolenko, 1975; *Rusticiformis* Ermolenko, 1975; *Berberidiformis* Ermolenko, 1975). Type species *Tenthredo enodis* Linnaeus, 1767. The larvae feed on the Rosaceae, Salicaceae, Betulaceae. The genus is distributed worldwide. Number of species: World – > 350; Palaearctic – about 170; Russia – 55.

Arge altaica Gussakovskij, 1935. Russia: **WS** (AL). – Korean Peninsula.

Arge aurata (Zaddach, 1864) [Hylotoma]. Russia: **EP** (NC). – Caucasus, Turkey, Syria.

Arge auripennis Konow, 1891 (*Hylotoma graeffei* Kriechbaumer, 1892). Russia: **EP** (NC). – Europe (EE), Caucasus, Turkey, Syria.

Arge azhendarovensis Vasilenko, 2010. Russia: **WS** (KM).

Arge beckeri Tournier, 1889 (*Hylotoma rufescens* Zaddach, 1864; *H. pallipes* Kriechbaumer, 1892; *H. pallidipes* Dalla Torre, 1894). Russia: **EP** (S, NC, CR). – Europe (EE, SE), Turkey.

Arge berberidis Schrank, 1802 (*Tenthredo xanthopyga* Vallot, 1836). Host plant: Berberis spp. (Berberidaceae). Russia: **EP** (C, S, NC, CR). – Europe (WE, EE, SE), Caucasus, Turkey, Japan (Hok).

Arge captiva (F. Smith, 1874) [Hylotoma] (*Hylotoma flavidollis* Cameron, 1876; *Arge sanguinolenta* Mocsáry, 1909; *A. kolthoffi* Forsius, 1927; *A. captiva rufoscutellata* Takeuchi, 1927; *A. captiva watanabei* Takeuchi, 1932). Host plant: Ulmus spp. (Ulmaceae); flies into the light. Russia: **WS** (NS, KM, AL), **ES** (ZB), **FE** (KH, PR, KU). – Kazakhstan (N),

- Mongolia, China (NE, CC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Tsushima), India (N), SE Asia.
- Arge carinifrons** Enslin, 1917. Russia: **EP** (NC). – Georgia, Armenia.
- Arge caucasica** Tournier, 1889 (*A. halinae* Kuznetsov-Ugamskij, 1927). Russia: **EP** (E, S, NC), **UR**, **WS** (OM, NS, AL). – Europe (EE, SE), Armenia, Kyrgyzstan, Kazakhstan.
- Arge ciliaris** (Linnaeus, 1767) [Tenthredo] (*Hylotoma coerulea* Klug, 1814; *H. corusca* Zaddach, 1859; *Arge fuscipes bleusei* Pic, 1917). Host plant: *Filipendula* spp., *Spiraea* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM, AL), **ES** (KR, IR, BR, YA), **FE** (AM, KH, PR, KA). – Europe (WE, EE, NE, SE), Turkey, Mongolia, China (NE, NC).
- Arge cinnabarina** Gussakovskij, 1935. Russia: **FE** (PR). – China (SW).
- Arge corallina** Gussakovskij, 1935. Russia: **FE** (AM, PR). – China (SW).
- Arge cyanocrocea** (Förster, 1771) [Tenthredo] (*Tenthredo coerulescens* Fabricius, 1775; *T. bicolor* Schrank, 1776; *Hylotoma syriaca* Mocsáry, 1880; *H. cyanocrocea messanensis* De-Stefani, 1885; *H. syriaca damascena* Magretti, 1890). Host plant: *Rubus* spp., *Sanguisorba* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM). – Europe (WE, EE, NE, SE), Caucasus, Asia Minor, Iran, Turkmenistan.
- Arge dimidiata** (Fallén, 1808) [Hylotoma] (*Hylotoma rufescens* Drapiez, 1819; *H. fasciata* Lepeletier, 1823; *H. fasciata* Serville, 1823; *H. mediata* Fallén, 1829; *H. aenescens* Förster, 1854; *H. confusa* Dietrich, 1868; *Arge kongauensis* Rohwer, 1925; *A. dimidiata aeneoviridescens* Bischoff, 1925; *A. pravei* Dovnar-Zapolskij, 1926). Host plant: *Alnus* spp., *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM, AL), **ES** (KS, KR, IR, BR, YA), **FE** (AM, PR, SA). – Europe (WE, EE, NE, SE), Georgia, Kazakhstan, Mongolia, China (NE, CC, SE), Korean Peninsula.
- Arge disparilis** (W.F. Kirby, 1882) [Hylotoma] (*Hylotoma humeralis* F. Smith, 1874). Russia: **FE** (PR). – Japan (Hon).
- Arge enodis** (Linnaeus, 1767) [Tenthredo] (*Tenthredo violacea* Fabricius, 1779; *T. coeruleipennis* Retzius, 1783; *Hylotoma atrata* Klug, 1814; *H. amethystina* Klug, 1814; *H. vulgaris* Klug, 1834). Host plant: the smooth-leaved species of *Salix* (Salicaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM, AL), **ES** (KR, BR, YA), **FE** (PR). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Iran, Kyrgyzstan, Kazakhstan, Korean Peninsula, Japan (Hon).
- Arge expansa** (Klug, 1834) [Hylotoma]. Host plant: *Salix* spp., *Populus* spp. (Salicaceae). Russia: **WS** (TM, KM, AL), **FE** (AM, KU, KA). – Mongolia, China (NC).
- Arge flavomixta** (André, 1881) [Hylotoma]. Russia: “Sibiria or.” (André, 1881), **FE** (PR). – Korean Peninsula.
- Arge frivaldszkyi** (Tischbein, 1852) [Hylotoma] (*Hylotoma schmiedeknechti* Costa, 1890). Russia: **EP** (NC, CR). – Europe (EE, SE), Caucasus, Turkey.
- Arge fuscipennis** (Herrich-Schäffer, 1835) [Hylotoma]. Host plant: *Betula* spp. (Betulaceae), ?*Lythrum* spp. (Lythraceae), ?*Solidago* spp. (Asteraceae). Russia: **EP** (C, E), **UR**. – Europe (WE, EE, SE).
- Arge fuscipes fuscipes** (Fallén, 1808) [Hylotoma] (*Hylotoma violacea* Klug, 1814; *H. atrocoerulea* Serville, 1823; *H. atrocoerulea* Lepeletier, 1823; *Arge fuscinervis* Lindqvist, 1974). Host plant: *Betula* spp. (Betulaceae), *Salix* spp., *Populus* spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM, AL), **ES** (KR, ZB), **FE** (KH, PR, KU, KA, MG). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia, China (NE), Korean Peninsula.
- Arge gracilicornis** (Klug, 1814) [Hylotoma] (*Tenthredo coerulescens* Geoffroy, 1785; *T. incolorata* Christ, 1791; *Hylotoma pilicornis* Leach, 1817; *H. cyamella* Klug, 1834; *H. crassa* Konow, 1884). Host plant: *Rosa* spp., *Rubus* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, TK, NS, KM, AL), **ES** (TU, KR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KU, KA, MG, CH). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Mongolia, China (Wei et al., 2006), Korean Peninsula, Japan (Hok, Hon, Shi).
- Arge hasegawae** Takeuchi, 1927. Russia: **FE** (PR). – Korean Peninsula.
- Arge jonasi** (W.F. Kirby, 1882) [Hylotoma] (*Hylotoma nigritarsis* F. Smith, 1874; *H. japonica* Marlatt, 1898). Host plant: *Pourthiae* spp., *Aria* spp., *Crataegus* spp., *Sorbus* spp., *Cotoneaster* spp. (Rosaceae). Russia: **FE** (KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).
- Arge kobayashii** Takeuchi, 1931. Host plant: *Betula* spp. (Betulaceae). Russia: **FE** (SA, KU). – Japan (Hok).
- Arge longicornis** Kuznetsov-Ugamskij, 1927 (*A. ciliaris pacifica* Malaise, 1931). Russia: **FE** (PR). – Korean Peninsula.

- Arge macrops** Shinohara, Hara et Kim, 2009. Host plant: *Ulmus* spp. (Ulmaceae). Russia: **WS** (AL), **FE** (PR). – China (NE, NC, CC), Korean Peninsula.
- Arge mali** (Uchiyama, 1906) [Hylotoma] (*A. xanthocera* Mocsáry, 1909; *Hylotoma mali* Matsumura, 1912). Host plant: *Malus* spp. (Rosaceae). Russia: **FE** (AM, KH, PR). – China (NE), Korean Peninsula, Japan (Hok, Hon).
- Arge melanochra** (Gmelin, 1790) [Tenthredo] (*Hylotoma femoralis* Klug, 1814; *H. dimidiata* Lepetier, 1823; *H. dimidiata* Serville, 1823; *H. nigritarsis* Klug, 1834; *H. similis* Rudow, 1871; *Arge fuliginata* Konow, 1907). Host plant: *Crataegus* spp. (Rosaceae). Russia: **EP** (S, NC, CR), **UR** (S), **WS** (KM). – Europe (WE, EE, SE), Armenia, Asia Minor, Iran, Turkmenistan.
- Arge nigripes nigripes** (Retzius, 1783) [Tenthredo] (*Hylotoma anglica* Leach, 1817). Host plant: *Rosa* spp., *Fragaria* spp., *Rubus* spp. (Rosaceae); live in colonies. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, TK, NS, KM, AL), **ES** (TU, KR, IR, BR, YA), **FE** (AM, PR, SA, KA, MG). – Europe (WE, EE, NE, SE), Georgia, Turkey, Kyrgyzstan, Kazakhstan, Mongolia.
- Arge nigronodosa** (Motschulsky, 1860) [Hylotoma] (*Hylotoma flava* Snellen van Vollenhoven, 1860; *H. trinotata* F. Smith, 1874; *H. similis* F. Smith, 1874; *H. dubia* W.F. Kirby, 1882; *H. quadripunctata* W.F. Kirby, 1882). Host plant: *Rosa* spp. (Rosaceae). Russia: **FE** (AM, KH, PR, SA). – China (NE), Japan (Hok, Hon, Shi, Kyu), Nepal.
- Arge nigrovaginata** Malaise, 1931. Russia: **FE** (AM, PR). – China (NE, CC, SE), Korean Peninsula, Japan (Hon).
- Arge nipponensis** Rohwer, 1910. Host plant: *Rosa* spp. (Rosaceae); 3-4 generations per year. Russia: **FE** (SA, KU). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Sado).
- Arge obesa** Hara et Shinohara, 2012. Host plant: *Carpinus* spp., *Ostrya japonica* (Betulaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu).
- Arge ochropus** (Gmelin, 1790) [Tenthredo] (*A. rosincola* Schrank, 1802; *Hylotoma rosarum* Klug, 1814; *H. pyrenaica* André, 1879; *Arge soror* Konow, 1890; *A. pyrenaica nigripes* Konow, 1895; *A. modesta* Konow, 1905; *A. pyrenaica mauritanica* Schulz, 1906; *Hylotoma rosae diversicolor* Pic, 1917; *Arge pyrenaica luteola* Muche, 1977). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (N, NE, C, E, S, NC, CR), **UR**, **WS** (OM, TK, NS, KM, AL), **ES** (TU, KR, IR, YA). – Europe (WE, EE, NE, SE), N Africa, Georgia, Armenia, Asia Minor, Iran, Turkmenistan, Kazakhstan; introduced into the N America.
- Arge pagana pagana** (Panzer, 1797) [Tenthredo] (*Tenthredo tricolor* Gmelin, 1790; *T. nigripennis* Panzer, 1804; *Hylotoma flaviventris* Fallén, 1807; *H. assimilis* Radoszkowsky, 1889). Host plant: *Rosa* spp. (Rosaceae); live in colonies. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TK, NS, KM, AL), **ES** (TU, KR, IR, BR, YA), **FE** (AM, PR, KA). – Europe (WE, EE, NE, SE), N Africa, Mongolia, China (NE, NC, CC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), India (NE).
- Arge paganiformis** Rohwer, 1925. Host plant: *Rosa* spp. (Rosaceae). Russia: **FE** (KH, PR).
- Arge pallidinervis** Gussakovskij, 1935. Russia: **EP** (CR). – Europe (EE), Armenia.
- Arge pleuritica** (Klug, 1834) [Hylotoma] (*Hylotoma sanguinicollis* André, 1880). Russia: **EP** (E, S, NC, CR). – Europe (EE, SE), Caucasus, Asia Minor, Uzbekistan.
- Arge potanini** Jakovlev, 1891 (*Hylotoma zonalis* Matsumura, 1911). Host plant: *Acer mono*, *A. mayrii* (Sapindaceae). Russia: **ES** (IR, BR, ZB), **FE** (AM, KH, PR, SA). – Mongolia, China (NE, NC), Korean Peninsula.
- Arge pseudorejecta** Wei et Lee, 2016. Russia: **FE** (PR). – China (NE), Korean Peninsula.
- Arge pullata** (Zaddach, 1859) [Hylotoma] (*Hylotoma ventriosa* Zaddach, 1864; *Arge nyemitawa* Rohwer, 1925). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (TM, TK, NS, AL), **ES** (KS, KR, ZB), **FE** (PR, SA, KU). – Europe (WE, EE, NE, SE), Armenia, Turkey, China (NE, NC), Korean Peninsula, Japan (Hok, Hon).
- Arge rufocincta** Gussakovskij, 1935. Russia: **FE** (PR). – China (NE), Japan (Hok).
- Arge rustica** (Linnaeus, 1758) [Tenthredo] (*Tenthredo atrata* Forster, 1771; *Cryptus segmentarius* Panzer, 1803; *Hylotoma klugii* Leach, 1817; *H. albicruris* Brullé, 1832; *H. leachii* Stephens, 1835; *H. marginata* Boheman, 1852; *H. discus* Costa, 1858; *H. saliceti* Rudow, 1871; *H. thomsoni* Konow, 1884; *Arge segmentaria rufiventris* Konow, 1899). Host plant: *Quercus* spp. (Fagaceae). Russia: **EP** (C, E, S, NC, CR), **UR**. – Europe (WE, EE, NE, SE), Armenia, Turkey, Syria.
- Arge scita** (Mocsáry, 1880) [Hylotoma] (*Hylotoma proxima* André, 1881; *Arge debilis* Konow, 1887; *A. zarudnyi* Gussakovskij, 1935). Russia: **EP**

- (Taeger, Blank, 2011). – Europe (SE, EE), Armenia, Asia Minor, Iran, Turkmenistan.
- Arge semicoerulea** (Klug, 1814) [Tenthredo] (*Hylotoma dimidiata* Klug, 1814). Russia: **EP** (E), **ES** (KS, KR, ZB), **FE** (AM, PR). – Mongolia, China (NE).
- Arge similis** (Snellen van Vollenhoven, 1860) [*Hylotoma*] (*Hylotoma imperator* F. Smith, 1874). Host plant: Rhododendron spp. (Ericaceae); up to 3 generations per year. Russia: **FE** (PR, KU). – China (NE, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), Nepal, India.
- Arge simillima** (F. Smith, 1874) [*Hylotoma*] (*A. forcifula* Jakovlev, 1891; *A. coriacea* Jakovlev, 1891; *A. simillima asahi* Tskeuchi, 1932). Russia: **FE** (KH, PR, KU). – China (NE, SE, CC, SW), Korean Peninsula, Japan (Hon).
- Arge simulatrix** Konow, 1887. Russia: **EP** (NC). – Georgia, Asia Minor, Iran.
- Arge solowiyofka** (Matsumura, 1911) [*Hylotoma*]. Host plant: Betula spp. (Betulaceae). Russia: **FE** (PR, SA). – Mongolia, China (NE, CC, SE), Japan (Hok, Hon).
- Arge stroganova** Sundukov, 2007 (*A. altaica* Stroganova, 1977). Russia: **WS** (AL).
- Arge suspicax** Konow, 1908 (*A. punctifrons* Kuznetsov-Ugamskij, 1927; *A. masudai* Takeuchi, 1932). Russia: **ES** (IR, BR, ZB), **FE** (AM, PR). – Mongolia, China (NE), Korean Peninsula, Japan (Hon, Shi).
- Arge ustulata** (Linnaeus, 1758) [Tenthredo] (*Tenthredo flavipes* Retzius, 1783; *T. ochroptera* Geoffroy, 1785; *T. crocipennis* Christ, 1791; *T. pilicornis* Preyssler, 1793; *Hylotoma claripennis* Rudow, 1871; *H. distinguenda* Konow, 1884; *Arge monostega* Konow, 1886; *Hylotoma anceps* Radoszkowsky, 1889; *Arge ustulata stigmatica* Pic, 1927). Host plant: Salix spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM, AL), **ES** (KS, KR, IR, BR, YA, ZB), **FE** (AM, PR, SA, KU, KA). – Europe (WE, EE, NE, SE), Georgia, Turkey, Kyrgyzstan, Mongolia, Korean Peninsula.
- Arge verticosa** Konow, 1907. Russia: **WS** (AL). – Kazakhstan, China (NW).
- Arge zhelochovzevi** Stroganova, 1966. Russia: **ES** (KR, IR).
- KOKUJEWIA** Konow, 1902. Type species *Kokujewia ectrapela* Konow, 1902. The larvae feed on the Polygonaceae. The genus is distributed in West Palaearctic. Number of species: World and Palaearctic – 3; Russia – 1.
- Kokujewia ectrapela** Konow, 1902 (*K. ectrapela clarescens* Zirngiebl, 1949). Host plant: Rumex spp. (Polygonaceae). Russia: **EP** (NC). – Caucasus, Turkey, Iran.
- PSEUDARGE** Gussakovskij, 1935. Type species *Pseudarge rubicunda* Gussakovskij, 1935. The genus is distributed in the Palaearctic and Oriental regions. Number of species: World – 6; Palaearctic – 4; Russia – 1.
- Pseudarge eversmanni** Gussakovskij, 1935. Russia: **EP** (E, S). – Europe (EE).
- SPINARGE** Wei, 1998. Type species *Spinarge sichuanensis* Wei, 1998. The larvae feed on the Betulaceae. The genus is distributed in East Asia and Oriental region. Number of species: World – 11; Palaearctic – 9; Russia – 2.
- Spinarge fulvicornis** (Mocsáry, 1909) [Arge]. Host plant: Betula spp. (Betulaceae). Russia: **ES** (YA), **FE** (AM, KH, PR, SA, KU). – China (NE, CC), Korean Peninsula, Japan (Hok, Hon, Shi).
- Spinarge metallica** (Klug, 1834) [*Hylotoma*]. Host plant: Betula spp. (Betulaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS, KM, AL), **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KA). – Europe (WE, EE, NE, SE), Mongolia, Korean Peninsula.

Subfamily STERICTIPHORINAE

- APROCEROS** Malaise, 1931. Type species *Aproceros umbricola* Malaise, 1931. The larvae feed on the Ulmus spp. (Ulmaceae). The genus is distributed in East Asia; one species in the Oriental region, and one species was introduced into the West Europe. Number of species: World – 10; Palaearctic – 9; Russia – 3.
- Aproceros hakusanus** Togashi, 1962. Host plant: Ulmus spp. (Ulmaceae). Russia: **FE** (PR, SA, KU). – Japan (Hon).
- Aproceros leucopoda** Takeuchi, 1939. Host plant: Ulmus spp. (Ulmaceae). Russia: **EP** (C, S, NC), **WS** (KM), **FE** (PR, SA). – Europe (WE, EE, SE), Kazakhstan, China (CC), Japan (Hok).
- Aproceros pallidicornis** (Mocsáry, 1909) [Aprosthemma] (*A. umbricola* Malaise, 1931). Host plant: Ulmus spp. (Ulmaceae). Russia: **FE** (AM, KH, PR). – Korean Peninsula, Japan (Hon).
- APROSTHEMA** Konow, 1899 (*Copidoceros* Forsius, 1921; *Lyrola* Ross, 1937). Type species

- Hylotoma brevicornis* Fallén, 1808. The larvae feed on the Fabaceae. The genus is distributed in the Holarctic and Oriental regions, mainly in the Palaearctic region. Number of species: World – about 55; Palaearctic – > 50; Russia – 22 (+ 2 ssp.).
- Aprosthemma austriacum** (Konow, 1892) [Schizocera]. Russia: **EP** (CR). – Europe (WE, EE, NE, SE), Kazakhstan.
- Aprosthemma axillare** (Zaddach, 1863) [Schizocera] (*Schizocera zaddachi* André, 1880). Russia: **EP** (NW, NC, CR). – Europe (WE, EE, SE).
- Aprosthemma bifidum** (Klug, 1834) [Hylotoma] (*Schizocera flavipes* Zaddach, 1864; *S. geniculata* Thomson, 1871). Russia: **EP** (NW, NC). – Europe (WE, EE, NE, SE).
- Aprosthemma bifurca** (Klug, 1834) [Hylotoma] (*Schizocera fusca* Zaddach, 1863). Russia: **EP** (NW, C). – Europe (WE, EE, NE, SE), Turkey.
- Aprosthemma brevicorne** (Fallén, 1808) [Hylotoma] (*Schizocera pallipes* Bremi-Wolf, 1849). Russia: **EP** (C, E, S). – Europe (WE, EE, NE).
- Aprosthemma enslini** Dovnar-Zapolskij, 1930. Russia: **EP** (NC).
- Aprosthemma fulvum** Vasilenko, 2009. Russia: **WS** (NS).
- Aprosthemma fuscicorne** (Thomson, 1871) [Schizocera]. **EP** (NW). – Europe (WE, EE, NE, SE).
- Aprosthemma humeratum** (Konow, 1892) [Schizocera]. Russia: **EP** (Zhelochovtsev, Zinovjev, 1995). – Europe (EE, SE).
- Aprosthemma instratum instratum** (Zaddach, 1859) [Schizocera]. Russia: **EP** (NW, C). – Europe (WE, EE, SE).
- Aprosthemma intermedium** (Zaddach, 1864) [Schizocera] (*A. hyalinoptera* Conde, 1934; *A. volgensis* Gussakovskij, 1935). Host plant: *Lathyrus vernus* (Fabaceae). Russia: **EP** (NW, C, S). – Europe (WE, EE, NE).
- Aprosthemma maculatum maculatum** (Jurine, 1807) [Cryptus] (*Hylotoma scutellaris* Herrich-Schäffer, 1835; *Schizocera scutellaris dorsalis* Konow, 1892; *Aprosthemma maculata moravica* Gregor, 1940). Russia: **EP** (CR). – Europe (WE, EE, SE).
- Aprosthemma maculatum nigripenne** Muche, 1972. Russia: **EP** (NC). – Georgia.
- Aprosthemma melanurum** (Klug, 1814) [Hylotoma] (*Schizocera cylindricornis* Thomson, 1871; *S. alfskeni* Konow, 1895; *S. friesei* Konow, 1895). Host plant: *Lathyrus* spp., *Vicia* spp. (Fabaceae); in East Siberia 2 generations. Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM), **ES** (KR, IR). – Europe (WE, EE, NE, SE), Central Asia, China (NC).
- Aprosthemma peletieri peletieri** (Villaret, 1832) [Schizocerus] (*Schizocera bleusei* Pic, 1918). Russia: **EP** (C, S, NC). – Europe (WE, EE, SE).
- Aprosthemma peletieri melanoptera** Muche, 1972. Russia: **EP** (NC). – Georgia.
- Aprosthemma sibiricum** Gussakovskij, 1935. Russia: **ES** (ZB).
- Aprosthemma staudingeri georgiense** Muche, 1972. Russia: **EP** (NC). – Georgia.
- Aprosthemma stroganovae** Vasilenko, 2009. Russia: **WS** (KM).
- Aprosthemma syrmiente** (Mocsáry, 1897) [Schizocera]. Russia: **EP** (NC). – Europe (SE), Turkey.
- Aprosthemma tardum** (Klug, 1814) [Hylotoma] (*A. carpentieri* Konow, 1902). Host plant: *Lathyrus* spp., *Vicia* spp. (Fabaceae). Russia: **EP** (C, E, S, NC), **UR**, **WS** (KM, AL), **ES** (KS). – Europe (WE, EE, SE), Turkey, Kyrgyzstan, Kazakhstan.
- Aprosthemma tauricum** Gussakovskij, 1935. **EP** (S, CR). – Europe (EE).
- Aprosthemma vittatum** (Mocsáry, 1879) [Schizocera]. Russia: **EP** (CR). – Europe (EE, SE).
- Aprosthemma xanthurum** Gussakovskij, 1935. Russia: **WS** (TK), **FE** (AM).
- SERICTIPHORA** Billberg, 1820 (*Schizocerus* Berthold, 1827; *Schizocerus* Lepeletier et Serville, 1828; *Schyzocera* Latreille, 1829; *Schizocera* Guérin, 1834; *Cyphona* Dahlbom, 1835; *Schizoceros* Konow, 1899). Type species *Tenthredo furcata* Villers, 1789. The larvae feed on the Rosaceae. The genus is distributed in the Holarctic; one species in Afrotropical, and two species in Oriental regions. Number of species: World – > 40; Palaearctic – about 35; Russia – 4.
- Sterictiphora caspica** Koch, 1988. Russia: **EP** (NC). – Iran.
- Sterictiphora furcata** (Villers, 1789) [*Tenthredo*] (*Tenthredo rubi idaei* Rossi, 1790; *Schizocera inaequalis* Bremi-Wolf, 1849; *Aprosthemma terebralis flavipes* Enslin, 1917). Host plant: *Rubus* spp., *Prunus* spp. (Rosaceae). Russia: **EP** (C, E, S, NC, CR), **UR**. – Europe (WE, EE, SE), N Africa, Azerbaijan, Armenia, Turkey, Syria, Iran, Kazakhstan.
- Sterictiphora geminata** (Gmelin, 1790) [*Tenthredo*]. Host plant: *Rosa* spp., *?Sorbus* spp. (Rosaceae). Russia: **EP** (C, NC), **UR**, **WS** (NS, KM), **ES** (BR, ZB), **FE** (PR, KA). – Europe (WE, EE, NE, SE), Armenia, Turkey, Turkmenistan, Kyrgyzstan.
- Sterictiphora orientalis** (Zhelochovtsev, 1939) [*Schizocera*]. Russia: **FE** (PR).

3. FAMILY BLASTICOTOMIDAE

Adults are characterized by their short 4-segmented antennae, of which an elongate 3rd segment forms almost the entire flagellum except for the minute (and sometimes obsolete) 4th segment. Scutellum without a post-tergite; the wing venation is unique in having the pear-shaped cell *IM* of the fore wing, rounded apically; the stigma is large and almost semi-circular in shape; vein *Sc* without a transverse branch joining *C*; and the anal cell has an oblique cross-vein; the wing membranes are corrugated at the apices. The legs are without preapical tibial spines and the front tibia has 2 apical spurs, the inner one of which is bifid apically. The abdomen is carinate laterally, and the ovipositor is of the exserted type, about half as long as the abdomen, though the apical projecting part, the sawsheath, is much shorter than the basal plate. The larvae are stem-borers in ferns and of a oligopodous type, with no abdominal legs.

The family is distributed in the Palaearctic and Oriental regions. Number of taxa: World – 2 genera, 12 species; Palaearctic – 2/8; Russia – 2/3 (+ 1 ssp.).

R e f e r e n c e s. Gussakovskij, 1935; Zhelochovtsev, 1935a, 1988; Ermolenko, 1972; Togashi, 1989; Zhelochovtsev, Zinovjev, 1995; Kim et al., 1997; Wei, Nie, 1999; Liston et al., 2006, 2014a; Shcherbakov, 2006; Taeger et al., 2006, 2010; Wei et al., 2006; Biryukova, Novgorodova, 2008; Schedl, 2009; Novgorodova, Biryukova, 2011; Taeger, Blank, 2011; Vasilenko, 2011b; Sundukov, Lelej, 2012; Kostyunin, 2015; Sundukov, 2015; Noblecourt, 2016.

BLASTICOTOMA Klug, 1834. Type species

Blasticotoma filiceti Klug, 1834. The larvae in the petioles of ferns (Polypodiophyta). The genus is distributed in the Palaearctic region; 1 species in the Oriental region. Number of species: World – 5; Palaearctic – 4; Russia – 2 (+ 1 ssp.).

Blasticotoma atra Zhelochovtsev, 1935. Host plant: ferns of families of Dryopteridaceae, Onocleaceae, Osmundaceae, Dennstaedtiaceae. Russia: **FE** (KH, PR, KU). – Japan (Hok, Hon).

Blasticotoma filiceti filiceti Klug, 1834. Host plant: *Athyrium* spp., *Dryopteris* spp. (Dryopteridaceae), *Matteuccia* spp. (Onocleaceae), *Osmunda* spp. (Osmundaceae), *Pteridium* spp. (Dennstaedtiaceae). Russia: **EP** (N, C, E), **UR**, **WS** (NS, KM, AL), **ES** (KR, IR, BR). – Europe (WE, EE, NE).

Blasticotoma filiceti pacifica Malaise, 1931. Host plant: ferns of families of Dryopteridaceae, Onocleaceae, Osmundaceae, Dennstaedtiaceae. Russia: **FE** (KH, PR, SA, KU). – China (NE, CC), Korean Peninsula, Japan (Hok, Hon).

RUNARIA Malaise, 1931 (*Bohea* Maa, 1944). Type species *Runaria reducta* Malaise, 1931. The genus is distributed in East Asia and Oriental region. Number of species: World – 7; Palaearctic – 4; Russia – 1.

Runaria reducta Malaise, 1931. Host plant: ferns of families of Dryopteridaceae, Onocleaceae, Osmundaceae, Dennstaedtiaceae. Russia: **FE** (AM, PR, KU). – Japan (Hok, Hon).

4. FAMILY CIMBICIDAE

Stout fast-flying insects with strongly clubbed antennae and broad, laterally carinate abdomens, arched above and flat beneath, so that they can be curled right down under the thorax at rest. Fore wing vein $2r$ presents. Tibiae without preapical spines and front tibia with pair of unmodified apical spurs. The larvae are free-feeding, with 8 pairs of abdominal legs. The larvae feed on Salicaceae, Betulaceae, Caprifoliaceae and other plant families. Pupation usually occurs in a cocoon with a dense wall in the soil or on branches of trees and shrubs.

The family is distributed in the Northern Hemisphere and Neotropical region. Number of taxa: World – 4 subfamilies, 15 genera, about 190 species; Palaearctic – 3/10/about 150; Russia – 3/8/72 (+ 2 spp.).

Subfamily ABIINAE

ABIA Leach, 1817 (*Zaraea* Leach, 1817; *Parabia* Semenov, 1891; *Orientabia* Malaise, 1934; *Hemibia* Semenov, 1937; *Auroabia* Kangas, 1946; *Aenoabia* Kangas, 1946; *Procimbex* Hong, 1984). Ty p e s p e c i e s *Tenthredo sericea* Linnaeus, 1767. The larvae on the Caprifoliaceae. The genus is distributed in the Holarctic and Oriental regions. Number of species: World – 52; Palaearctic – 43; Russia – 24.

Abia aenea (Klug, 1820) [Cimbex] (*A. bifida* Thomson, 1871; *A. bigens* Kangas, 1946). Host plant: Lonicera spp., Symphoricarpos spp. (Caprifoliaceae), Samucus spp. (Adoxaceae). Russia: **EP** (NW, C, E, S,

NC), **WS** (TK, KM). – Europe (WE, EE, NE, SE), Georgia, Turkey.

Abia aurata (Takeuchi, 1931) [*Zaraea*]. Russia: **FE** (KU). – Korean Peninsula, Japan (Hok).

Abia berezowskii Semenov, 1896. Russia: **FE** (AM, PR). – Mongolia, China (SW), Korean Peninsula, Japan (Hon).

Abia candens Konow, 1887 (*A. symbalophthalma* Semenov, 1892; *A. candens subopaca* Kangas, 1946). Host plant: Knautia arvensis (Caprifoliaceae). Russia: **EP** (NW, C, E, NC). – Europe (WE, EE, NE, SE).

Abia coreana Takeuchi, 1927 (*Orientabia pacifica* Semenov et Gussakovskij, 1937). Russia: **FE** (PR). – Korean Peninsula.

Abia dubiosa (Gussakovskij, 1947) [*Orientabia*]. Russia: **FE** (SA). – Japan (Hon).

Abia egregia Kuznetzov-Ugamskij, 1927. Russia: **FE** (PR).

Abia fasciata (Linnaeus, 1758) [*Tenthredo*]. Host plant: Lonicera spp., Symphoricarpos spp., Linnaea spp., Leycesteria spp. (Caprifoliaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (TM, TK, NS, KM, AL), **ES** (KS, TU, KR, IR, BR, YA, ZB), **FE** (AM, KH, SA, KA, MG). – Europe (WE, EE, NE, SE), Kazakhstan, China (NE, NW), Korean Peninsula, Japan (Hok, Hon).

Abia fulgens Zaddach, 1863 (*A. fulgens unicoloricornis* Pic, 1933; *A. plana* Benson, 1954). Host plant: Lonicera spp. (Caprifoliaceae). Russia: **EP** (NC). – Europe (WE, EE, SE).

Abia gussakovskii Semenov, 1935. Russia: **EP** (NC).

Abia japonica Cameron, 1887 (*A. pilosa* Konow, 1896; *A. bantaizana* Matsumura, 1912; *Orientabia finitima* Semenov et Gussakovskij, 1937). Host plant: Weigela spp. (Caprifoliaceae). Russia: **FE** (PR, KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Sado).

Abia lewisi Cameron, 1887 (*Zaraea lewisi matsu-*
murai Takeuchi, 1931). Host plant: Lonicera spp. (Caprifoliaceae). Russia: **FE** (KU). – Japan (Hon).

Abia marginata Moscáry, 1909. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **FE** (KH, PR). – Korean Peninsula.

Abia metallica Moscáry, 1909. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **FE** (KH, PR). – China (NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Abia mutica Thomson, 1871. Host plant: Lonicera spp., Knautia arvensis (Caprifoliaceae). Russia: **EP** (N, NW, C), **UR**, **WS** (NS, AL), **ES** (TU, KR, IR, BR, YA, ZB), **FE** (PR). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia.

- Abia ochotica** (Semenov et Gussakovskij, 1937) [Orientalia]. Russia: **FE** (KH).
- Abia sachalinensis** Takeuchi, 1931. Russia: **FE** (PR, SA). – Japan (Hok).
- Abia semenoviiana** Gussakovskij, 1947. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **ES** (BR, ZB), **FE** (PR). – Korean Peninsula.
- Abia sericata** Zhelochovtsev, 1935. Russia: **FE** (AM, KH, PR).
- Abia sericea** (Linnaeus, 1767) [Tenthredo] (*A. dorsalis* Costa, 1859). Host plant: Succica spp., Knautia spp., Dipsacus spp. (Caprifoliaceae), ?Fragaria spp. (Rosaceae). Russia: **EP** (NW, C, E, S, NC, CR). – Europe (WE, EE, NE, SE), Caucasus, Turkey, China (NW).
- Abia sibirica** Mocsáry, 1883. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **WS** (OM, NS, AL), **ES** (KS, BR). – Kazakhstan.
- Abia skorikovi** Semenov, 1935. Russia: **EP** (NC).
- Abia tshershkii** Semenov, 1935. Russia: **FE** (KH).
- Abia zhelochovtzevi** (Gussakovskij, 1947) [Zaraea]. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **FE** (KH, PR).

Subfamily CIMBICINAE

AGENOCIMBEX Rohwer, 1910. Type species *Cimbex maculata* Marlatt, 1898. The genus is distributed in East Asia; one species in the Oriental region. Number of species: World and Palaearctic – 6; Russia – 2.

Agenocimbex eous Semenov, 1935. Russia: **FE** (PR). – Korean Peninsula, Japan (Kyu).

Agenocimbex malaisei Gussakovskij, 1947. Russia: **FE** (PR).

CIMBEX Olivier, 1791 (*Crabro* Geoffroy, 1762; *Clavellarius* Olivier, 1789; *Clavellaria* Lamarck, 1801; *Palaeocimbex* Semenov, 1935; *Deuterocimbex* Semenov, 1935; *Neocimbex* Malaise, 1937; *Allocimbex* Zirngiebl, 1953). Type species *Tenthredo lutea* Linnaeus, 1758. The larvae mainly on the Salicaceae and Betulaceae. The genus is distributed in the Holarctic region; one species in the Oriental region. Number of species: World – 14; Palaearctic – 10; Russia – 6 (+ 2 spp.).

Cimbex amurensis Forsius, 1930. Host plant: Salix spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **FE** (AM, PR).

Cimbex carinulatus Konow, 1897 (*C. nomurae* Marlatt, 1898; *C. suzukii* Matsumura, 1912). Host

plant: Pyrus spp., Amelanchier asiatica, Prunus spp., Chaenomeles spp. (Rosaceae). Russia: **FE** (PR, KU). – Korean Peninsula, Japan (Hok, Hon).

Cimbex connatus connatus (Schrank, 1776) [Tenthredo] (*Crabro maculatus* Geoffroy, 1785; *Tenthredo montana* Panzer, 1801; *T. alnivaga* Bechstein et Scharfenberg, 1805; *Cimbex ornata* Serville, 1823; *C. luteola* Serville, 1823; *C. ornata* Lepeletier, 1823; *C. luteola* Lepeletier, 1823; *C. humboldtii* Ratzeburg, 1844; *C. variabilis nigroviolacea* Eversmann, 1847; *C. violascens* Thomson, 1871). Host plant: Salix spp., Populus spp. (Salicaceae), Alnus spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM), **ES** (IR). – Europe (WE, EE, NE, SE), Caucasus, Kazakhstan.

Cimbex connatus japonicus W.F. Kirby, 1882 (*C. saporensis* Matsumura, 1912). Host plant: Salix spp. (Salicaceae). Russia: **FE** (KH, PR, SA, KU). – China (NE, CC), Japan (Hok, Hon).

Cimbex connatus taukushi Marlatt, 1898 (*C. taukushiensis* Konow, 1905; *C. castanea* Matsumura et Ushida, 1927; *Neocimbex taukushi carbonaria* Malaise, 1939). Host plant: Alnus spp. (Betulaceae), Salix spp. (Salicaceae). Russia: **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR, KU). – Mongolia, China (NE), Korean Peninsula, Japan (Hon, Shi, Kyu).

Cimbex femoratus (Linnaeus, 1758) [Tenthredo] (*Tenthredo tristis* Fabricius, 1779; *Crabro lunulatus* Geoffroy, 1785; *C. annulatus* Geoffroy, 1785; *Tenthredo sylvarum* Fabricius, 1793; *Cimbex europaea* Leach, 1817; *C. varians* Leach, 1817; *C. variabilis* Klug, 1820; *Tenthredo russa* Klug, 1820; *Cimbex schaefferi* Lepeletier, 1823; *C. pallens* Lepeletier, 1823; *C. schaefferi* Serville, 1823; *C. pallens* Serville, 1823; *C. pallidus* Stephens, 1829; *C. venusta* Perty, 1833; *C. biguetina* Lepeletier, 1834; *C. pallida* Stephens, 1835; *C. betulae* Zaddach, 1863; *C. betulae pulla* Zaddach, 1863; *C. betulae lutescens* Zaddach, 1863; *C. betulae nigra* Zaddach, 1863; *C. tonnaitchana* Matsumura, 1911; *C. femorata unicolor* Enslin, 1917; *C. femorata abdominalis* Enslin, 1917; *C. femorata ornata* Uchida, 1927; *C. quadrimaculata sachalinensis* Uchida, 1927; *Crabro uchidai* Takeuchi, 1931). Host plant: Alnus spp. (Betulaceae), Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, OM, TK, NS, KM, AL), **ES** (KS, TU, KR, IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KA, MG). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan, Uzbekistan, Kazakhstan, Mongolia, China (NE, NC), Korean Peninsula, Japan (Hok, Hon).

Cimbex luteus (Linnaeus, 1758) [Tenthredo] (*C. griffini* Leach, 1817; *C. saliceti* Zaddach, 1863; *C. variabilis salicis* Zaddach, 1863; *C. brevispina* Thomson, 1871; *C. lutea testacea* Konow, 1890; *C. saliceti testacea* Dalla Torre, 1894; *C. capreae* Konow, 1897; *C. femorata coreana* Uchida, 1927). Host plant: Salix spp., Populus spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, OM, TK, NS, KM, AL), **ES** (KS, KR, IR, BR, YA), **FE** (KH, PR, SA, MG). – Europe (WE, EE, NE, SE), Kyrgyzstan, Uzbekistan, Kazakhstan, China (NC, NW), Korean Peninsula, Japan (Hok, Hon).

Cimbex sibiricus W.F. Kirby, 1882. Russia: **ES** (IR, BR).

LEPTOCIMBEX Semenov, 1896 (*Euclavellaria* Enslin, 1911; *Cimbicisoma* Rohwer, 1915; *Okamotonius* Sato, 1928). Type species *Leptocimbex potanini* Semenov, 1896. The genus is distributed in East Asia and Oriental region. Number of species: World – 26; Palaearctic – 21; Russia – 4.

Leptocimbex allantiformis (Mocsáry, 1909) [Clavelaria] (*L. petrimagni* Malaise, 1931). Russia: **FE** (KH, PR). – China (NE), Korean Peninsula.

Leptocimbex gracilentus (Mocsáry, 1904) [Clavelaria] (*Okamotonius kurisuei* Sato, 1928). Russia: **FE** (KH, PR). – China (SE), Korean Peninsula.

Leptocimbex potanini Semenov, 1896 (*Clavellaria marginata* R.E. Turner, 1920; *Leptocimbex potanini sinobirmanica* Malaise, 1939). Russia: **FE** (PR). – China (SW), India (NE), SE Asia.

Leptocimbex terrificus Malaise, 1931. Russia: **FE** (PR).

PRAIA Wankowicz, 1880. Type species *Praia taczanowskii* Wankowicz, 1880. The larvae feed on the Betulaceae and Rosaceae. The genus is distributed in the Palaearctic region. Number of species: World, Palaearctic and Russia – 2.

Praia taczanowskii Wankowicz, 1880. Host plant: Betula spp. (Betulaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (TK, NS, KM), **ES** (IR, BR, YA), **FE** (AM, PR, KA). – Europe (WE, EE, NE), Mongolia.

Praia ussuriensis Malaise, 1939. Host plant: Betula spp. (Betulaceae), Prunus spp. (Rosaceae). Russia: **ES** (Zhelochovtsev, Zinovjev, 1995), **FE** (PR, SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

PSEUDOCLAVELLARIA Schulz, 1906. Type species *Tenthredo amerinae* Linnaeus, 1758. The larvae feed on the Salicaceae. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 3; Russia – 2.

Pseudoclavellaria amerinae (Linnaeus, 1758) [Tenthredo] (*Tenthredo marginata* Linnaeus, 1767; *T. 4-fasciata* Degeer, 1773; *T. rufa* Retzius, 1783; *Cimbex saliceti* Sasaki, 1902; *Clavellaria nitobei* Matsamura, 1912; *Trichosoma albopilosum* Matsumura, 1912; *Clavellaria amerinae delagrangei* Pic, 1920; *C. amerinae anatolica* Pic, 1920). Host plant: Salix spp., Populus spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, OM, TK, NS, KM), **ES** (KS, TU, KR, IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, MG). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Mongolia, China (NE), Korean Peninsula.

Pseudoclavellaria semenovi (Gussakovskij, 1947) [Clavellaria]. Russia: **ES** (ZB), **FE** (PR).

TRICHIOSOMA Leach, 1817 (*Asitrichiosoma* Malaise, 1939; *Lucorumiformis* Ermolenko, 1972; *Vitelliniformis* Ermolenko, 1972; *Sericiformis* Ermolenko, 1972; *Sorbiiformis* Ermolenko, 1972). Type species *Tenthredo lucorum* Linnaeus, 1758. The larvae feed on the deciduous of trees and shrubs. The genus is distributed in Holarctic and Oriental region. Number of species: World – 38; Palaearctic – 33; Russia – 24.

Trichiosoma aenescens Gussakovskij, 1947. Host plant: Prunus spp., Padus spp. (Rosaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS, KM, AL), **ES** (KS, IR, YA), **FE** (AM, PR). – Europe (EE, NE), Japan (Hok).

Trichiosoma anthracinum Forsius, 1930. Russia: **WS** (AL). – China (SW).

Trichiosoma asachalinense Verzhutskii, 1973. Host plant: Spiraea spp., Dasiphora fruticosa (Rosaceae). Russia: **ES** (IR), **FE** (KA).

Trichiosoma bombiforme Takeuchi, 1939. Russia: **FE** (PR). – China (SE), Japan (Hon).

Trichiosoma crassum W.F. Kirby, 1882 (*T. arcticum* W.F. Kirby, 1882; *T. arctica* Konow, 1903; *T. jakovlevi* Konow, 1905; *T. jakovlevi tinctipennis* Enslin, 1919; *T. jakovlevi* Gussakovskij, 1947). Host plant: Betula spp. (Betulaceae). Russia: **EP** (N), **WS** (TM, AL), **ES** (KR, YA), **FE** (KH, PR, SA, KA, MG, CH). – Europe (NE), Mongolia, Japan (Hok, Hon), N America.

Trichiosoma hirtellum Gussakovskij, 1947. Host plant: Salix spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **ES** (KR, IR, YA, ZB), **FE** (AM, KH, MG).

Trichiosoma latreillii Leach, 1817. Host plant: Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (TK, NS, KM, AL), **ES** (KR, IR, BR, YA, ZB),

- FE** (AM, KH, PR, KA, MG). – Europe (WE, EE), Turkey, Mongolia, China (NE, NC), Japan (Hon).
- Trichiosoma lucorum** (Linnaeus, 1758) [Tenthredo] (*T. unidentatum* Leach, 1817; *Cimbex betuleti* Klug, 1834; *Trichiosoma salicis* Hartig, 1840). Host plant: Betula spp. (Betulaceae), Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (TM, TK, NS, KM, AL), **ES** (KR, IR, YA), **FE** (SA). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia, China (NC), Japan (Hok, Hon).
- Trichiosoma malaisei** Saarinen, 1950. Host plant: Betula spp. (Betulaceae). Russia: **EP** (N), **FE** (MG). – Europe (NE).
- Trichiosoma melanopygum** Zhelochovtsev, 1968. Host plant: Betula spp. (Betulaceae). Russia: **ES** (IR, BR).
- Trichiosoma nanae** Vikberg et Viitasaari, 1991. Host plant: Betula nana (Betulaceae). Russia: **ES** (KR). – Europe (NE).
- Trichiosoma nigricoma** Konow, 1906. Host plant: Salix spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **EP** (N, NW), **WS** (AL), **ES** (TU, KR). – Europe (NE).
- Trichiosoma opacum** Konow, 1906 (*T. jozankeanum* Matsumura, 1912). Host plant: Salix spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **ES** (KR, IR, YA, ZB), **FE** (KH, PR, SA, MG). – Korean Peninsula, Japan (Hok, Hon).
- Trichiosoma pusillum** Stephens, 1835 (*T. biverrucatum* Stephens, 1835; *T. nigripes* Gussakovskij, 1947; *T. groenblomi* Saarinen, 1947). Host plant: Populus spp., Salix spp. (Salicaceae). Russia: **EP** (N), **WS** (NS, AL), **ES** (KR, IR, BR, ZB), **FE** (AM). – Europe (WE, NE).
- Trichiosoma sachalinense** Matsumura, 1911 (*T. bilineata* Malaise, 1931). Host plant: Salix spp. (Salicaceae). Russia: **EP** (N, NW), **WS** (NS, KM, AL), **ES** (IR, BR, YA, ZB), **FE** (KH, SA, KA, MG, CH). – Mongolia, Korean Peninsula, Japan (Hok).
- Trichiosoma scalesii** Leach, 1817 (*T. fennicum* Saarinen, 1947). Russia: **ES** (YA). – Europe (WE, NE).
- Trichiosoma sericeum** Konow, 1903. Host plant: Betula spp. (Betulaceae), Populus spp., Salix spp. (Salicaceae). Russia: **EP** (N, NW, E), **UR**, **WS** (TK, NS, KM, AL), **ES** (KS, KR, IR, BR, YA, ZB), **FE** (AM, KH, PR). – Europe (NE), Mongolia, China (NE), Korean Peninsula.
- Trichiosoma sibiricum** Gussakovskij, 1947. Russia: **WS** (AL), **ES** (KR, IR, YA), **FE** (AM, KH, KA). – Europe (NE), China (NE).
- Trichiosoma sorbi** Hartig, 1840. Host plant: Sorbus spp. (Rosaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (KM, AL), **ES** (YA). – Europe (WE, EE, NE, SE).
- Trichiosoma sylvaticum** Leach, 1817. Host plant: Populus spp., Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E), **WS** (TK, NS, KM, AL), **ES** (KS, BR, YA). – Europe (EE, SE).
- Trichiosoma tibiale** Stephens, 1835 (*Cimbex crataegi* Zaddach, 1863; *Tenthredo crataegi* Newman, 1870; *Trichiosoma oxyacanthae* Morley, 1907; *T. tibiale decipiens* Enslin, 1917). Host plant: Salix spp. (Salicaceae), Sorbus spp., Crataegus spp. (Rosaceae). Russia: **EP** (N, NW, C), **WS** (AL), **ES** (IR, YA), **FE** (KU, KA, MG, CH). – Europe (WE, EE, NE, SE), Japan (Hok, Hon).
- Trichiosoma ushinskii** Ermolenko, 1973. Russia: **FE** (KU).
- Trichiosoma villosum** (Motschulsky, 1860) [*Cimbex*] (*T. pubescens* Jakovlev, 1891; *T. relictum* Saarinen, 1950). Host plant: Populus spp., Salix spp. (Salicaceae). Russia: **EP** (NW, C), **WS** (NS, KM, AL), **ES** (KR, IR, BR, YA, ZB), **FE** (AM, KH, PR, KA). – Europe (NE), Kazakhstan, China (NE).
- Trichiosoma vitellina** (Linnaeus, 1760) [Tenthredo] (*Cynips betulae* Strøm, 1762; *Trichiosoma marginale* Leach, 1817; *Cimbex trichiosoma* Lepeletier, 1823; *Trichiosoma boreale* Gussakovskij, 1947). Host plant: Alnus spp., Betula spp. (Betulaceae), Salix spp., Populus spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S), **UR**, **WS** (TK, NS, KM, AL), **ES** (KS, KR, IR, BR, YA, ZB), **FE** (KH, PR). – Europe (WE, EE, NE, SE), Korean Peninsula.

Subfamily CORYNIDINAE

CORYNIS Thunberg, 1789 (*Amasis* Leach, 1817; *Amoeniformis* Ermolenko, 1972; *Lateralisiformis* Ermolenko, 1972; *Obscuriformis* Ermolenko, 1972). Type species *Tenthredo obscura* Fabricius, 1775. The larvae feed on the herbaceous plants. The genus is distributed in the Palaearctic region. Number of species: World and Palaearctic – 28; Russia – 8.

Corynis amoena (Klug, 1834) [*Cimbex*. Adults on the Ranunculus (Ranunculaceae). Russia: **EP** (N, NW, C, E, S, NC). – Europe (WE, EE, NE), Uzbekistan, Kyrgyzstan, Kazakhstan, Mongolia.

Corynis caucasica (Mocsáry, 1886) [*Amasis caspica* Konow, 1886]. Russia: **EP** (NC). – Europe (EE), Armenia, Azerbaijan, Turkey, Iran.

Corynis crassicornis (Rossi, 1790) [Tenthredo] (*Cimbex sylvatica* Olivier, 1791; *Tenthredo laeta* Fabricius, 1798; *T. ranunculi* Panzer, 1804; *Cimbex jurinae* Serville, 1823; *C. jurinae* Lepeletier, 1823; *C. olivieri* Lepeletier, 1823; *Amasis crassicornis nigriventris* Soldanski, 1916; *A. crassicornis algerica* Pic, 1916; *A. crassicornis gallica* Pic, 1918). Host plant: Sedum spp. (Crassulaceae), Ranunculus spp. (Ranunculaceae). Russia: **EP** (CR). – Europe (WE, EE, SE), N Africa, Georgia, Azerbaijan.

Corynis frontina (Konow, 1905) [Amasis]. Russia: **EP** (NC). – Europe (SE), Azerbaijan, Turkey.

Corynis lateralis (Brullé, 1832) [Amasis] (*Amasis lateralis sibirica* Kuznetzov-Ugamskij, 1925; *Corynis dominiquei* Chevin, 1988). Russia: **EP** (C, E, S,

NC, CR), **UR**. – Europe (EE, SE), Caucasus, Turkey, Kazakhstan.

Corynis mutabilis (Tischbein, 1852) [Abia] (*Amasis concinna* J.P.E.F. Stein, 1876; *A. bleyli* Muche, 1964). Adults on the Ranunculus (Ranunculaceae). Russia: **EP** (CR). – Europe (EE, SE), Armenia, Turkey.

Corynis obscura (Fabricius, 1775) [Tenthredo] (*Amasis helvetica* Konow, 1886; *A. obscura adusta* Zirngiebl, 1953; *A. valkanovi* Vassilev, 1969). Host plant: Geranium spp. (Geraniaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TK, NS, KM), **ES** (IR). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Iran.

Corynis ovicula Zhelochovtsev, 1968. Russia: **ES** (BR, ZB).

5. FAMILY DIPRIONIDAE

Stout, slow-flying insects associated with conifers. They are characterized by plumose male and serrate female antennae of more than 9 segments and by absence of vein $2r$ on the fore wing; scutellum without a transverse furrow cutting off a post-tergite; hind wing with both middle closed cells RS and M present; tibiae without preapical spines and front tibiae with simple unmodified spurs.

The larvae are free-living, often gregariously on needles of conifers. They have 8 pairs of abdominal legs (segments 2-8 and 10). The cocoons are double, and upon emerging the adult severs a cap at one end of the cocoon and this cap is left hanging by a few threads.

The family is distributed in the Holarctic, Oriental and Neotropical regions. Number of taxa: World – 2 subfamilies, 11 genera, about 140 species; Palaearctic – 2/9/about 70; Russia – 2/7 (+ 1 unplaced)/26 (+ 2 unplaced).

Subfamily DIPRIONINAE

DIPRION Schrank, 1802 (*Pteronus* Jurine, 1801; *Lophyrus* Latreille, 1803; *Pteronus* Panzer, 1806; *Anchoreta* Gistel, 1848; *Cristiger* Gistel, 1848). Type species *Tenthredo pini* Linnaeus, 1758. The larvae feed on the conifers. The genus is distributed in the Palaearctic and Oriental regions; one species was introduced into the Nearctic region. Number of species: World – 13; Palaearctic – 9; Russia – 3.

Diprion koreanus Takagi, 1931. Host plant: *Larix* spp. (Pinaceae); live in groups. Russia: **UR**, **ES** (IR, YA, ZB), **FE** (AM, KH). – Korean Peninsula.

Diprion pini (Linnaeus, 1758) [Tenthredo] (*Tenthredo dorsata* Fabricius, 1781; *T. eques* Schrank, 1782;

T. pineti Bechstein et Scharfenberg, 1805; *Lophyrus pini nigripectus* Matsumura, 1912; *Diprion pini nigroscutellatum* Enslin, 1916; *D. pini nigristernis* Enslin, 1916; *D. pini klugi* Enslin, 1916; *D. butovitschi* Hedqvist, 1967). Host plant: *Pinus* spp. (Pinaceae); live in groups, 2 generation per year. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM), **ES** (IR, YA). – Europe (WE, EE, NE, SE), N Africa, Georgia, Cyprus, Turkey.

Diprion similis (Hartig, 1836) [*Lophyrus*] (*Lophyrus eremita* Thomson, 1871; *Diprion simile claristernis* Enslin, 1916; *D. simile atroscutellatum* Enslin, 1916). Host plant: *Pinus* spp. (Pinaceae); live alone, 2 generation per year. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TM, AL), **ES** (IR, YA). – Europe (WE, EE, NE, SE); introduced into the N America.

GILPINIA Benson, 1939. Type species *Lophyrus polytomus* Hartig, 1834. Larvae feed on conifers. The genus is distributed in the Palaearctic and Oriental regions; two species were introduced to the Nearctic region. Number of species: World – about 40; Palaearctic – > 30; Russia – 15.

Gilpinia abieticola (Dalla Torre, 1894) [*Lophyrus*] (*Lophyrus abietis* Stein, 1866). Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (C), **WS** (TM), **ES** (IR, YA). – Europe (WE, EE, NE, SE).

Gilpinia catocala (Snellen van Vollenhoven, 1858) [*Lophyrus*] (*Gilpinia verticalis* Gussakovskij, 1947). Host plant: *Pinus* spp. (Pinaceae). Russia: **EP** (NW, C, E), **WS** (TK, NS, KM). – Europe (EE, NE).

Gilpinia daisetusana Takeuchi, 1940. Host plant: *Picea* spp. (Pinaceae). Russia: **FE** (KU). – Japan (Hok).

Gilpinia fennica (Forsius, 1911) [Diprion]. Host plant: *Picea* spp. (Pinaceae). Russia: **ES** (TU, YA). – Europe (EE, NE), China (NC).

Gilpinia frutetorum (Fabricius, 1793) [Tenthredo] (*Lophyrus anachoreta* Costa, 1894; *Diprion frutetorum lutescens* Enslin, 1916; *D. frutetorum luteolum* Enslin, 1916). Host plant: *Pinus* spp. (Pinaceae); live alone, 2 generation per year. Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (TK, NS, AL), **ES** (IR, YA). – Europe (WE, EE, NE, SE), Turkey; introduced into the N America.

Gilpinia hercyniae (Hartig, 1837) [*Lophyrus*]. Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (NW, C, NC), **UR**, **WS** (TM), **ES** (KR, IR, BR, YA), **FE** (PR). – Europe (WE, EE, NE, SE), Pakistan, Mongolia, Korean Peninsula, Japan (Hok, Hon); introduced into the N America.

Gilpinia hokkaidoensis Hara et Shinozaki, 2015. Host plant: *Picea* spp., *Abies* spp. (Pinaceae). Russia: **FE** (KU). – Japan (Hok).

Gilpinia laricis (Jurine, 1807) [Pteronus] (*Diprion laricis fenestratum* Enslin, 1916; *D. laricis flavomarginatum* Enslin, 1916; *D. laricis lugens* Enslin, 1916). Host plant: *Pinus* spp. (Pinaceae); live alone, 1-2 generation per year. Russia: **EP** (NW, C, E), **WS** (TM, TK, KM, AL), **ES** (IR, YA). – Europe (WE, EE, NE, SE).

Gilpinia pallida (Klug, 1812) [Lophyrus] (*Lophyrus minor* Serville, 1823; *L. minor* Lepeletier, 1823). Host plant: *Pinus* spp. (Pinaceae); live in groups, 2 generation per year. Russia: **EP** (NW, C, S), **WS** (TK), **ES** (IR, YA). – Europe (WE, EE, NE, SE).

Gilpinia polytoma (Hartig, 1834) [Lophyrus] (*Diprion polytomum pseudopalidum* Enslin, 1916). Host plant: *Picea* spp., *Abies* spp., *Larix* spp. (Pinaceae); live alone, 1-2 generation per year. Russia: **EP** (NW, C), **UR**, **WS** (TM, TK, NS), **ES** (IR, BR, YA), **FE** (KH, PR, KU). – Europe (WE, EE, NE, SE), Korean Peninsula, Japan (Hok, Hon), Pakistan, India.

Gilpinia sachalinensis Takeuchi, 1940. Russia: **FE** (SA).

Gilpinia socia (Klug, 1812) [Lophyrus] (*Lophyrus pineti* Hartig, 1837). Host plant: *Pinus* spp. (Pinaceae); live in groups, 2 generation per year. Russia: **EP** (NW), **ES** (KR). – Europe (WE, EE, NE, SE).

Gilpinia tohi Takeuchi, 1940. Host plant: *Picea* spp., *Abies* spp. (Pinaceae). Russia: **FE** (PR, KU). – China (NE), Japan (Hok).

Gilpinia variegata (Hartig, 1834) [Lophyrus] (*Lophyrus thomsoni* Konow, 1884). Host plant: *Pinus* spp. (Pinaceae); live alone, 2 generation per year. Russia: **EP** (NW, C), **WS** (TK, NS, AL), **ES** (KR, IR). – Europe (WE, EE, NE, SE), Kazakhstan.

Gilpinia virens (Klug, 1812) [Lophyrus] (*Diprion virens atramentarium* Enslin, 1916). Host plant: *Pinus* spp. (Pinaceae); live alone, 1-2 generation per year. Russia: **EP** (NW, C), **WS** (TM, NS, AL), **ES** (IR, YA). – Europe (WE, EE, NE, SE), Mongolia.

MACRODIPRION Enslin, 1914. Type species *Lophyrus nemoralis* Enslin, 1917. The larvae feed on the *Pinus* spp. (Pinaceae). The genus is distributed in Palaearctic and Oriental region. Number of species: World – 2; Palaearctic – 1; Russia – 1.

Macrodrion nemoralis (Enslin, 1917) [Lophyrus] (*Tenthredo nemorum* Fabricius, 1793). Host plant: *Pinus* spp. (Pinaceae); live alone, 1-2 generation per

year. Russia: **EP** (N, NW, C), **WS** (NS), **ES** (KR, IR, BR). – Europe (WE, EE, NE, SE).

MICRODIPRION Enslin, 1914. Type species *Hylotoma pallipes* Fallén, 1808. The larvae on the *Pinus* spp. (Pinaceae). The genus is distributed in Palaearctic and Oriental region. Number of species: World – 5; Palaearctic – 3; Russia – 2.

Microdiprion fuscipennis (Forsius, 1911) [Diprion]. Host plant: *Picea* spp. (Pinaceae); live in groups in the younger ages, singly in the senior, 2 generation per year. Russia: **EP** (C, E), **ES** (KR). – Europe (EE, NE).

Microdiprion pallipes (Fallén, 1808) [Hylotoma] (*Lophyrus elongatulus* Klug, 1812; *L. politus* Klug, 1812; *L. pulchricornis* Bremer-Wolf, 1849; *L. pallidipes* Dalla Torre, 1894; *Diprion pallipes aterrimum* Enslin, 1916). Host plant: *Pinus* spp. (Pinaceae); live in groups, 1-2 generation per year. Russia: **EP** (N, NW, C, NC), **WS** (TK), **ES** (KR, IR, BR, YA), **FE** (AM, PR, KU). – Europe (WE, EE, NE, SE), Kazakhstan.

NEODIPRION Rohwer, 1918. Type species *Lophyrus lecontei* Fitch, 1858. The larvae feed on the *Pinus* spp. (Pinaceae). The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – > 45; Palaearctic – 2; Russia – 1.

Neodiprion sertifer (Geoffroy, 1785) [Tenthredo] (*Tenthredo pectinata rufa* Retzius, 1783; *T. pinirufa* Villers, 1789; *Hylotoma rufa* Fallén, 1808; *Lophyrus piceae* Lepeletier, 1823; *L. piceae* Serville, 1823; *L. basalis* Matsumura, 1915). Host plant: *Pinus* spp. (Pinaceae); live in groups, often severely pest. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TK, NS, KM, AL), **ES** (IR), **FE** (AM). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Kazakhstan, Korean Peninsula, Japan (Hok, Hon, Kyu), N America.

NESODIPRION Rohwer, 1910. Type species *Lophyrus japonicus* Marlatt, 1898. The larvae feed on the *Pinus* (Pinaceae). The genus is distributed in East Palaearctic and Oriental region. Number of species: World – 13; Palaearctic – 11; Russia – 1.

Nesodiprion japonicus (Marlatt, 1898) [Lophyrus]. Host plant: *Pinus* spp., *Larix* spp., *Cedrus* spp. (Pinaceae). Russia: **FE** (PR). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), N America (California).

Subfamily MONOCTENINAE

MONOCTENUS Dahlbom, 1835. Type species *Tenthredo juniperi* Linnaeus, 1758. Larvae feed on the Juniperus (Cupressaceae). The genus occurs in the Holarctic and Neotropical regions. Number of species: World – 12; Palaearctic – 8; Russia – 3.

Monocetus juniperi (Linnaeus, 1758) [Tenthredo (*Tenthredo pterophorus* Sulzer, 1761; *Monocetus andrei* Mocsáry, 1880)]. Host plant: Juniperus spp. (Cupressaceae). Russia: **EP** (NW, C, E), **UR**. – Europe (WE, EE, NE, SE), Turkey, Syria.

Monocetus nipponicus Takeuchi, 1940. Host plant: Juniperus spp. (Cupressaceae). Russia: **FE** (PR). – Japan (Hon).

Monocetus obscuratus (Hartig, 1837) [Lophyrus (*M. obscuratus intermedius* Zombori, 1975)]. Host

plant: Juniperus spp. (Cupressaceae). Russia: **WS** (AL), **ES** (YA). – Europe (WE, EE, NE, SE).

Unplaced Diprionidae

NYCTERIDIUM Fischer von Waldheim, 1806. Type species *Nycteridium fischeri* Fischer von Waldheim, 1806. The genus with incomprehensible systematic status (see Blank et al., 2009). The genus distribution in Palaearctic. Number of species: World and Palaearctic – 2; Russia – 2.

Nycteridium fischeri Fischer von Waldheim, 1806. Russia: without region (Fischer von Waldheim, 1806).

Nycteridium mosquense Fischer von Waldheim, 1806. Russia: **EP** (C).

6. FAMILY HEPTAMELIDAE

Have previously been classified into the subfamily Selandriinae within Tenthredinidae. Now treated as a separate family, within the “higher” Tenthredinoidea (Tenthredinidae, Cimbicidae, and Diprionidae), thus not forcing the inclusion of the well defined families Diprionidae and Cimbicidae into Tenthredinidae (Liston et al., 2014a; Malm, Nyman, 2015; Schmidt et al., 2016; Schneider, 2016). All known larvae feed on ferns. No reports exist of economic damage caused by Heptamelidae.

The family is distributed in the Holarctic and Oriental regions. Number of taxa: World – 6 genera, about 50 species; Palaearctic – 2/13; Russia – 2/5.

R e f e r e n c e s. Verzhutskii, 1974; Zhelochovtsev, 1988; Zhelochovtsev, Zinovjev, 1992, 1996; Vikberg, Liston, 2009; Sundukov, Lelej, 2012; Liston et al., 2014a; Malm, Nyman, 2015; Schmidt et al., 2016; Schneider, 2016; Vikberg, 2017.

HEPTAMELUS Haliday, 1855 (*Melicerta* Stephens, 1835; *Caenoneura* Thomson, 1870). Type species *Melicerta ochroleuca* Stephens, 1835. The larvae feed on the ferns. The genus is distributed in Palaearctic and Oriental region; one species was

introduced into the N America. Number of species: World – 37; Palaearctic – 11; Russia – 4.

Heptamelus dahlbomi (Thomson, 1870) [Caenoneura]. Host plant: *Athyrium filix-femina* (Dryopteridaceae). Russia: **EP** (N). – Europe (WE, NE); introduced into the N America.

Heptamelus magnocularis Malaise, 1931. Russia: **FE** (SA, KA).

Heptamelus ochroleucus (Stephens, 1835) [Meli certa]. Host plant: Dryopteridaceae, Blechnaceae, Onocleaceae, Polypodiaceae. Russia: **EP** (NW, C). – Europe (WE, EE, NE), Japan (Hon).

Heptamelus ussuriensis Malaise, 1931. Russia: **FE** (AM, PR).

PSEUDOHEPTAMELUS Conde, 1932. Type species *Pseudoheptamelus runari* Conde, 1932. The larvae feed on the ferns. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 2; Russia – 1.

Pseudoheptamelus runari Conde, 1932. Host plant: *Athyrium* spp. (Dryopteridaceae); larva in the ferns stem. Russia: **EP** (N, NW, C), **ES** (IR), **FE** (PR). – Europe (NE).

7. FAMILY TENTHREDINIDAE

Adults of Tenthredinidae are distinguished from those of other families by the presence of 7-10 flagellomeres, by the metapleuron clearly separated from the tergum 1, and by the long and clearly outlined (at least laterally) mesoscutellar appendage. Adults are herbivorous or do not feed, few predators. The larvae of most species are external feeders on foliage, but those of some species are leaf miners, gall formers, or shoot borers; usually oligophages, less often monophages or polyphages. Host plants are horsetails, ferns, conifers or angiosperms (especially many species on willows, poplars, birches and rosaceous). It usually hibernates a prepupa, sometimes a pupa, less often eggs. Part of the species are pests of fruit and berry and forest plants.

The family is distributed worldwide. Number of taxa: World – 6 subfamilies, about 400 genera, > 5600 species; Palaearctic – 6/about 220/about 3500; Russia – 6/109/1124 (+ 29 ssp.).

Subfamily ALLANTINAE

ALLANTUS Panzer, 1801 (*Emphytus* Klug, 1815; *Anemphytus* Dovnar-Zapolskij, 1931; *Synemphytus* Malaise, 1945). Type species *Tenthredo togata* Panzer, 1801. The larvae feed on the deciduous trees and shrubs; when pupation is carried into dry branches and bark. The genus is distributed in Holarctic and Oriental region. Number of species: World – > 45; Palaearctic – about 35; Russia – 17 from 2 subgenera.

Allantus (Allantus) calliblepharus (Konow, 1900) [*Emphytus*] (*Emphytus karaftonis* Matsumura, 1911). Host plant: *Salix* spp. (Salicaceae). Russia: WS

- (KM, AL), **ES** (IR, YA), **FE** (KH, PR, SA, KU). – Europe (NE), Korean Peninsula, Japan (Hok, Hon).
- Allantus (Allantus) luctifer luctifer** (F. Smith, 1874) [Macrophyia]. Host plant: *Salix* spp. (Salicaceae), *Rumex* spp., *Polygonum* spp. (Polygonaceae). Russia: **FE** (PR, SA). – China (CC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).
- Allantus (Allantus) togatus** (Panzer, 1801) [Tenthredo] (*Tenthredo ferruginosa* Gmelin, 1790; *T. succincta* Klug, 1818; *Emphytus succinctus steini* Schmiedeknecht, 1881; *E. leucostomus* Costa, 1890; *E. succinctus ruficornis* Costa, 1890). Host plant: *Salix* spp. (Salicaceae), *Betula* spp. (Betulaceae), *Quercus* spp. (Fagaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS), **ES** (YA), **FE** (SA). – Europe (WE, EE, NE, SE), Turkey.
- Allantus (Allantus) viennensis** (Schrank, 1781) [Tenthredo] (*Emphytus viennensis nigricoxis* De-Stefani, 1883; *E. viennensis medinae* Konow, 1894; *Allantus viennensis uberior* Enslin, 1914; *Emphytus viennensis atricornis* Pic, 1948). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (S, NC). – Europe (WE, EE, SE), Georgia, Armenia, Turkey, Central Asia, N America.
- Allantus (Emphytus) albicinctus** (Matsumura, 1912) [Dolerus]. Host plant: *Filipendula* spp., *Rubus* spp., *Rosa* spp. (Rosaceae). Russia: **FE** (SA, KU). – China (NC), Japan (Hok).
- Allantus (Emphytus) basalis basalis** (Klug, 1818) [Tenthredo] (*Emphytus basalis masculus* Zirngiebl, 1937). Host plant: *Rosa* spp., *Dasiphora* spp., *Potentilla* spp. (Rosaceae), *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S), **UR**, **WS** (NS), **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KU, KA, MG). – Europe (WE, EE, NE, SE), Turkey, Mongolia, China (NE, NC), Korean Peninsula, Japan (Hok, Hon), N America.
- Allantus (Emphytus) calceatus** (Klug, 1818) [Tenthredo] (*Dolerus vicinus* Lepeletier, 1823; *D. vicinus* Serville, 1823; *Tenthredo vitis* Vallot, 1845; *Emphytus dissimilis* Dietrich, 1868). Host plant: *Filipendula* spp., *Spiraea* spp., *Rubus* spp. and others Rosaceae. Russia: **EP** (N, NW, C, S, E, NC), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **FE** (AM, PR, YA). – Europe (WE, EE, NE, SE), Georgia, Kazakhstan, Mongolia, China (Wei et al., 2006).
- Allantus (Emphytus) cinctus** (Linnaeus, 1758) [Tenthredo] (*Tenthredo cordigera* Geoffroy, 1785; *Dolerus cinctus* Jurine, 1807; *D. varipes* Lepeletier, 1823; *D. cingulatus* Serville, 1823; *D. varipes* Serville, 1823; *Emphytus neglectus* Zaddach, 1859; *E. cinctipes* Norton, 1867; *E. infasciatus* Pic, 1948). Host plant: *Fragaria* spp., *Rosa* spp., *Rubus* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **WS** (NS), **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR, KA, MG). – Europe (WE, EE, NE, SE), Armenia, Turkey, Iran, Kazakhstan, Mongolia, China (Wei et al., 2006), N America.
- Allantus (Emphytus) cingillipes** (Kontuniemi, 1947) [Emphytus]. Russia: **FE** (SA). – Europe (NE).
- Allantus (Emphytus) cingillum** (Klug, 1818) [Tenthredo]. Host plant: *Betula* spp. (Betulaceae), ?*Rosa* spp. (Rosaceae). Russia: **EP** (NW, C, E), **ES** (KR, IR, BR, YA). – Europe (WE, EE, NE).
- Allantus (Emphytus) cingulatus** (Scopoli, 1763) [Tenthredo] (*Dolerus cingulatus* Lepeletier, 1823; *Tenthredo tenius* Lepeletier, 1823; *Emphytus elegans* Costa, 1859; *Allantus cingulatus muliebris* Enslin, 1914). Host plant: *Fragaria* spp., *Rosa* spp. (Rosaceae). Russia: **EP** (NW, NC), **ES** (TU), **FE** (KA). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey.
- Allantus (Emphytus) didymus didymus** (Klug, 1818) [Tenthredo]. Host plant: *Sanguisorba* spp., *Rosa* spp. (Rosaceae). Russia: **EP** (C, E, S, NC), **WS** (NS). – Europe (WE, EE, SE), N Africa, Caucasus, SW Asia, Iran, Kazakhstan.
- Allantus (Emphytus) melanarius** (Klug, 1818) [Tenthredo] (*Emphytus tricoloripes* Costa, 1859). Host plant: *Cornus sanguinea* (Cornaceae). Russia: **EP** (NC). – Europe (WE, EE, SE), Iran.
- Allantus (Emphytus) ruficeps** (Konow, 1899) [Emphytus]. **EP** (NC). – Georgia.
- Allantus (Emphytus) rufocinctus** (Retzius, 1783) [Tenthredo] (*Tenthredo zonata* Christ, 1791; *T. rufocincta* Klug, 1818; *T. cingulum* Klug, 1818; *T. agilis* Drapiez, 1820; *Dolerus fasciatus* Lepeletier, 1823; *D. fasciatus* Serville, 1823; *Tenthredo ruralis* Dahlbom, 1835; *Emphytus rufocinctus ruralis* Thomson, 1871). Host plant: *Rosa* spp., *Rubus* spp. (Rosaceae). Russia: **EP** (N, NW, C). – Europe (WE, EE, SE), Mongolia.
- Allantus (Emphytus) truncatoides** Koch, 1988. Russia: **ES** (IR).
- Allantus (Emphytus) truncatus** (Klug, 1818) [Tenthredo] (*Tenthredo fulvipes* Fallén, 1829; *T. schoenherri* Dahlbom, 1835; *T. angustata* Zetterstedt, 1838). Host plant: *Filipendula* spp., *Fragaria* spp., *Potentilla* spp. and others (Rosaceae). Russia: **EP** (NW, C, E, NC), **UR**, **WS** (NS), **ES** (YA), **FE** (KA). – Europe (WE, EE, NE), Kyrgyzstan, Kazakhstan, Mongolia, China (NC, NW).

AMETASTEGIA Costa, 1882 (*Aomodyctium* Ashmead, 1898; *Protemphytus* Rohwer, 1909; *Emphytina* Rohwer, 1911; *Simplemphytus* MacGillivray, 1914; *Unitaxonus* MacGillivray, 1921; *Ocla* Malaise, 1957). Type species *Ametastegia fulvipes* Costa, 1882. The larvae before pupation borer branches, stems, bark or fruit. The genus distribution in Holarctic, Oriental and Neotropical regions. Number of species: World – about 60; Palaearctic - > 30; Russia – 13 from 2 subgenera.

Ametastegia (Ametastegia) albipes (Thomson, 1871) [Taxonus] (*Taxonus fletcheri* Cameron, 1878; *Eriocampa alabastripes* Costa, 1890). Russia: **EP** (N, NW, C, E, NC), **FE** (KA). – Europe (WE, EE, NE, SE).

Ametastegia (Ametastegia) equiseti (Fallén, 1808) [Tenthredo] (*Tenthredo bicolor* Klug, 1817; *T. gracilis* Serville, 1823; *T. gracilis* Lepeletier, 1823; *T. fuscitarsis* Hummel, 1827; *T. coxalis* Hartig, 1837; *T. bizonata* Zetterstedt, 1838; *Taxonus minutus* Costa, 1859; *Tenthredo angustula* Eversmann, 1864; *Taxonus innominatus* MacGillivray, 1901; *Unitaxonus repentinus* MacGillivray, 1921; *U. rumicis* MacGillivray, 1921; *Strongylogastroidea depressata* MacGillivray, 1921; *S. rufocinctella* MacGillivray, 1923; *Hemitaxonus dediticius* MacGillivray, 1923; *Ametastegia equiseti stitia* Zirngiebel, 1954). Host plant: *Polygonum* spp., *Rumex* spp. (Polygonaceae), *Chenopodium* (Amaranthaceae), etc. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **ES** (IR, BR, YA). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Mongolia, China (Wei et al., 2006), N America.

Ametastegia (Ametastegia) glabrata (Fallén, 1808) [Tenthredo] (*Tenthredo violacea* Christ, 1791; *T. agilis* Klug, 1817; *T. rufipes* Lepeletier, 1823; *T. rufipes* Serville, 1823; *T. nigrisoma* Norton, 1862; *Ametastegia fulvipes* Costa, 1882; *Strongylogaster abnormis* Provancher, 1885; *Strongylogastroidea potulenta* MacGillivray, 1923). Host plant: *Polygonum* spp., *Rumex* spp. (Polygonaceae), *Chenopodium* (Amaranthaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **WS** (KM). – Europe (WE, EE, NE, SE), N Africa, SW Asia, Kazakhstan, Central Asia, Mongolia, China (NW), N America, S America, Australia.

Ametastegia (Ametastegia) kirishimensis Takeuchi, 1929. Russia: **FE** (PR, SA). – Japan (Kyu).

Ametastegia (Ametastegia) wuorentausi Forsius, 1928 (*A. montana* Malaise, 1931). Russia: **FE** (KA). – China (NE).

Ametastegia (Protemphytus) albovaria (Takeuchi, 1936) [Emphytina]. Russia: **FE** (SA, KU). – Japan (Hok, Hon).

Ametastegia (Protemphytus) carpini (Hartig, 1837) [Emphytus] (*Taxonus glottianus* Cameron, 1874; *Emphytus arcticus* Nerén, 1892; *Allantus carpini decipiens* Enslin, 1914; *Emphytus perla obscura* Zirngiebel, 1954). Host plant: *Geranium* spp. (Geraniaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (TU, BR), **FE** (AM, PR, KA). – Europe (WE, EE, NE, SE), Armenia, Turkey, Central Asia, Kazakhstan.

Ametastegia (Protemphytus) pallipes (Spinola, 1808) [Tenthredo] (*Tenthredo grossulariae* Klug, 1818; *Dolerus leucopodus* Lepeletier, 1823; *D. leucopodus* Serville, 1823; *Tenthredo lapponica* Zetterstedt, 1838; *Emphytus pallipes* Provancher, 1878; *E. canadensis* W.F. Kirby, 1882; *E. pallidipes* Dalla Torre, 1894; *Empria cavata* MacGillivray, 1911; *E. cetaria* MacGillivray, 1921; *Emphytus hyacinthus* MacGillivray, 1923; *E. hospitus* MacGillivray, 1923; *E. halesus* MacGillivray, 1923; *E. heroicus* MacGillivray, 1923; *E. hiatus* MacGillivray, 1923). Host plant: *Viola* spp. (Violaceae), *Vicia* spp. (Fabaceae). Russia: **EP** (NW, C, E, NC, CR), **UR**, **ES** (TU), **FE** (KU, KA). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Iran, N America.

Ametastegia (Protemphytus) perla (Klug, 1818) [Tenthredo] (*Tenthredo bohemanni* Dahlbom, 1835). Host plant: *Salix* spp., *Populus* spp. (Salicaceae), *Quercus* spp. (Fagaceae), *Polygonum* spp. (Polygonaceae). Russia: **EP** (NW, C), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR), **FE** (KA). – Europe (WE, EE, NE).

Ametastegia (Protemphytus) tenera (Fallén, 1808) [Tenthredo] (*Tenthredo patellata* Klug, 1818; *Dolerus luctuosus* Lepeletier, 1823; *D. nigritus* Lepeletier, 1823; *D. luctuosus* Serville, 1823; *D. nigritus* Serville, 1823; *Tenthredo trunculi* Vallot, 1845; *Simplemphytus pacificus* MacGillivray, 1914; *Emphytina vanduzeei* Rohwer, 1915; *Emphytus haustus* MacGillivray, 1923; *E. haliartus* MacGillivray, 1923; *Empria columna* MacGillivray, 1923). Host plant: *Acetosa* spp., *Rumex* spp. (Polygonaceae), *Filipendula* spp. (Rosaceae), *Cirsium* spp. (Asteraceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR, BR), **FE** (AM, KH, MG). – Europe (WE, EE, NE, SE), Armenia, Turkey, Iran, Kyrgyzstan, Kazakhstan, Mongolia, China (NW), N America.

Ametastegia geranii (Takeuchi, 1929) [Emphytina]. Host plant: *Geranium* spp. (Geraniaceae). Russia: **FE** (KU). – Japan (Hon, Shi).

Ametastegia longicornis (Takeuchi, 1929) [Emphytina]. Russia: **FE** (KU). – Japan (Hon, Shi).

Ametastegia polygoni Takeuchi, 1929. Host plant: *Polygonum* spp. (Polygonaceae). Russia: **FE** (SA, KU). – China (NE), Korean Peninsula, Japan (Hon, Kyu).

APETHYmus Benson, 1939 (*Kjellia* Malaise, 1947). Type species *Dolerus abdominalis* Lepeletier, 1823. The larvae feed on deciduous trees and shrubs. The genus is distributed in Palaearctic and Oriental region. Number of species: World – about 25; Palaearctic – about 24; Russia – 7.

Apethymus apicalis (Klug, 1818) [Tenthredo] (*Emphytus klugii* Thomson, 1871). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (Liston, 1995). – Europe (WE, EE, NE), Turkey.

Apethymus filiformis (Klug, 1818) [Tenthredo] (*Tenthredo serotina* Klug, 1818; *T. tarsata* Zetterstedt, 1819; *Dolerus abdominalis* Lepeletier, 1823; *D. abdominalis* Serville, 1823; *Emphytus temesiensis* Mocsáry, 1879; *E. serotinus melanopus* Ulbricht, 1913; *E. autumnalis* Forsius, 1933). Host plant: *Quercus* spp. (Fagaceae). Russia: **EP** (NW). – Europe (WE, EE, NE, SE).

Apethymus kunugi Togashi, 2005 (*A. proceratis*: Sundukov, Lelej, 2012). Host plant: *Quercus acutissima*, *Q. mongolicus* (Fagaceae). Russia: **FE** (PR). – Japan (Hon).

Apethymus kuri Takeuchi, 1952. Host plant: *Castanea crenata*, *Quercus crispula* (Fagaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu).

Apethymus parallelus (Eversmann, 1847) [Emphytus]. Russia: **UR, FE** (MG).

Apethymus serotinus (O.F. Müller, 1776) [Tenthredo] (*Tenthredo braccata* Gmelin, 1790; *T. varicornis* Gmelin, 1790; *T. tibialis* Panzer, 1799; *Emphytus caligatus* Eversmann, 1847; *E. panzeri* W.F. Kirby, 1882). Host plant: *Quercus* spp. (Fagaceae), *Rosa* spp. (Rosaceae). Russia: **EP** (NW, C, E, NC), **UR, WS** (NS). – Europe (WE, EE, NE, SE), Georgia.

Apethymus sidorenkoi Sundukov, 2010. Host plant: *Quercus mongolicus* (Fagaceae). Russia: **FE** (PR).

ASIEMPHYTUS Malaise, 1947. Type species *Macremphytus deutziae* Takeuchi, 1929. The larvae feed on the deciduous trees and shrubs; when pupation is carried into dry branches and bark.

The genus is distributed in East Asia and Oriental region. Number of species: World – 10; Palaearctic – 8; Russia – 2.

Asiemphytus dellei (Conde, 1935) [Macremphytus].

Host plant: *Deutzia crenata* (Hydrangeaceae). Russia: **FE** (AM, PR, KU). – China (NE, SE).

Asiemphytus fasciatus (Takeuchi, 1929) [Macremphytus].

Host plant: *Cornus controversa* (Cornaceae). Russia: **FE** (SA). – Japan (Hok, Hon, Shi, Kyu).

BELESES Cameron, 1877 (*Anisoneura* Cameron, 1876;

Belesidea Rohwer, 1916). Type species *Anisoneura stigmatica* Cameron, 1876. The genus is distributed in East Asia and Oriental region. Number of species: World – 22; Palaearctic – 14; Russia – 1.

Beleses satonis (Takeuchi, 1929) [Abeleses].

Host plant: *Actinidia arguta* (Actinidiaceae). Russia: **FE** (KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

DINAX Konow, 1897 (*Adamas* Malaise, 1945). Type

species *Dinax jakowleffi* Konow, 1897. The larvae feed on the Rosaceae. The genus is distributed mainly in East Asia; one species in Oriental region, and one species up to the Urals. Number of species: World – 6; Palaearctic – 5; Russia – 2.

Dinax ermak (Zhelochovtsev, 1968) [Adamas]. Host plant: *Spiraea* spp. (Rosaceae). Russia: **EP** (E), **UR, ES** (ZB), **FE** (MG). – Europe (EE).

Dinax jakowleffi Konow, 1897. Host plant: *Spiraea* spp. (Rosaceae). Russia: **ES** (IR, YA), **FE** (AM, KH, PR). – China (NE).

EMPRIA Lepeletier et Serville, 1828 (*Poecilostoma*

Dahlbom, 1835; *Proscris* Gistel, 1848; *Poecilosoma* Thomson, 1870; *Poecilostomidea* Ashmead, 1898; *Tetratneura* Ashmead, 1898; *Parataxonous* MacGillivray, 1908; *Leucempria* Enslin, 1913; *Triempria* Enslin, 1914). Type species *Dolerus pallimacula* Lepeletier, 1823. The larvae mainly feed on Rosaceae, some on *Betula* (Betulaceae) and *Salix* (Salicaceae). The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – about 50; Palaearctic – about 40; Russia – 28.

Empria alector Benson, 1938. Host plant: *Filipendula* spp. (Rosaceae). Russia: **EP** (N, NW, C, E), **WS** (Zelochovtsev, 1988). – Europe (WE, EE, NE).

Empria alpina Benson, 1938. Host plant: *Dryas* spp. (Rosaceae). Russia: **EP** (NW). – Europe (WE, NE).

- Empria archangelskii** Dovnar-Zapolskij, 1929. Russia: **EP** (NC). – Caucasus, SW Asia.
- Empria basalis** Lindqvist, 1968. Host plant: Geum spp. (Rosaceae). Russia: **EP** (N). – Europe (WE, EE, NE).
- Empria camtschatica** Forsius, 1928. Host plant: Salix spp. (Salicaceae). Russia: **FE** (KA). – Europe (NE).
- Empria candidata** (Fallén, 1808) [Tenthredo] (*Tenthredo repanda* Klug, 1816). Host plant: Betula spp. (Betulaceae). Russia: **EP** (NW, C, E), **WS** (NS), **ES** (IR, BR, YA), **FE** (AM, KH, PR, KA). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia, China (NE), Korean Peninsula, Japan (Hok), N America.
- Empria excisa** (Thomson, 1871) [Poecilosoma] (*E. africana* Forsius, 1918). Host plant: Filipendula spp. (Rosaceae). Russia: **EP** (N). – Europe (WE, EE, NE, SE), N Africa, Turkey.
- Empria fletcheri** (Cameron, 1878) [Poecilosoma]. Host plant: Betula spp. (Betulaceae). Russia: **EP** (N), **WS** (TM), **ES** (TU, BR). – Europe (WE, NE), Mongolia.
- Empria gelida** (Erichson, 1851) [Tenthredo]. Russia: **FE** (KH).
- Empria hungarica** (Konow, 1895) [Poecilosoma] (*E. zacharovi* Dovnar-Zapolskij, 1929). Host plant: Filipendula spp. (Rosaceae). Russia: **EP** (C, S, NC). – Europe (WE, EE, NE, SE), Kazakhstan.
- Empria immersa** (Klug, 1818) [Tenthredo] (*Selandria labialis* Brullé, 1832; *Tenthredo opacomaculata* Eversmann, 1847; *Emphytus majalis* Snellen van Vollenhoven, 1869; *Empria tirolensis* Enslin, 1914). Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR, BR, YA), **FE** (AM, KH, MG). – Europe (WE, EE, NE, SE), Mongolia.
- Empria liturata** (Gmelin, 1790) [Tenthredo] (*Tenthredo guttata* Fallén, 1808; *T. impressa* Klug, 1816; *Emphytus pallimaculatus* Stephens, 1835; *Tenthredo spuria* Zetterstedt, 1838; *Emphytus fenestratus* Eversmann, 1847; *E. vernalis* Dietrich, 1868; *Poecilosoma submutica* Thomson, 1871; *P. undulata* Konow, 1885; *Harpiphorus calderoni* Medina, 1888). Host plant: Filipendula spp., Fragaria spp., Geum spp., Rubus spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS, KM), **ES** (KR, IR, YA), **FE** (MG). – Europe (WE, EE, NE, SE), Turkey, Mongolia, Japan (Hok).
- Empria loktini** Ermolenko, 1971. Host plant: Geum japonicum, G. calthifolium (Rosaceae). Russia: **FE** (SA). – Japan (Hok).
- Empria longicornis** (Thomson, 1871) [Poecilosoma] (*E. rubi* Kontuniemi, 1951). Host plant: Rubus spp. (Rosaceae). Russia: **EP** (NW, C, E), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (Zhelochovtsev, Zinovjev, 1996). – Europe (WE, EE, NE, SE), Mongolia.
- Empria mongolica** (Konow, 1895) [Poecilosoma]. Russia: **ES** (TU). – Mongolia, China (NC).
- Empria pallimacula** (Serville, 1823) [Dolerus] (*Dolerus pallimacula* Lepeletier, 1823; *Empria baltica* Conde, 1937). Host plant: Filipendula spp. (Rosaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (NS, KM), **ES** (YA). – Europe (WE, EE, NE, SE), Armenia.
- Empria parvula** (Konow, 1892) [Poecilosoma] (*E. pseudodoklugi* Dovnar-Zapolskij, 1929; *E. kuznetzovi* Dovnar-Zapolskij, 1929). Host plant: Geum spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S), **FE** (AM, PR). – Europe (WE, EE, NE, SE), Mongolia.
- Empria plana** (Jakovlev, 1891) [Poecilosoma] (*Tenthredo hybrida* Erichson, 1851; *Empria itelmena* Malaise, 1931; *E. erichsoni* Liston, 1995). Host plant: Salix spp. (Salicaceae). Russia: **WS** (Lelej, Taeger, 2007), **ES** (IR), **FE** (AM, KH, PR, KA, MG). – Mongolia, Japan (Hok, Hon).
- Empria pravei** Dovnar-Zapolskij, 1925. Russia: **EP** (NC). – Armenia, Iran.
- Empria pumila** (Konow, 1896) [Poecilosoma]. Host plant: Filipendula spp. (Rosaceae). Russia: **EP** (NW, E), **WS** (KM). – Europe (WE, EE, NE, SE), Kazakhstan.
- Empria pumiloides** Lindqvist, 1968 (*E. tricornis* Lindqvist, 1968). Host plant: Filipendula spp. (Rosaceae). Russia: **EP** (Heidemaa, Prous, 2006). – Europe (WE, NE).
- Empria quadrimaculata** Takeuchi, 1952. Host plant: Rosa multiflora, Potentilla indica, ?Rubus parvifolius (Rosaceae). Russia: **FE** (KU). – Japan (Hon, Shi, Kyu).
- Empria rubicola** Ermolenko, 1971. Russia: **FE** (SA). – Japan (Hok).
- Empria sexpunctata** (Serville, 1823) [Tenthredo] (*Tenthredo sexpunctata* Lepeletier, 1823; *Selandria klugii* Stephens, 1835; *Poecilosoma guttata* Thomson, 1871; *P. carbonarium* Konow, 1884; *Empria waldstaettrense* Liston, 1980). Host plant: Geum spp. (Rosaceae). Russia: **EP** (NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE, SE), Georgia, Armenia.
- Empria testaceipes** (Konow, 1896) [Poecilosoma]. Host plant: Sanguisorba officinalis (Rosaceae).

- Russia: **EP** (E), **ES** (IR), **FE** (AM). – Europe (WE, EE, NE), SW Asia, Mongolia.
- Empria tridens** (Konow, 1896) [*Poecilosoma*] (*E. caucasicum* Dovnar-Zapolskij, 1929; *E. gussakovskii* Dovnar-Zapolskij, 1929; *E. konowi* Dovnar-Zapolskij, 1929). Host plant: *Geum japonicum*, *Filipendula camtschatica*, *Rubus* spp. (Rosaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **ES** (TU, IR), **FE** (AM, PR, SA, KA). – Europe (WE, EE, NE, SE), Turkey, Mongolia, Japan (Hok).
- Empria tridentis** Lee et Ryu, 1996. Host plant: *Geum japonicum*, *Filipendula camtschatica* (Rosaceae). Russia: **FE** (KH, PR, SA). – Korean Peninsula, Japan (Hok).
- Empria ushinskii** Dovnar-Zapolskij, 1929. **EP** (NC, CR). – Europe (EE).
- EOPSIS** Benson, 1959. Type species *Eopsis beaumonti* Benson, 1959. The genus is distributed in West Palaearctic. Number of species: one West Palaearctic species.
- Eopsis beaumonti** Benson, 1959 (*Monosoma mosquense* Zhelochovtsev, 1981). Host plant: *Rumex* spp., *Polygonum* spp. (Polygonaceae). Russia: **EP** (C). – Europe (WE, EE).
- ERIOCAMP** Hartig, 1837 (*Brachycampa* Zirngiebl, 1956). Type species *Tenthredo ovata* Linnaeus, 1760. The genus is distributed in Holarctic and Oriental region; one species was introduced into the North America. Number of species: World – about 20; Palaearctic – 15; Russia – 6.
- Eriocampa albipes** Matsumura, 1912. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (AM, KH, SA). – Korean Peninsula, Japan (Hok, Hon, Shi).
- Eriocampa dorpatica** Konow, 1887. Host plant: black currant – *Ribes nigrum* and others (Grossulariaceae). Russia: **EP** (NW, C, E), **UR**, **ES** (KR, IR). – Europe (NE).
- Eriocampa mitsukurii** Rohwer, 1910. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (AM, KH, PR, SA, KU). – China (SE), Japan (Hok, Hon, Shi).
- Eriocampa ovata ovata** (Linnaeus, 1760) [Tenthredo] (*Tenthredo gossypina* Retzius, 1783; *T. vernalis* Geoffroy, 1785; *T. leucogona* Schrank, 1802; *Eriocampa ovata nigritibialis* Enslin, 1914). Host plant: *Alnus* spp. (Betulaceae), *Rhamnus* spp., *Frangula* spp. (Rhamnaceae), *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE, SE), Georgia, Turkey; introduced into the N America.
- Eriocampa peineae** Zirngiebl, 1956. Russia: **EP** (Lacourt, 1999). – Iran.
- Eriocampa umbratica** (Klug, 1816) [Tenthredo]. Host plant: *Alnus* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC). – Europe (WE, EE, NE, SE), Georgia, Turkey.
- ERIOCAMPOPSIS** Takeuchi, 1952. Type species *Eriocampopsis subtruncata* Takeuchi, 1952. The genus is distributed in East Asia. Number of species: World and Palaearctic – 2; Russia – 1.
- Eriocampopsis subtruncata** Takeuchi, 1952. Host plant: *Actaea* spp. (Ranunculaceae). Russia: **FE** (PR). – Japan (Hon).
- FILIXUNGULIA** Wei, 1997. Type species *Fili-xungulia alboclypea* Wei, 1997. East Palaearctic genus. Palaearctic – 3 species, Russia – 1.
- Filixungulia alboclypea** Wei, 1997. Russia: **FE** (PR). – China (NE).
- HARPIPHORUS** Hartig, 1837 (*Asticta* Newman, 1838; *Harpophorus* Agassiz, 1848). Type species *Tenthredo lepida* Klug, 1818. The larvae feed on the *Quercus* (Fagaceae). The genus is distributed in West Palaearctic. Number of species: one species.
- Harpiphorus lepidus** (Klug, 1818) [Tenthredo] (*Fenusia ianthe* Newman, 1837). Host plant: *Quercus robur* (Fagaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE, SE).
- HEMIBELESES** Takeuchi, 1929. Type species *Hemibeleses nigriceps* Takeuchi, 1929. The genus is distributed in East Asia and Oriental region. Number of species: World – about 20; Palaearctic – 14; Russia – 1.
- Hemibeleses ventralis** Takeuchi, 1952. Russia: **FE** (PR). – Korean Peninsula, Japan (Hon, Shi, Kyu).
- HEPTAPOTAMIUS** Malaise, 1935. Type species *Heptapotamius simini* Malaise, 1935. The genus is distributed in Central Eurasia. Number of species: one species.
- Heptapotamius simini** Malaise, 1935. Russia: **EP** (S). – Uzbekistan, Kyrgyzstan, Kazakhstan.
- MONOSTEGIA** Costa, 1859 (*Nematoceros* Konow, 1896). Type species *Tenthredo luteola* Klug, 1816. The larvae pupate in the soil. The genus is distributed in Palaearctic; one species was introduced

into the N America. Number of species: World and Palaearctic – 5; Russia – 2.

Monostegia abdominalis (Fabricius, 1798) [Tenthredo] (*Tenthredo luteola* Klug, 1816; *Monostegia martini* MacGillivray, 1908; *M. nearctica* Rohwer, 1912; *Empria abdominalis rufinotis* Enslin, 1914). Host plant: *Lysimachia* spp., *Anagallis* spp. (Primulaceae), *Lactuca* spp. (Asteraceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR, YA), **FE** (AM, PR). – Europe (WE, EE, NE, SE), Azerbaijan, Armenia, SW Asia, Kyrgyzstan, Kazakhstan, China (Wei et al., 2006); introduced into the N America.

Monostegia cingulata (Konow, 1891) [Poecilosoma]. Russia: **EP** (NC). – Georgia.

MONSOMA MacGillivray, 1908 (*Monosoma* Viereck, 1910). Type species *Poecilostoma inferentia* Norton, 1868. The larvae feed on Betulaceae. The genus is distributed in Holarctic. Number of species: World – 4; Palaearctic – 3; Russia – 2.

Monsoma pallipes (Matsumura, 1912) [Poecilosoma]. Host plant: ?*Alnus* spp. (Betulaceae). Russia: **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (Zhelochovtsev, Zinovjev, 1996), **FE** (PR). – Japan (Hok).

Monsoma pulveratum (Retzius, 1783) [Tenthredo] (*Tenthredo limbata* Gmelin, 1790; *T. pulverulenta* Christ, 1791; *T. obesa* Klug, 1817; *T. obtusa* Klug, 1817; *Selandria pulchella* Stephens, 1835; *Tenthredo leuczonias* Hartig, 1837; *T. segmentata* Zetterstedt, 1838; *Harpiphorus taeniatus* Costa, 1869; *Empria pulverata obtusalis* Enslin, 1914). Host plant: *Alnus* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **WS** (KM). – Europe (WE, EE, NE, SE), N Africa, Caucasus, SW Asia; introduced into the N America.

STENEMPHYTUS Wei et Nie, 1999. Type species *Stenemphytus superbus* Wei et Nie, 1999. The genus is distributed in East Asia and Oriental region. Number of species: World – 4; Palaearctic – 2; Russia – 1.

Stenemphytus nakabusensis (Takeuchi, 1929) [Allantus]. Host plant: *Prunus* spp. (Rosaceae). Russia: **FE** (KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

TAXOBLENUS Wei et Nie, 1999. Type species *Taxoblenus longicornis* Wei et Nie, 1999. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 11; Palaearctic – 8; Russia – 1.

Taxoblenus latus (Jakovlev, 1888) [Taxonus] (*Taxonus ballioni* Konow, 1891). Russia: **EP** (S), **ES** (IR, ZB).

TAXONUS Hartig, 1837 (*Ermilia* Costa, 1859; *Parasibla* Ashmead, 1898; *Strongylogastroidea* Ashmead, 1898; *Hypotaxonus* Ashmead, 1898). Type species *Tenthredo nitida* Klug, 1817. The larvae pupate in the soil. The genus is distributed in Holarctic and Oriental region. Number of species: World – 60; Palaearctic – about 45; Russia – 7.

Taxonus abdominalis Lee et Ryu, 1996. Russia: **FE** (PR). – Korean Peninsula.

Taxonus agrorum (Fallén, 1808) [Tenthredo] (*Tenthredo nitida* Klug, 1817; *Perineura dualis* Förster, 1844; *Tenthredo anomala* Eversmann, 1847; *T. subiecta* Eversmann, 1847; *Ermilia pulchella* Costa, 1859; *Strongylogaster rubrofasciatus* Palma, 1861; *Taxonus creperus* Konow, 1900). Host plant: *Rubus* spp. (Rosaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR, BR, YA, ZB), **FE** (KH). – Europe (WE, EE, NE, SE), Turkey, Japan (Hok, Hon, Shi, Kyu).

Taxonus carbonarius Takeuchi, 1929. Russia: **FE** (PR). – China (SE).

Taxonus delumbis Konow, 1900 (*T. kamtchaticus* Malaise, 1931). Host plant: *Populus* spp. (Salicaceae). Russia: **ES** (KR, IR, BR, YA), **FE** (PR, SA, KA, MG). – China (Wei et al., 2006), Korean Peninsula, Japan (Togashi, 2000).

Taxonus fluvicornis Matsumura, 1912 (*Conaspidia bergrothi* Forsius, 1925). Host plant: *Polygonum cuspidatum* (Polygonaceae). Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Taxonus sticticus (Klug, 1817) [Tenthredo]. Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (S, NC), **ES** (IR). – Europe (WE, EE, SE), Turkey.

Taxonus zhelochovtsevi Viitasaari et Zinovjev, 1991. Russia: **FE** (KH, PR). – China (NE).

Unplaced Allantinae

Emphytus albisternus André, 1882. Russia: “Amur” (?*Ametastegia* Costa, 1882; see Blank et al., 2009).

Subfamily ATHALIINAE

ATHALIA Leach, 1817 (*Dentathalia* Benson, 1931). Type species *Tenthredo spinarum* Fabricius, 1793. The larvae feed on the Brassicaceae and Lamiaceae. The genus is distributed in Palaearctic,

- Oriental and Afrotropic regions. Number of species: World – about 95; Palaearctic - > 45; Russia – 18 (+ 3 ssp.).
- Athalia ahngeri** Kokujev, 1910. Russia: **EP** (Lacourt, 1999). – Azerbaijan, Armenia, Uzbekistan, Kazakhstan.
- Athalia ancilla ancilla** Serville, 1823 (*A. ancilla* Lepetier, 1823; *A. glabricollis* Thomson, 1870; *A. glabricollis bulgarica* Gregor, 1932). Host plant: *Daucus* spp. (Apiaceae). Russia: **EP** (C, NC, CR), **UR**, **WS** (NS). – Europe (WE, EE, NE, SE), N Africa, Georgia, Turkey.
- Athalia bicolor** Serville, 1823 (*Tenthredo annulata* Fabricius, 1787; *Athalia richardi* Serville, 1823; *A. richardi* Lepeletier, 1823; *A. bicolor* Lepeletier, 1823; *A. bicolor nigritegulis* Enslin, 1918). Host plant: ?*Ranunculus* spp. (Ranunculaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **WS** (NS). – Europe (WE, EE, NE, SE), N Africa, Caucasus, Turkey, Turkmenistan.
- Athalia circularis circularis** (Klug, 1815) [*Tenthredo*] (*Tenthredo annulata* Gmelin, 1790; *Athalia lineolata* Lepeletier, 1823; *A. lineolata* Serville, 1823; *A. rosae sternalis* Costa, 1894; *A. bolivari* Dusmet, 1896; ?*A. lineolata niezabitowskii* Szulczewski, 1938; ?*A. lineolata gorkaensis* Szulczewski, 1938; *A. cordatoides* Kontuniemi, 1951; *A. alpina* Chevin, 1969). Host plant: Plantaginaceae, Asteraceae, Lamiaceae, etc. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (KS, KR). – Europe (WE, EE, NE, SE), N Africa, Caucasus, Turkey, Pakistan, Uzbekistan, Tajikistan, Kazakhstan, India (NW).
- Athalia circularis melanoptera** Benson, 1962. Host plant: Plantaginaceae, Asteraceae, Lamiaceae, etc. Russia: **ES** (IR, ZB), **FE** (AM, SA, KU, KA). – Mongolia, China (NE), Korean Peninsula.
- Athalia cordata** Serville, 1823 (*A. suessionensis* Serville, 1823; *A. suessionensis* Lepeletier, 1823; *A. cordata* Lepeletier, 1823; *A. blanchardi* Brullé, 1846; *A. rosae obscura* Konow, 1884; *A. lineolata analis* Enslin, 1913). Host plant: Plantaginaceae and Lamiaceae. Russia: **EP** (C, E, S, NC, CR), **UR**. – Europe (WE, EE, NE, SE), N Africa, Caucasus, SW Asia.
- Athalia cornubiae** Benson, 1931. Host plant: *Sedum* spp. (Crassulaceae). Russia: **EP** (CR). – Europe (WE, EE, SE), Georgia, Armenia, Turkey, Uzbekistan; introduced into the N America.
- Athalia decorata** Konow, 1900. Russia: **ES** (KS, KR, IR, BR, ZB), **FE** (AM, PR). – China (SW).
- Athalia dimidiata** Konow, 1891. Russia: **EP** (Lacourt, 1999). – Georgia, Armenia, Turkey.
- Athalia infumata** (Marlatt, 1898) [*Phyllotoma*] (*A. nigrinotum* Matsumura, 1912). Host plant: *Cardamine* spp., *Nasturtium* spp., *Rorippa* spp., *Brassica* spp. (Brassicaceae). Russia: **FE** (PR, SA, KU). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), India.
- Athalia japonica** (Klug, 1815) [*Tenthredo*] (*A. novitella* Kokujev, 1927). Host plant: Brassicaceae. Russia: **WS** (AL), **ES** (KS, KR, IR), **FE** (AM, KH, PR, SA, KU). – Kazakhstan, China (NE, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), India.
- Athalia liberta** (Klug, 1815) [*Tenthredo*] (*A. rosae immaculata* Konow, 1884). Host plant: Brassicaceae. Russia: **EP** (NW, C, E, S, NC), **UR**, **ES** (KR). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Iran, Tajikistan, Uzbekistan, Kyrgyzstan, China (NW, SW), India.
- Athalia longifoliae** Kontuniemi, 1951. Host plant: *Veronica longifolia* (Plantaginaceae). Russia: **EP** (NW, C, S, NC). – Europe (WE, NE), Central Asia, Kazakhstan.
- Athalia lugens** (Klug, 1815) [*Tenthredo*] (*A. lugens flavoscutellata* Enslin, 1918). Host plant: *Ajuga reptans* (Lamiaceae), ?Brassicaceae. Russia: **EP** (NW, C, NC, CR), **WS** (NS), **ES** (BR), **FE** (PR, KA). – Europe (WE, EE, NE, SE), Georgia, China (NE), Korean Peninsula, Japan (Hon), India, SE Asia.
- Athalia proxima** (Klug, 1815) [*Tenthredo*] (*A. tibialis* Cameron, 1876; *A. spinarum orientalis* Cameron, 1877; *A. proxima funebris* Forsius, 1925; *A. colibri kuroiwae* Matsumura et Uchida, 1926; *A. lugens camtschatica* Forsius, 1928; *A. lugens tristis* Forsius, 1934). Host plant: Brassicaceae. Russia: **FE** (KH, PR, SA, KU, KA). – China (SE), Korean Peninsula, Japan (Ryu), India, SE Asia.
- Athalia rosae rosae** (Linnaeus, 1758) [*Tenthredo*] (*Tenthredo colibri* Christ, 1791; *T. spinarum* Fabricius, 1793; *T. centifoliae* Panzer, 1797). Host plant: Brassicaceae. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (KS, KR). – Europe (WE, EE, NE, SE), N Africa, Caucasus, SW Asia, Kazakhstan.
- Athalia rosae ruficornis** Jakovlev, 1888 (*A. leucostoma* Cameron, 1904; *A. spinarum japanensis* Rohwer, 1910). Host plant: Brassicaceae. Russia: **ES** (IR, BR), **FE** (AM, KH, PR, SA, KU). – Mongolia, China (NE, NC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), India.

Athalia rufoscutellata Mocsáry, 1879 (*A. maculata* Mocsáry, 1879; *A. maritima* W.F. Kirby, 1884; *A. rufoscutellata mocsaryi* Konow, 1892; *A. rufoscutellata nigroscutellata* Konow, 1892; *A. rufoscutellata pleuralis* Konow, 1898; *A. rufoscutellata obscurata* Konow, 1904). Host plant: *Teucrium* spp. (Lamiaceae). Russia: **EP** (S, NC, CR). – Europe (WE, EE, SE), Georgia, Armenia, Turkey, China (Wei et al., 2006).

Athalia scutellariae scutellariae Cameron, 1880 (*Dentathalia galericulatae* Kontuniemi, 1951). Host plant: *Scutellaria* spp., *Lycopus* spp. (Lamiaceae). Russia: **EP** (NW, C, E). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan.

Athalia scutellariae flammma Zhelochovtsev, 1927. Host plant: *Scutellaria* spp. (Lamiaceae). Russia: **ES** (IR, ZB), **FE** (AM, KH, PR). – Mongolia, China (NC).

Athalia yanoi Takeuchi, 1952. Russia: **FE** (KH, PR, SA, KU). – Japan (Hok, Hon).

Subfamily BLENNOCAMPINAE (HETERARTHINAE)

ANAFENUSA Benson, 1959. Type species *Entodecta impropria* Malaise, 1931. The genus is distributed in East Asia and Oriental region. Number of species: World – 4; Palaearctic – 3; Russia – 1.

Anafenusa impropria (Malaise, 1931) [Entodecta]. Russia: **FE** (PR).

APAREOPHORA Sato, 1928. Type species *Apareophora forsythiae* Sato, 1928. The genus is distributed in Holarctic and Oriental region. Number of species: World – 8; Palaearctic – 6; Russia – 1.

Apareophora coreana Sato, 1928. Russia: **FE** (PR). – China (NC), Korean Peninsula.

ARDIS Konow, 1886 (*Valco* Ross, 1937). Type species *Tenthredo bipunctata* Klug, 1817. The larvae without spines on the body; borer the branches of *Rosa* (Rosaceae); go down the branch. The genus is distributed in Holarctic. Number of species: World – 5; Palaearctic – 4; Russia – 1.

Ardis pallipes (Serville, 1823) [Dolerus] (*Tenthredo bipunctata* Klug, 1817; *Dolerus pallipes* Lepeletier, 1823; *Tenthredo brunniventris* Hartig, 1837; *Monophadnus dissimilis* Costa, 1859; *Selandria irrogata* Cresson, 1880; *Emphytus dubius* W.F. Kirby, 1882; *Aphanisus odoratus* MacGillivray, 1908;

A. parallelus MacGillivray, 1923). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **FE** (MG). – Europe (WE, EE, NE, SE), Central Asia, China (Wei et al., 2006), Japan (Hon); introduced into the N America.

BLENNOCAMPA Hartig, 1837. Type species *Tenthredo pusilla* Klug, 1816. The larvae with branched spines on the body; feeding on Rosaceae. The genus is distributed in Palaearctic, Oriental and Neotropical regions. Number of species: World – 10; Palaearctic – 3; Russia – 2.

Blennocampa phyllocolpa Viitasari et Vikberg, 1985 (*Tenthredo pusilla* Klug, 1816). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **ES** (IR), **FE** (AM, SA, KA, MG). – Europe (WE, EE, NE, SE), Turkey, Central Asia, Kazakhstan, China (NW).

Blennocampa sibirica Jakovlev, 1891. Russia: **ES** (IR).

CALIROA Costa, 1859 (*Eriocampoides* Konow, 1890; *Periclistoptera* Ashmead, 1898). Type species *Caliroa sebetia* Costa, 1859. The larvae are covered with mucus; skeletonize of leaves of trees and shrubs, pupate in the soil. The genus is distributed in Holarctic and Oriental region; was introduced into the Neotropical, Ethiopian and Australasian regions. Number of species: World – about 60; Palaearctic – 30; Russia – 7.

Caliroa angustata Forsius, 1927. Russia: **FE** (AM). – China (CC, SE).

Caliroa annulipes (Klug, 1816) [Tenthredo] (*Selandria atra* Stephens, 1835; *Eriocampa myrtilli* Brischke, 1889). Host plant: Salicaceae, Betulaceae, Fagaceae, Cannabaceae, etc. Russia: **EP** (N, NW, C, E), **UR**, **ES** (IR, BR, YA), **FE** (KA, MG). – Europe (WE, EE, NE, SE), Turkey, China (Wei et al., 2006), Japan (Hon), N America.

Caliroa cerasi (Linnaeus, 1758) [Tenthredo] (*Tenthredo flavipes* Schrank, 1781; *T. limacina* Retzius, 1783; *T. adumbrata* Klug, 1816; *Monostegia antipoda* W.F. Kirby, 1881; *Caliroa laudata* MacGillivray, 1909; *C. lacinata* MacGillivray, 1909). Host plant: Rosaceae, Salicaceae, Fagaceae, etc. Russia: **EP** (NW, C, E, S, NC, CR), **UR**, **WS** (NS), **FE** (AM, KH, PR). – Europe (WE, EE, NE, SE), N Africa, SW Asia, Uzbekistan, Kyrgyzstan, Kazakhstan, China (NE, CC, SW, SE); introduced into the N America, S America, S Africa, Australia, New Zealand.

Caliroa cincta (Klug, 1816) [Tenthredo]. Host plant: Quercus spp. (Fagaceae). Russia: **EP** (C, S, NC). – Europe (WE, EE, NE, SE).

Caliroa oishii (Takeuchi, 1933) [Eriocampoides]. Host plant: Quercus spp. (Fagaceae). Russia: **FE** (PR, SA). – China (NE), Korean Peninsula, Japan (Hon).

Caliroa tremulae Chevin, 1974. Host plant: Populus tremula (Salicaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).

Caliroa varipes (Klug, 1816) [Tenthredo] (*Eriocampa crassicornis* Tischbein, 1846; *Eriocampoides variipes* Dalla Torre, 1894). Host plant: Salix spp. (Salicaceae), Betula spp. (Betulaceae), Quercus robur (Fagaceae). Russia: **EP** (NW, C, S, NC), **WS** (Zhelochovtsev, Zinovjev, 1996), **FE** (AM, PR). – Europe (WE, EE, NE), Turkey, Japan (Hok).

CLADARDIS Benson, 1952. Type species *Tenthredo elongatula* Klug, 1817. The larvae bore the branches of Rosa (Rosaceae); move from top to bottom along the branch. The genus is distributed in Palaearctic; one species in Oriental region. Number of species: World and Palaearctic – 4; Russia – 2.

Cladardis elongatula (Klug, 1817) [Tenthredo]. Host plant: Rosa spp. (Rosaceae). Russia: **EP** (NW, C, E), **FE** (PR). – Europe (WE, EE, NE, SE), Turkey, Mongolia.

Cladardis hartigi Liston, 1995 (*Tenthredo semicincta* Hartig, 1837). Host plant: Rosa spp. (Rosaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).

CLAREMONTIA Rohwer, 1909 (*Pseudoblennocampa* Malaise, 1935). Type species *Claremontia typica* Rohwer, 1909. The larvae feed on herbaceous of Rosaceae. The genus is distributed in Holarctic; one species in Oriental region. Number of species: World – 16; Palaearctic – 9; Russia – 7.

Claremontia alternipes (Klug, 1816) [Tenthredo] (*Tenthredo maura* Schrank, 1802; *Blennocampa divisa* Konow, 1884; *B. intermedia* Kriechbaumer, 1885; *B. tergestina* Kriechbaumer, 1888; *B. finitima* Konow, 1900). Host plant: Rubus spp. (Rosaceae). Russia: **EP** (NW, C, S, NC, CR), **WS** (Lelej, Taeger, 2007), **ES** (IR), **FE** (MG). – Europe (WE, EE, NE, SE), Mongolia.

Claremontia brevicornis (Brischke, 1883) [Blennocampa] (*Blennocampa confusa* Konow, 1886; *B. mixta* Malaise, 1920). Host plant: Fragaria spp., Potentilla spp., Sanguisorba spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (KM), **ES** (IR). – Europe (WE, EE, NE, SE), Mongolia.

Claremontia puncticeps (Konow, 1886) [Blennocampa].

Host plant: Poterium sanguisorba (Rosaceae). Russia: **EP** (C, E), **WS** (NS), **ES** (IR), **FE** (AM, PR). – Europe (WE, SE), Turkey, Kyrgyzstan, Kazakhstan.

Claremontia springatei Koch, 1988. Russia: **ES** (IR).

Claremontia tenuicornis (Klug, 1816) [Tenthredo] (*Phyllotoma conformis* Fallén, 1829; *Selandria tibialis* Stephens, 1835; *Blennocampa spiraeae* Brischke, 1883). The larvae feed on the Spiraea spp., Filipendula spp., Alchemilla spp. (Rosaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **ES** (IR), **FE** (PR, MG). – Europe (WE, EE, NE, SE), Armenia, Turkey, China (Wei et al., 2006).

Claremontia uncta (Klug, 1816) [Tenthredo] (*Selandria humeralis* Snellen van Vollenhoven, 1869; *Blennocampa lioparea* Konow, 1884). Russia: **EP** (Liston, 1995). – Europe (WE, EE, NE).

Claremontia waldheimii (Gimmerthal, 1847) [Tenthredo] (*Selandria subcana* Zaddach, 1859; *Blennocampa subserrata* Thomson, 1870; *B. subcana angularis* Konow, 1895). Host plant: Geum spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS), **ES** (Zhelochovtsev, Zinovjev, 1996), **FE** (AM, PR). – Europe (WE, EE, NE, SE), Armenia, Turkey, Mongolia.

ENDELOMYIA Ashmead, 1898. Type species *Selandria rosae* T.W. Harris, 1841. The larvae skeletonize of leaves of trees and shrubs, pupate in the soil. The genus is distributed in Palaearctic and Oriental region; one wasp species introduced into the N America. Number of species: World and Palaearctic – 3; Russia – 1.

Endelomyia aethiops (Gmelin, 1790) [Tenthredo] (*Tenthredo morio* Fabricius, 1781; *T. atratula* Dahlbom, 1835; *Selandria rosae* T.W. Harris, 1841; *Eriocampa livonensis* Gimmerthal, 1844; *E. nitida* Tischbein, 1846; *Tenthredo dolosa* Eversmann, 1847; *Emphytus radialis* Eversmann, 1847; *Selandria soror* Snellen van Vollenhoven, 1869; *Eriocampa atratula* Thomson, 1870; *E. testaceipes* Cameron, 1874; *E. caninae* Cameron, 1878; *Poecilosoma nigricolle* Cameron, 1882). Host plant: Rosa spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (AL), **FE** (PR). – Europe (WE, EE, NE, SE), Georgia, Armenia, Kyrgyzstan; introduced into the N America.

ENDEMOLYIA Wei, 1998. Type species *Endemolygia genata* Wei, 1998. The larvae skeletonize of leaves of trees and shrubs, pupate in the soil. The genus is distributed in East Asia and Oriental

region. Number of species: World – 6; Palaearctic – 1; Russia – 1.

Endemyolia negativa (Malaise, 1931) [Caliroa]. Russia: **FE** (PR). – China (Wei et al., 2006).

EUPAREOPHORA Enslin, 1914. Type species *Blennocampa exarmata* Thomson, 1871. The genus is distributed in West Palaearctic and Nearctic. Number of species: World – 2; Palaearctic – 1; Russia - 1.

Eupareophora exarmata (Thomson, 1871) [*Blennocampa*]. Host plant: *Fraxinus* spp. (Oleaceae). Russia: **EP** (NC). – Europe (WE, EE, NE), Georgia.

EURHADINOCERAEA Enslin, 1920 (*Pseudoblennocampa* Malaise, 1935). Type species *Rhadinoceraea roseni* Enslin, 1920. The larvae feed on the Ranunculaceae. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 16; Palaearctic – 15; Russia – 4.

Eurhadinoceraea athaliooides (Jakovlev, 1891) [Monophadnus] (*Rhadinoceraea singularis* Konow, 1897). Host plant: *Clematis* spp., *Pulsatella* spp. (Ranunculaceae). Russia: **EP** (NC), **FE** (PR). – Europe (WE), Armenia, China (NC).

Eurhadinoceraea roseni (Enslin, 1920) [*Rhadinoceraea*]. Host plant: *Clematis* spp. (Ranunculaceae). Russia: **FE** (KH). – China.

Eurhadinoceraea sanguinicollis (Mocsáry, 1880) [*Blennocampa*] (*Rhadinoceraea insignis* Konow, 1896). Host plant: *Clematis* spp. (Ranunculaceae). Russia: **ES** (IR). – Europe (EE).

Eurhadinoceraea ventralis (Panzer, 1799) [Tenthredo] (*Monophadnus rufoniger* Tischbein, 1852; *Blennocampa coronata* André, 1881). Host plant: *Clematis recta*, *C. vitalba* (Ranunculaceae). Russia: **EP** (C), **WS** (NS), **ES** (TU). – Europe (WE, SE), Kyrgyzstan, Kazakhstan.

EUTOMOSTETHUS Enslin, 1914 (*Atomostethus* Enslin, 1914; *Tomostethopsis* Sato, 1928; *Forsia* Malaise, 1931). Type species *Tenthredo luteiventris* Klug, 1816. The larvae feed on the Juncaceae, Poaceae, Cyperaceae. The genus is distributed in Palaearctic and Oriental region; two species were introduced into the N America. Number of species: World – > 100; Palaearctic – > 60; Russia – 10 (+ 1 ssp.).

Eutomostethus apicalis (Matsumura, 1912) [Monophadnus] (*Tomostethus juncivorus* Rohwer, 1924). Host plant: *Juncus* spp. (Juncaceae). Russia: **FE** (SA, KU). – Japan (Hok, Hon, Shi).

Eutomostethus ephippium ephippium (Panzer, 1798) [Tenthredo] (*Tenthredo dubia* Gmelin, 1790; *Selandria inhabilis* Norton, 1861). Host plant: *Poa* spp. (Poaceae). Russia: **EP** (N, NW, C, E, S), **UR**, **FE** (PR). – Europe (WE, EE, NE, SE), N Africa, Caucasus, Turkey, India (NW); introduced into the N America.

Eutomostethus ephippium vopiscus (Konow, 1899) [Tomostethus]. Host plant: *Poa* spp. (Poaceae). Russia: **EP** (NC, CR). – Europe (EE), Georgia, Armenia.

Eutomostethus flavipes (Matsumura, 1911) [Tomostethus]. Russia: **FE** (SA).

Eutomostethus gagathinus (Klug, 1816) [Tenthredo] (*E. gagathinus meridionalis* Benson, 1954). Host plant: *Juncus* spp. (Juncaceae), *Carex* spp. (Cyperaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (OM, NS, AL), **ES** (IR). – Europe (WE, EE, NE, SE), N Africa, SW Asia, Kazakhstan, Mongolia.

Eutomostethus luteiventris (Klug, 1816) [Tenthredo] (*Tenthredo fuscipennis* Serville, 1823; *T. fuscipennis* Lepeletier, 1823; *Phyllotoma fuscipennis* Fallén, 1829). Host plant: *Juncus* spp. (Juncaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE, SE), Caucasus; introduced into the N America.

Eutomostethus metallicus (Sato, 1928) [Tomostethopsis]. Russia: **FE** (PR). – Korean Peninsula, China (NE, SE).

Eutomostethus punctatus (Konow, 1887) [Tomostethus] (*Tomostethus brachycera* Cameron, 1893). Host plant: *Carex* spp. (Cyperaceae). Russia: **EP** (E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (TU, IR), **FE** (PR). – Europe (WE, EE, NE, SE), Mongolia, China (NC).

Eutomostethus teberdicus Muche, 1969. Russia: **EP** (NC).

Eutomostethus tomostethi (Malaise, 1931) [Forsia]. Russia: **FE** (PR, SA, KA).

Eutomostethus tricolor (Malaise, 1934) [Tomostethus] (*E. hyalinus* Takeuchi, 1936). Russia: **FE** (PR, SA). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

FENELLA Westwood, 1839 (*Melinia* Costa, 1859; *Paraphyllotoma* Forsius, 1930). Type species *Fenella nigrita* Westwood, 1839. The larvae in mines on leaves of herbaceous plants. The genus is distributed in Palaearctic; one species was introduced into the N America. Number of species: World and Palaearctic – 11; Russia – 3.

Fenella minuta (Dahlbom, 1835) [Phyllotoma] (*F. voigti* Hering, 1932). Host plant: *Geranium*

spp. (Geraniaceae). Russia: **EP** (NC), **ES** (IR), **FE** (AM). – Europe (WE, EE, NE, SE), Kyrgyzstan, Kazakhstan, Mongolia.

Fenella monilicornis (Dahlbom, 1835) [Phyllotoma] (*F. famosa* Benson, 1950). Host plant: *Geranium* spp. (Geraniaceae). Russia: **WS** (AL). – Europe (WE, EE, NE), Mongolia, China (NW).

Fenella nigrita Westwood, 1839 (*Melinia minutissima* Costa, 1859; *Phyllotoma tormentillae* Healy, 1868; *Fenella agrimoniae* Brischke, 1888). Host plant: *Agrimonia* spp., *Potentilla* spp. (Rosaceae). Russia: **EP** (NW), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (YA). – Europe (WE, EE, NE, SE), Kyrgyzstan, Kazakhstan, Mongolia, Korean Peninsula, Japan (Hon); introduced into the N America.

FENUSA Leach, 1817 (*Kaliosysphinga* Tischbein, 1846; *Aphadnurus* Costa, 1859; *Phaenusa* Cameron, 1875; *Phoenusa* André, 1880; *Caliosysphinga* Konow, 1905; *Lithoryssus* Brues, 1906; *Kaliofenus* Viereck, 1910). Type species *Tenthredo pumila* Klug, 1818. The larvae in mines on leaves of trees. The genus is distributed in Holarctic and Oriental region; one species was introduced into the Afrotropical region. Number of species: World – 10; Palaearctic – 8; Russia – 6 from 2 subgenera.

Fenusia (Fenusia) dohrnii (Tischbein, 1846) [*Kaliosysphinga*] (*F. curtus* Norton, 1862; *Phaenusa melanopoda* Cameron, 1876; *Fenella westwoodi* Cameron, 1882). Host plant: *Alnus* spp., *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (TU, IR, BR), **FE** (KU). – Europe (WE, EE, NE, SE), Turkey, Kazakhstan, Japan (Hok, Hon, Shi); introduced into the N America and Tropical Africa.

Fenusia (Fenusia) pumila Leach, 1817 (*Tenthredo pumila* Klug, 1818; *Aphadnurus tantillus* Costa, 1859; *Fenusa fuliginosa* Healy, 1869; *F. minima* Brischke, 1883). Host plant: *Betula* spp., *Alnus* spp. (Betulaceae), *Ulmus* spp. (Ulmaceae). Russia: **EP** (N, NW, C, E, NC), **WS** (Lelej, Taeger, 2007), **ES** (IR, YA), **FE** (KH, SA, KA). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan, Kazakhstan, Mongolia, China (SW), Japan (Hok, Hon); introduced into the N America.

Fenusia (Kaliofenus) *ulmi* Sundevall, 1847 (*F. intermedia* Thomson, 1871; *Messa alsia* MacGillivray, 1923). Host plant: *Ulmus* spp. (Ulmaceae). Russia: **EP** (C, E, S, NC), **ES** (IR, BR), **FE** (KH, PR). – Europe (WE, EE, NE, SE), Georgia, Armenia,

Turkey, Japan (Smith, 1981); introduced into the N America.

Fenusia (Kaliofenus) *zinojevi* (Liston, 1994) [Kaliofenus]. Russia: **FE** (PR).

Fenusia absens D.R. Smith et Altenhofer, 2011. Host plant: *Ulmus pumila* (Ulmaceae). Russia: **WS** (NS).

Fenusia ewaldi D.R. Smith, 2011. Host plant: *Rosa* spp. (Rosaceae). Russia: **WS** (NS).

FENUSELLA Enslin, 1912 (*Melanobates* MacGillivray, 1916). Type species *Fenusia wuestneii* Konow, 1894. The larvae in mines on leaves of Betulaceae, Salicaceae, etc. The genus is distributed in Holarctic. Number of species: World – 11; Palaearctic – 8; Russia – 4.

Fesunella glaucopis (Konow, 1907) [*Phoenusa*] (*Phoenusa tictinensis* Magretti, 1886). Host plant: *Populus* spp. (Salicaceae). Russia: **EP** (C, E, S), **UR**, **ES** (IR). – Europe (WE, EE, NE, SE), Kazakhstan.

Fesunella hortulana (Klug, 1818) [*Tenthredo*] (*Phoenusa doderleini* De-Stefani, 1883; *Fenusella soenderupi* Hering, 1935). Host plant: *Populus* spp. (Salicaceae). Russia: **EP** (NC). – Europe (WE, EE, SE), N Africa, Azerbaijan, Turkey, Central Asia; introduced into the N America.

Fenusella nana (Klug, 1816) [*Tenthredo*] (*Phyllotoma mellita* Newman, 1870; *Fenusia quercus* Cameron, 1885; *Scolionoeura laeta* Enslin, 1918). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS), **ES** (IR, BR), **FE** (AM, PR). – Europe (WE, EE, NE), Kyrgyzstan, Kazakhstan, Mongolia, Japan (Hok); introduced into the N America.

Fenusella wuestneii (Konow, 1894) [*Fenusia*]. Host plant: *Salix* spp. (Salicaceae). Russia: **ES** (IR, BR), **FE** (KH). – Europe (WE, EE, NE), Kyrgyzstan, Kazakhstan, Japan (Hon); introduced into the N America.

HALIDAMIA Benson, 1939. Type species *Hylotoma affinis* Fallén, 1807. The genus is distributed in West Palaearctic, introduced into the Nearctic. Number of species: Russia – 1.

Halidamia affinis (Fallén, 1807) [*Hylotoma*] (*Tenthredo hyalina* Klug, 1816; *Blennocampa assimilis* Thomson, 1870; *B. formosella* Costa, 1882; *B. affinis pleuritica* Enslin, 1914). Host plant: *Galium* spp. (Rubiaceae). Russia: **EP** (NW, C, E, S, NC, CR), **UR**. – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey; introduced into the N America.

HETERARTHUS Stephens, 1835 (*Phyllotoma* Fallén, 1829; *Decatria* Stephens, 1835; *Druida* Newman, 1838; *Phlebatrophia* MacGillivray, 1909). Type species *Tenthredo ochropoda* Klug, 1818. The larvae in mines on leaves of Acer (Sapindaceae), Betulaceae, Salicaceae. The genus is distributed in Palaearctic; one species in Oriental region; one species introduced to North America. Number of species: World – 22; Palaearctic – 21; Russia – 11.

Heterarthrus aceris (Kaltenbach, 1856) [Phyllotoma] (*Phyllotoma fumipennis* Cameron, 1888). Host plant: Acer platanoides (Sapindaceae). Russia: **EP** (C, S). – Europe (WE, EE, NE, SE), Armenia.

Heterarthrus aceroides (Malaise, 1931) [Phyllotoma]. Russia: **FE** (KA).

Heterarthrus aihinoensis Haris, 2006. Russia: **FE** (KU).

Heterarthrus alnivorus Togashi, 1992. Host plant: Alnus spp. (Betulaceae). Russia: **FE** (PR). – Japan (Hon).

Heterarthrus fasciatus (Malaise, 1931) [Phyllotoma]. Host plant: Populus spp. (Salicaceae). Russia: **ES** (BR), **FE** (KA).

Heterarthrus flavigollis (Gussakovskij, 1947) [Phyllotoma]. Host plant: Acer platanoides (Sapindaceae). Russia: **EP** (NC). – Europe (WE, EE, NE), Georgia.

Heterarthrus microcephalus (Klug, 1818) [Tenthredo]. Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW, C, NC), **WS** (NS), **ES** (IR), **FE** (KH). – Europe (WE, EE, NE, SE), Armenia, Kyrgyzstan, Kazakhstan.

Heterarthrus nemoratus (Fallén, 1808) [Hylotoma] (*Fenusia parviceps* Newman, 1837; *Phyllotoma tenella* Zaddach, 1859; *Phlebatrophia mathesonii* MacGillivray, 1909). Host plant: Betula spp., Alnus spp. (Betulaceae). Russia: **EP** (N, NW, C), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR). – Europe (WE, EE, NE), Armenia; introduced into the N America.

Heterarthrus ochropoda (Klug, 1818) [Tenthredo] (*Decatria fuscipennis* Stephens, 1835; *Phyllotoma pinguis* Snellen van Vollenhoven, 1869; *Ph. nigrescens* Grädl, 1881; *Ph. costae* Costa, 1894; *Ph. maxima* Strobl, 1896). Host plant: Populus spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **EP** (NW, C, S, NC, CR), **UR**, **WS** (NS), **ES** (IR, BR), **FE** (AM, KH). – Europe (WE, EE, NE), Turkey, Kyrgyzstan.

Heterarthrus vagans (Fallén, 1808) [Hylotoma] (*Tenthredo melanopyga* Klug, 1818; *T. amaura* Klug,

1818; *Phyllotoma leucopoda* Dahlbom, 1835; *Ph. kamtchatica* Malaise, 1931; *Heterarthrus vagans anatolicus* Muche, 1983). Host plant: Alnus spp., Betula spp. (Betulaceae). Russia: **EP** (N, NW, C, E, NC, CR), **UR**, **ES** (IR), **FE** (PR, KU, KA). – Europe (WE, EE, NE, SE), Azerbaijan, SW Asia, China (NE); introduced into the N America.

Heterarthrus wuestneii (Konow, 1905) [Phyllotoma] (*Phyllotoma aceris* McLachlan, 1867; *Heterarthrus tauricus* Ermolenko, 1984; *H. healyi* Altenhofer et Zombori, 1987). Host plant: Acer spp. (Sapindaceae), Alnus spp. (Betulaceae). Russia: **EP** (CR). – Europe (WE, EE), N America.

HINATARA Benson, 1936. Type species *Fenusia excisa* Konow, 1885. The larvae in mines on leaves of trees. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 4; Russia – 3.

Hinatara hakusana Togashi, 2002. Russia: **FE** (PR). – Japan (Hon).

Hinatara nigripes (Konow, 1907) [Fenusia]. Host plant: Acer campestre (Sapindaceae). Russia: **EP** (S). – Europe (WE, EE, SE).

Hinatara recta (Thomson, 1871) [Blennocampa]. Host plant: Acer platanoides (Sapindaceae). Russia: **EP** (NW, C, S). – Europe (WE, EE, NE), Armenia.

HOPLOCAMPOIDES Enslin, 1914. Type species *Selandria xylostei* Giraud, 1863. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 2; Russia – 1.

Hoplocampoides xylostei (Vallot, 1836) [Tenthredo] (*Selandria xylostei* Giraud, 1863). Host plant: Lonicera spp. (Caprifoliaceae). Russia: **EP** (N, NW, C), **ES** (KR). – Europe (WE, EE, NE, SE).

LAGONIS Ross, 1937. Type species *Selandria nevadensis* Cresson, 1880. The genus is distributed in East Palaearctic and Nearctic. Number of species: World – 3; Palaearctic – 2; Russia – 1.

Lagonis opacicollis (Malaise, 1931) [Rhadinoceraea]. Host plant: Sambucus sieboldiana (Adoxaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi).

MASAAKIA Takeuchi, 1950. Type species *Masaakia longivaginata* Takeuchi, 1950. The genus is distributed in East Asia. Number of species: World and Palaearctic – 5; Russia – 2.

Masaakia kichizoi Haris, 2006. Russia: **FE** (KU).

Masaakia longivaginata Takeuchi, 1950. Russia: **FE** (KU). – Japan (Hon).

METALLUS Forbes, 1885 (*Entodecta* Konow, 1886; *Polybates* MacGillivray, 1909). Type species *Metallus rubi* Forbes, 1885. The larvae in mines on leaves of Rosaceae. The genus is distributed in Holarctic and Oriental region. Number of species: World – 21; Palaearctic – 7; Russia – 5.

Metallus adamantis Lee et Ryu, 1996. Russia: **FE** (PR). – Korean Peninsula.

Metallus albipes (Cameron, 1875) [*Phaenusa*] (*Entodecta tenuicornis* Hellén, 1935). Host plant: Rubus spp. (Rosaceae). Russia: **EP** (C), **FE** (SA, KA, MG). – Europe (WE, EE, NE), Japan (Hon).

Metallus beckeri (Konow, 1904) [*Entodecta*]. Russia: **EP** (NC). – Georgia, Turkey.

Metallus lanceolatus (Thomson, 1870) [*Blennocampa*] (*Fenusae gei* Brischke, 1883; *Entodecta decolor* Konow, 1886; *Metallus bensoni* D.R. Smith, 1971). Host plant: Geum spp. (Rosaceae). Russia: **EP** (NW, C, NC), **UR**, **FE** (AM). – Europe (WE, EE, NE), N America.

Metallus pumilus (Klug, 1816) [*Tenthredo*] (*Emphytus pumilio* Hartig, 1837; *Fenusae rubi* Boie, 1848). Host plant: Rubus spp. (Rosaceae). Russia: **EP** (NW, C, NC), **ES** (IR, BR), **FE** (KH, PR). – Europe (WE, EE, NE, SE), Japan (Hon).

MONARDIS Enslin, 1914. Type species *Tenthredo plana* Klug, 1817. The genus is distributed in Holarctic and Oriental region. Number of species: World – 8; Palaearctic – 4; Russia – 1.

Monardis plana (Klug, 1817) [*Tenthredo*] (*Tenthredo sericans* Hartig, 1837; *Blennocampa rosarum* Brischke, 1883). Host plant: Rosa spp. (Rosaceae); larvae in the buds and shoots. Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (KM). – Europe (WE, EE, NE, SE), Caucasus.

MONOPHADNOIDES Ashmead, 1898 (*Pseudomonophadnus* Malaise, 1935). Type species *Selandria rubi* T.W. Harris, 1845. The genus is distributed in Holarctic and Oriental region. Number of species: World and Palaearctic – 9; Russia – 4.

Monophadnoides klausnitzeri (Muche, 1973) [Monophadnus]. Russia: **EP** (NC).

Monophadnoides rubi (T.W. Harris, 1845) [*Selandria*] (*Tenthredo geniculata* Hartig, 1837; *T. longicornis* Hartig, 1837; *Selandria nigella* Cresson, 1880;

Monophadnus hudsonicus W.F. Kirby, 1882; *M. atricornus* MacGillivray, 1893; *M. atricornis* Konow, 1905; *Blennocampa gillettei* Weldon, 1907; *Monophadnoides consobrinus* MacGillivray, 1908; *M. costalis* MacGillivray, 1908; *M. coracinus* MacGillivray, 1908; *M. collaris* MacGillivray, 1908; *M. conspicuus* MacGillivray, 1908; *M. conspersus* MacGillivray, 1908; *M. crassus* MacGillivray, 1908; *M. concessus* MacGillivray, 1908; *Aphanisus nigritus* MacGillivray, 1908; *Aphanisus lenis* Rohwer, 1909; *Monophadnoides costatus* MacGillivray, 1916; *M. kincaidi* MacGillivray, 1923; *M. shawi* MacGillivray, 1923; *M. consonus* MacGillivray, 1923; *M. constitutus* MacGillivray, 1923; *M. corythus* MacGillivray, 1923; *M. curiosus* MacGillivray, 1923; *Paracharactus obversus* MacGillivray, 1923). Host plant: Geum spp., Filipendula spp., Rubus spp. (Rosaceae). Russia: **EP** (NW, C, E), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (KR, BR). – Europe (WE, EE, NE, SE), Mongolia, N America; introduced into the S America.

Monophadnoides ruficruris (Brullé, 1832) [*Selandria*] (*Blennocampa flavigollis* Jacobs, 1884; *Monophadnus dispar* Konow, 1886; *M. ruficruris plagiatus* Enslin, 1914). Host plant: Rubus idaeus (Rosaceae). Russia: **EP** (NC). – Europe (WE, EE, SE).

Monophadnoides tuberculatus Smith et Wei, 2015. Host plant: Rosaceae. Russia: **FE** (PR). – China (NE), Korean Peninsula.

MONOPHADNUS Hartig, 1837 (*Corporaalinus* Forsius, 1925; *Doderia* Malaise, 1935). Type species *Tenthredo albipes* Gmelin, 1790. The larvae without branched spines; feed on Ranunculaceae. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – about 25; Palaearctic – about 10; Russia – 3.

Monophadnus monticola (Hartig, 1837) [*Tenthredo*] (*Selandria feriata* Zaddach, 1859; *Monophadnus fuliginipennis* Costa, 1859; *M. fulgidipennis* Dalla Torre, 1894). Russia: **EP** (NW, C, CR). – Europe (WE, EE, NE, SE).

Monophadnus pallescens (Gmelin, 1790) [*Tenthredo*] (*Tenthredo albipes* Gmelin, 1790; *Selandria tiliae* Norton, 1861; *Blennocampa emarginata* Thomson, 1871; *Hoplocampa calceolata* Costa, 1881; *Monophadnus bipunctatus* MacGillivray, 1908; *M. furvus* Benson, 1930). Host plant: Ranunculus spp., Anemone spp. (Ranunculaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (KM, AL), **ES** (IR), **FE** (PR). – Europe (WE, EE, NE, SE), Caucasus,

Turkey, Kyrgyzstan, Kazakhstan; introduced into the N America.

Monophadnus spinolae (Klug, 1816) [Tenthredo] (*Hylotoma ventralis* Spinola, 1806; *Tenthredo croceiventris* Klug, 1816; *T. bipartita* Lepeletier, 1823; *T. bipartita* Serville, 1823; *Monophadnus pleuriticus* Costa, 1859; *M. gastricus* Costa, 1859; *Blennocampa scutellaris* André, 1881; *Monophadnus spinolae pectoralis* Konow, 1886; *Periclista nigricarpa* Costa, 1894; *Monophadnus spinolae ruberrima* Enslin, 1914; *M. spinolae rufipictus* Enslin, 1914). Host plant: Clematis spp. (Ranunculaceae). Russia: **EP** (CR). – Europe (WE, EE, SE), Georgia; introduced into the New Zealand.

OBTUSIA Malaise, 1964. Type species *Obtusia ussuriensis* Malaise, 1964. The genus is distributed in East Palaearctic. Number of species: one East Asian species.

Obtusia ussuriensis Malaise, 1964. Russia: **FE** (PR).

OKUTANIUS D.R. Smith, 1981. Type species *Okutanius lobatus* D.R. Smith, 1981. The genus is distributed in East Palaearctic. Number of species: World – 2; Palaearctic – 2; Russia – 1.

Okutanius lobatus D.R. Smith, 1981. Russia: **FE** (PR). – Korean Peninsula.

PARACHARACTUS MacGillivray, 1908 (*Dicrostema* Benson, 1952). Type species *Paracharactus obscuratus* MacGillivray, 1908. The genus is distributed in Holarctic. Number of species: World – 7; Palaearctic – 4; Russia – 2.

Paracharactus gracilicornis (Zaddach, 1859) [Selandria]. Host plant: Adoxa spp. (Adoxaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (AL). – Europe (WE, EE, NE, SE), Kyrgyzstan, Kazakhstan.

Paracharactus japonicus (Malaise, 1931) [Neotomostethus]. Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

PARAMASAAKIA Ermolenko, 1971. Type species *Paramasaakia ajnu* Ermolenko, 1971. The genus is distributed in East Asia. Number of species: one species.

Paramasaakia ajnu Ermolenko, 1971. Russia: **FE** (SA). – China (SE).

PAREOPHORA Konow, 1886. Type species *Tenthredo luridiventris* Klug, 1816. The genus is

distributed in Palaearctic. Number of species: World and Palaearctic – 4; Russia – 1.

Pareophora pruni (Linnaeus, 1758) [Tenthredo] (*Tenthredo luridiventris* Klug, 1816; *T. nigripes* Klug, 1816; *Blennocampa bicolor* Tischbein, 1852; *Monophadnus nigripes maculiventris* Costa, 1894). Host plant: *Prunus spinosa*, *P. tenella* (Rosaceae). Russia: **EP** (S, NC, CR). – Europe (WE, EE, NE, SE).

PARNA Benson, 1936. Type species *Tenthredo tenella* Klug, 1816. The larvae in mines on leaves of trees. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 7; Russia – 2.

Parna apicalis (Brischke, 1888) [Blennocampa] (*P. re-seri* Liston, 1993). Host plant: *Tilia* spp. (Tiliaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).

Parna tenella (Klug, 1816) [Tenthredo] (*Blennocampa tiliae* Kaltenbach, 1874). Host plant: *Tilia* spp. (Tiliaceae). Russia: **EP** (C, E, NC), **FE** (PR). – Europe (WE, EE, NE), Armenia, Japan (Hon).

PERICLISTA Konow, 1886 (*Mogerus* MacGillivray, 1895; *Isodyctium* Ashmead, 1898; *Aphanisus* MacGillivray, 1908; *Neocharactus* MacGillivray, 1908; *Apericlista* Enslin, 1914; *Neoclista* Malaise, 1964). Type species *Tenthredo lineolata* Klug, 1816. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – about 55; Palaearctic – about 30; Russia – 4 from 2 subgenera.

Periclista (Periclista) albida (Klug, 1816) [Tenthredo] (*Tenthredo melanocephala* Fabricius, 1798; *T. testacea* Serville, 1823; *T. testacea* Lepeletier, 1823; *Selandria fulvicollis* Stephens, 1835; *S. versicolor* Newman, 1837; *Monophadnus inquilinus* Förster, 1844; *Periclista albida orbitalis* Enslin, 1914). Host plant: *Quercus robur*, *Q. mongolica* (Fagaceae). Russia: **EP** (S, NC, CR), **FE** (KH). – Europe (WE, EE, NE, SE).

Periclista (Periclista) lineolata (Klug, 1816) [Tenthredo] (*Monophadnus tenuicingulatus* Costa, 1859). Host plant: *Quercus robur* (Fagaceae). Russia: **EP** (NW, NC). – Europe (WE, EE, NE, SE).

Periclista (Periclista) pubescens (Zaddach, 1859) [Selandria] (*Periclista pubescens analis* Konow, 1886). Host plant: *Quercus* spp. (Fagaceae). Russia: **EP** (NW, S, CR). – Europe (WE, EE, SE).

Periclista (Neocharactus) albipennis (Zaddach, 1859) [Selandria]. Russia: **EP** (NW). – Europe (WE, EE).

PHYMATOCERA Dahlbom, 1835 (*Pectinia* Brullé, 1846; *Phymatoceros* Konow, 1905; *Hypargyricus* MacGillivray, 1908; *Melanoselandria* MacGillivray, 1908). Type species *Tenthredo aterrima* Klug, 1816. The larvae feed on the monocotyledonous plants (Liliales). The genus is distributed in Holarctic and Oriental region. Number of species: World – 13; Palaearctic – 6; Russia – 2.

Phymatocera aterrima (Klug, 1816) [Tenthredo] (*Tenthredo trichocera* Serville, 1823; *T. trichocera* Lepeletier, 1823; *Selandria robinsoni* Curtis, 1850). Host plant: *Polygonatum* spp. (Asparagaceae), *Convallaria* spp., *Smilacina* spp. (Convallariaceae). Russia: **EP** (NW, C, E, S, NC, CR), **WS** (NS). – Europe (WE, EE, NE, SE), Armenia, Kazakhstan, China (NW), Korean Peninsula.

Phymatocera nipponica Togashi, 1958. Host plant: Liliaceae. Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hon, Shi, Kyu).

PHYMATOCERIOLA Sato, 1928. Type species *Phymatoceriola suigenensis* Sato, 1928. The genus is distributed in East Asia. Number of species: World and Palaearctic – 4; Russia – 2.

Phymatoceriola suigenensis Sato, 1928. Russia: **ES** (IR), **FE** (KH). – Korean Peninsula.

Phymatoceriola ussuriensis Malaise, 1964. Russia: **FE** (PR).

PHYMATOCEROPTYSIS Rohwer, 1916. Type species *Phymatoceropsis fulvocincta* Rohwer, 1916. The genus is distributed in East Asia and Oriental region. Number of species: World – 9; Palaearctic – 5; Russia – 2.

Phymatoceropsis melanogaster He, Wei et Zhang, 2005. Russia: **FE** (PR). – China (CC, SE).

Phymatoceropsis peregrinator (Malaise, 1931) [Neotomostethus]. Russia: **FE** (KA). – Japan (Hok, Hon).

PROFENUSA MacGillivray, 1914 (*Gunnea* Malaise, 1964). Type species *Profenusa collaris* MacGillivray, 1914. The larvae in mines on leaves of trees. The genus is distributed in Holarctic and Oriental region. Number of species: World – 14; Palaearctic – 8; Russia – 2.

Profenusa pygmaea (Klug, 1816) [Tenthredo]. Host plant: *Quercus* spp., *Castanea sativa* (Fagaceae). Russia: **EP** (NW, C, S, NC). – Europe (WE, EE, NE, SE), Turkey.

Profenusa thomsoni (Konow, 1886) [Fenusia]. Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW, C, NC), **ES** (BR), **FE** (AM, KH). – Europe (WE, EE, NE), Armenia, Turkey, Kyrgyzstan, Kazakhstan, Japan (Hok, Hon); introduced into the N America.

RHADINOCERAEA Konow, 1886 (*Veratra* D.R. Smith, 1969). Type species *Tenthredo micans* Klug, 1816. The larvae feed on the Liliaceae, Iridaceae, Adoxaceae. The genus is distributed in Holarctic and Oriental region. Number of species: World – about 20; Palaearctic – about 10; Russia – 8 from 2 subgenera.

Rhadinoceraea (Rhadinoceraea) bensoni Beneš, 1961. Host plant: *Lilium* spp. (Liliaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR). – Europe (WE, EE, SE).

Rhadinoceraea (Rhadinoceraea) caucasica Dovnar-Zapolskij, 1930. Russia: **EP** (NC).

Rhadinoceraea (Rhadinoceraea) micans (Klug, 1816) [Tenthredo] (*Monophadnus iridis* Kaltenbach, 1862). Host plant: *Iris* spp. (Iridaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (AL). – Europe (WE, EE, NE, SE).

Rhadinoceraea (Rhadinoceraea) reitteri Konow, 1890. Host plant: *Iris* spp. (Iridaceae). Russia: **EP** (C). – Europe (WE, EE, SE).

Rhadinoceraea (Rhadinoceraea) sachalinensis Ermolenko, 1971. Russia: **FE** (SA).

Rhadinoceraea (Veratra) nodicornis Konow, 1886 (*Rh. heydeni* Konow, 1887). Host plant: *Veratrum* spp. (Liliaceae). Russia: **EP** (C, S), **UR**, **WS** (KM, AL), **ES** (KS, KR, IR, BR). – Europe (WE, EE, SE), China (NW).

Rhadinoceraea (Veratra) subarctica Hellén, 1948. Russia: **EP** (N). – Europe (NE).

Rhadinoceraea sibiricola Zhelochovtsev, 1939. Russia: **ES** (KR).

SCOLIONEURA Konow, 1890. Type species *Tenthredo betuleti* Klug, 1816. The genus is distributed in Holarctic, mainly in West Palaearctic; one species was introduced into the N America. Number of species: World and Palaearctic – 4; Russia – 1.

Scolioneura betuleti (Klug, 1816) [Tenthredo] (*Tenthredo nigricans* Klug, 1818; *Fenusia betulae* Zaddach, 1859). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (AL), **ES** (TU, IR, BR). – Europe (WE, EE, NE, SE), Armenia,

Kyrgyzstan, Kazakhstan, Mongolia; introduced into the N America.

SENOCLIDEA Rohwer, 1912. Type species *Senoclidea amala* Rohwer, 1912. The genus is distributed in East Palaearctic, Oriental and Australian regions. Number of species: World – 17; Palaearctic – 6; Russia – 1.

Senoclidea koreana (Konow, 1898) [Monophadnus]. Russia: **FE** (PR). – Korean Peninsula, China (Wei et al., 2006).

STETHOMOSTUS Benson, 1939. Type species *Tenthredo fuliginosa* Schrank, 1781. The larvae feed on Ranunculus (Ranunculaceae). The genus is distributed in Palaearctic and Oriental region; one species was introduced into the North America. Number of species: World – 6; Palaearctic – 4; Russia – 3.

Stethomostus flavigollaris (Sato, 1928) [Atomostethus]. Host plant: Ranunculus spp. (Ranunculaceae). Russia: **ES** (BR), **FE** (AM, PR). – China (NE), Korean Peninsula.

Stethomostus fuliginosus (Schrank, 1781) [Tenthredo] (*Tenthredo fusca* Serville, 1823; *T. fusca* Lepeletier, 1823; *Selandria geniculata* Stephens, 1835; *Blennocampa croceipes* Costa, 1864; *Monophadnus fukaii* Rohwer, 1910). Host plant: Ranunculus spp. (Ranunculaceae), Kerria spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (KM). – Europe (WE, EE, NE, SE), Turkey, Kazakhstan, Japan (Hon, Shi); introduced into the N America.

Stethomostus funereus (Klug, 1816) [Tenthredo]. Host plant: Ranunculus spp. (Ranunculaceae). Russia: **EP** (N, NW, C, E), **UR**, **ES** (BR). – Europe (WE, EE, NE), Turkey, Kazakhstan.

TOMOSTETHUS Konow, 1886. Type species *Tenthredo nigrita* Fabricius, 1804. The larvae feed on the woody plants. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – 8; Palaearctic – 6; Russia – 3.

Tomostethus juglans Takeuchi, 1929. Host plant: Juglans spp. (Juglandaceae). Russia: **FE** (PR). – Korean Peninsula.

Tomostethus nigritus (Fabricius, 1804) [Tenthredo] (*Tenthredo nigerrima* Klug, 1816; *T. brevicornis* Klug, 1816; *T. fraxini* Serville, 1823; *T. fraxini* Lepeletier, 1823; *Monophadnus latus* Costa, 1894). Host

plant: Fraxinus spp. (Oleaceae). Russia: **EP** (NW, C, S, NC), **ES** (BR), **FE** (PR, SA). – Europe (WE, EE, NE, SE), N Africa, Caucasus, Turkey, China (NE, CC), Korean Peninsula, Japan (Hon).

Tomostethus veles Konow, 1900. Russia: **ES** (IR).

ZAPHYMATOCERA Sato, 1928. Type species *Zaphymatocera typica* Sato, 1928. The genus is distributed in East Asia. Number of species: World and Palaearctic – 2; Russia – 1.

Zaphymatocera typica Sato, 1928. Russia: **FE** (KU, KA). – Korean Peninsula.

Subfamily NEMATINAE

ANOPLONYX Marlatt, 1896 (*Marlattia* Ashmead, 1898). Type species *Nematus lariciphagus* Zaddach, 1883. The larvae feed on Larix (Pinaceae). The genus is distributed in Holarctic. Number of species: World – 12; Palaearctic – 8; Russia – 7.

Anoplonyx apicalis (Brischke, 1883) [*Leptopus*] (*Leptopus curinthicus* Zaddach, 1883; *Camponiscus braunsi* Konow, 1884; *C. tscheki* Rogenhofer et Kohl, 1885; *C. carinthiacus* Dalla Torre, 1894). Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW), **UR**, **ES** (KR, IR, BR, YA, ZB), **FE** (AM). – Europe (WE, EE, NE), Mongolia.

Anoplonyx bilineatus Verzhutskii, 1981. Host plant: Larix spp. (Pinaceae). Russia: **ES** (TU, IR, YA, ZB), **FE** (MG). – Mongolia.

Anoplonyx destructor Benson, 1952. Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW). – Europe (WE, EE, NE), Korean Peninsula, Japan (Hon).

Anoplonyx lariciphagus (Zaddach, 1883) [*Nematus*] (*Camponiscus luridus* Konow, 1884; *Platycampus pectoralis obscurus* Enslin, 1915). Host plant: Larix spp. (Pinaceae). Russia: **ES** (KR, IR, BR, ZB). – Europe (WE, EE), Korean Peninsula.

Anoplonyx orientis D.R. Smith, 1988. Host plant: Larix leptolepis, L. kurilensis (Pinaceae). Russia: **FE** (KU). – Japan (Hok, Hon).

Anoplonyx ovatus (Zaddach, 1883) [*Leptopus*]. Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW), **ES** (YA, ZB). – Europe (WE, EE, NE).

Anoplonyx versicolor Vikberg, 1975 (*A. ornatus* Verzhutskii, 1981). Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW), **ES** (IR, BR, YA), **FE** (AM). – Europe (NE), Mongolia, Korean Peninsula.

CLADIUS Illiger, 1807 (*Priophorus* Dahlbom, 1835; *Trichiocampus* Hartig, 1837; *Stevenia* Brullé, 1846;

Eudryas Gistel, 1848; *Prionophorus* Agassiz, 1848). Type species *Tenthredo difformis* Panzer, 1799. The larvae feed on the woody plants. The genus is distributed in Holarctic and Oriental region; one species was introduced into the Neotropical and Australasian regions. Number of species: World – about 45; Palaearctic - > 35; Russia – 15 from 3 subgenera.

Cladius (Cladius) pectinicornis (Geoffroy, 1785) [Tenthredo] (*Tenthredo alces* Thunberg, 1789; *T. difformis* Panzer, 1799; *Cladius geoffroyi* Serville, 1823; *C. morio* Serville, 1823; *C. geoffroyi* Lepeletier, 1823; *C. morio* Lepeletier, 1823; *Nematus crassicornis* Stephens, 1835; *Cladius isomera* Norton, 1861; *C. ramicornis* André, 1880; *C. gracilicornis* Konow, 1884; *C. crassicornis* Konow, 1884; *C. comari* Stein, 1886; *C. hyalinopterus* Konow, 1886; *C. palmicornis* Konow, 1892; *C. ordubadensis* Konow, 1892; *C. major* Cobelli, 1892; *C. orientalis* Cameron, 1902; *C. tibialatus* Konow, 1906). Host plant: Rosa spp., Fragaria spp., Potentilla spp., Filipendula spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, KM, AL), **ES** (IR, BR, YA, ZB), **FE** (AM, PR, SA, KA, MG). – Europe (WE, EE, NE, SE), Georgia, Azerbaijan, SW Asia, Afghanistan, Central Asia, Kazakhstan, China (NE, NC), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), India (NW), N America.

Cladius (Priophorus) brullei (Dahlbom, 1835) [Priophorus] (*C. immunis* Stephens, 1835; *Nematus melanostigma* Stephens, 1835; *Cladius tener* Zaddach, 1859; *C. tristis* Zaddach, 1859; *C. parvus* Zaddach, 1883; *Priophorus rubivorus* Rohwer, 1922; *P. montanus* Rohwer, 1922; *P. rubi* Rohwer, 1922; *P. foveivaginatus* Malaise, 1931). Host plant: Rubus spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (AL), **ES** (KR, IR, ZB), **FE** (PR, SA, KA). – Europe (WE, EE, NE, SE), Central Asia, China (NC), Korean Peninsula, Japan (Hok, Hon), India, SE Asia, N America; introduced into the S America, Australia, New Zealand.

Cladius (Priophorus) compressicornis (Fabricius, 1804) [Tenthredo] (*Tenthredo albipes* Fallén, 1808; *Cladius pallipes* Lepeletier, 1823; *C. pallipes* Serville, 1823; *C. albipes* Hartig, 1837; *C. aequalis* Norton, 1872; *Priophorus discors* Konow, 1894; *Cladius solitarius* Dyar, 1895; *Priophorus padi collaris* Enslin, 1915; *P. modestius* MacGillivray, 1921; *P. munditus* MacGillivray, 1921; *P. crataegi* Rohwer, 1922; *P. pruni* Rohwer, 1922; *P. plesius* Rohwer, 1922;

P. virginianus Rohwer, 1922). Host plant: Salix spp., Populus spp. (Salicaceae), Rubus spp., Prunus spp. (Rosaceae), and others. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **ES** (KR, IR, YA, ZB), **FE** (KH, PR, SA, KA, MG). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Iran, Kyrgyzstan, Kazakhstan, China (CC), Korean Peninsula, Japan (Hok, Hon), N America.

Cladius (Priophorus) corniger Zhelochovtsev, 1952. Russia: **ES** (ZB). – China (Wei et al., 2006).

Cladius (Priophorus) hyalopterus (Jakovlev, 1891) [Priophorus] (*Priophorus triangulifer* Konow, 1902). Russia: **EP** (E), **UR**, **WS** (KM), **ES** (IR, ZB), **FE** (AM). – Kyrgyzstan, Kazakhstan, Mongolia, China (NW, NC).

Cladius (Priophorus) nubilus (Konow, 1897) [Trichiocampus] (*Priophorus dellei* Conde, 1935). Russia: **EP** (E), **UR**, **WS** (AL), **ES** (IR), **FE** (AM, PR, KU). – China (NE).

Cladius (Priophorus) rufipes Serville, 1823 (*C. rufipes* Lepeletier, 1823; *C. uncinnata* Hartig, 1837; *C. discrepans* Costa, 1859; *Trichiocampus garbiglietii* Costa, 1864; *Priophorus phaeopterus* Costa, 1894). Host plant: Ulmus spp. (Ulmaceae). Russia: **EP** (C, S, NC). – Europe (WE, EE, NE), Turkey, Iran.

Cladius (Trichiocampus) aeneus Zaddach, 1859. Host plant: Salix spp., Populus spp. (Salicaceae). Russia: **EP** (N, NW), **ES** (KR, IR, YA). – Europe (EE, NE).

Cladius (Trichiocampus) cannabis (Xiao et Huang, 1986) [Trichiocampus]. Host plant: Cannabis sativa (Cannabaceae). Russia: **EP** (E), **ES** (IR), **FE** (AM). – China (NC, CC).

Cladius (Trichiocampus) grandis (Serville, 1823) [Nematus] (*Tenthredo viminalis* Fallén, 1808; *Nematus grandis* Lepeletier, 1823; *Cladius eucera* Bouché, 1834; *C. luteicornis* Stephens, 1835; *C. luteiventris* Dahlbom, 1836; *Aulacomerus lutescens* Lintner, 1888; *Platycampus victoria* MacGillivray, 1920). Host plant: Populus spp., Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (Lelej, Taeger, 2007), **ES** (IR, BR, YA), **FE** (MG). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Kazakhstan; introduced into the N America.

Cladius (Trichiocampus) pilicornis Curtis, 1833. Host plant: Crataegus spp. (Rosaceae). Russia: **ES** (YA). – Europe (WE, EE, NE, SE).

Cladius (Trichiocampus) populi (Okamoto, 1912) [Trichiocampus]. Host plant: Populus spp. (Salicaceae). Russia: **FE** (SA). – Japan (Hok, Hon).

Cladius (Trichiocampus) rufus Verzhutskii, 1966 [*Trichiocampus pseudoviminalis* Huang et Wang,

1993). Host plant: *Populus* spp. (Salicaceae). Russia: **ES** (IR), **FE** (AM). – China (NE).

Cladius (Trichiocampus) takeuchii Liston, Taeger et Blank, 2009 (*Trichiocampus pruni* Takeuchi, 1956). Host plant: *Prunus* spp. (Rosaceae). Russia: **FE** (KU). – China (SE), Japan (Hok, Hon), SE Asia.

Cladius (Trichiocampus) ulmi (Linnaeus, 1758) [Tenthredo] (*C. eradiatus* Hartig, 1837; *C. drewseni* Thomson, 1871; *Priophorus distinguendus* Enslin, 1915; *P. laevifrons* Benson, 1936). Host plant: *Ulmus* spp. (Ulmaceae). Russia: **EP** (C, NC, CR), **WS** (AL). – Europe (WE, EE, NE, SE), Armenia.

DINEURA Dahlbom, 1835 (*Leachia* Brullé, 1846; *Dinevra* Agassiz, 1848; *Varna* Ross, 1937). Type species *Tenthredo degeeri* Klug, 1817. The larvae feed on the woody plants. The genus is distributed in Holarctic. Number of species: World and Palaearctic – 9; Russia – 5.

Dineura parcivalvis (Konow, 1901) [Pontania]. Russia: **ES** (IR). – Europe (NE).

Dineura pullior Schmidt et Walter, 1995. Russia: **EP** (N). – Europe (NE).

Dineura stilata (Klug, 1816) [Tenthredo] (*Tenthredo mediocris* Lepeletier et Serville, 1828; *Nematus apicalis* Stephens, 1835; *Selandria scapularis* Stephens, 1835; *Nematus xanthocerus* Hartig, 1840; *Dineura flaveola* Eversmann, 1847; *Nematus posticus* Förster, 1854; *N. xanthopus* Zaddach, 1876; *N. v-flavum* Cameron, 1882; *Dineura melanoxantha* Zaddach, 1883; *D. sulcifrons* Konow, 1885; *D. nigroflava* Magretti, 1886; *Pristiphora oblita* Costa, 1894; *Pontania ancilla* Konow, 1901; *Dineura stilata virilis* Enslin, 1918). Host plant: *Sorbus* spp., *Crataegus* spp., *Cotoneaster* spp. (Rosaceae). Russia: **EP** (E). – Europe (WE, EE, NE, SE).

Dineura testaceipes (Klug, 1816) [Tenthredo] (*D. ventralis* Zaddach, 1859; *D. nigra* Zaddach, 1883; *D. testaceipes nigritiventris* Enslin, 1915). Host plant: *Sorbus* spp., *Crataegus* spp., *Cotoneaster* spp. (Rosaceae). Russia: **EP** (NW, C, E), **ES** (IR, BR, YA), **FE** (KH, PR, KA). – Europe (WE, EE, NE).

Dineura virididorsata (Retzius, 1783) [Tenthredo] (*Tenthredo nigricans* Christ, 1791; *T. degeeri* Klug, 1817; *Nematus varius* Lepeletier, 1823; *N. varius* Serville, 1823; *Dineura hartigii* Gimmerthal, 1844; *D. virididorsata dorsalis* Enslin, 1915). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E), **UR**, **ES** (IR, BR, YA), **FE** (AM, PR, SA, KA). – Europe (WE, EE, NE), China (Wei et al., 2006), Japan (Hok).

ENDOPHYTUS Hering, 1934 (*Neopelmatopus* Conde, 1934; *Verna* Kaisila, 1960; *Verna* Kontuniemi, 1960). Type species *Pelmatopus anemones* Hering, 1924. The larvae feed on *Anemone nemorosa* (Ranunculaceae). The genus is distributed in West Palaearctic. Number of species: one species.

Endophytus anemones (Hering, 1924) [*Pelmatopus*] (*Pelmatopus tenuiserra* Lindqvist, 1949). Host plant: *Anemone nemorosa* (Ranunculaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).

EUURA Newman, 1837 (*Cryptocampus* Hartig, 1837; *Evura* Agassiz, 1848; *Pontania* Costa, 1852; *Epitactus* Förster, 1854; *Amauronematus* Konow, 1890; *Holcocneme* Konow, 1890; *Pachynematus* Konow, 1890; *Brachycolus* Konow, 1895; *Holcocnema* Schulz, 1906; *Holcocnemis* Konow, 1907; *Pteronidea* Rohwer, 1911; *Pontopristia* Malaise, 1921; *Brachycolumna* Strand, 1929; *Decanematus* Malaise, 1931; *Pikonema* Ross, 1937; *Phyllocolpa* Benson, 1960; *Eitelius* Kontuniemi, 1966; *Gemmura* E.L. Smith, 1968; *Ribinematus* Kontuniemi, 1975; *Eupontania* Zinovjev, 1985; *Larinematus* Zhe-lochovtsev, 1988; *Polynematus* Zhe-lochovtsev, 1988; *Bacconematus* Zhe-lochovtsev, 1988; *Alpinematus* Lacourt, 1996; *Epicenematus* Lacourt, 1998; *Kontuniemiana* Lacourt, 1998; *Lindqvistia* Lacourt, 1998; *Luea* Wei et Nie, 1998; *Tubpontania* Vikberg, 2010). Type species *Euura gallae* Newman, 1837. The genus is distributed in Holarctic and Oriental region; introduced into the Neotropical, Ethiopian and Australasian regions. Number of species: World – about 450; Palaearctic – about 300; Russia – 258 (+ 1 ssp.).

Euura abnormis (Holmgren, 1883) [*Nematus*] (*Amauronematus tolli* Konow, 1907; *A. aulatus* MacGillivray, 1919). Russia: **EP** (N), **WS** (TM), **ES** (KR, YA). – Europe (WE, NE), N America.

Euura aborigensis (Vikberg, 2003) [Eupontania]. Host plant: *Salix dshugdshurica* (Salicaceae). Russia: **FE** (MG).

Euura acuta (Lindqvist, 1970) [Amauronematus]. Host plant: *Dasiphora* spp. (Rosaceae). Russia: **ES** (IR, ZB), **FE** (MG).

Euura acutifoliae (Zinovjev, 1985) [Pontania] (*Pontania acutifoliae daphnoides* Zinovjev, 1993; *Eupontania acutifoliae baltica* Vikberg et Zinovjev, 2006). Host plant: *Salix acutifolia*, *S. daphnoides* (Salicaceae). Russia: **EP** (N, NW, C, E, S). – Europe (WE, EE, NE).

Euura acutiserra (Lindqvist, 1949) [Pontania]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N). – Europe (WE, NE).

Euura aeger (Konow, 1895) [Amauronematus] (*Amauronematus dalecarlicus* Malaise, 1921). Russia: **ES** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE).

Euura albipennis (Hartig, 1837) [Nematus] (*Nematus vernalis* Hartig, 1840; *N. obscuratus* Zaddach, 1883; *Polynematus legirupus* Konow, 1903; *P. sannio* Konow, 1903). Host plant: *Polygonum* spp. (Polygonaceae). Russia: **EP** (NW, C, E, S), **WS** (TK), **ES** (IR), **FE** (AM). – Europe (WE, EE, NE), Kazakhstan, Korean Peninsula.

Euura albopicta (Malaise, 1931) [Pontania]. Host plant: *Salix* spp. (Salicaceae). Russia: **FE** (KA).

Euura alpicola (Konow, 1895) [Amauronematus]. Host plant: *Salix phylicifolia* (Salicaceae). Russia: **EP** (NW). – Europe (WE).

Euura amentorum (Förster, 1854) [Nematus] (*Nematus suavis* Ruthe, 1859; *N. laevigatus* Zaddach, 1883; *Pontania atra* Marlatt, 1896; *P. maura* Rohwer, 1908; *P. amentivora* Rohwer, 1915; *Pristiphora amentorum nigripleuris* Enslin, 1916; *Pontopristia kamtchatica* Malaise, 1931). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (Taeger et al., 2006), **FE** (KA, CH). – Europe (WE, EE, NE), Greenland, N America.

Euura amerinae (Linnaeus, 1758) [Cynips] (*Tenthredo salicispentandrae* Retzius, 1783; *Tenthredo gallarum* Latreille, 1804; *T. saliceti* Fallén, 1808; *Nematus pentandrae* Dahlbom, 1835; *Nematus populi* Hartig, 1837; *N. medullarius* Hartig, 1837; *N. impunctatus* Herrich-Schäffer, 1840; *N. buccatus* Thomson, 1863; *Pontania joergensei* Strand, 1908). The larvae form a nutlike gall on the branches of *Salix pentandra* (Salicaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (YA), **FE** (KA, MG). – Europe (WE, EE, NE, SE).

Euura ampla (Konow, 1895) [Amauronematus]. Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR, ZB). – Europe (WE, EE, NE).

Euura amurensis (Zinovjev, 1985) [Pontania]. Host plant: *Salix miyabeana* (Salicaceae). Russia: **ES** (ZB), **FE** (AM, KH, PR).

Euura annulata (Gimberthal, 1834) [Nematus] (*Nematus xanthopterus* Dahlbom, 1835; *N. flavipennis* Cameron, 1876; *Pachynematus freyi* Lindqvist, 1949; *P. lacteipennis* Benson, 1963). Host plant:

Rumex spp. (Polygonaceae). Russia: **EP** (E, NC), **ES** (IR, BR), **FE** (KH, SA). – Europe (WE, EE, NE), Central Asia.

Euura anomaloptera (Förster, 1854) [Nematus] (*Pontania joergensei* Enslin, 1916; *Amauronematus maidli* Zirngiebl, 1937; *Pontania cyrnea* Liston, 2005). Host plant: *Salix carpea* (Salicaceae). Russia: **EP** (N, NW). – Europe (WE, EE, NE, SE).

Euura arbusculae (Benson, 1941) [Pontania]. Host plant: *Salix arbuscula* (Salicaceae). Russia: **EP** (N). – Europe (WE).

Euura arctica MacGillivray, 1919 (*Pontania deminuta* MacGillivray, 1919; *P. delicatula* MacGillivray, 1919; *Euura abortiva* MacGillivray, 1919). Host plant: *Salix reticulata* (Salicaceae). Russia: **ES** (YA), **FE** (CH). – N America.

Euura arcticornis (Konow, 1904) [Pontania] (*Pontania phylicifoliae* Forsius, 1919; *P. viminalis hepaticulae* Malaise, 1920). Host plant: *Salix phyticifolia*, *S. lapponicum* (Salicaceae). Russia: **EP** (N, NW, E), **UR**, **WS** (TM, AL), **ES** (KR, IR, ZB, BR, YA), **FE** (AM, PR, MG). – Europe (WE, EE, NE), Korean Peninsula.

Euura atra (Jurine, 1807) [Pteronus] (*Nematus angustus* Hartig, 1837; *E. salicicola* E.A. Smith, 1879; *Cryptocampus helveticus* Zaddach, 1883; *C. robustus* Zaddach, 1883; *Euura nigra* Provancher, 1888). Host plant: *Salix* spp. (Salicaceae); larvae in galls on shoots. Russia: **EP** (NC), **ES** (IR, BR, YA, ZB), **FE** (MG). – Europe (WE, EE, NE), Armenia, Cyprus, Kyrgyzstan, Kazakhstan; introduced into the N America.

Euura auritae Kopalke, 2000 (*E. cinereae* Kopalke, 1996; *E. lapponica* Kopalke, 1996; *E. salicislapponicae* Kopalke, 2014). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N). – Europe (WE, EE, NE).

Euura bergmani (Malaise, 1931) [Amauronematus] (*Pteronidea kamtchatica* Lindqvist, 1971). Russia: **FE** (KA).

Euura bergmanni (Dahlbom, 1835) [Nematus] (*Nematus virescens* Hartig, 1837; *N. pallicarpus* Hartig, 1837; *N. curtispina* Thomson, 1871; *N. varipictus* Holmgren, 1883; *N. anthophilus* Zaddach, 1884; *N. pallidicarpus* Dalla Torre, 1894; *Amauronematus longicornis* Konow, 1897; *Pteronus curtispinus* Konow, 1903; *Amauronematus trigonicus* Konow, 1905; *Lygaeonematus pallens* Enslin, 1916; *Pteronidea curtispina luctuosa* Enslin, 1916; *P. vernalis* Lindqvist, 1937). Host plant: *Salix* spp. (Salicaceae); up to 5 generations per year. Russia: **EP** (N, NW,

- C, E, S, NC), **UR, ES** (IR, YA). – Europe (WE, EE, NE, SE), Kyrgyzstan.
- Euura bertilpoppii** Heibo et Liston, 2014 (*Amauronematus poppii* Konow, 1904). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW), **ES** (KR), **FE** (KA). – Europe (NE).
- Euura betulae** (Schmidt, 1997) [*Amauronematus*]. Host plant: *Betula* spp. (Betulaceae). Russia: **FE** (MG). – Europe (NE).
- Euura bicolor** (Jakovlev, 1891) [*Amauronematus*]. Russia: **ES** (IR), **FE** (AM).
- Euura bigallae** (Vikberg et Zinovjev, 2014) [*Pontania*]. Host plant: *Salix* spp. (Salicaceae); larvae in galls on shoots. Russia: **EP** (N). – Europe (NE).
- Euura bipartita** (Serville, 1823) [*Nematus*] (*Nematus bipartitus* Lepeletier, 1823; *N. aurantiacus* Hartig, 1837; *N. confusus* Förster, 1854; *N. xanthogaster* Förster, 1854; *N. ochropus* Thomson, 1863; *Pachynematus albipennis salicicola* Enslin, 1916). Host plant: *Salix* spp., *Populus* spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S), **UR, WS** (TM, OM). – Europe (WE, EE, NE, SE), Kazakhstan.
- Euura bohemani** (Thomson, 1871) [*Nematus*] (*Pteronidea pseudonotabilis* Enslin, 1916; *P. pseudonotabilis simplex* Forsius, 1921; *P. pseudonotabilis t-magnum* Malaise, 1931). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, C), **FE** (KA). – Europe (EE, NE).
- Euura boreophila** (Lindqvist, 1971) [*Pteronidea*]. Host plant: *Salix* spp. (Salicaceae). Russia: **ES** (IR, BR). – Europe (NE).
- Euura borisi** (Vikberg, 2003) [*Eupontania*]. Host plant: *Salix rhamnifolia* (Salicaceae). Russia: **ES** (BR).
- Euura brevicera** Taeger et Blank, 2014 (*Pteronidea brachycera* Lindqvist, 1975). Host plant: *Salix* spp. (Salicaceae). Russia: **ES** (IR).
- Euura breviseta** (Lindqvist, 1949) [*Pteronidea*]. Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N). – Europe (NE).
- Euura brevivalva** (Thomson, 1871) [*Nematus*] (*Pteronidea kriegeri* Konow, 1903; *Amauronematus spurcus* Konow, 1904; *Pteronidea assimilis* Lindqvist, 1949). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N, NW), **ES** (IR, ZB), **FE** (AM, MG). – Europe (WE, NE).
- Euura bridgmanii** (Cameron, 1883) [*Nematus*] (*Pontania kirchneri* Zirngiebl, 1959). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1995), “Siberia” (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, NE).
- Euura brunneipicta** (Lindqvist, 1975) [*Amauronematus*]. Russia: **ES** (IR).
- Euura cadderensis** (Cameron, 1875) [*Nematus*] (*Pteronidea macroserrata* Lindqvist, 1943). Host plant: *Betula* spp. (Betulaceae), *Salix* spp. (Salicaceae). Russia: **EP** (N, E), **UR**. – Europe (WE, EE, NE).
- Euura caeruleocarpa** Hartig, 1837 (*Nematus propinquus* Dahlbom, 1835; *N. sulcipes* Hartig, 1837; *N. brevispinis* Förster, 1854; *N. brachyacanthus* Thomson, 1863; *N. insubricus* Cobelli, 1892). Host plant: *Salix* spp., *Populus* spp. (Salicaceae), *Paeonia*ceae, *Ranunculaceae*. Russia: **EP** (NW, C, NC), **ES** (IR, BR, YA, ZB), **FE** (KH, PR, MG). – Europe (WE, EE, NE), China (Wei et al., 2006), Japan (Hok, Hon).
- Euura camtschaticalis** (Enslin, 1927) [*Amauronematus*]. Russia: **FE** (KA).
- Euura camtschatica** (Forsius, 1928) [*Pontania*]. Host plant: *Salix* spp. (Salicaceae). Russia: **FE** (KA).
- Euura capito** (Konow, 1903) [*Pteronus*]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, C), **UR, FE** (KA). – Europe (WE, EE, NE, SE), Kazakhstan, China (NW).
- Euura carelica** (Hellén, 1948) [*Nematus*] (*Pteronidea winteri* Lindqvist, 1958). Russia: **EP** (N). – Europe (NE).
- Euura caucasica** (Liston, Taeger et Blank, 2009) [*Pachynematus*] (*Pachynematus alticola* Muche, 1973). Russia: **EP** (NC). – Georgia, Mongolia.
- Euura caudalis** (Eversmann, 1847) [*Nematus*]. Russia: **EP** (E).
- Euura clibrichella** (Cameron, 1878) [*Nematus*] (*Nematus thomsoni* Cameron, 1882; *Pachynematus pubescens* Marlatt, 1896; *P. gotarus* Kincaid, 1900; *P. venustus* MacGillivray, 1921; *P. vernus* MacGillivray, 1921). Host plant: *Carex* spp. (Cyperaceae). Russia: **EP** (N). – Europe (WE, NE), N America.
- Euura clitellata** (Serville, 1823) [*Nematus*] (*Nematus clitellatus* Lepeletier, 1823; *N. kirbyi* Dahlbom, 1835; *N. leucocarpus* Hartig, 1840; *N. einersbergensis* Hartig, 1840; *N. flaviventris* Hartig, 1840; *N. palliceps* Hartig, 1840; *N. diaphanus* Eversmann, 1847; *N. umbripennis* Eversmann, 1847; *N. griseus* Eversmann, 1847; *Epitactus praecox* Förster, 1854; *Nematus trisignatus* Förster, 1854; *N. microps* Förster, 1854; *N. pectoralis* Snellen van Vollenhoven, 1867; *N. turgidus* Zaddach, 1876; *N. leucocarpus* André, 1880; *N. valesiacus* W.F. Kirby, 1882; *N. tener* Zaddach, 1884; *N. pallidiceps* Dalla Torre, 1894; *Pachynematus infumatus* Marlatt, 1896; *P. zad-dachi* Konow, 1901; *P. latus* Konow, 1903; *P. glesipennis* Konow, 1903; *P. foveolatus* Konow, 1903; *P. clitellatus transigens* Enslin, 1916; *P. clitellatus*

- flavissimus* Enslin, 1916; *P. refractarius* MacGillivray, 1921; *P. truncatus* Benson, 1948). Host plant: Poaceae. Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (Zhelochovtsev, 1988), **ES** (IR, BR), **FE** (SA, MG). – Europe (WE, EE, NE), Kazakhstan, China (Wei et al., 2006), Korean Peninsula, Japan (Hok).
- Euura clypeata** (Lindqvist, 1975) [Amauronematus]. Russia: **ES** (IR).
- Euura collectanea** (Förster, 1854) [Nematus] (*Nematus deficiens* Förster, 1854; *N. crassipes vacciniellus* Cameron, 1876; *N. xanthostylos* Zaddach, 1884; *Pontania viminalis lugubris* Enslin, 1918; *P. collectanea relicta* Weiffenbach, 1962; *Eupontania collectanea rosmarinifolia* Vikberg et Zinovjev, 2006). Host plant: *Salix repens* repens, *S. repens rosmarinifolia* (Salicaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).
- Euura compacta** (Bogacheva, 1977) [Amauronematus]. Russia: **WS** (TM).
- Euura cornuta** (Lindqvist, 1962) [Amauronematus]. Russia: **FE** (MG). – Europe (NE).
- Euura crassidens** (Lindqvist, 1975) [Amauronematus]. Russia: **ES** (IR).
- Euura crassipes** (Thomson, 1871) [Nematus] (*Pontania lapponica* Malaise, 1920; *P. enslini* Zirngiebel, 1937). Host plant: *Salix herbacea*, *S. lapporum*, *S. polaris* (Salicaceae); larvae in galls on the central vein of the leaf. Russia: **EP** (N, C), **WS** (TM), **ES** (IR, YA), **FE** (KU, MG). – Europe (WE, NE).
- Euura crassispina** (Thomson, 1871) [Nematus]. Host plant: *Salix glauca*, *S. arctica*, *S. sphenophylla* (Salicaceae). Russia: **ES** (YA), **FE** (KA, MG). – Europe (NE).
- Euura dentata** (Lindqvist, 1937) [Pachynematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW). – Europe (NE).
- Euura dispar** (Zaddach, 1876) [Nematus]. Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E), **ES** (IR). – Europe (WE, EE, NE).
- Euura distinguenda** (Enslin, 1915) [Amauronematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).
- Euura dolichura** (Thomson, 1871) [Nematus] (*Nematus femoralis* Cameron, 1876; *Pontania Robbinsi* Benson, 1935; *P. lapponicola* Kopelke, 1994). Host plant: *Salix lapporum*, *S. phylicifolia*, ?*S. iliensis* (Salicaceae); larvae form galls. Russia: **EP** (N, NC), **WS** (AL), **ES** (KR, IR, BR, YA), **FE** (PR, KA, MG). – Europe (WE, EE, NE, SE), Kyrgyzstan, N America.
- Euura duplex** (Serville, 1823) [Pristiphora] (*Pristiphora duplex* Lepeletier, 1823). Host plant: Poaceae.
- Russia: **EP** (NW), **UR**, **ES** (KR, IR, BR, YA, ZB), **FE** (AM). – Europe (WE, EE, NE), Mongolia.
- Euura edentata** (Lindqvist, 1975) [Pachynematus]. Russia: **ES** (IR).
- Euura edenticulata** (Lindqvist, 1970) [Amauronematus]. Russia: **ES** (IR).
- Euura eiteli** (Saarinen, 1948) [Amauronematus]. Russia: **EP** (N), **ES** (ZB). – Europe (NE).
- Euura elaeagnocola** (Kopelke, 1994) [Pontania] (*Nematus parallelus* Kriechbaumer, 1876). Host plant: *Salix elaeagnos*, *S. lapponicum*, *S. alaxensis* (Salicaceae). Russia: **FE** (MG). – Europe (WE).
- Euura elbrus** Sundukov, 2017 (*Nematus nivalis* Muche, 1973). Russia: **EP** (NC). – Georgia.
- Euura pilosa** (Lindqvist, 1970) [Pteronidea]. Host plant: *Spiraea* spp. (Rosaceae). Russia: **ES** (IR).
- Euura erecta** (Lindqvist, 1945) [Amauronematus]. Russia: **WS** (TM). – Europe (WE, NE).
- Euura ermolenkoi** (Haris, 2006) [Nematus]. Russia: **FE** (KU).
- Euura erythropus** (Lindqvist, 1975) [Amauronematus]. Russia: **ES** (IR).
- Euura evenensis** (Zhelochovtsev, 1981) [Nematus]. Host plant: ?*Chosenia arbutifolia* (Salicaceae). Russia: **FE** (MG).
- Euura excavata** (Marlatt, 1896) [Pontania] (*Pontania megacephala* Rohwer, 1908; *P. distracta* MacGillivray, 1923; *P. apicifrons* Malaise, 1931). Host plant: *Populus suaveolens*, *Salix pentandra*, *S. pseudopentandra* (Salicaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1995), **ES** (Zhelochovtsev, Zinovjev, 1995), **FE** (KA). – Europe (WE, NE), N America.
- Euura excisa** (Thomson, 1863) [Nematus] (*Lygaeone-matus strandi* Konow, 1901). Host plant: *Geranium* spp. (Geraniaceae). Russia: **ES** (IR). – Europe (NE), Mongolia, N America.
- Euura extensicornis** (Norton, 1861) [Nematus] (*Nematus marylandicus* Norton, 1864; *N. aureopectus* Norton, 1867; *N. suadus* Cresson, 1880; *Pachynematus affinis* Marlatt, 1896; *P. tritici* Marlatt, 1896). Host plant: Poaceae. Russia: **ES** (IR), **FE** (MG). – N America.
- Euura facialis** (Lindqvist, 1969) [Pteronidea]. Host plant: *Alnus* spp. (Betulaceae). Russia: **ES** (IR). – Europe (NE).
- Euura fahraei** (Thomson, 1863) [Nematus] (*Nematus melanodus* Zaddach, 1884). Host plant: *Populus* spp. (Salicaceae). Russia: **ES** (IR, YA). – Europe (WE, EE, NE).
- Euura fallax** (Serville, 1823) [Nematus] (*Nematus fal-lax* Lepeletier, 1823; *N. melanocerus* Hartig, 1840;

N. xanthocarpus Hartig, 1840; *N. eupodius* Hartig, 1840; *N. haemorrhoidalis* Hartig, 1840; *N. brachycercus* Hartig, 1840; *N. schmidtii* Gimmerthal, 1844; *N. eversmanni* Förster, 1854; *N. emarginatus* Förster, 1854; *N. circumscriptus* Förster, 1854; *N. declinatus* Förster, 1854; *N. incertus* W.F. Kirby, 1882; *N. erythropareus* Zaddach, 1884; *Pachynematus sulcatus* Benson, 1948; *P. chambersi* Benson, 1948; *P. virginialis* Liston, 1980). Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW, NC), **FE** (PR, KA, MG). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan, Kazakhstan, Mongolia, China (NW), Korean Peninsula, Japan (Hon).

Euura fasciata (Konow, 1897) [Amauronematus] (*Amauronematus perkinsi* Benson, 1933). Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW), **ES** (IR). – Europe (WE, EE, NE).

Euura ferruginea (Förster, 1854) [Nematus] (*Nematus glottianus* Cameron, 1882; *Amauronematus moricei* Konow, 1902; *Pteronidea ferruginea plagiata* Enslin, 1916). Host plant: Salix spp., Populus spp. (Salicaceae). Russia: **EP** (N), **ES** (IR). – Europe (WE, EE, NE).

Euura filiformis (Lindqvist, 1975) [Pachynematus]. Russia: **ES** (IR).

Euura flavescens (Stephens, 1835) [Nematus] (*Nematus dilutus* Brischke, 1883). Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW), **ES** (YA), **FE** (KA). – Europe (WE, EE, NE), Central Asia.

Euura foetidae (Kopelke, 1989) [Pontania]. Host plant: Salix foetida, S. saposhnikovii (Salicaceae); larvae form galls. Russia: **WS** (AL). – Europe (WE).

Euura frenalis (Thomson, 1888) [Nematus] (*Pteronus fastosus* Konow, 1904). Host plant: Salix spp. (Salicaceae). Russia: **EP** (N), “Siberia” (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE), China (Wei et al., 2006).

Euura freyja Liston, Taeger et Blank, 2009 (*Pontopristia analis* Lindqvist, 1961). Host plant: Salix spp. (Salicaceae). Russia: **ES** (IR). – Europe (NE).

Euura fujicense (Zinovjev, 1993) [Pikonema]. Host plant: ?Abies spp., ?Picea spp. (Pinaceae). Russia: **FE** (KU). – Japan (Hon).

Euura fulvescens (Lindqvist, 1949) [Pteronidea]. Russia: **EP** (N). – Europe (NE).

Euura fuscomaculata (Förster, 1854) [Nematus] (*Nematus strongylogaster* Cameron, 1878; *Pteronus dossuarius* Konow, 1904). Host plant: Populus spp. (Salicaceae). Russia: **EP** (NW, C), **ES** (YA). – Europe (WE, EE, NE).

Euura gehrsi (Konow, 1903) [Pachynematus]. Host plant: Polygonum spp. (Polygonaceae). Russia: **EP** (NC), **ES** (IR). – Europe (WE).

Euura glabrifrons (Benson, 1960) [Pontania]. Host plant: Salix lanata (Salicaceae); larvae form galls. Russia: **EP** (N), **WS** (TM), **ES** (YA), **FE** (MG). – Europe (NE).

Euura glacialis (Jakovlev, 1891) [Amauronematus]. Russia: **EP** (N).

Euura glaucae (Kopelke, 1994) [Pontania]. Host plant: Salix glauca, S. alpina, S. saxatilis (Salicaceae); larvae form galls. Russia: **ES** (YA), **FE** (MG). – Europe (WE, NE).

Euura gracilidentata (Viitasaari, 1980) [Pteronidea]. Host plant: Ribes alpinum (Grossulariaceae). Russia: **EP** (NW). – Europe (WE, NE, SE).

Euura groenlandica (Malaise, 1933) [Amauronematus]. Russia: **EP** (N). – Europe (NE), Greenland, N America.

Euura harpicola (Bogacheva, 1977) [Amauronematus]. Russia: **WS** (TM).

Euura hartigi (Saarinen, 1950) [Amauronematus]. Russia: **EP** (NW). – Europe (WE).

Euura hastatae Malaise, 1920. Host plant: Salix hastata (Salicaceae). Russia: **EP** (N). – Europe (WE, EE, NE).

Euura hastatavora Vikberg, 2014 (*Pontania hastatae* Vikberg, 1970). Host plant: Salix hastata (Salicaceae). Russia: **EP** (N), **WS** (TM), **ES** (YA), **FE** (MG, CH). – Europe (WE, NE).

Euura hebes (Konow, 1907) [Amauronematus] (*Amauronematus pristiphorinus* Malaise, 1921). Russia: **WS** (TM). – Europe (NE), N America.

Euura hedstroemi (Malaise, 1931) [Amauronematus] (*Amauronematus rex* Benson, 1948). Russia: **EP** (N), **FE** (KA, CH). – Europe (WE, NE), N America.

Euura helleni (Lindqvist, 1941) [Amauronematus]. Russia: **EP** (N), **FE** (MG). – Europe (NE), N America.

Euura helveticae (Kopelke, 1986) [Pontania]. Host plant: Salix helvetica, S. lanata, S. brachypoda (Salicaceae); larvae form galls. Russia: **EP** (NW), **WS** (AL), **ES** (YA). – Europe (WE).

Euura herbacea (Cameron, 1876) [Nematus] (*Pontania polaris* Malaise, 1920). Host plant: Salix herbacea, S. polaris, S. nummularia (Salicaceae). Russia: **EP** (N), **WS** (TM), **ES** (KR, BR, YA), **FE** (MG, CH). – Europe (WE, NE).

Euura hirowatarii (Haris et Zsolnai, 2007) [Pachynematus]. Russia: **FE** (SA). – Korean Peninsula.

- Euura histrio** (Serville, 1823) [Nematus] (*Nematus histrio* Lepeletier, 1823; *N. rufescens* Hartig, 1837; *N. fur* Walsh, 1866; *N. glenelgensis* Cameron, 1882). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW, C, E, NC), **UR**, **ES** (IR, ZB). – Europe (WE, EE, NE, SE), N America.
- Euura hulteni** (Malaise, 1931) [Amauronematus]. Russia: **FE** (KA). – N America.
- Euura humeralis** (Serville, 1823) [Nematus] (*Nematus humeralis* Lepeletier, 1823; *N. squalidus* Eversmann, 1847; *N. incanus* Förster, 1854; *Amauronematus terminalis* Malaise, 1931). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR), **FE** (KA, MG). – Europe (WE, EE, NE).
- Euura hypoxantha** (Förster, 1854) [Nematus] (*Nematus palliatus* Thomson, 1863; *N. orbitalis* Cameron, 1884; *Pteronidea nigronota* Lindqvist, 1958). Host plant: *Salix* spp., *Populus* spp. (Salicaceae). Russia: **EP** (NW, C, S), **ES** (IR). – Europe (WE, EE, NE, SE), Kazakhstan, Japan (Hon).
- Euura imperfecta** (Zaddach, 1876) [Nematus] (*Pachynematus imperfectus claristernis* Enslin, 1916). Host plant: *Larix* spp. (Pinaceae). Russia: **EP** (NW), **ES** (IR, BR, YA, ZB). – Europe (WE, EE, NE).
- Euura incompleta** (Förster, 1854) [Nematus] (*Nematus smaragdinus* Stein, 1881; *N. pulchellus* Cameron, 1882; *N. chlorogaster* Zaddach, 1884; *Pteronidea segmentaria signata* Enslin, 1916; *P. segmentaria tesselensis* Enslin, 1916). Host plant: *Lathyrus vernus* (Fabaceae). Russia: **EP** (N, NW, C, E, S, NC), **ES** (ZB). – Europe (WE, EE, NE, SE), Georgia, Kazakhstan.
- Euura insignis** (Hartig, 1840) [Nematus] (*Nematus superbus* Gradl, 1881; *N. nobilis* W.F. Kirby, 1882). Host plant: *Abies* spp., *Picea* spp. (Pinaceae). Russia: **EP** (NW), **ES** (YA), **FE** (PR). – Europe (WE, EE, NE).
- Euura integra** (Zinovjev, 1985) [Pontania]. Host plant: *Salix integra* (Salicaceae). Russia: **FE** (KH, PR). – Japan (Zinovjev, 2010).
- Euura itelmena** (Malaise, 1931) [Pontopristia]. Host plant: ?*Salix alaxensis* (Salicaceae). Russia: **FE** (KA). – N America.
- Euura itoi** (Okutani, 1955) [Pachynematus]. Host plant: *Larix* spp. (Pinaceae). Russia: **UR**, **ES** (TU, IR, BR, YA, ZB), **FE** (AM, MG). – Europe (WE), China (NE), Korean Peninsula, Japan (Hon).
- Euura jugicola** (Thomson, 1871) [Nematus] (*Pteronidea karvoneni* Lindqvist, 1969). Host plant: *Salix* aurita (Salicaceae). Russia: **EP** (NW). – Europe (WE, NE).
- Euura krausi** (Taeger et Blank, 1998) [Amauronematus]. Host plant: *Populus tremula* (Salicaceae). Russia: **EP** (N, NW, C), **ES** (IR). – Europe (WE, EE, NE, SE).
- Euura kunasirensis** (Haris, 2006) [Nematus]. Russia: **FE** (KU).
- Euura laeta** (Brischke, 1883) [Cryptocampus] (*E. viminalis* Kopelke, 2001). Host plant: *Salix viminalis* (Salicaceae); larvae in the galls at the base of the leaf petiole. Russia: **EP** (N, NW, C, E), **FE** (KA). – Europe (WE, EE, NE).
- Euura lanatae** Malaise, 1920. Host plant: *Salix lanata* (Salicaceae); larvae in enlarged buds. Russia: **WS** (TM), **ES** (KR). – Europe (NE), N America.
- Euura lanceata** (Hellén, 1970) [Amauronematus]. Russia: **FE** (MG). – Europe (NE).
- Euura lappo** Malaise, 1920. Host plant: *Salix lapponum* (Salicaceae). Russia: **EP** (N). – Europe (EE, NE).
- Euura latiserra** (Malaise, 1921) [Pontopristia]. Host plant: *Salix* spp. (Salicaceae). Russia: **WS** (TM), **ES** (KR), **FE** (CH). – Europe (NE).
- Euura latisulcata** (Malaise, 1931) [Amauronematus]. Russia: **FE** (KA).
- Euura leionota** (Benson, 1933) [Pteronidea]. Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N). – Europe (WE, EE, NE).
- Euura leptcephala** (Thomson, 1863) [Nematus] (*Amauronematus morawitsi* Jakovlev, 1891). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW). – Europe (NE), N America.
- Euura lethe** Prous et Liston, 2014 (*Amauronematus atratus* Lindqvist, 1961). Russia: **ES** (IR). – Europe (NE).
- Euura leucapsis** (Tischbein, 1846) [Nematus] (*Nematus viminalis* Hartig, 1840; *N. alienatus* Förster, 1854; *N. coriaceus* Benson, 1953; *Phyllocolpa rolleri* Liston, 2005). Host plant: *Salix cinerea*, *S. aurita*, *S. silesiaca* (Salicaceae). Russia: **EP** (NW), **ES** (IR, BR, YA), **FE** (AM, KA, MG). – Europe (WE, EE, NE), Tajikistan, Kyrgyzstan, Canada.
- Euura leucolena** (Brischke, 1883) [Nematus] (*Pontania unga* Kincaid, 1900; *Pteronidea egeria* MacGillivray, 1923). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW), **UR**, **WS** (TM), **ES** (KR, IR, BR, ZB), **FE** (KA, MG). – Europe (WE, EE, NE), N America.
- Euura leucopyga** (Lindqvist, 1949) [Amauronematus] (*Pteronidea bipicta* Lindqvist, 1959). Host plant:

- Alnus* spp. (Betulaceae). Russia: **EP** (N), **ES** (IR). – Europe (NE).
- Euura leucosticta** (Hartig, 1837) [Nematus] (*Nematus klugii* Gimmerthal, 1844; *N. crassulus* Thomson, 1863; *N. sharpi* Cameron, 1876; *Pontania ischnoceros nigrifrons* Konow, 1897; *P. auberti* Zirngiebl, 1957). Host plant: *Salix carpea*, *S. aurita*, *S. atrocincta* (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE, SE), N Africa, Armenia, Turkey, Kazakhstan.
- Euura leucotrocha** (Hartig, 1837) [Nematus] (*Nematus cylindricus* Hartig, 1840; *N. maculiventris* Hartig, 1840; *N. approximatus* Förster, 1854; *N. consobrinus* Snellen van Vollenhoven, 1871; *N. umbrenus* Zaddach, 1876; *N. sauterianus* Zaddach, 1883; *N. multiplex* Zaddach, 1883; *Pteronidea cognata* Lindqvist, 1958). Host plant: *Ribes* spp. (Grossulariaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE), China (Wei et al., 2006).
- Euura lichtwardti** (Konow, 1903) [Pachynematus] (*Nematus apicalis* Hartig, 1837; *Pachynematus kubesi* Konow, 1905). Host plant: Poaceae. Russia: **EP** (N), **ES** (IR). – Europe (WE, EE, NE), Korean Peninsula.
- Euura lienterica** (Holmgren, 1883) [Nematus]. Host plant: *Vaccinium* spp. (Ericaceae). Russia: **EP** (N), **WS** (TM), **ES** (KR), **FE** (MG, CH). – Europe (NE).
- Euura lindqvisti** (Hellén, 1951) [Amauronematus]. Russia: **ES** (Zhelochovtsev, Zinovjev, 1995). – Europe (NE).
- Euura longicauda** (Hellén, 1948) [Nematus]. Russia: **EP** (N), **FE** (MG). – Europe (NE), N America.
- Euura longiserra** (Thomson, 1863) [Nematus] (*Nematus leucodous* Zaddach, 1884). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, C), **WS** (AL), **ES** (IR, YA), **FE** (KA). – Europe (WE, NE).
- Euura magadanensis** (Vikberg et Zinovjev, 2014) [Pontania]. Host plant: *Salix* spp. (Salicaceae); larvae form galls. Russia: **ES** (YA), **FE** (KA, MG, CH).
- Euura malaisei** (Hellén, 1970) [Amauronematus] (*Decanematus longiserra* Malaise, 1931). Russia: **FE** (KA). – Europe (WE, EE, NE).
- Euura mandshurica** (Zinovjev, 1981) [Pontania]. Host plant: *Salix pierotii*, *S. babylonica* (Salicaceae); larvae form galls. Russia: **FE** (AM, PR). – Japan (Zinovjev, 2010).
- Euura mcluckiei** (Benson, 1935) [Amauronematus] (*Amauronematus pustulatus* Lindqvist, 1962). Host plant: *Salix reticulata* (Salicaceae). Russia: **EP** (N), “Siberia” (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, NE).
- Euura melanocephala** (Hartig, 1837) [Nematus] (*Tenthredo salicis* Retzius, 1783; *Nematus perspicillaris* Hartig, 1840; *N. breviusculus* Eversmann, 1847; *N. pyrrhonotus* Zaddach, 1883; *Pteronus xanthostomus* Rohwer, 1910; *Pteronidea melanocephala mesothoracica* Enslin, 1916). Host plant: *Salix* spp., *Populus* spp. (Salicaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE, SE), Armenia.
- Euura microphyes** (Förster, 1854) [Nematus] (*Pontopristia romani* Malaise, 1921; *P. nana* Lindqvist, 1949; *P. fennicus* Lindqvist, 1949). Host plant: *Salix* spp. (Salicaceae); larvae in the inflorescence. Russia: **EP** (N), **FE** (PR). – Europe (WE, NE), N America.
- Euura miliaris** (Panzer, 1797) [Tenthredo] (*Nematus dorsalis* Serville, 1823; *N. dorsalis* Lepeletier, 1823; *N. testaceus* Stephens, 1835; *N. fulvus* Hartig, 1837; *N. purus* Förster, 1854; *N. validicornis* Förster, 1854; *N. fulvus basalis* Costa, 1859; *N. fulvus exoleta* Costa, 1859; *N. trimaculatus* Snellen van Vollenhoven, 1862; *N. solitarius* Zaddach, 1883; *Pteronidea miliaris nigronotata* Enslin, 1916). Host plant: *Salix* spp. (Salicaceae); larvae form a gall on the leaves. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **ES** (KR, IR, BR, YA), **FE** (SA). – Europe (WE, EE, NE, SE), SW Asia, Central Asia, China (Wei et al., 2006), Korean Peninsula.
- Euura miltonota** (Zaddach, 1883) [Nematus] (*Amauronematus jaroslawensis* Jakovlev, 1891; *A. hercyniae* Konow, 1896). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C), **FE** (KA). – Europe (WE, EE).
- Euura mimator** Schmidt, 2014 (*Amauronematus mimus* Schmidt, 1997). Russia: **EP** (NW). – Europe (WE, NE).
- Euura mimus** (Konow, 1903) [Pteronus]. Russia: **EP** (NW). – Europe (WE, EE, SE).
- Euura mirabilis** (Zinovjev, 1985) [Pontania]. Host plant: *Salix cardiophyla* (Salicaceae). Russia: **FE** (PR, SA).
- Euura montana** (Zaddach, 1883) [Nematus] (*Nematus jemilleri* Stein, 1894). Host plant: *Picea* spp., *Abies* spp. (Pinaceae). Russia: **EP** (C), **ES** (YA). – Europe (WE, EE, NE).
- Euura monticola** (Thomson, 1871) [Nematus] (*Pachynematus perkioemaekii* Lindqvist, 1960; *Nematus pschorntwalcheri* Muche, 1972). Russia: **EP** (N). – Europe (WE, EE, NE, SE).

Euura mucronata (Hartig, 1837) [Nematus] (*Cryptocampus pictus* Zaddach, 1883; *C. gemmarum* Brischke, 1883; *Euura insularis* Kincaid, 1900). Host plant: *Salix caprea*, *S. aurita* (Salicaceae); larvae in bugs. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **ES** (IR, YA), **FE** (AM, KA). – Europe (WE, EE, NE, SE), Armenia, Japan (Hon), N America.

Euura mundus (Konow, 1895) [Amauronematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW), **ES** (IR). – Europe (WE, NE), Mongolia, China (Wei et al., 2006).

Euura myosotidis (Fabricius, 1804) [Tenthredo] (*Nematus interruptus* Serville, 1823; *N. interruptus* Lepeletier, 1823; *N. segmentarius* Förster, 1854; *N. ambiguus* Förster, 1854; *N. decipiens* W.F. Kirby, 1882; *Pteronidea myosotidis fallaciosus* Konow, 1903; *Pteronidea myosotidis pseudopavida* Enslin, 1916). Host plant: Fabaceae, Rosaceae. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (AL), **ES** (KR, IR). – Europe (WE, EE, NE, SE), Armenia, Turkey, Kyrgyzstan, Kazakhstan.

Euura myrsiniticola (Kopelke, 1991) [Pontania]. Host plant: *Salix myrsinoides* (Salicaceae). Russia: **EP** (N). – Europe (NE).

Euura myrtilloidica (Kopelke, 1991) [Pontania]. Host plant: *Salix myrtilloides* (Salicaceae). Russia: **EP** (N, NW), **FE** (AM, MG). – Europe (WE, NE).

Euura neglecta (W.F. Kirby, 1882) [Nematus] (*Amauronematus spiniserra* Malaise, 1920; *A. intermedius* Malaise, 1931). Host plant: *Salix* spp. (Salicaceae). Russia: **UR**, **ES** (TU, YA), **FE** (KA). – Europe (NE), N America.

Euura nigricornis (Serville, 1823) [Nematus] (*Nematus nigricornis* Lepeletier, 1823; *N. zetterstedti* Dahlbom, 1835; *N. miniatus* Hartig, 1837; *N. sibiricus* Jakovlev, 1888; *N. biannulatus* Costa, 1890). Host plant: *Salix* spp., *Populus* spp. (Salicaceae). Russia: **EP** (NW, C, E), **ES** (IR). – Europe (WE, EE, NE, SE), Japan (Hon).

Euura nigriventris (Holmgren, 1883) [Nematus] (*Amauronematus varians* MacGillivray, 1919; *Pteronidea melanostoma* Rohwer, 1920). Russia: **EP** (N). – N America.

Euura nitidipleuris (Malaise, 1931) [Amauronematus]. Russia: **FE** (KA). – Europe (NE), N America.

Euura nivalis (Vikberg, 1970) [Pontania]. Host plant: *Salix glauca* (Salicaceae). Russia: **EP** (N), **WS** (TM, AL). – Europe (WE, NE), Canada.

Euura nudipectus (Vikberg, 1965) [Pontania]. Host plant: *Salix phylicifolia* (Salicaceae). Russia: **EP** (N, NW), **FE** (MG). – Europe (NE).

Euura nuortevai (Lindqvist, 1958) [Pteronidea]. Russia: **ES** (IR). – Europe (NE).

Euura obducta (Hartig, 1837) [Nematus] (*Nematus conductus* Ruthe, 1859; *N. graminis* Cameron, 1874; *N. palliventris* Cresson, 1880; *N. pallidiventralis* Dalla Torre, 1894; *Pachynematus boulderensis* Rohwer, 1920). Host plant: Poaceae. Russia: **EP** (N, NW, C, NC), **ES** (TU, IR), **FE** (SA, KU, KA, MG). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan, N America.

Euura oblita (Serville, 1823) [Nematus] (*Nematus oblitus* Lepeletier, 1823; *N. pineti* Hartig, 1837; *N. pleurostictus* Förster, 1854; *N. lepidus* Förster, 1854; *N. puella* Thomson, 1871; *N. elegans* Zaddach, 1884). Host plant: *Salix triandra*, *S. alba*, *S. fragilis* (Salicaceae). Russia: **EP** (NW, C, S), **ES** (ZB). – Europe (WE, EE, NE), Armenia, Turkey.

Euura obscuripes (Holmgren, 1883) [Nematus]. Russia: **EP** (N).

Euura olfaciens olfaciens (Benson, 1953) [Nematus]. Host plant: *Ribes* spp. (Grossulariaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE).

Euura olfaciens kolymensis (Zhelochovtsev, 1981) [Nematus]. Host plant: *Ribes* spp. (Grossulariaceae). Russia: **ES** (YA), **FE** (MG).

Euura oligospila (Förster, 1854) [Nematus] (*Nematus mendicus* Walsh, 1866; *N. trivittatus* Norton, 1867; *N. microcercus* Thomson, 1871; *N. dorsivittatus* Cresson, 1880; *N. salicivorus* Cameron, 1882; *Pteronidea koebelei* Marlatt, 1896; *Pteronidea vanduzeei* Rohwer, 1913; *P. elelea* MacGillivray, 1923; *Nematus desantisi* D.R. Smith, 1983). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **ES** (TU, IR). – Europe (WE, EE, NE, SE), Caucasus, Central Asia, Pakistan, N America; introduced into the Tropical Africa, S America, Australia, New Zealand.

Euura pallens (Konow, 1903) [Pteronus] (*Pteronidea straminea* Lindqvist, 1958). Russia: **ES** (IR). – Europe (NE).

Euura pallescens (Hartig, 1837) [Nematus] (*Nematus olivaceus* Thomson, 1871; *N. ruficeps* Zaddach, 1883; *N. pachycerus* Borries, 1896). Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (C). – Europe (WE, EE, NE).

Euura pallidior (Hellén, 1970) [Amauronematus]. Russia: **WS** (TM). – Europe (NE).

Euura papillosa (Retzius, 1783) [Tenthredo] (*Tenthredo fuscata* Christ, 1791; *Nematus melanaspis* Hartig, 1840; *N. lacteus* Thomson, 1871; *N. sulphureus* Zaddach, 1876; *N. citreus* André, 1880; *N. maculiger* Cameron, 1882; *N. brunnicornis* Zaddach, 1883; *Pteronidea sveae* Lindqvist, 1958). Host plant: Salix spp., Populus spp. (Salicaceae), Betula spp. (Betulaceae). Russia: **EP** (N, NW, C), **WS** (Zhelochovtsev, 1988), **ES** (IR, BR, YA). – Europe (WE, EE, NE, SE), Pakistan, Kyrgyzstan, Kazakhstan, Japan (Takeuchi, 1952).

Euura parvula (Holmgren, 1883) [Nematus] (*Pontania poppii* Konow, 1904; *Pteronidea gracilicornis* Lindqvist, 1962). Host plant: Vaccinium spp. (Ericaceae). Russia: **EP** (N), **ES** (IR). – Europe (NE).

Euura pavida (Serville, 1823) [Nematus] (*Nematus pavidus* Lepeletier, 1823; *N. ochraceus* Hartig, 1837; *N. semiorbitalis* Förster, 1854; *Cryptocampus quadrum* Costa, 1859; *Nematus wtewaalli* Snellen van Vollenhoven, 1862; *N. cameronii* Dalla Torre, 1894; *Pteronidea pavida notanda* Enslin, 1916). Host plant: Salix spp., Populus spp. (Salicaceae). Russia: **EP** (NW, C), **WS** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE, SE).

Euura pedunculi (Hartig, 1837) [Nematus] (*Nematus bellus* Zaddach, 1876; *N. baccarum* Cameron, 1876; *N. curticornis* Cameron, 1885; *Pontania bella nigrescens* Enslin, 1915; *P. pusilla* Lindqvist, 1964). Host plant: Salix spp. (Salicaceae); larvae form galls. Russia: **EP** (NW, C), **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (YA), **FE** (SA, KA, MG). – Europe (WE, EE, NE, SE), Korean Peninsula.

Euura piliserra (Thomson, 1863) [Nematus] (*Pontania piliserra mascula* Enslin, 1915; *P. piliserra tristis* Enslin, 1915; *Pteronidea weiffenbachi* Lindqvist, 1958). Host plant: Salix viminalis (Salicaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1995), **WS** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE).

Euura platystigma (Lindqvist, 1949) [Pteronidea]. Russia: **ES** (IR). – Europe (NE).

Euura poecilonota (Zaddach, 1876) [Nematus] (*Nematus viridescens* Cameron, 1885; *Pteronus hyalinus* Marlatt, 1896; *Pteronidea subnitens* Lindqvist, 1958). Host plant: Betula spp. (Betulaceae). Russia: **EP** (NW, C, E, S), **WS** (AL), **ES** (TU, IR, BR), **FE** (MG). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan, Korean Peninsula.

Euura polaris (Holmgren, 1883) [Nematus] (*Nematus morionellus* Holmgren, 1883; *Pteronus shumagensis*

Kincaid, 1900; *Pontania islandica* Kincaid, 1900; *P. birulae* Konow, 1907). Host plant: Salix spp. (Salicaceae). Russia: **EP** (N), **WS** (TM), **FE** (MG). – Europe (WE, NE), N America.

Euura polita (Zaddach, 1883) [Nematus] (*Nematus sieboldii* Zaddach, 1884; *Pontania leucapsis connata* Enslin, 1915). Russia: **EP** (NW). – Europe (WE, EE).

Euura pravus (Konow, 1895) [Amauronematus]. Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW), **ES** (YA). – Europe (WE, NE), N America.

Euura pribaicalica (Lindqvist, 1970) [Amauronematus]. Host plant: Salix spp. (Salicaceae). Russia: **ES** (IR).

Euura pristiphoroides (Lindqvist, 1972) [Amauronematus]. Host plant: Salix spp. (Salicaceae). Russia: **ES** (IR), **FE** (KA).

Euura proxima (Serville, 1823) [Nematus] (*Nematus proximus* Lepeletier, 1823; *N. gallicola* Stephens, 1835; *N. vallisnieri* Hartig, 1837; *N. redii* Contarinia, 1852; *Pontania gallicola* Costa, 1852; *Nematus albicarpus* Costa, 1859; *Messa hyalina* Norton, 1864; *Nematus festivus* Zaddach, 1884; *Euura flavipes* Cameron, 1885; *Pontania daedala* MacGillivray, 1921). Host plant: Salix spp. (Salicaceae); larvae form galls on lateral veins. Russia: **EP** (N, NW, C, E, S), **WS** (AL), **ES** (IR, BR), **FE** (KU, KA, MG). – Europe (WE, EE, NE, SE), Cyprus, Kazakhstan; introduced into the N America, Australia, New Zealand.

Euura pseudodispar (Lindqvist, 1969) [Pteronidea]. Host plant: Betula spp. (Betulaceae). Russia: **ES** (YA). – Europe (NE).

Euura pseudoleptocephala (Haris, 2006) [Amauronematus]. Russia: **FE** (SA).

Euura pseudotorneensis (Conde, 1935) [Amauronematus]. Russia: **FE** (SA).

Euura pumilio (Konow, 1903) [Pachynematus]. Host plant: Ribes spp. (Grossulariaceae); larvae in black currant berries. Russia: **EP** (NW, C, E), **WS** (TM, TK, AL), **ES** (KR). – Europe (WE, EE, NE).

Euura punctifrons (Malaise, 1931) [Pontania]. Russia: **FE** (KA).

Euura punicea (Christ, 1791) [Tenthredo] (*Tenthredo nigrata* Retzius, 1783; *T. crocea* Fabricius, 1804; *Nematus melanosternus* Serville, 1823; *N. melanosternus* Lepeletier, 1823; *N. prototypus* Förster, 1854; *Amauronematus excellens* Forsius, 1921). Host plant: Populus spp. (Salicaceae). Russia: **EP** (N, NW, C), **ES** (IR, YA). – Europe (WE, EE, NE), Korean Peninsula.

Euura purpureae (Cameron, 1884) [Nematus] (*E. acuminata* Enslin, 1915). Host plant: *Salix purpurea*, *S. acutifolia* (Salicaceae). Russia: **EP** (C). – Europe (WE, EE, NE, SE).

Euura pustulator (Forsius, 1923) [Pontania]. Host plant: *Salix phyllicifolia*, *S. pulchra* (Salicaceae); larvae form galls. Russia: **EP** (N). – Europe (WE, EE, NE).

Euura pygmaea Brischke, 1883 (Cryptocampus). Russia: **EP** (NW). – Europe (EE).

Euura quieta (Eversmann, 1847) [Nematus]. Russia: **EP** (E).

Euura quinquemontana (Jakovlev, 1891) [Pachyne-matus]. Russia: **EP** (NC).

Euura ranini (Lindqvist, 1960) [Amauronematus]. Host plant: *Populus* spp. (Salicaceae). Russia: **ES** (IR). – Europe (NE).

Euura relictana (Zinovjev, 1981) [Pontania]. Host plant: *Chosenia arbutifolia* (Salicaceae); larvae form galls. Russia: **FE** (KH, PR, KA, MG).

Euura respondens (Förster, 1854) [Nematus] (*Nematus nitens* Thomson, 1888; *Pteronus balassagloii* Jakovlev, 1891). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (E). – Europe (WE, EE, NE), Uzbekistan, Kazakhstan.

Euura reticulata (Holmgren, 1883) [Nematus] (*Nematus arcticus* Thomson, 1871; *N. mysticus* Holmgren, 1883; *N. anceps* Holmgren, 1883; *N. occipitalis* Holmgren, 1883; *N. picticollis* Holmgren, 1883; *N. arctica* Dalla Torre, 1894; *Pontania popofiana* Kincaid, 1900; *P. glinka* Kancaid, 1900; *P. forsiusi* Enslin, 1915; *Amauronematus arcticola* Enslin, 1915; *A. alsius* Benson, 1935). Host plant: *Vaccinium* spp. (Ericaceae). Russia: **EP** (N), **WS** (TM), **ES** (KR, YA), **FE** (MG). – Europe (WE, NE), N America.

Euura ribesicola (Lindqvist, 1949) [Pteronidea] (*Nematus beybienkoi* Skorikova, 1952). Host plant: *Ribes* spp. (Grossulariaceae). Russia: **EP** (N), **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR, YA), **FE** (KH). – Europe (NE).

Euura ribesii (Scopoli, 1763) [Tenthredo] (*Nematus dimidiatus* Lepeletier, 1823; *N. trimaculatus* Lepeletier, 1823; *N. dimidiatus* Serville, 1823; *N. trimaculatus* Serville, 1823; *N. ribesii* Stephens, 1829; *Tenthredo grossulariae* folii Moore, 1831; *T. ventricosa* Bouché, 1834; *Nematus grossulariae* Dahlbom, 1835; *N. ventricosus* Hartig, 1837; *N. flavipes* Hartig, 1840; *N. xanthophorus* Hartig, 1840; *N. macrocerus* Hartig, 1840; *N. ribis* Leduc, 1842; *Tenthredo grossulariae* Fischer von Waldheim, 1843; *Pteronus*

longicornis Marlatt, 1896; *P. arapahonum* Cockerell, 1906; *Pteronidea aceris* Rohwer, 1915; *P. ribesii feminina* Enslin, 1916; *P. ribesii konowi* Enslin, 1916; *P. equatia* MacGillivray, 1923). Host plant: *Ribes* spp. (Grossulariaceae). Russia: **EP** (NW, C, E, S, NC), **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR, YA, ZB), **FE** (KH, PR). – Europe (WE, EE, NE, SE), Central Asia, Kazakhstan, Korean Peninsula, Japan (Hon); introduced into the N America.

Euura rubiginosa (Hellén, 1951) [Amauronematus]. Russia: **ES** (KR).

Euura rufomacula (Malaise, 1931) [Amauronematus] (*Amauronematus obesus* Lindqvist, 1959). Russia: **FE** (KA). – Europe (NE).

Euura rufus (Konow, 1896) [Amauronematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N), **ES** (IR, ZB), **FE** (AM, KA, MG). – Europe (NE).

Euura sagmarius (Konow, 1895) [Amauronematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C, S), **WS** (TM), **ES** (KR). – Europe (WE, NE), N America.

Euura saliceti sibirica Stroganova, 1985. Russia: **WS**.

Euura salicis (Linnaeus, 1758) [Tenthredo] (*Tenthredo capreae* Linnaeus, 1758; *T. notata* O.F. Müller, 1776; *Cynips salicis capreae* Christ, 1791; *Nematus klugi* Dahlbom, 1835; *N. immaculatus* Snellen van Vollenhoven, 1869; *N. inflatus* Thomson, 1871; *Pteronidea salicis obscurior* Enslin, 1916). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C, S, NC). – Europe (WE, EE, NE, SE), Caucasus.

Euura saliciscinereae (Retzius, 1783) [Tenthredo] (*Tenthredo salicis* Christ, 1791; *Nematus gallarum* Hartig, 1837; *N. acerosus* Hartig, 1840; *N. saliceti* Förster, 1854; *N. aestivus* Thomson, 1863; *N. cinereae* Thomson, 1871; *Pontania harrisoni* Benson, 1940; *P. varia* Kopelke, 1991; *P. norvegica* Kopelke, 1991). Host plant: *Salix myrsinifolia* (Salicaceae); larvae form galls. Russia: **EP** (C, E), **UR**. – Europe (WE, EE, NE).

Euura samolad (Malaise, 1920) [Pontania]. Host plant: *Salix lapponum* (Salicaceae); larvae form galls. Russia: **EP** (N, NW). – Europe (WE, NE).

Euura schlueteri (Enslin, 1915) [Amauronematus] (*Amauronematus lundbohmi* Malaise, 1920; *A. uliginosae* Malaise, 1920; *A. squamotus* Lindqvist, 1959). Host plant: *Vaccinium* spp. (Ericaceae). Russia: **EP** (N), **WS** (TM), **ES** (KR, IR, BR, YA, ZB), **FE** (AM, MG). – Europe (NE).

Euura scotapsis (Förster, 1854) [Nematus] (*Nematus westermanni* Thomson, 1863; *N. anglicus* Cameron, 1877; *N. nigrolineatus* Cameron, 1879). Host

- plant: *Salix viminalis*, *S. schwerinii* and others (Salicaceae). Russia: **EP** (N, NW, C), **ES** (KR, IR, YA), **FE** (KA). – Europe (WE, EE, NE), Armenia, Kyrgyzstan.
- Euura scutellata** (Hartig, 1837) [Nematus] (*Nematus immundus* Thomson, 1863). Host plant: *Abies* spp., *Picea* spp., *Larix* spp. (Pinaceae). Russia: **EP** (N, NW, C), **ES** (KR, IR, YA). – Europe (WE, EE, NE).
- Euura semilactea** (Zaddach, 1983) [Nematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW). – Europe (WE, EE, NE), N America.
- Euura semiopaca** (Lindqvist, 1958) [Pteronidea]. Russia: **EP** (N, NC), **WS** (TM). – Europe (NE).
- Euura sempersolis** (Kiær, 1898) [Amauronematus] (*Amauronematus tristis* Lindqvist, 1959). Russia: **EP** (N), **WS** (TM), **ES** (YA), **FE** (KA, MG). – Europe (NE).
- Euura septentrionalis** (Saarinen, 1950) [Amauronematus] (*Nematus taiganus* Zhelochovtsev, 1988). Russia: **FE** (MG). – Europe (NE).
- Euura seriepunctata** (Malaise, 1921) [Pteronidea]. Russia: **EP** (N), **FE** (MG). – Europe (NE).
- Euura sibirica** (Malaise, 1931) [Pontania]. Host plant: *Salix* spp. (Salicaceae). Russia: **FE** (KA).
- Euura sjoeblomi** (Malaise, 1931) [Amauronematus] (*Amauronematus tridentatus* Malaise, 1931). Russia: **FE** (KA).
- Euura smithae** (Ross, 1945) [Pachynematus] (*Pachynematus angustatus* Lindqvist, 1949). Russia: **EP** (Taeger et al., 2006). – Europe (WE, NE), N America.
- Euura speciosa** (Hellén, 1951) [Amauronematus]. Russia: **FE** (MG). – Europe (NE).
- Euura spiraeae** (Zaddach, 1883) [Nematus]. Host plant: *Spiraea* spp., *?Aruncus* spp. (Rosaceae). Russia: **EP** (NW), **ES** (IR, BR). – Europe (WE, NE).
- Euura stenogaster** (Förster, 1854) [Nematus] (*Nematus trifurcatus* W.F. Kirby, 1882; *Amauronematus analis* Konow, 1897; *A. vescus* MacGillivray, 1921; *A. veneficus* MacGillivray, 1923; *A. festivus* Saarinen, 1950). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR, YA). – Europe (WE, EE, NE, SE), N America.
- Euura stichi** (Enslin, 1913) [Pteronidea] (*Nematus testaceus* Thomson, 1871; *Pteronidea fuscårina* Benson, 1933). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N). – Europe (WE, EE, NE, SE).
- Euura styx** (Benson, 1958) [Pachynematus]. Host plant: *Picea* spp. (Pinaceae). Russia: **ES** (KR). – Europe (WE, EE, NE).
- Euura subgemma** Liston, 2006. Russia: **EP** (N). – Europe (WE, EE, NE).
- Euura sylvestris** (Cameron, 1884) [Nematus] (*Nematus silvester* Dalla Torre, 1894; *N. fastosus ponojense* Hellén, 1948; *N. fastosus punctiscuta* Hellén, 1948). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (C, NC), "Siberia" (Zhelochovtsev, Zinovjev, 1995), **FE** (SA). – Europe (WE, EE, NE).
- Euura temporalis** (Hellén, 1970) [Amauronematus]. Russia: **EP** (N, C), **FE** (KA). – Europe (NE).
- Euura tenuiserra** (Lindqvist, 1944) [Amauronematus]. Russia: **EP** (N, NW). – Europe (WE, NE).
- Euura testaceipes** (Brischke, 1883) [Cryptocampus] (*E. cynips* Newman, 1837). Host plant: *Salix* spp. (Salicaceae); larvae form spindle-shaped galls on the petiole or central vein of leaf. Russia: **EP** (NW, C, CR). – Europe (WE, EE, NE), Armenia.
- Euura tibialis** (Newman, 1837) [Nematus] (*Nematus hortensis* Hartig, 1837; *N. xanthobaptus* Förster, 1854; *N. trilineatus* Norton, 1867; *N. catachloris* Snellen van Vollenhoven, 1869; *N. similaris* Norton, 1880; *N. robiniae* Forbes, 1885; *Pteronus solitarius* Rohwer, 1908). Host plant: *Robinia pseudoacacia* (Fabaceae). Russia: **EP** (C, S). – Europe (WE, EE, SE), N America.
- Euura tillbergi** (Malaise, 1920) [Amauronematus] (*Amauronematus tillbergi foveifrons* Malaise, 1920). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N), **ES** (IR). – Europe (WE, NE), Kyrgyzstan, Korean Peninsula, N America.
- Euura toeniata** (Serville, 1823) [Nematus] (*Nematus taeniatus* Lepeletier, 1823; *Tenthredo humeralis* Zetterstedt, 1838; *Amauronematus aemulus* Konow, 1895; *A. zetterstedti* Malaise, 1920). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW), **ES** (IR, YA). – Europe (WE, EE, NE), Korean Peninsula.
- Euura tranquilla** Vårdal et Prous, 2014 (*Amauronematus pacificus* Malaise, 1931; *A. obscurus* Lindqvist, 1962). Russia: **ES** (Lindqvist, 1962), **FE** (KA). – Europe (NE).
- Euura transversalis** (Lindqvist, 1977) [Pteronidea]. Russia: **ES** (IR).
- Euura trautmanni** (Enslin, 1919) [Amauronematus] (*Amauronematus lateralis* Konow, 1895; *A. cameroni* Perkins, 1929; *A. piliserra* Lindqvist, 1943). Russia: **EP** (N, NW), **ES** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE, SE).
- Euura triandrae** (Benson, 1941) [Pontania]. Host plant: *Salix triandra* (Salicaceae). Russia: **EP** (NW). – Europe (WE, EE, NE), Kazakhstan.

- Euura trochanterata** (Malaise, 1931) [Pteronidea] (*Nematus pieli* Takeuchi, 1938). Russia: **FE** (PR). – China (NE).
- Euura tuberculata** (Benson, 1953) [Nematus]. Host plant: *Salix myrtilloides*, *S. saxatilis*, *S. bebbiana*, *S. integra* (Salicaceae). Russia: **EP** (N, NW), **ES** (YA), **FE** (PR, KU, MG, CH). – Europe (WE, NE).
- Euura tunicata** (Zaddach, 1883) [Nematus] (*Nematus laevis* Brischke, 1883). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW, C), **ES** (IR). – Europe (WE, EE, NE), Kyrgyzstan.
- Euura turgaiensis** (Safjanov, 1977) [Nematus]. Russia: **WS** (AL). – Kazakhstan.
- Euura udus** (Holmgren, 1883) [Nematus]. Russia: **EP** (N). – Europe (NE).
- Euura umbrata** (Thomson, 1871) [Nematus] (*Nematus collinus* Cameron, 1882; *Pteronus similis* Forsius, 1911; *Pteronidea verrucosae* Kontuniemi, 1966). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW, E), **ES** (IR). – Europe (WE, EE, NE).
- Euura unigallae** (Vikberg et Zinovjev, 2014) [Pontania]. Host plant: *Salix* spp. (Salicaceae); larvae form galls. Russia: **EP** (NW). – Europe (NE).
- Euura vaginosa** (Konow, 1903) [Pachynematus]. Russia: **ES** (IR). – Europe (NE).
- Euura vaga** (Fabricius, 1781) [Tenthredo] (*Tenthredo flaviventris* Gmelin, 1790; *Nematus leucogaster* Hartig, 1840; *N. hypoleucus* Förster, 1854; *N. micraulius* Förster, 1854; *N. punctipleuris* Thomson, 1863; *N. punctulatus* Thomson, 1863; *N. meridionalis* André, 1880; *N. inconspicuus* W.F. Kirby, 1882; *Pachynematus corticosus* MacGillivray, 1901; *Holcocneme ulbrichti* Enslin, 1910; *Pachynematus roscidus* MacGillivray, 1921). Host plant: *Carex* spp. (Poaceae), *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C, E, NC), **ES** (IR, YA), **FE** (AM, KA, MG). – Europe (WE, EE, NE), Turkey, Kyrgyzstan, Kazakhstan, Mongolia, China (NW).
- Euura variabilis** (Malaise, 1931) [Amauronematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (Taege et al., 2006), **FE** (KA, MG).
- Euura varians** (Lindqvist, 1962) [Amauronematus]. Russia: **EP** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR). – Europe (NE).
- Euura variator** (Ruthe, 1859) [Nematus] (*Amauronematus longidens* Lindqvist, 1962). Host plant: *Salix* spp. (Salicaceae). Russia: **FE** (MG). – Europe (WE, EE, NE), N America.
- Euura vastatrix** (Zhelochovtsev, 1935) [Pteronidea]. Host plant: *Ribes* spp. (Grossulariaceae). Russia: **WS** (TK), **ES** (KR, IR), **FE** (AM, KH).
- Euura vastidens** (Lindqvist, 1975) [Amauronematus]. Russia: **ES** (IR).
- Euura venusta** (Brischke, 1883) [Cryptocampus] (*Cryptocampus brevicornis* Zaddach, 1883). Host plant: *Salix* spp. (Salicaceae); larvae in galls on the base of a leaf petiole. Russia: **EP** (NW, C), "Siberia" (Zhelochovtsev, Zinovjev, 1995), **FE** (AM). – Europe (WE, EE, NE), Armenia.
- Euura vesicator** (Bremi-Wolf, 1849) [Nematus] (*Nematus helicinus* Brischke, 1850; *N. leptocerus* Förster, 1854; *N. lugdunensis* Snellen van Vollenhoven, 1871). Host plant: *Salix purpurea*, *S. superpurpurea* (Salicaceae); larvae form galls. Russia: **EP** (NW, C), **ES** (YA). – Europe (WE, EE, NE, SE), Caucasus.
- Euura vicina** (Serville, 1823) [Nematus] (*Nematus vicinus* Lepeletier, 1823; *N. longispinis* Kriechbaumer, 1885; *Holcocneme flavipes* Matsumura, 1912). Host plant: *Salix* spp., *Populus* spp. (Salicaceae), *Betula* spp. (Betulaceae), *Rumex* spp. (Polygonaceae). Russia: **EP** (NW, C, NC), **ES** (IR), **FE** (KH, PR, SA, KA). – Europe (WE, EE, NE, SE), Kyrgyzstan, Kazakhstan, Korean Peninsula, Japan (Hok, Hon), N America.
- Euura viduatinus** (Malaise, 1931) [Amauronematus] (*Amauronematus viduatinus apiciscerra* Malaise, 1931). Russia: **ES** (Zhelochovtsev, Zinovjev, 1995), **FE** (KA). – Europe (NE).
- Euura viduatoides** (Lindqvist, 1960) [Amauronematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **ES** (IR). – Europe (WE, NE).
- Euura viduata** (Zetterstedt, 1838) [Tenthredo] (*Nematus lepidotus* Hartig, 1840; *N. brachyotus* Förster, 1854; *N. luctuosus* Förster, 1854; *N. notatus* Förster, 1854; *N. vagus* Zaddach, 1883; *Amauronematus viduatus lugens* Enslin, 1915; *A. viduatus laetus* Enslin, 1915). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW, C), **ES** (IR), **FE** (AM, MG). – Europe (WE, EE, NE, SE), Mongolia, China (NC), N America; introduced into the Australia, New Zealand.
- Euura villosa** (Thomson, 1863) [Nematus] (*Nematus arcticus* Holmgren, 1869; *N. brachyacanthus palliditarsus* Cameron, 1876; *N. gelidus* W.F. Kirby, 1882). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N), **ES** (KR, BR), **FE** (CH). – Europe (NE), N America.
- Euura viminalis** (Linnaeus, 1758) [Cynips] (*Nematus vollenhovenii* Cameron, 1874; *N. interstitialis* Cameron, 1876; *N. nigritarsis* André, 1880; *Pontania ciccum* Konow, 1901; *P. viminalis xanthaspis* Enslin,

1915; *P. hungarica* Enslin, 1918). Host plant: *Salix purpurea*, *S. babylonica* (Salicaceae); larvae form galls. Russia: **EP** (C, E, S, NC, CR), **UR**, **WS** (AL), **ES** (TU, YA), **FE** (AM, PR, SA, KU, KA, MG). – Europe (WE, EE, SE), Armenia, Turkey, Mongolia.

Euura viridis (Stephens, 1835) [Nematus] (*Nematus prasinus* Hartig, 1837; *N. polystipus* Förster, 1854; *N. hypoleucus* Costa, 1859; *N. costae* W.F. Kirby, 1882). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N), **ES** (IR, BR), **FE** (SA, MG). – Europe (WE, EE, NE, SE), Kazakhstan.

Euura virilis (Zirngiebl, 1955) [Pontania] (*Pontania rufana* Lacourt, 1973). Host plant: *Salix purpurea* (Salicaceae); larvae form galls. Russia: **EP** (NW). – Europe (WE, EE, NE, SE).

Euura viridissima (Möller, 1882) [Nematus] (*Nematus glutinosae* Cameron, 1882). Host plant: *Alnus* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC). – Europe (WE, EE, NE, SE).

Euura vittata (Serville, 1823) [Nematus] (*Nematus vittatus* Lepeletier, 1823; *N. melanoleucus* Hartig, 1840; *N. exoletus* Eversmann, 1847; *N. continuus* Eversmann, 1847; *N. scabrilvalvis* Thomson, 1871; *Amauronematus konowi* Enslin, 1915; *A. vittatus sternalis* Enslin, 1915; *A. crispus* Benson, 1948). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (N, NW, C, E), **UR**, **ES** (IR, YA), **FE** (KA, MG). – Europe (WE, EE, NE), Kyrgyzstan.

Euura weiffenbachiella Liston et Vikberg, 2017 (*E. weiffenbachii* Ermolenko, 1988). Host plant: *Salix rosmarinifolia*, *S. repens* (Salicaceae). Russia: **ES** (YA). – Europe (WE, EE, NE).

Euura zaitzevi (Enslin, 1919) [Amauronematus]. – Russia: **EP** (N), **WS** (TM).

HEMICROA Stephens, 1835 (*Leptocerca* Hartig, 1837; *Engages* Gistel, 1848; *Leptocercus* Thomson, 1871; *Varna* Ross, 1937). Type species *Tenthredo australis* Serville, 1823. The larvae live in colonies on the *Alnus*, *Betula* (Betulaceae). The genus is distributed in Holarctic and Oriental region. Number of species: World – 13; Palaearctic – 10; Russia – 4.

Hemicroa australis (Serville, 1823) [Tenthredo] (*Tenthredo alni* Linnaeus, 1767; *T. luctuosa* Hill, 1773; *T. australis* Lepeletier, 1823). Host plant: *Betula* spp., *Alnus* spp. (Betulaceae); larvae live alone. Russia: **EP** (N, NW, C, E), **UR**, **WS** (TK, AL), **ES** (YA). – Europe (WE, EE, NE), Kazakhstan.

Hemicroa crocea (Geoffroy, 1785) [Tenthredo] (*Tenthredo rufa* Panzer, 1799; *Hemicroa stigma*

Stephens, 1835; *Leptocercus nigriceps* Thomson, 1871; *Dineura unicolor* Rudow, 1872; *D. americana* Provancher, 1882; *Nematus ardens* Zaddach, 1883; *Dineura pallida* Ashmead, 1890; *Hemicroa dyari* Rohwer, 1918; *H. orientalis* Rohwer, 1921; *H. washingtonia* Rohwer, 1932). Host plant: *Alnus* spp., *Betula* spp., *Corylus* spp. (Betulaceae), *Salix* spp. (Salicaceae); larvae live in groups. Russia: **EP** (N, NW, C, E, NC), **UR**, **ES** (BR, YA), **FE** (AM, KH, PR, SA). – Europe (WE, EE, NE), China (Wei et al., 2006), India, SE Asia, N America.

Hemicroa haematopygia Zhelochovtsev, 1935. Host plant: *Alnus* spp., *Betula* spp. (Betulaceae). Russia: **ES** (IR, BR, YA), **FE** (AM, PR, SA, MG). – Korean Peninsula.

Hemicroa paramushirensis Takeuchi, 1933. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (SA, KU). – Japan (Hon).

HOPLOCAMPA Hartig, 1837 (*Macgillivraya* Ashmead, 1898; *Macgillivrayella* Ashmead, 1900). Type species *Tenthredo brevis* Klug, 1816. The larvae in fruits of Rosaceae. The genus is distributed in Holarctic; two species in Oriental region. Number of species: World – > 40; Palaearctic – > 20; Russia – 11.

Hoplocampa alpina (Zetterstedt, 1838) [Tenthredo] (*Selandria pallida* Newman, 1837). Host plant: *Sorbus* spp. (Rosaceae). Russia: **EP** (N, C), **WS** (TM), **ES** (KR). – Europe (WE, EE, NE), Japan (Hon).

Hoplocampa brevis (Klug, 1816) [Tenthredo] (*Tenthredo fallax* Serville, 1823; *T. fallax* Lepeletier, 1823; *T. pyri* Vallot, 1848). Host plant: *Pyrus* spp., *Malus* spp. (Rosaceae). Russia: **EP** (NC, CR). – Europe (WE, EE, SE), Caucasus, SW Asia; introduced into the N America.

Hoplocampa chrysorrhoea (Klug, 1816) [Tenthredo] (*H. chrysorrhoea nigrita* Enslin, 1914). Host plant: *Prunus* spp. (Rosaceae). Russia: **EP** (NC, CR). – Europe (WE, EE), Cyprus.

Hoplocampa crataegi (Klug, 1816) [Tenthredo] (*Tenthredo pallida* Serville, 1823; *T. luteola* Serville, 1823; *T. verticata* Serville, 1823; *T. pallida* Lepeletier, 1823; *T. luteola* Lepeletier, 1823; *T. verticata* Lepeletier, 1823). Host plant: *Crataegus* spp. (Rosaceae). Russia: **EP** (NC). – Europe (WE, EE, NE, SE).

Hoplocampa ephippiata Konow, 1897. Host plant: *Malus* spp. (Rosaceae). Russia: **WS** (AL), **ES** (IR, BR), **FE** (AM, KH, PR).

Hoplocampa flava (Linnaeus, 1760) [Tenthredo] (*Tenthredo ruficapilla* Gmelin, 1790; *T. glaucopis*

Rossi, 1790; *Allantus ferrugineus* Panzer, 1803; *Hylotoma ferruginea* Fabricius, 1804; *H. simplex* Fallén, 1807; *Tenthredo brunnea* Klug, 1816; *Hoplocampa flava dimidiata* Costa, 1894; *Tomostethus testaceus* Niegabitowski, 1899). Host plant: *Prunus* spp. (Rosaceae). Russia: **EP** (S, NC). – Europe (WE, EE, NE, SE), Caucasus, SW Asia.

Hoplocampa fulvicornis (Panzer, 1801) [Tenthredo] (*Tenthredo rutilicornis* Klug, 1816; *T. haemorrhoidalis* Serville, 1823; *T. haemorrhoidalis* Lepeletier, 1823; *Hoplocampa rutilicornis pleuris* Zirngiebl, 1954; *H. prunicola* Benson, 1968). Host plant: *Prunus* spp. (Rosaceae). Russia: **EP** (CR). – Europe (WE, EE, NE, SE).

Hoplocampa minuta (Christ, 1791) [Tenthredo] (*Tenthredo hylotomoides* Serville, 1823; *T. parvula* Serville, 1823; *T. hylotomoides* Lepeletier, 1823; *T. parvula* Lepeletier, 1823; *T. turcarum* Vallot, 1848; *Hoplocampa fabricii* W.F. Kirby, 1882; *H. minuta dudai* Gregor, 1942). Host plant: *Prunus* spp. (Rosaceae). Russia: **EP** (NW, CR). – Europe (WE, EE, NE, SE), Armenia, Syria, Uzbekistan, China (NW).

Hoplocampa phantom Zinovjev, 1993. Host plant: *Sorbus* spp. (Rosaceae). Russia: **UR, ES** (Zhe-lochovtsev, Zinovjev, 1995), **FE** (PR).

Hoplocampa plagiata (Klug, 1816) [Tenthredo]. Host plant: *Amelanchier* spp., *Crataegus* spp. (Rosaceae). Russia: **EP** (S). – Europe (WE, EE, SE), Caucasus.

Hoplocampa testudinea (Klug, 1816) [Tenthredo]. Host plant: *Malus* spp., *Pyrus* spp. (Rosaceae). Russia: **EP** (C, S, NC, CR). – Europe (WE, EE, NE, SE), SW Asia; introduced into the N America.

MEGADINEURA Malaise, 1931 (*Stenomesoneura* Wei, 1998). Type species *Dineura grandis* André, 1882. The genus is distributed in East Asia; one species in Oriental region. Number of species: World and Palaearctic – 5; Russia – 1.

Megadineura grandis (André, 1882) [Dineura]. Russia: **ES** (IR), **FE** (PR). – China (NE), Korean Peninsula, Japan (Takeuchi, 1952).

MESONEURA Hartig, 1837 (*Pristis* Brullé, 1846; *Mesonevra* Agassiz, 1848; *Lisconeura* Rohwer, 1908). Type species *Tenthredo opaca* Fabricius, 1775. The larvae feed on *Quercus* (Fagaceae). The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 9; Russia – 3.

Mesoneura koreana Ryu, Kim et Lee, 1991. Host plant: *Quercus mongolica* (Fagaceae). Russia: **FE** (PR). – Korean Peninsula.

Mesoneura lanigera Benson, 1954. Host plant: *Quercus* spp. (Fagaceae). Russia: **EP** (NC, CR). – Europe (EE), Cyprus.

Mesoneura opaca (Fabricius, 1775) [Tenthredo] (*Tenthredo verna* Klug, 1816; *T. punctigera* Lepeletier, 1823; *T. punctigera* Serville, 1823; *Selandria biloba* Stephens, 1835; *Dineura pallipes* Hartig, 1837; *D. dorsalis* Förster, 1844; *D. selandriiformis* Cameron, 1875; *Mesoneura opaca nigerrima* Enslin, 1914; *M. opaca lucida* Enslin, 1914; *M. opaca obscuriventris* Enslin, 1914). Host plant: *Quercus* spp. (Fagaceae). Russia: **EP** (C, S, NC, CR). – Europe (WE, EE, NE, SE), Caucasus.

NEMATINUS Rohwer, 1911. Type species *Nematus fuscipennis* Lepeletier, 1823. The larvae feed on Betulaceae. The genus is distributed in Holarctic. Number of species: World – 26; Palaearctic – 22; Russia – 9.

Nematinus acuminatus (Thomson, 1871) [Nematus] (*Nematus nebulosus* Stein, 1881). Host plant: *Betula* spp., *Corylus* spp., *Alnus* spp. (Betulaceae). Russia: **EP** (NW, C, E), **UR, WS** (AL), **ES** (IR, YA), **FE** (AM, SA, MG). – Europe (WE, EE, NE, SE), Korean Peninsula, Japan (Hok).

Nematinus aterrimus Vikberg, 1982 (*Pteronidea pontanioides* Malaise, 1931). Russia: **FE** (SA, KA). – Japan (Hok, Hon).

Nematinus bilineatus (Klug, 1819) [Tenthredo] (*Nematus flavus* Gimmerthal, 1844; *N. luteus trimaculatus* Cameron, 1876; *N. flavicans* W.F. Kirby, 1882; *Nematinus bilineatus virilis* Enslin, 1915; *N. bilineatus muliebris* Enslin, 1915; *N. bilineatus luteiformis* Enslin, 1915). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW). – Europe (WE, EE, NE, SE), Turkey.

Nematinus caledonicus (Cameron, 1882) [Nematus] (*N. nigrosternatus* Malaise, 1931). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (NW, C), **ES** (IR), **FE** (PR, KU, KA). – Europe (WE, NE).

Nematinus fuscipennis (Serville, 1823) [Nematus] (*Tenthredo rufa* Schrank, 1802; *T. alnina* Bechstein et Scharfenberg, 1805; *Nematus fuscipennis* Lepeletier, 1823; *N. fumipennis* Stephens, 1835; *N. gravenhurstii* Gimmerthal, 1836). Host plant: *Alnus* spp., *Carpinus* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, S). – Europe (WE, EE, NE, SE).

Nematinus kamtchaticus Malaise, 1931. Russia: **ES** (KR), **FE** (SA, KA, MG, CH).

Nematinus luteus (Panzer, 1803) [Nematus] (*Tenthredo lutea* Fabricius, 1804; *Nematinus willigiae*

- Stein, 1926; *N. willigiae pilosus* Benson, 1958). Host plant: Alnus spp., Corylus spp. (Betulaceae). Russia: **EP** (N, NW, C, E, NC). – Europe (WE, EE, NE), Japan (Hok, Hon).
- Nematinus rubrocaudatus** Takeuchi, 1956. Russia: **FE** (KU). – Japan (Hon).
- Nematinus steini** Blank, 1998 (*Tenthredo alneti* Bechstein et Scharfenberg, 1805). Host plant: Alnus spp. (Betulaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE).
- NEMATUS** Panzer, 1801 (*Nematus* Jurine, 1801; *Nematus* Jurine, 1807; *Craesus* Leach, 1817; *Hypolaepus* W.F. Kirby, 1882; *Paranematus* Zinovjev, 1978). Type species *Tenthredo lucida* Panzer, 1801. The larvae feed on the deciduous trees and shrubs. The genus is distributed mainly in Holarctic, few species in Oriental region. Number species: World – about 40; Palaearctic – about 35; Russia – 20 (+ 1 ssp.).
- Nematus alniastri** (Scharfenberg, 1805) [*Tenthredo*] (*N. varus* Villaret, 1832; *Craesus varus ligeris* Pic, 1923). Host plant: Alnus spp. (Betulaceae). Russia: **EP** (N, NW, C, E, NC). – Europe (WE, EE, NE, SE), Caucasus, Turkey; introduced into the N America.
- Nematus brischkei** Zaddach, 1876. Host plant: Carpinus spp., Corylus spp. (Betulaceae). Russia: **EP** (NW). – Europe (WE, EE).
- Nematus coeruleus** Zinovjev, 1978. Host plant: Lonicera coerulea (Caprifoliaceae). Russia: **EP** (NW).
- Nematus egregius** Kajmuk, 1986. Host plant: Crataegus spp. (Rosaceae). Russia: **ES** (YA).
- Nematus inornatus** (Takeuchi, 1936) [*Holcocneme*]. Host plant: Salix spp. (Salicaceae), Vaccinium spp. (Ericaceae). Russia: **FE** (KU). – Japan (Hon, Sado).
- Nematus jakowleffi** (Konow, 1902) [*Holcocneme*]. Host plant: Salix spp. (Salicaceae), ?Betula spp. (Betulaceae). Russia: **ES** (IR), **FE** (AM).
- Nematus japonicus** (Takeuchi, 1921) [*Craesus*] (*N. nigromaculatus* Malaise, 1931). Host plant: Alnus spp. (Betulaceae). Russia: **FE** (PR, SA, KU, KA). – Korean Peninsula, Japan (Hok, Hon).
- Nematus latipes** Villaret, 1832. Host plant: Betula spp. (Betulaceae). Russia: **EP** (C, E), **ES** (BR, YA). – Europe (WE, EE, NE, SE), Kazakhstan.
- Nematus lonicerae** (Weiffenbach, 1957) [*Pachyne-matus*]. Host plant: Lonicera spp., Symphoricarpos spp. (Caprifoliaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, NE, SE).
- Nematus lucens** (Enslin, 1918) [*Pteronidea*] (*Mesoneura nigrostigmata* Haris, 2001). Russia: **EP** (C). – Europe (EE).
- Nematus lucidus** (Panzer, 1801) [*Tenthredo*] (*N. cinctus* Serville, 1823; *N. cinctus* Lepeletier, 1823; *Holcocneme lucidus rufa* Zirngiebl, 1937). Host plant: Crataegus spp., Prunus spp. (Rosaceae). Russia: **EP** (NC), **ES** (YA), **FE** (KU). – Europe (WE, EE, NE, SE), Cyprus, Japan (Hok, Hon).
- Nematus mandshuricus** Zhelochovtsev et Zinojev, 1994. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **ES** (ZB), **FE** (KH).
- Nematus nigrodorsatus** Malaise, 1931. Russia: **FE** (KA).
- Nematus princeps** Zaddach, 1876. Host plant: Salix spp. (Salicaceae). Russia: **EP** (NW), **UR**, **WS** (AL), **ES** (IR, BR, YA), **FE** (AM, PR, SA, KU, MG). – Europe (WE, EE, NE), Mongolia, Japan (Hok, Hon, Shi).
- Nematus septentrionalis** (Linnaeus, 1758) [*Tenthredo*] (*Tenthredo alni* Linnaeus, 1758; *T. largipes* Retzius, 1783; *Nematus laticrus* Villaret, 1832; *Craesus stephensi* Newman, 1837). Host plant: Betulaceae, Oleaceae, Salicaceae. Russia: **WS** (AL), **ES** (KS). – Europe (WE, EE, NE, SE), Armenia, Turkey.
- Nematus shinoharai** (Beneš, 1990) [*Craesus*]. Host plant: Juglans spp. (Juglandaceae). Russia: **FE** (PR). – Japan (Hok, Hon).
- Nematus tataricus** Zinovjev, 1978. Host plant: Lonicera tatarica, L. xylosteum, Symphoricarpu racemosus (Caprifoliaceae). Russia: **EP** (NW, C), **UR**. – Europe (WE, NE), Kazakhstan.
- Nematus tulunensis** Vikberg, 1972. Host plant: Lonicera spp., Symphoricarpu sp. (Caprifoliaceae). Russia: **EP** (NW, C), **UR**, **ES** (IR, YA). – Europe (NE).
- Nematus wahlbergi tavastiensis** Vikberg, 1972. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **EP** (N). – Europe (NE).
- Nematus wahlbergi wahlbergi** Thomson, 1871 (*N. sardiniensis* Costa, 1886). Host plant: Lonicera spp. (Caprifoliaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE, SE).
- Nematus yokohamensis** (Konow, 1895) [*Holcocneme*]. Host plant: Lonicera spp. (Caprifoliaceae). Russia: **ES** (IR, BR), **FE** (PR, SA). – China (NE), Korean Peninsula, Japan (Hon).
- PLATYCAMPUS** Schiødte, 1839 (*Leptopus* Hartig, 1837; *Erasminus* Gistel, 1848; *Camponiscus* Newman, 1869). Type species *Nematus hypogastricus* Hartig, 1837. The larvae with strongly flattened body; live on the lower surface of leaves of woody plants. The genus is distributed in East Palaearctic; one species in West Europe, and one species

in Oriental region. Number of species: World and Palaearctic – 8; Russia – 6.

Platycampus amaculatus Verzhutskii, 1966. Host plant: *Betula* spp. (Betulaceae). Russia: **ES** (IR), **FE** (KH, PR).

Platycampus amurensis Zinovjev, 1986. Host plant: *Corylus* spp. (Betulaceae). Russia: **FE** (AM, PR).

Platycampus coryli Zinovjev, 1986. Host plant: *Corylus* spp. (Betulaceae). Russia: **FE** (AM, PR).

Platycampus luridiventris (Fallén, 1808) [Tenthredo] (*Tenthredo alnicola* Bechstein et Scharfenberg, 1805; *Nematus hypogastricus* Hartig, 1837; *N. alnivorus* Hartig, 1840; *N. rufipes* Tischbein, 1846; *Leptopus rufipes* Förster, 1854; *Nematus protensus* Förster, 1854; *Camponiscus healaei* Newman, 1869; *Nematus fennicus* André, 1880; *N. tischbeini* André, 1880; *N. alnicola* Zaddach, 1883; *N. cellularis* Brischke, 1884; *Platycampus luridiventris pleuritica* Enslin, 1915). Host plant: *Alnus* spp., *Corylus* spp., *Betula* spp. (Betulaceae). Russia: **EP** (NW, C), **UR**. – Europe (WE, EE, NE), China (Wei et al., 2006), Japan (Hon).

Platycampus speciosus Zinovjev, 1986. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (AM, KH, PR).

Platycampus zhelochovtsevi Zinovjev, 1986. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (AM, KH, PR, SA).

PRISTIPHORA Latreille, 1810 (*Diphadnus* Hartig, 1837; *Lygaeonematus* Konow, 1890; *Micronematus* Konow, 1890; *Gymnonychus* Marlatt, 1896; *Neopareophora* MacGillivray, 1908; *Neotomostethus* MacGillivray, 1908; *Dineuridea* Rohwer, 1912; *Sala* Ross, 1937; *Pristola* Ross, 1945; *Lygaeotus* Lindqvist, 1952; *Lygaeophora* Lindqvist, 1952; *Nepionema* Benson, 1960; *Melastola* Wong, 1968; *Sharliphora* Wong, 1969; *Oligonematus* Zhelochovtsev, 1988; *Lygaeotus* Liston, 1993; *Lygaeophora* Liston, 1993; *Pristicampus* Zinovjev, 1993). Type species *Pteronus testaceus* Jurine, 1807. The larvae feed on various plants, mainly on deciduous, rarely on coniferous. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – about 220; Palaearctic – about 170; Russia – 89.

Pristiphora abbreviata (Hartig, 1837) [Nematus] (*Gymnonychus californicus* Marlatt, 1896). Host plant: *Pyrus* spp. (Rosaceae). Russia: **EP** (NW, C, S, NC), **FE** (AM, KH, PR). – Europe (WE, EE, NE,

SE), Caucasus, Turkey, Kyrgyzstan; introduced into the N America.

Pristiphora abietina (Christ, 1791) [Tenthredo] (*Tenthredo pini* Retzius, 1783; *T. abietina* Christ, 1791; *T. abietum* Hartig, 1834; *Nematus abietinus* Dahlbom, 1835; *N. truncatus* Hartig, 1837). Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (NW, C), **ES** (YA). – Europe (WE, EE, NE, SE), Kyrgyzstan.

Pristiphora acutidens Lindqvist, 1977. Russia: **ES** (IR).

Pristiphora affinis (Lindqvist, 1952) [Lygaeonematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **ES** (KR). – Europe (NE).

Pristiphora albilabris (Boheman, 1852) [Nematus] (*Nematus albilabris* Thomson, 1863; *N. collaris* Stein, 1884). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (N, E), **ES** (IR). – Europe (WE, NE).

Pristiphora albitibia (Costa, 1859) [Nematus] (*Nematus puncticeps* Thomson, 1863; *N. agilis* Zaddach, 1884; *Pristiphora aterrima* Lindqvist, 1977; *P. nigropuncticeps* Haris, 2002). Host plant: *Vicia* spp. (Fabaceae). Russia: **EP** (NW, NC), **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (IR, BR, YA). – Europe (WE, EE, NE, SE), Mongolia.

Pristiphora alpestris (Konow, 1903) [Pachynematus] (*Lygaeonematus karvoneni* Lindqvist, 1952). Host plant: *Betula pendula*, *B. pubescens* (Betulaceae). Russia: **EP** (N), **ES** (IR). – Europe (WE, EE, NE).

Pristiphora amphibola (Förster, 1854) [Nematus] (*Nematus laetus* Cameron, 1883; *N. fraternus* Cameron, 1885). Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).

Pristiphora angulata Lindqvist, 1974. Host plant: *Spiraea chamaedryfolia*, *S. salicifolia* (Rosaceae). Russia: **EP** (NW). – Europe (NE), Mongolia.

Pristiphora aphantoneura (Förster, 1854) [Nematus] (*Tenthredo fulvipes* Fallén, 1808; *Cryptocampus distinctus* Costa, 1882; *Pristiphora pygmaea* Lindqvist, 1964). Host plant: *Lathyrus pratensis* (Fabaceae). Russia: **EP** (N, NW, C, E, NC), **UR**. – Europe (WE, EE, NE, SE), Caucasus, Turkey, Kyrgyzstan, Kazakhstan, Mongolia, China (NW), Korean Peninsula.

Pristiphora appendiculata (Hartig, 1837) [Nematus] (*P. pallipes* Lepeletier, 1823; *P. pallipes* Serville, 1823; *Nematus flavipes* Dahlbom, 1835; *N. fusicornis* Hartig, 1837; *N. enervis* Herrich-Schäffer, 1840; *N. cathoraticus* Förster, 1854; *N. pallicornis* Norton, 1861; *N. pallicornis labratus* Norton, 1861; *Pristiphora grossulariae* Walsh, 1866; *Nematus peletieri* André, 1880; *N. hypobalius* Zaddach, 1884;

N. pumilus Zaddach, 1884; *N. ghilianii* Costa, 1894; *Pristiphora anivskiensis* Haris, 2006). Host plant: Ribes spp. (Grossulariaceae). Russia: **EP** (N, NW, C, E, S, NC), **ES** (IR, BR), **FE** (KH, PR, SA, MG). – Europe (WE, EE, NE, SE), Turkey, Kazakhstan, Mongolia, China (NC), Korean Peninsula, Japan, N America.

Pristiphora apricoti Zinovjev, 1993. Russia: **FE** (PR). – Korean Peninsula.

Pristiphora armata (Thomson, 1863) [*Nematus*] (*Nematus crassicornis* Hartig, 1837; *N. crataegi* Brischke, 1883; *N. fletcheri* Cameron, 1884; *N. melanostomus* Zaddach, 1884; *N. ensicornis* Jacobs, 1884; *N. nigricollis* Cameron, 1885). Host plant: Crataegus spp. (Rosaceae). Russia: **EP** (NW, C, S, NC), **FE** (SA, KA). – Europe (WE, EE, NE, SE), Turkey, Kazakhstan.

Pristiphora bicalis (Förster, 1854) [*Nematus*] (*Nematus conspersus* Zaddach, 1883; *N. pruni* Brischke, 1883; *N. lateralis* Brischke, 1885; *N. postumus* Dalla Torre, 1894). Host plant: Prunus spinosa (Rosaceae). Russia: **EP** (NW, C, NC), **ES** (IR, BR), **FE** (SA). – Europe (WE, EE), Turkmenistan.

Pristiphora borea (Konow, 1904) [*Lygaeonematus*] (*Nematus astutus* Cameron, 1885; *Pachynematus laponicus* Enslin, 1916). Host plant: Betula nana (Betulaceae). Russia: **EP** (N), **WS** (TM), **ES** (IR, YA, ZB), **FE** (MG). – Europe (WE, EE, NE), N America.

Pristiphora breadalbanensis (Cameron, 1882) [*Nematus*] (*Lygaeonematus tromsouensis* Kiær, 1898; *L. corpulentus* Konow, 1904; *L. arcticola* Enslin, 1916). Russia: **EP** (N), **ES** (YA), **FE** (CH). – Europe (WE, NE), N America.

Pristiphora bufo (Brischke, 1883) [*Nematus*] (*Pristiphora pallidula* Konow, 1902; *Pachynematus crassicauda* Lindqvist, 1964; *Pristiphora laricicola* Verzhutskii, 1966). Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW), **WS** (TM), **ES** (TU, IR, BR, YA), **FE** (MG). – Europe (WE, EE, NE), Mongolia.

Pristiphora carinata (Hartig, 1837) [*Nematus*] (*Tenthredo pallipes* Fallén, 1808; *Nematus canaliculatus* Hartig, 1840; *N. denudatus* Hartig, 1840; *Pachynematus alticola* Enslin, 1916). Host plant: Vaccinium myrtillus (Ericaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (AL), **ES** (KR, IR, YA, ZB), **FE** (KA, MG). – Europe (WE, EE, NE), Kyrgyzstan, Mongolia, China (NC).

Pristiphora chromata Rohwer, 1925. Russia: **FE** (PR).

Pristiphora cincta Newman, 1837 (*Nematus quercus* Hartig, 1837; *Tenthredo borealis* Zetterstedt, 1838; *Pristiphora identidem* Norton, 1867; *P. idiota* Norton, 1867; *P. coloradensis* Marlatt, 1896; *P. hoodi* Marlatt, 1896; *P. seorsa* Konow, 1897; *P. idiotiformis* Rohwer, 1910). Host plant: Vaccinium spp. (Ericaceae), Betula spp. (Betulaceae), Salix spp. (Salicaceae). Russia: **EP** (N, C, NC), **ES** (IR, BR, YA), **FE** (AM, KH, PR, SA, KA, MG). – Europe (WE, EE, NE), Kazakhstan, Mongolia, Korean Peninsula, Japan (Hon), N America.

Pristiphora coactula (Ruthe, 1859) [*Nematus*] (*Nematus winnipeg* Norton, 1867; *N. alpinus* Thomson, 1871; *N. winnipegensis* W.F. Kirby, 1882; *Lygaeonematus pachyvalvis* Konow, 1904; *Pristiphora dawsoni* Rohwer, 1908). Host plant: Vaccinium uliginosum (Ericaceae). Russia: **EP** (N, NW, C), **WS** (TM, AL), **ES** (TU, KR, IR, BR, YA, ZB), **FE** (MG). – Europe (WE, NE), N America.

Pristiphora compressa (Hartig, 1837) [*Nematus*]. Host plant: Picea spp. (Pinaceae). Russia: **EP** (NW, C, E), **WS** (AL), **ES** (TU, KR, IR). – Europe (WE, EE, NE), Mongolia, China (NC).

Pristiphora condei Lindqvist, 1955. Host plant: Sorbus aucuparia, Amelanchier spicata (Rosaceae). Russia: **EP** (NW, C), **FE** (PR). – Europe (NE, EE).

Pristiphora confusa Lindqvist, 1955. Host plant: Salix spp. (Salicaceae). Russia: **EP** (N), **FE** (PR). – Europe (WE, EE, NE).

Pristiphora conjugata (Dahlbom, 1835) [*Nematus*] (*Nematus gonymelas* Stephens, 1835; *N. discipennis* Herrich-Schäffer, 1840; *N. discoidalis* Thomson, 1888; *Pristiphora conjugata ulbrichti* Enslin, 1916; *P. conjugata forsiusi* Enslin, 1916). Host plant: Populus spp., Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E, S, NC), **ES** (IR, YA), **FE** (AM, PR, KA). – Europe (WE, EE, NE, SE), Armenia, Turkey, Iran, Kyrgyzstan, China (NW), Japan.

Pristiphora dasiphorae (Zinovjev, 1993) [*Pristicampus*]. Host plant: Potentilla fruticosa (Rosaceae). Russia: **ES** (IR, ZB), **FE** (MG).

Pristiphora decipiens (Enslin, 1916) [*Lygaeonematus*]. Host plant: Picea spp. (Pinaceae). Russia: **EP** (C), **ES** (YA). – Europe (WE, EE, NE), Kyrgyzstan.

Pristiphora dochmocera (Thomson, 1871) [*Nematus*] (*Tenthredo flavipes* Zetterstedt, 1838; *Nematus congener* W.F. Kirby, 1882; *Pristiphora thomsoni* Lindqvist, 1953). Russia: **EP** (Taeger et al., 2006), **WS** (Zhelochovtsev, Zinovjev, 1995), **FE** (AM). – Europe (NE), Turkey.

- Pristiphora erichsonii** (Hartig, 1837) [Nematus] (*Nematus leachii* Dahlbom, 1835; *N. notabilis* Cresson, 1880). Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW, C), **ES** (IR, BR, YA, ZB), **FE** (AM, KH, SA, KU). – Europe (WE, EE, NE, SE), China (NE), Japan (Hon); introduced into the N America.
- Pristiphora friesei** (Konow, 1904) [Lygaeonematus] (*Pristiphora atrata* Lindqvist, 1975). Host plant: Larix decidua, L. eurolepis (Pinaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TM), **ES** (IR). – Europe (WE, EE, NE, SE).
- Pristiphora frigida** (Boheman, 1865) [Nematus] (*P. adelungi* Konow, 1902; *P. gelida* Wong, 1968). Russia: **EP** (N). – Europe (NE), N America.
- Pristiphora geniculata** (Hartig, 1840) [Nematus] (*Nematus cheilon* Zaddach, 1876). Host plant: Sorbus spp. (Rosaceae). Russia: **EP** (NW, NC), **ES** (YA), **FE** (KA). – Europe (WE, EE, NE), Kyrgyzstan, Mongolia, China (NC); introduced into the N America.
- Pristiphora gerula** (Konow, 1904) [Lygaeonematus]. Host plant: Picea spp. (Pinaceae). Russia: **EP** (Taege et al., 2006). – Europe (WE, EE, NE).
- Pristiphora glauca** Benson, 1954 (*Pachynematus laricivorus* Takagi, 1931; *Pristiphora takagii* Wong, 1975). Host plant: Larix spp. (Pinaceae). Russia: **EP** (N), **ES** (IR, BR), **FE** (PR, SA). – Europe (WE, NE), Mongolia, Korean Peninsula, Japan (Hon).
- Pristiphora groenblomi** (Lindqvist, 1952) [Lygaeonematus]. Host plant: Betula spp. (Betulaceae). Russia: **EP** (N, E), **ES** (IR). – Europe (WE, EE, NE), Mongolia, Korean Peninsula, N America.
- Pristiphora insularis** Rohwer, 1910 (*Amauronematus amelanchieris* Takeuchi, 1922; *Pristiphora kamtchatica* Malaise, 1931; *P. luteiventris* Koch, 1989). Host plant: Amelanchier asiatica, Chaenomeles japonica, Rosa spp. (Rosaceae). Russia: **EP** (N), **ES** (IR), **FE** (KA, MG). – Europe (WE, NE, SE), N Africa, Japan (Hon), N America.
- Pristiphora jacutica** Beneš, 2014. Host plant: Picea obovata (Pinaceae). Russia: **ES** (YA).
- Pristiphora jakowlewi** (Jakovlev, 1891) [Lygaeonematus]. Russia: **ES** (IR).
- Pristiphora kuznetzovorum** (Enslin, 1919) [Lygaeonematus]. Russia: **EP** (N), **WS** (TM).
- Pristiphora lanifica** (Zaddach, 1883) [Nematus]. Russia: **EP** (NW). – Europe (WE, NE).
- Pristiphora laricis** (Hartig, 1837) [Nematus] (*Nematus ruficollis* Hartig, 1840; *N. leucocnemis* Förster, 1854; *N. oblongus* Cameron, 1882; *N. laricivorus*

- Brischke, 1883; *N. rusticanus* Brischke, 1884; *Pachynematus ravidus* Konow, 1903; *Lygaeonematus paedidus* Konow, 1904; *Pachynematus nigricorpus* Takagi, 1931). Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW), **UR**, **WS** (NS), **ES** (KR, IR, BR, YA, ZB), **FE** (AM, KH, PR, MG). – Europe (WE, EE, NE, SE), Mongolia, China (NE), Korean Peninsula, Japan.
- Pristiphora lativentris** (Thomson, 1871) [Nematus] (*Nematus scoticus* Cameron, 1881; *N. extremus* Holmgren, 1883; *Pristiphora bucoda* Kincaid, 1900; *Lygaeonematus alpicola* Konow, 1904; *L. pallipes femoralis* Zirngiebl, 1953). Russia: **EP** (N), **WS** (TM, AL), **ES** (TU, KR, IR), **FE** (MG). – Europe (WE, NE), Mongolia, N America.
- Pristiphora leucopodia** (Hartig, 1837) [Nematus] (*Nematus nitens* Borries, 1896; *Pachynematus sagittatus* Konow, 1903; *Nematus piceae* Zhelochovtsev, 1988; *Pristiphora hoverlaensis* Haris, 2001). Host plant: Picea spp. (Pinaceae). Russia: **EP** (NW, C), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (YA). – Europe (WE, EE, NE).
- Pristiphora leucopus** (Hellén, 1948) [Nematus] (*Nematus vitreipennis* Eversmann, 1864). Host plant: Tilia spp. (Tiliaceae). Russia: **EP** (NW, C, E), **UR**. – Europe (WE, EE, NE).
- Pristiphora longicornis** (Malaise, 1931) [Pachynematus]. Russia: **FE** (KA).
- Pristiphora luteipes** Linqvist, 1955. Host plant: Salix spp. (Salicaceae). Russia: **EP** (N, C). – Europe (WE, EE, NE, SE).
- Pristiphora maesta** (Zaddach, 1876) [Nematus] (*Nematus brevicornis* Thomson, 1863; *N. parvicornis* W.F. Kirby, 1882; *Pachynematus insularis* Malaise, 1921). Host plant: Malus spp. (Rosaceae). Russia: **EP** (NW, C, NC), **ES** (ZB), **FE** (PR, KA). – Europe (WE, EE, NE), Caucasus.
- Pristiphora malaisei** (Lindqvist, 1952) [Lygaeonematus] (*Mesoneura arctica* Lindqvist, 1959; *Pachynematus incisus* Lindqvist, 1970; *P. intermedius* Verzhutskii, 1974; *Pristiphora mongololaricis* Haris, 2003). Host plant: Potentilla fruticose, ?Comarum palustre (Rosaceae). Russia: **ES** (IR), **FE** (MG). – Europe (WE, NE), Mongolia.
- Pristiphora melanocarpa** (Hartig, 1840) [Nematus] (*Nematus funerulus* Costa, 1859; *N. wuestneii* Stein, 1885; *Pristiphora ortingia* Kincaid, 1900). Host plant: Betula spp. (Betulaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (Zhelochovtsev, Zinovjev, 1995), **FE** (KH),

PR, SA). – Europe (WE, EE, NE, SE), Kyrgyzstan, China (NW), Korean Peninsula, N America.

Pristiphora micronematica Malaise, 1931 (*Lygaeo-nematus leucostoma* Lindqvist, 1952). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW), **ES** (Zhelochovtsev, 1988), **FE** (KA). – Europe (WE, NE), N America.

Pristiphora mollis (Hartig, 1837) [Nematus] (*Tenthredo bipunctata* Gmelin, 1790; *Nematus mollis* Hartig, 1837; *Tenthredo lapponica* Zetterstedt, 1838; *Nematus whitei* Cameron, 1878; *Pachymen-matus orarius* Kincaid, 1900; *P. kontkaneni* Lindqvist, 1960). Host plant: *Vaccinium myrtillus*, *V. uliginosum* (Ericaceae). Russia: **EP** (N, NW, C, E), **ES** (IR, BR, YA), **FE** (AM, MG, CH). – Europe (WE, EE, NE), Mongolia, Korean Peninsula, N America.

Pristiphora monogyniae (Hartig, 1840) [Nematus] (*Nematus pullus* Förster, 1854; *N. filicornis* Thomson, 1863; *N. hibernicus* Cameron, 1878; *N. nanus* Zaddach, 1884; *N. serotinus* Zaddach, 1884; *N. catulus* Zaddach, 1884; *N. ludens* Costa, 1894). Host plant: *Prunus* spinose, *P. domestica* (Rosaceae). Russia: **EP** (NW, NC). – Europe (WE, EE, NE, SE), Caucasus.

Pristiphora nestor (Zhelochovtsev, 1981) [Nematus]. Russia: **ES** (IR), **FE** (MG).

Pristiphora nigella (Förster, 1854) [Nematus] (*Tenthredo ambigua* Fallén, 1808; *Nematus occul-tus* Förster, 1854; *N. furvescens* Cameron, 1876; *N. obscurus* Zaddach, 1884; *N. xanthomus* Zaddach, 1884; *N. obscurior* Dalla Torre, 1894). Host plant: *Picea abies* (Pinaceae). Russia: **EP** (NW, C, NC), **ES** (YA). – Europe (WE, EE, NE), Turkey.

Pristiphora nigricans (Eversmann, 1847) [Nematus] (*Nematus anderschi* Zaddach, 1876; *Pristiphora inocreata* Konow, 1902; *P. discolor* Lindqvist, 1975). Host plant: *Sanguisorba officinalis* (Rosaceae). Russia: **EP** (NW, C, E), **ES** (IR). – Europe (WE, EE), Kazakhstan.

Pristiphora nigriceps (Hartig, 1840) [Nematus] (*Nematus bistriatus* Thomson, 1871). Host plant: *Picea abies* (Pinaceae). Russia: **EP** (Zhelochovtsev, 1995), **ES** (YA), **FE** (PR). – Europe (WE, EE, NE).

Pristiphora nigromongolica Haris, 2002. Russia: **ES** (IR). – Mongolia.

Pristiphora pallida (Konow, 1904) [*Lygaeonematus*] (*Lygaeonematus stecki* Nägeli, 1936). Host plant: *Picea abies* (Pinaceae). Russia: "Siberia" (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE).

Pristiphora pallidiventris (Fallén, 1808) [Tenthredo] (*Nematus ephippiger* Hartig, 1840; *N. flavigomus* Tischbein, 1846; *N. gemellus* Förster, 1854; *N. mar-shalli* Cameron, 1875; *N. cirrhostomus* Zaddach, 1883; *Pristiphora pallidiventris denudata* Konow, 1902; *P. zella* Rohwer, 1909; *P. pallicoxa* Rohwer, 1910; *P. xanthotrichela* Rohwer, 1913; *P. pallidiven-tris haemorrhoidalis* Enslin, 1916; *P. pallidiventris stigmatica* Enslin, 1916; *P. ostiaria* MacGillivray, 1920; *P. pallidiventris megalpina* Lacourt, 1987). Host plant: *Filipendula* spp., *Geum* spp., *Rubus* spp. (Rosaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **ES** (YA), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Kazakhstan, Mongolia, China (NW), Korean Peninsula, Japan (Hon), N America.

Pristiphora paralella (Hartig, 1840) [Nematus] (*Lygaeonematus tenuicornis* Lindqvist, 1955). Host plant: *Picea* sp. (Pinaceae). Russia: **EP** (NW), **ES** (IR, YA), **FE** (PR). – Europe (WE, EE, NE), Korean Peninsula.

Pristiphora parva (Hartig, 1837) [Nematus] (*Nematus nigricornis* Zaddach, 1883; *N. germanicus* Dalla Torre, 1894; *Lygaeonematus ambiguus* flavater Enslin, 1916). Host plant: *Picea abies* (Pinaceae). Russia: **EP** (NW). – Europe (WE, EE, NE).

Pristiphora pseudodecipliens Beneš et Křístek, 1976. Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, EE, NE).

Pristiphora pseudogeniculata Lindqvist, 1969. Host plant: *Prunus padus* (Rosaceae). Russia: **FE** (KA). – Europe (NE).

Pristiphora pseudomelanocarpa Haris, 2006. Russia: **FE** (KU).

Pristiphora punctifrons (Thomson, 1871) [Nematus] (*Nematus platyceros* Zaddach, 1884; *Pristiphora viridana* Konow, 1902; *Micronematus camtschatalis* Enslin, 1927; *Pristiphora aspericeps* Lindqvist, 1960; *P. flavipicta* Lindqvist, 1975; *P. mongoloexigua* Haris, 2002; *P. flavopleura* Haris, 2002; *P. mongolofausta* Haris, 2003). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (AL), **ES** (IR, BR, YA), **FE** (SA, KA, MG). – Europe (WE, EE, NE, SE), Georgia, Central Asia, Kazakhstan, Mongolia, Japan (Hon), N America.

Pristiphora retusa (Thomson, 1871) [Nematus]. Host plant: *Prunus padus* (Rosaceae). Russia: **EP** (NW, C), **ES** (IR, YA), **FE** (KH, PR). – Europe (WE, EE, NE).

- Pristiphora reuteri** (Lindqvist, 1960) [Lygaeonematus]. Host plant: *Salix phyllicifolia* (Salicaceae). Russia: **EP** (N), **UR**, **WS** (TM), **ES** (IR, BR), **FE** (KA, MG). – Europe (NE), N America.
- Pristiphora robusta** (Konow, 1895) [Lygaeonematus]. Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (NW), **ES** (YA). – Europe (EE, NE).
- Pristiphora ruficornis** (Olivier, 1811) [Nematus] (*P. testaceicornis* Serville, 1823; *P. testaceicornis* Lepeletier, 1823; *Nematus fraxini* Hartig, 1837; *N. testaceicornis* Jacobs, 1884; *N. ruficornis integer* Hellén, 1948). Host plant: *Betula pubescens* (Betulaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (TU, IR, BR, ZB). – Europe (WE, EE, NE, SE), Armenia, Mongolia.
- Pristiphora rufipes** Serville, 1823 (*P. fusca* Serville, 1823; *Nematus suessionensis* Serville, 1823; *Pristiphora rufipes* Lepeletier, 1823; *P. fusca* Lepeletier, 1823; *Nematus suessionensis* Lepeletier, 1823; *N. selandrioides* Costa, 1859; *N. aquilegiae* Snellen van Vollenhoven, 1866). Host plant: *Aquilegia* spp. (Ranunculaceae). Russia: **EP** (C, S), **WS** (AL), **ES** (KS, KR, YA), **FE** (AM, PR). – Europe (WE, EE, NE, SE), Turkey, Kyrgyzstan; introduced into the N America.
- Pristiphora salicivora** (Takeuchi, 1922) [Lygaeonematus]. Host plant: *Salix* spp. (Salicaceae). Russia: **FE** (SA). – Japan (Hon).
- Pristiphora sareptana** Kuznetzov-Ugamskij, 1924 (*P. moravica* Gregor, 1940). Russia: **EP** (C, E, S). – Europe (EE, NE), Kazakhstan.
- Pristiphora saxesenii** (Hartig, 1837) [Nematus] (*P. thalenhorsti* Wong, 1975). Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (NW, C), **WS** (Zhelochovtsev, Zinovjev, 1995), **ES** (YA). – Europe (WE, EE, NE), Kyrgyzstan.
- Pristiphora sermola** Liston, 1993 (*Lygaeonematus variipes* Lindqvist, 1952). Host plant: *Salix* spp. (Salicaceae). Russia: **EP** (NW), **ES** (Zhelochovtsev, Zinovjev, 1995). – Europe (WE, NE).
- Pristiphora similis** Kuznetzov-Ugamskij, 1924. Russia: **EP** (S).
- Pristiphora simplicifrons** Malaise, 1931. Russia: **FE** (PR).
- Pristiphora staudingeri** (Ruthe, 1859) [Nematus] (*P. circularis* Kincaid, 1900; *P. hyperborea* Malaise, 1921; *P. asperlatus* Benson, 1935). Host plant: *Salix herbacea*, *S. phyllicifolia* (Salicaceae). Russia: **EP** (N, NW, C), **ES** (KS, KR, IR, YA, ZB), **FE** (KH, KA, MG). – Europe (WE, EE, NE), Mongolia, China (NC), N America.
- Pristiphora subarctica** (Forsslund, 1936) [Lygaeonematus] (*P. pseudosaxesenii* Lindqvist, 1968). Host plant: *Picea abies* (Pinaceae). Russia: **EP** (C), **ES** (KR). – Europe (WE, EE, NE).
- Pristiphora subbifida** (Thomson, 1871) [Nematus] (*Nematus depressus* Hartig, 1840). Host plant: *Acer campestre* (Sapindaceae). Russia: **EP** (Taeger et al., 2006). – Europe (WE, EE, NE), Cyprus, N America.
- Pristiphora subopaca** Lindqvist, 1955 (*P. coniceps* Lindqvist, 1955; *P. brunniapex* Lindqvist, 1960). Host plant: *Salix caprea*, *S. phyllicifolia* (Salicaceae). Russia: **EP** (NW), **ES** (IR). – Europe (WE, NE).
- Pristiphora tenuiserra** (Lindqvist, 1959) [Microneurus]. Russia: **EP** (Taeger et al., 2006). – Europe (WE, EE, NE).
- Pristiphora testacea** (Jurine, 1807) [Pteronus] (*Tenthredo betulae* Retzius, 1783; *T. betulae* Christ, 1791; *Nematus betulinus* Dahlbom, 1835; *N. betularius* Hartig, 1837; *N. betulae* Hartig, 1837; *N. melanurus* Hartig, 1840; *N. erythrogaster* Thomson, 1871; *N. crassiventris* Cameron, 1878; *N. hartigii* W.F. Kirby, 1882; *N. luteogaster* W.F. Kirby, 1882; *Pristiphora gaunitzi* Lindqvist, 1968). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (C). – Europe (WE, EE, NE), China (Wei et al., 2006).
- Pristiphora tetrica** (Zaddach, 1883) [Nematus] (*Nematus velatus* Zaddach, 1883; *Pristiphora nievesi* Haris, 2004). Host plant: *Acer* spp. (Sapindaceae). Russia: **EP** (NC). – Europe (WE, SE), N Africa.
- Pristiphora thalictri** (Kriechbaumer, 1884) [Nematus] (*P. henschi* Konow, 1902; *Diphadnus thalictri* Takeuchi, 1922). Host plant: *Thalictrum aquilegiformium*, *T. minus* (Ranunculaceae). Russia: **EP** (NW, C), **ES** (Zhelochovtsev, Zinovjev, 1995), **FE** (KU). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia, Korean Peninsula, Japan (Hon).
- Pristiphora thalictrovora** Lindqvist, 1962 (*P. thalictrocola* Lindqvist, 1974; *P. rufiventris* Lindqvist, 1974). Host plant: *Thalictrum flavum*, *T. simplex* (Ranunculaceae). Russia: **EP** (Taeger et al., 2006), **ES** (IR). – Europe (NE).
- Pristiphora trochanterica** (Lindqvist, 1952) [Lygaeonematus]. Russia: **EP** (N), **WS** (TM), **ES** (KR). – Europe (NE).
- Pristiphora truncatiserra** Lindqvist, 1975. Russia: **ES** (IR, BR).

Pristiphora werzhutskii Lindqvist, 1970. Host plant: Spiraea spp. (Rosaceae). Russia: **ES** (IR).

Pristiphora wesmaeli (Tischbein, 1853) [Nematus] (*Nematus solea* Snellen van Vollenhoven, 1870). Host plant: Larix spp. (Pinaceae). Russia: **EP** (NW), **WS** (OM), **ES** (KR, IR, YA). – Europe (WE, EE, NE), China (NE), Korean Peninsula, Japan (Hon).

PSEUDODINEURA Konow, 1885 (*Pelmatopus* Hartig, 1837; *Phyllopais* Hering, 1934). Type species *Tenthredo parvula* Klug, 1816. The larvae live in mines on leaves of Ranunculaceae. The genus is distributed in Holarctic. Number of species: World – 12; Palaearctic – 9; Russia – 6.

Pseudodineura clematidis (Hering, 1932) [*Pelmatopus*]. Host plant: Clematis spp., ?Atragene spp. (Ranunculaceae). Russia: **UR** (Taeger et al., 2006). – Europe (WE, EE).

Pseudodineura enslini (Hering, 1923) [*Pelmatopus*]. Host plant: Trollius spp. (Ranunculaceae). Russia: **EP** (C), **ES** (KR, IR). – Europe (WE, EE, NE).

Pseudodineura fuscula (Klug, 1816) [*Tenthredo*] (*Dineura despecta* Hartig, 1837; *Dolerus minutus* Hartig, 1837; *Dineura simulans* Cameron, 1877). Host plant: Ranunculus spp. (Ranunculaceae). Russia: **EP** (N, NW, C, E, S, NC), **ES** (IR). – Europe (WE, EE, NE, SE), Armenia, Kazakhstan; introduced into the N America.

Pseudodineura heringi (Enslin, 1921) [*Permatopus*]. Host plant: Anemone spp. (Ranunculaceae). Russia: **EP** (C), **ES** (IR). – Europe (WE, EE, NE).

Pseudodineura mentiens (Thomson, 1871) [Blennocampa] (*Dineura hepatica* Brischke, 1883; *Pelmatopus mentiens konowi* Enslin, 1921). Host plant: Hepatica nobilis (Ranunculaceae). Russia: **EP** (NW, C, E, NC), **UR**, **FE** (KH, PR). – Europe (WE, EE, NE).

Pseudodineura parvula (Klug, 1816) [*Tenthredo*] (*Tenthredo minuta* Lepetier et Serville, 1828). Host plant: Pulsatilla spp. (Ranunculaceae). Russia: **EP** (C), **ES** (ZB). – Europe (WE, EE).

STAURONEMATUS Benson, 1953 (*Stauronema* Benson, 1948). Type species *Nematus platycerus* Hartig, 1840. The larvae live in mines on leaves. The genus is distributed in Palaearctic. Number of species: one species.

Stauronematus platycerus (Hartig, 1840) [Nematus] (*Nematus vallator* Snellen van Vollenhoven, 1858;

N. cebrionicornis Costa, 1859; *N. callicerus* Thomson, 1863). Host plant: Populus spp., Salix alopechroa (Salicaceae). Russia: **EP** (NW, C, E, S, NC, CR), **UR**, **ES** (IR, YA), **FE** (KH). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Iran, Kyrgyzstan, Kazakhstan, China (CC), Korean Peninsula, Japan (Hok, Hon).

Unplaced Nematinae

Amauronematus nigridorsis Jakovlev, 1891. Russia: **ES** (IR).

Cryptocampus fuscus Zaddach, 1883. Russia: **EP** (NW).

Nematus cinereus Eversmann, 1847. Russia: **EP** (E).

Nematus konowi (Jakovlev, 1891) [*Pteronus*]. Russia: **EP** (NC).

Nematus contractus Eversmann, 1847. Russia: **EP** (S).

Nematus fruticum Eversmann, 1847. Russia: **EP** (E).

Nematus schewyrewi (Jakovlev, 1891) [*Pteronus*]. Russia: **EP** (NC).

Nematus (Pteronidea) pyramidalis Hellén, 1948. Russia: **ES** (KR).

Pteronus irkutensis Jakovlev, 1891. Russia: **ES** (IR).

Tenthredo (Selandria) umbrosa Eversmann, 1847. Russia: **EP** (E).

Subfamily SELANDRIINAE

ALPHASTROMBOCEROS Kuznetzov-Ugamskij, 1928 (*Parastromboceros* Takeuchi, 1941). Type species *Strongylogaster konowi* Jakovlev, 1891. The larvae on herbaceous plants. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 5; Palaearctic – 3; Russia – 1.

Alphastromboceros konowi (Jakovlev, 1891) [Strongylogaster] (*Stromboceros filicis* Malaise, 1931). Host plant: Urtica spp. (Urticaceae). Russia: **EP** (C), **FE** (KH, PR, SA). – Europe (WE, EE), China (NE, SE), Korean Peninsula, Japan (Hok, Hon, Kyu).

ANEUGMENUS Hartig, 1837 (*Colposelandria* Enslin, 1912; *Atoposelandria* Enslin, 1913; *Polyselandria* MacGillivray, 1914; *Selandrophe* Zirngiebl, 1956). Type species *Tenthredo coronata* Klug, 1818. The larvae on ferns. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – 32; Palaearctic – 15; Russia – 8.

Aneugmenus carinifrons (Malaise, 1931) [Selandria] (*Selandria planiceps* Malaise, 1931). Host plant: ?*Lysimachia* spp. (Primulaceae). Russia: **FE** (AM, PR). – China (SE), Korean Peninsula, Japan (Hon, Kyu, Sado, Tsushima).

Aneugmenus coronatus (Klug, 1818) [Tenthredo] (*Selandria analis* Thomson, 1871; *S. cereipes* Snellen van Vollenhoven, 1873; *S. bimaculata* Cobelli, 1892; *S. ogloblini* Dovnar-Zapolskij, 1930). Host plant: *Athyrium* spp., *Dryopteris* spp. (Dryopteridaceae), *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **EP** (NW, C, NC), **WS** (AL), **FE** (AM, KH, PR). – Europe (WE, EE, NE, SE), Georgia, China (NE), Korean Peninsula, Japan (Niu, Wei, 2013).

Aneugmenus fuerstenbergensis (Konow, 1885) [Selandria]. Host plant: *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **EP** (N, C, E). – Europe (WE, SE, EE, NE).

Aneugmenus japonicus Rohwer, 1910 (*A. gratus* Zhelochovtsev, 1951). Host plant: *Pteridium aquelinum* (Dennstaedtiaceae). Russia: **FE** (SA, KU). – China (NC, CC, SE), Korean Peninsula, Japan (Hon, Shi, Kyu).

Aneugmenus kiotonis Takeuchi, 1929. Host plant: *Pteridium aquelinum* (Dennstaedtiaceae). Russia: **FE** (SA, KU). – Japan (Hon, Shi, Kyu, Sado).

Aneugmenus oertzeni (Konow, 1887) [Selandria]. Russia: **EP** (C). – Europe (SE), SW Asia.

Aneugmenus padi (Linnaeus, 1760) [Tenthredo] (*Tenthredo stramineipes* Klug, 1816; *T. albipes* Serville, 1823; *T. albipes* Lepeletier, 1823; *Selandria rufitarsis* Brullé, 1832; *Allantus laticinctus* Brullé, 1832; *Tenthredo cerasorum* Dahlbom, 1835; *Selandria vollenhoveni* Gribodo, 1881; *S. urbis* Ross, 1930). Host plant: *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **EP** (NW, S, NC). – Europe (WE, EE, NE, SE), N Africa, Georgia, Turkey, Iran; introduced into the N America.

Aneugmenus temporalis (Thomson, 1871) [Selandria]. Host plant: *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **EP** (NW, C, E), **UR**, **FE** (AM, KH, PR, SA). – Europe (WE, EE, NE, SE), China (NC, NE, CC), Korean Peninsula, Japan (Niu, Wei, 2013).

BIRKA Malaise, 1944 (*Lineobirka* Wei et Nie, 1997). Type species *Tenthredo cinereipes* Klug, 1816. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 17; Palaearctic – 11; Russia – 4 from 2 subgenera.

Birka (Birka) annulitarsis (Thomson, 1870) [Selandria]. Host plant: *Rubus* spp. (Rosaceae). Russia:

EP (E), **UR**, **WS** (KM, AL), **ES** (YA). – Europe (WE, EE, NE).

Birka (Birka) catellata (Konow, 1900) [Selandria]. Russia: **WS** (KM), **ES** (KR, IR), **FE** (AM).

Birka (Birka) cinereipes (Klug, 1816) [Tenthredo] (*Tenthredo aperta* Hartig, 1837; *Selandria foief-rorns* Thomson, 1870). Host plant: *Myosotis* spp. (Boraginaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (TM, NS, AL), **FE** (KA). – Europe (WE, EE, NE, SE), Caucasus, Turkey.

Birka (Lineobirka) koreana (Takeuchi, 1941) [Nesoselandria] (*B. pallipes* Zhelochovtsev, 1951). Host plant: *Pyrus* spp. (Rosaceae). Russia: **FE** (AM, PR). – China (NE), Korean Peninsula.

BRACHYTHOPS Curtis, 1839 (*Coryna* Lepeletier et Serville, 1828; *Paraselandria* Ashmead, 1898; *Selandridea* Rohwer, 1911; *Pseudoselandria* MacGillivray, 1914). Type species *Brachythops seminigra* Curtis, 1839. The larvae free-living, on *Carex* (Cyperaceae). The genus is distributed in Holarctic. Number of species: World and Palaearctic – 4; Russia – 3.

Brachythops flavens (Klug, 1816) [Tenthredo] (*Tenthredo scapularis* Lepeletier et Serville, 1828; *Phyllostoma puella* Fallén, 1829; *Brachythops seminigra* Curtis, 1839; *Selandria flavescens* Thomson, 1870; *S. decolorata* Cresson, 1880; *Selandridea vanduzeei* Rohwer, 1911; *Selandria flavens flavor* Enslin, 1913; *Pseudoselandria oxalata* MacGillivray, 1914; *Selandria flavens antennalis* Zirngiebl, 1954). Host plant: *Carex* spp. (Cyperaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **ES** (IR, BR), **FE** (AM, KH). – Europe (WE, EE, NE), Armenia, Kazakhstan, China (Wei et al., 2006), N America.

Brachythops nitens (Zhelochovtsev, 1951) [Selandria]. Host plant: *Carex* spp. (Cyperaceae). Russia: **FE** (KH, PR).

Brachythops wuestneii (Konow, 1885) [Selandria] (*Selandria flavistigma* Grönblom, 1939). Host plant: *Carex* spp. (Cyperaceae). Russia: **EP** (N, NW), **WS** (AL), **ES** (IR, BR), **FE** (KH). – Europe (WE, EE, NE), N America.

BUSARBIDEA Rohwer, 1915 (*Canoniades* Forsius, 1929). Type species *Busarbidea himalaiensis* Rohwer, 1915. The genus is distributed in East Palaearctic and Oriental region. Number of species: World – 19; Palaearctic – 8; Russia – 1.

Busarbidea ussuriensis (Malaise, 1931) [Canoniades]. Russia: **FE** (PR).

DOLERUS Panzer, 1801 (*Dolerus* Jurine, 1801; *Dosytheus* Leach, 1817; *Dositheus* Agassiz, 1848; *Loderus* Konow, 1890; *Hamatodentiden* Zirngiebl, 1930; *Multidentiden* Zirngiebl, 1930; *Noduloden-tiden* Zirngiebl, 1930; *Pratensisformis* Ermolenko, 1975; *Gonagerformis* Ermolenko, 1975; *Nigerfor-mis* Ermolenko, 1975; *Achaetopriion* Goulet, 1986; *Dicrodolerus* Goulet, 1986; *Neodolerus* Goulet, 1986; *Oncodolerus* Goulet, 1986; *Cyperolerus* Zhelochovtsev, 1988; *Poodolerus* Zhelochovtsev, 1988; *Juncilerus* Zhelochovtsev, 1988; *Equidolerus* Tae-ger et Blank, 1996). Type species *Tenthredo pedestris* Panzer, 1801. The larvae feed mainly on Poaceae and Equisetaceae, less often on Juncaceae and Cyperaceae. The genus is distributed in Holarctic and Oriental region. Number of species: World – about 225; Palaearctic – about 155; Russia – 75 (+ 8 ssp.) from 9 subgenera.

Dolerus (Achaetopriion) ferrugatus Serville, 1823 (*D. ferrugatus* Lepeletier, 1823; *D. brevicornis* Thomson, 1871; *D. thomsoni* Konow, 1884; *D. thomsoni miricolor* Konow, 1887). Host plant: *Juncus* spp. (Juncaceae). Russia: **EP** (C, E). – Europe (WE, EE, NE, SE), China (Wei et al., 2006).

Dolerus (Achaetopriion) madidus (Klug, 1818) [*Tenthredo*] (*Tenthredo lateritia* Klug, 1818; *Dolerus chappelli* Cameron, 1877; *D. lamprechti* Konow, 1884; *D. madidus monozonus* Enslin, 1913). Host plant: *Juncus* spp. (Juncaceae). Russia: **EP** (NW, C, E, CR), **WS** (NS). – Europe (WE, EE, NE, SE), Korean Peninsula.

Dolerus (Achaetopriion) pachycerus Hartig, 1837 (*D. taeniatus* Zaddach, 1859; *D. tinctipennis* Cameron, 1881; *D. mocsaryi* Konow, 1895). Host plant: *Juncus* spp. (Juncaceae). Russia: **EP** (N, NW, C, E), **WS** (Zhelochovtsev, 1988), **ES** (BR, YA). – Europe (WE, EE, NE, SE), Kazakhstan.

Dolerus (Achaetopriion) triplicatus (Klug, 1818) [*Tenthredo*] (*Tenthredo tremula* Klug, 1818; *Dolerus trimaculatus* Lepeletier, 1823; *D. dimidiatus* Lepeletier, 1823; *D. trimaculatus* Serville, 1823; *D. dimidiatus* Serville, 1823; *D. lugubris* Gimmenthal, 1834; *D. steini* Konow, 1885; *D. tremulus aemula* Konow, 1902). Host plant: *Juncus* spp. (Juncaceae). Russia: **EP** (C, S, NC, CR). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey.

Dolerus (Cyperolerus) anticus anticus (Klug, 1818) [*Tenthredo*]. Host plant: *Carex* spp., *Eleocharis palustris* (Cyperaceae). Russia: **EP** (C, E), **UR**, **WS**

(NS), **ES** (Zhelochovtsev, Zinovjev, 1996). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Kazakhstan.

Dolerus (Dicrodolerus) apricus (Norton, 1861) [*Dosytheus*] (*D. luctatus* MacGillivray, 1908; *D. femur-rubrum* Rohwer, 1909; *Loderus acerbus* MacGillivray, 1923; *L. alticinctus* MacGillivray, 1923; *L. ancisus* MacGillivray, 1923). Russia: **FE** (MG). – China (Wei et al., 2006), N America.

Dolerus (Dicrodolerus) genucinctus Zaddach, 1859 (*D. annulipes* Thomson, 1871; *Loderus genucinctus tegularis*). Host plant: *Equisetum* spp. (Equisetaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (IR), **FE** (AM, KH, SA, KU, KA, MG). – Europe (WE, EE, NE), Mongolia, China (NE), Japan (Hok, Hon).

Dolerus (Dicrodolerus) mongolicus (Muche, 1965) [*Loderus*]. Host plant: *Equisetum* spp. (Equisetaceae). Russia: **ES** (ZB). – Mongolia, China (NC).

Dolerus (Dicrodolerus) vestigialis vestigialis (Klug, 1818) [*Tenthredo*]. Host plant: *Equisetum* spp. (Equisetaceae). Russia: **EP** (NW, C, E, NC), **WS** (KM), **ES** (IR, BR). – Europe (WE, EE, NE, SE), Armenia, Turkey, Iran.

Dolerus (Dolerus) aericeps Thomson, 1871 (*D. bajulus* Serville, 1823; *D. bajulus* Lepeletier, 1823; *D. mandibularis* Konow, 1884; *D. aericeps rufipes* Konow, 1888; *D. aericeps erythropus* Enslin, 1913; *D. aericeps theresae* Pic, 1948; *D. aericeps guttatus* Zirngiebl, 1954). Host plant: *Equisetum* spp. (Equisetaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (KM, AL), **ES** (TU, IR, BR, YA), **FE** (PR). – Europe (WE, EE, NE, SE), Caucasus, Turkey, Kazakhstan.

Dolerus (Dolerus) armillatus Konow, 1896 (*D. austerus* Muche, 1965). Host plant: Poaceae. Russia: **WS** (AL), **ES** (IR, BR), **FE** (AM, KH, PR). – Mongolia, China (SW, SE), Korean Peninsula, Japan (Hok).

Dolerus (Dolerus) bimaculatus (Geoffroy, 1785) [*Tenthredo*] (*Tenthredo tristis* Fabricius, 1804; *Dolerus saxatilis* Hartig, 1837). Host plant: *Equisetum* spp. (Equisetaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (AL), **ES** (TU, IR, BR, YA), **FE** (AM, KH, KA, MG). – Europe (WE, EE, NE, SE), Mongolia.

Dolerus (Dolerus) cothurnatus Serville, 1823 (*Tenthredo palustris* Klug, 1818; *Dolerus cothurnatus* Lepeletier, 1823; *Dosytheus junci* Stephens, 1835; *Dolerus busaei* Snellen van Vollenhoven, 1858). Host plant: *Equisetum* spp. (Equisetaceae). Russia: **EP** (N, NW, C, E, S, NC), **ES** (IR), **FE** (MG). – Europe (WE, EE, NE, SE), Mongolia, Korean Peninsula.

Dolerus (Dolerus) elderi elderi Kincaid, 1900
(D. pusillus Jakovlev, 1891; *D. cohaesus* MacGillivray, 1908; *D. nutricius* MacGillivray, 1923; *Loderus acriculus* MacGillivray, 1923; *Dolerus myctelius* MacGillivray, 1923; *D. negotiosus* MacGillivray, 1923; *D. nemorosus* MacGillivray, 1923; *D. pullulus* Zhechovtsev, 1928; *D. elderi auraneus* Ross, 1931; *D. elderi rubicanus* Ross, 1931; *D. elderi melanurus* Ross, 1931; *D. pullulus coloratus* Hellén, 1956; *D. orchonensis* Muche, 1965). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (N), **WS** (TM, AL), **ES** (KS, KR, IR, BR, ZB), **FE** (MG). – Europe (NE), Tadzhikistan, Kyrgyzstan, Kazakhstan, Mongolia, China (NW, NC), N America.

Dolerus (Dolerus) germanicus aterrimus Zhechovtsev, 1935. Host plant: Equisetum spp. (Equisetaceae). Russia: **FE** (KU). – Japan (Hok).

Dolerus (Dolerus) germanicus claripennis Zhechovtsev, 1935. Host plant: Equisetum spp. (Equisetaceae). Russia: **FE** (KA, MG).

Dolerus (Dolerus) germanicus fuscipennis (Stephens, 1835) [Dosytheus] (*D. arcticus* Thomson, 1871). Host plant: Equisetum spp. (Equisetaceae). Russia: **FE** (KA). – Europe (NE).

Dolerus (Dolerus) germanicus germanicus (Fabricius, 1775) [Tenthredo] (*Tenthredo hortorum* O.F. Müller, 1776; *T. melanocephala* Fourcroy, 1785; *T. eglanteriae* Fabricius, 1793; *T. pedestris* Panzer, 1801; *T. subfusca* Lepeletier, 1823; *Dosytheus xanthopus* Stephens, 1835; *Tenthredo quadricincta* Zetterstedt, 1838; *Dolerus fennicus* André, 1880; *D. rufipes* Grädl, 1881; *D. pratensis nigripes* Konow, 1884; *D. pratensis mediater* Enslin, 1913; *D. pratensis laterater* Enslin, 1913; *D. pratensis terminater* Enslin, 1913; *D. pratensis totus* Malaise, 1931; *D. germanicus berlandi* Pic, 1948; *D. germanicus buyssoni* Pic, 1948; *D. pratensis major* Zirngiebl, 1954). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (NW, C), **WS** (NS, KM, AL), **ES** (IR), **FE** (PR, KA). – Europe (WE, EE, NE, SE).

Dolerus (Dolerus) germanicus meridianus Zhechovtsev, 1928. Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (NC). – Georgia, Armenia.

Dolerus (Dolerus) germanicus orientalis Zhechovtsev, 1935. Host plant: Equisetum spp. (Equisetaceae). Russia: **FE** (AM, KH, PR, MG). – China (NE), Korean Peninsula.

Dolerus (Dolerus) germanicus sibiricus Zhechovtsev, 1935. Host plant: Equisetum spp.

(Equisetaceae). Russia: **EP** (N), **WS** (TM), **ES** (KS, KR, IR, BR, ZB), **FE** (MG). – Mongolia.

Dolerus (Dolerus) germanicus subsolanus Zhechovtsev, 1928. Host plant: Equisetum spp. (Equisetaceae). Russia: **UR**, **WS** (OM, AL). – Kazakhstan.

Dolerus (Dolerus) klutchianus Malaise, 1931. Russia: **FE** (KA).

Dolerus (Dolerus) manticatus Konow, 1907. Host plant: Equisetum spp. (Equisetaceae). Russia: **WS** (Zhechovtsev, Zinovjev, 1996), **ES** (KR, IR), **FE** (AM). – Mongolia, China (NC, SW).

Dolerus (Dolerus) nigriceps Konow, 1891. Russia: **EP** (Lacourt, 1999). – Caucasus, Turkey, Iran.

Dolerus (Dolerus) subarcticus Hellén, 1956 (*D. willoughbyi* Benson, 1956). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (N, C), **WS** (NS), **ES** (KR, YA). – Europe (NE), Mongolia.

Dolerus (Dolerus) variegatus Jakovlev, 1891 (*D. patricius* Muche, 1965). Host plant: Equisetum spp. (Equisetaceae). Russia: **WS** (NS, AL), **ES** (IR, BR, ZB), **FE** (AM, MG). – Europe (WE), Mongolia, China (NC).

Dolerus (Dolerus) yukonensis Norton, 1872 (*D. scoticus* Cameron, 1881; *D. lateralis* Konow, 1895; *D. articola* Kier, 1898; *D. nuntius* MacGillivray, 1923; *D. nundius* MacGillivray, 1923; *D. scoticus lenensis* Hellén, 1956; *D. thargitai* Zombori, 1994). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (KM), **ES** (IR, BR, YA), **FE** (AM, SA, KU, KA, MG). – Europe (WE, EE, NE), Mongolia, China (NC), N America.

Dolerus (Equidolerus) gessneri André, 1880 (*D. labiosus* Konow, 1897; *D. kamtchaticus* Malaise, 1931; *D. gessneri rufomaculata* Hellén, 1956). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (NW, C), **WS** (TM), **ES** (KS, KR, IR, BR, ZB), **FE** (AM, SA, KA, MG). – Europe (WE, EE, NE), China (Wei et al., 2006), Korean Peninsula, Japan (Hok, Hon), N America.

Dolerus (Equidolerus) konowi glacialis Goulet, 1986. Host plant: Equisetum spp. (Equisetaceae). Russia: **FE** (KU, KA, CH). – N America (Alaska).

Dolerus (Equidolerus) pratensis (Linnaeus, 1758) [Tenthredo] (*Tenthredo dubia* Klug, 1818; *T. timida* Klug, 1818; *T. deserta* Klug, 1818; *Dosytheus hyalinialis* Stephens, 1835; *Dolerus dubius niger* Enslin, 1909; *D. dubius atratus* Enslin, 1913; *D. pratensis camtschatcalis* Enslin, 1918; *D. variator* Enslin, 1927; *D. variator mesonotalis* Enslin, 1927; *D. variator mesopleuralis* Enslin, 1927). Host plant: Equisetum

- spp. (Equisetaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS), **ES** (IR, BR, YA), **FE** (AM, KA). – Europe (WE, EE, NE), Turkey, Mongolia, China (NC), N America; introduced into the Tropical Africa.
- Dolerus (Equidolerus) pseudoanticus** Malaise, 1931. Russia: **FE** (KA).
- Dolerus (Equidolerus) rhodogaster** Zhelochovtsev, 1935. Host plant: Equisetum spp. (Equisetaceae). Russia: **ES** (IR, BR), **FE** (AM, PR). – China (NE).
- Dolerus (Equidolerus) subfasciatus** F. Smith, 1874 (*D. picinus* Marlatt, 1898). Host plant: Equisetum spp. (Equisetaceae). Russia: **FE** (KU). – Japan (Hon, Shi).
- Dolerus (Loderus) gilvipes albifrons** (Norton, 1861) [*Dosytheus*] (*D. minusculus* MacGillivray, 1908; *Loderus accuratus* MacGillivray, 1923). Russia: **FE** (CH). – China (NE), N America.
- Dolerus (Loderus) gilvipes gilvipes** (Klug, 1818) [Tenthredo] (*D. tenebrosus* Eversmann, 1847; *Loderus ornatulus* Konow, 1897; *L. ornatulus plagiatus* Konow, 1897; *L. gilvipes camtschatcalis* Enslin, 1927). Russia: **EP** (N, E), **UR**, **ES** (IR, YA), **FE** (AM, PR, KA, MG). – Europe (WE, NE), Mongolia, China (NE, NC), Korean Peninsula, Japan (Goulet, 1986).
- Dolerus (Loderus) pratorum** (Fallén, 1808) [Tenthredo] (*Tenthredo equiseti* Klug, 1818; *Loderus pratorum maculifrons* Hellén, 1956). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (N, NW, C, E, NC), **WS** (NS, KM), **ES** (IR, BR, YA), **FE** (AM). – Europe (WE, EE, NE), Kazakhstan, China (NE).
- Dolerus (Neodolerus) anatolii** Heidemaa et Zinovjev, 2004. Russia: **FE** (PR). – Korean Peninsula.
- Dolerus (Oncodolerus) eversmanni eversmanni** W.F. Kirby, 1882 (*Tenthredo palmata* Klug, 1818; *Dolerus fumosus* Eversmann, 1847; *D. trigeminus* Konow, 1884). Host plant: Equisetum spp. (Equisetaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (KM), **ES** (IR, BR, YA), **FE** (AM, KH, MG). – Europe (WE, EE, NE), Georgia, Armenia, Turkey, Mongolia, China (NE).
- Dolerus (Poodolerus) aeneus** Hartig, 1837 (*D. longicornis* Zaddach, 1859; *D. incertus* Zaddach, 1859; *D. elongatus* Thomson, 1871; *D. aeneus zaddachi* Konow, 1886). Host plant: Poa spp., Hordeum vulgare, Triticum spp. (Poaceae), Carex spp. (Cyperaceae). Russia: **EP** (N, NW, C, E, S, NC), **WS** (AL), **ES** (IR), **FE** (KU, KA, MG). – Europe (WE, EE, NE, SE), Armenia, Turkey, Mongolia.
- Dolerus (Poodolerus) albertii** Muche, 1969. Russia: **EP** (NC).
- Dolerus (Poodolerus) anthracinus** (Klug, 1818) [Tenthredo] (*Tenthredo mutilata* Klug, 1818; *Dolerus atricapillus* Hartig, 1837; *D. violaceus* Pigeot, 1918; *D. violaceus obscura* Pigeot, 1918). Host plant: Hordeum vulgare, Poa spp. (Poaceae). Russia: **EP** (N, NW, C, E, S). – Europe (WE, EE, NE, SE).
- Dolerus (Poodolerus) asper** Zaddach, 1859 (*D. oblongus* Cameron, 1882; *D. asper megapteroides* Muche, 1964). Host plant: Deschampsia spp. (Poaceae), Carex spp. (Cyperaceae). Russia: **EP** (N, NW, C, E, S, NC), **ES** (IR, BR, YA), **FE** (AM, MG). – Europe (EE, NE, SE), Armenia, Turkey, Mongolia, China (NC).
- Dolerus (Poodolerus) blanki** Liston, 1995 (*Tenthredo opaca thoracica* Fallén, 1808; *T. thoracica* Klug, 1818). Russia: **EP** (C). – Europe (WE, EE, NE, SE), China (Wei et al., 2006).
- Dolerus (Poodolerus) brevicornis** Zaddach, 1859 (*D. tectus* MacGillivray, 1914). Russia: **EP** (N, NW). – Europe (WE, EE, NE), N America.
- Dolerus (Poodolerus) ciliatus** Konow, 1891 (*D. quasi-ciliatus* Kerenskij, 1926). Russia: **EP** (S, CR). – Europe (EE), Armenia, Turkey, Kazakhstan.
- Dolerus (Poodolerus) coracinus** (Klug, 1818) [Tenthredo]. Russia: **EP** (C). – Europe (WE, EE, NE), Korean Peninsula.
- Dolerus (Poodolerus) dathei** Muche, 1973. Russia: **EP** (NC).
- Dolerus (Poodolerus) derzavini** Malaise, 1931. Russia: **FE** (KA).
- Dolerus (Poodolerus) docilus** Benson, 1956. Russia: **EP** (C, E), **UR**, **WS** (AL). – Kyrgyzstan, Kazakhstan.
- Dolerus (Poodolerus) fumosus** Stephens, 1835 (*D. brachygaster* Hartig, 1837; *D. gracilis* Zaddach, 1859; *D. brevis* Zaddach, 1859; *D. rarus* Zaddach, 1859). Russia: **EP** (NW). – Europe (WE, EE, NE).
- Dolerus (Poodolerus) gibbosus** Hartig, 1837 (*D. planatus* Hartig, 1837). Russia: **EP** (NW, C), **WS** (Zhelochovtsev, Zinovjev, 1996), **FE** (KH, SA). – Europe (WE, EE, NE), Armenia.
- Dolerus (Poodolerus) gonager** (Fabricius, 1781) [Tenthredo] (*Tenthredo erythrogora* Schrank, 1781; *T. geniculata* Geoffroy, 1785; *Dolerus femoratus* Eversmann, 1847; *D. magnicornis* Eversmann, 1847; *D. lucidus* Zirngiebl, 1930; *D. gonager flavitibia* Hellén, 1956). Host plant: Agrostis spp., Festuca spp., Poa spp., Triticum spp., etc. (Poaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (KM, AL),

- ES (KS).** – Europe (WE, EE, NE, SE), Armenia, Azerbaijan, Turkmenistan.
- Dolerus (Poodolerus) haematodes** (Schrink, 1781) [Tenthredo] (*Tenthredo collaris* Donovan, 1808; *Dolerus coeruleascens* Hartig, 1837; *D. micans* Zaddach, 1859; *D. haematodes muliebris* Enslin, 1909; *D. haematodes rufatus* Enslin, 1913). Host plant: Poaceae, Cyperaceae, Juncaceae. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TM), **ES** (TU, YA, ZB). – Europe (WE, EE, NE, SE), Armenia, Turkey.
- Dolerus (Poodolerus) harwoodi** Benson, 1947. Russia: **EP** (N, NW, C, E, S), **UR**, **WS** (NS), **ES** (IR, BR), **FE** (AM, KH). – Europe (WE, EE, NE).
- Dolerus (Poodolerus) kokujewi** Konow, 1902. Russia: **EP** (C, NC). – Caucasus, SW Asia, Iran.
- Dolerus (Poodolerus) liogaster liogaster** Thomson, 1871 (*D. annulatus* Stein, 1894; *D. liogaster rufo-notatus* Enslin, 1913; *D. liogaster modestus* Dubois, 1920). Host plant: Dactylis spp., Festuca spp., Poa spp. (Poaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE), Kazakhstan.
- Dolerus (Poodolerus) liogaster schneideri** Kiær, 1898. Host plant: Poaceae. Russia: **EP** (N), **UR**, **WS** (TM, KM, AL), **ES** (IR, BR). – Europe (NE).
- Dolerus (Poodolerus) melanopterus tauricus** Zhelochovtsev, 1928. Russia: **EP** (CR). – Europe (EE).
- Dolerus (Poodolerus) niger** (Linnaeus, 1767) [Tenthredo] (*Tenthredo angusta* Gmelin, 1790). Host plant: Avena spp., Hordeum spp., Secale spp., Triticum spp., etc. (Poaceae). Russia: **EP** (NW, C, E), **WS** (NS, KM). – Europe (WE, EE, NE, SE).
- Dolerus (Poodolerus) nigratus** (O.F. Müller, 1776) [Tenthredo] (*Tenthredo canescens* Gmelin, 1790; *Dolerus cenchris* Hartig, 1837; *D. leucobasis* Hartig, 1837; *D. fissus* Hartig, 1837; *D. hartigii* Scholtz, 1848; *D. analis* Konow, 1890). Host plant: Triticum spp., Festuca spp., Holcus spp., Poa spp., etc. (Poaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **WS** (KM), **ES** (BR). – Europe (WE, EE, NE, SE), Turkey, China (Wei et al., 2006).
- Dolerus (Poodolerus) nitens** Zaddach, 1859 (*D. coruscans* Konow, 1890; *D. wanda* Ross, 1935). Host plant: Festuca spp., Poa spp., Deschampsia spp. (Poaceae). Russia: **EP** (NW, C, E, NC), **UR**, **WS** (NS, KM), **ES** (Zhelochovtsev, Zinovjev, 1996). – Europe (WE, EE, NE, SE); introduced into the N America.
- Dolerus (Poodolerus) nonultimus** Zhelochovtsev, 1941. Russia: **EP** (NC). – Georgia, Armenia, Turkey.
- Dolerus (Poodolerus) picipes** (Klug, 1818) [Tenthredo] (*D. brevitarsus* Hartig, 1837; *D. leucopterus* Zaddach, 1859; *D. ochroneurus* Förster, 1860; *D. intermedius* Cameron, 1881; *D. raddatzi* Konow, 1884; *D. leucopterus sulcatus* Konow, 1884). Host plant: Agrostis spp., Festuca sp. (Poaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS). – Europe (WE, EE, NE, SE), Armenia, Kazakhstan.
- Dolerus (Poodolerus) puncticollis** Thomson, 1871 (*D. croaticus* Konow, 1890). Host plant: Poa spp., Dactylis spp. (Poaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**. – Europe (WE, EE, NE, SE), N Africa, Armenia, SW Asia, Iran, Turkmenistan.
- Dolerus (Poodolerus) sanguinicollis** (Klug, 1818) [Tenthredo] (*D. lucens* André, 1880; *D. sanguinicollis reichertii* Konow, 1894; *D. sanguinicollis confusus* Enslin, 1913). Host plant: Poaceae. Russia: **EP** (N, NW, C, E), **UR**, **WS** (KM). – Europe (WE, EE, NE, SE).
- Dolerus (Poodolerus) schmidti** Konow, 1884. Russia: **EP** (N). – Europe (WE, NE).
- Dolerus (Poodolerus) stygius** Förster, 1860 (*D. megapterus* Cameron, 1881; *D. carinatus* Konow, 1884; *D. crassus* Konow, 1884; *D. megapterus* Schulz, 1906; *D. eutropis* Speiser, 1908). Host plant: Carex spp. (Cyperaceae). Russia: **EP** (N, C, E, S), **UR**, **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (YA). – Europe (WE, EE, NE, SE), Turkey.
- Dolerus (Poodolerus) subalatus** Kerenskij, 1926. Russia: **EP** (C, S, NC). – Europe (EE).
- Dolerus (Poodolerus) vernalis** Ermolenko, 1964. Russia: **EP** (CR). – Europe (WE, EE, SE).
- Dolerus (Poodolerus) vulneratus** Mocsáry, 1878. Russia: **EP** (NW), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (Zhelochovtsev, Zinovjev, 1996), **FE** (AM). – Europe (NE), China (NE), Korean Peninsula.
- Dolerus (Poodolerus) zhelochovtsevi** Heidemaa et Viitasaari, 2009. Russia: **EP** (NW, C), **WS** (TM). – Europe (WE, EE, NE).
- Dolerus coreanus** Takeuchi, 1927 (*D. merops* Zhelochovtsev, 1928). Russia: **FE** (PR). – China (NE), Korean Peninsula, Japan (Haris, 2000).
- Dolerus ephippiatus** F. Smith, 1874. Host plant: Poaceae (including Hordeum, Triticum, Secale), Equisetum spp. (Equisetaceae). Russia: **FE** (SA, KU). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).
- Dolerus harukawai** Waterston, 1926. Host plant: Juncus spp. (Juncaceae). Russia: **FE** (PR). – China (NE), Japan (Hon, Kyu).
- Dolerus hyrcanus** Benson, 1968. Russia: **EP** (NC).

Dolerus jesoenensis Matsumura, 1912. Russia: **FE** (SA). – Japan (Hok).

Dolerus lewisii Cameron, 1887. Host plant: *Hordeum* spp., *Triticum* spp. (Poaceae). Russia: **FE** (PR). – Korean Peninsula, Japan (Hon).

Dolerus novograblenovi Malaise, 1931. Russia: **FE** (PR, KA, MG). – Korean Peninsula.

Dolerus okeanskajensis Rohwer, 1925. Russia: **FE** (PR). – Korean Peninsula.

Dolerus sachalinensis Takeuchi, 1936. Russia: **FE** (SA).

Unplaced Dolerus

Dolerus carbonarius Zaddach, 1859. Russia: **EP** (NW).

Dolerus zaddachi W.F. Kirby, 1882 (*D. fumosus* Zaddach, 1859). Russia: **EP** (NW).

NEOSTROMBOCEROS Rohwer, 1912 (*Stypoza* Endrelein, 1920). Type species *Stromboceros metallica* Rohwer, 1912. The larvae feed on the ferns. The genus is distributed in East Palaearctic, Oriental and Australasian regions. Number of species: World – about 135; Palaearctic – about 70; Russia – 2.

Neostromboceros gracilis Takeuchi, 1941. Russia: **FE** (KU). – Japan (Hok, Hon, Shi).

Neostromboceros nipponicus Takeuchi, 1941. Russia: **FE** (KU). – China (SC), Japan (Hon, Shi, Kyu).

NESOSELANDRIA Rohwer, 1910 (*Neobusarbia* Takeuchi, 1928; *Melisandra* Benson, 1939). Type species *Paraselandria imitatrix* Ashmead, 1905. The larvae feed on the ferns and herbaceous plants. The genus is distributed in Palaearctic and Oriental region, two species in Neotropical region; one species introduced into the N America. Number of species: World – about 85; Palaearctic – 25; Russia – 2.

Nesoselandria morio (Fabricius, 1781) [Tenthredo] (*Tenthredo ulmi* Schrank, 1802; *T. tristis* Serville, 1823; *T. tristis* Lepeletier, 1823; *Emphytus infuscatus* Eversmann, 1847; *Selandria fabricii* Konow, 1885; *Aneugmenus brunneus* Magretti, 1886). Host plant: Ditrichaceae, Dicranaceae, Rosaceae, Boraginaceae, etc. Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (KM, AL), **ES** (IR, BR), **FE** (AM, KH, PR, KU). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Kazakhstan, China (SE), Korean Peninsula, Japan (Hon); introduced into the N America.

Nesoselandria nipponica Takeuchi, 1929. Host plant: Polypodiophyta. Russia: **FE** (KU). – China (SE), Japan (Hon, Shi, Kyu).

POPPIA Konow, 1904. Type species *Poppia athalioides* Konow, 1904. The larvae feed on the ferns. The genus is distributed in East Asia. Number of species: World and Palaearctic – 2; Russia – 1.

Poppia athalioides Konow, 1904. Host plant: Polypodiophyta, ?*Tilia* sp. (Tiliaceae). Russia: **EP** (NC), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (YA, ZB), **FE** (AM, KH). – China (NE), Japan (Sado).

PSEUDOHEMITAXONUS Conde, 1932. Type species *Pseudohemitaxonus exsectus* Conde, 1932. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 4; Palaearctic – 3; Russia – 1.

Pseudohemitaxonus parvus Naito, 1969. Russia: **FE** (KU). – Japan (Hok, Hon).

ROCALIA Takeuci, 1952. Type species *Rocalia longipennis* Takeuchi, 1952. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 14; Palaearctic – 3; Russia – 1.

Rocalia longipennis Takeuchi, 1952. Host plant: *Dryopteris* spp. (Dryopteridaceae). Russia: **FE** (KU). – Europe (NE), Japan (Hok, Hon).

SELANDRIA Leach, 1817 (*Cubitella* Malaise, 1944). Type species *Tenthredo serva* Fabricius, 1793. The larvae feed on Poaceae, Juncaceae, Cyperaceae. The genus is distributed in Palaearctic, Oriental and Neotropical regions. Number of species: World – 8; Palaearctic – 4; Russia – 3.

Selandria konoi Takeuchi, 1936. Russia: **FE** (SA). – Japan (Hon).

Selandria melanosterna (Serville, 1823) [Tenthredo] (*Tenthredo melanosterna* Lepeletier, 1823; *Selandria sixii* Snellen van Vollenhoven, 1858; *S. grandis* Zaddach, 1859; *S. interstitialis* Thomson, 1871). Host plant: *Carex* spp., *Scirpus* spp. (Cyperaceae), *Juncus* spp. (Juncaceae). Russia: **EP** (NW, C, E), **ES** (IR). – Europe (WE, EE, NE).

Selandria serva (Fabricius, 1793) [Tenthredo] (*Hylotoma serva mascula* Fallén, 1807; *Tenthredo socia* Klug, 1816; *T. lepida* Serville, 1823; *T. lepida* Lepeletier, 1823; *Selandria dorsalis* Stephens, 1835; *S. excisa* Konow, 1885; *S. serva interstitialis* Konow, 1885; *S. serva fuscitarsis* Benson, 1954; *S. serva punctatus* Zirngiebl, 1956). Host plant: Poaceae, Cyperaceae, Juncaceae. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TM, TK, NS, AL), **ES** (KR,

IR), **FE** (KH, PR). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Iran, Kazakhstan, Mongolia, China (NE), Korean Peninsula.

STROMBOCEROS Konow, 1885 (*Strombocerina* Malaise, 1942; *Arbusia* Malaise, 1944). Type species *Tenthredo delicatulus* Fallén, 1808. The larvae on the ferns; pupate inside stems and branches. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – 55; Palaearctic – 2; Russia – 2.

Stromboceros delicatulus (Fallén, 1808) [Tenthredo] (*Tenthredo eborina* Klug, 1817; *Synairema alpina* Bremi-Wolf, 1849; *Selandria phthisica* Snellen van Vollenhoven, 1869; *S. virescens* Rudow, 1871; *Tenthredo seesana* Rudow, 1871; *Strongylogaster viridis* Schmiedeknecht, 1881; *Stromboceros delicatulus albiceps* Takeuchi, 1941). Host plant: Dryopteridaceae, Dennstaedtiaceae, Onocleaceae, Polypodiaceae. Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS, KM, AL), **ES** (KR, IR, BR), **FE** (PR, SA, KU, KA). – Europe (WE, EE, NE), China (CC), Korean Peninsula, Japan (Hok, Hon).

Stromboceros koebelei Rohwer, 1910 (*Strongylogaster compressus* Matsumura, 1912; *Stromboceros japonicus* Malaise, 1931). Host plant: *Polystichum* spp. (Dryopteridaceae). Russia: **UR**, **FE** (PR, SA, KU). – Korean Peninsula, Japan (Hok, Hon).

STRONGYLOGASTER Dahlbom, 1835 (*Pseudotaxonus* Costa, 1894; *Polystichophagus* Ashmead, 1898; *Prototaxonus* Rohwer, 1910). Type species *Tenthredo multifasciata* Geoffroy, 1785. The larvae feed on the ferns. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – 55; Palaearctic – 25; Russia – 12.

Strongylogaster baikalensis Naito, 1990. Host plant: *Dryopteris* spp. (Dryopteridaceae), *Matteuccia* spp. (Onocleaceae). Russia: **ES** (IR), **FE** (KH). – Europe (EE).

Strongylogaster empriaeformis (Malaise, 1931) [*Thrinax*]. Host plant: Adiantaceae, Dryopteridaceae, Dennstaedtiaceae, Onocleaceae. Russia: **UR**, **WS** (KM), **FE** (PR, KA). – Japan (Hon).

Strongylogaster filicis (Klug, 1817) [Tenthredo] (*Tenthredo carinata* Klug, 1817; *T. atricornis* Stephens, 1835; *Sciopteryx apicalis* Matsumura, 1912). Host plant: *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (AL), **ES** (KR, IR), **FE** (AM, KH, SA). – Europe (WE, EE, NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Sado).

Strongylogaster macula (Klug, 1817) [Tenthredo] (*Thrinax intermedia* Konow, 1885). Host plant: Dryopteridaceae, *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **EP** (C, E, NC), **UR**, **ES** (IR, BR, ZB), **FE** (PR, KA). – Europe (WE, EE, NE), Armenia, China (NE, SE), Korean Peninsula, Japan (Hok, Hon); introduced into the N America.

Strongylogaster mixta (Klug, 1817) [Tenthredo] (*S. femoralis* Cameron, 1875; *Selandria japonica* Matsumura, 1912; *Thrinax contigua orientalis* Malaise, 1931). Host plant: Adiantaceae, Dryopteridaceae, Dennstaedtiaceae. Russia: **EP** (NW, C, E), **UR**, **WS** (KM), **ES** (IR), **FE** (KU, KA). – Europe (WE, EE, NE), Japan (Hok, Hon).

Strongylogaster moiwana Matsumura, 1912. Host plant: *Comogramme* spp. (Adiantaceae), *Osmunda* spp. (Osmundaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi).

Strongylogaster multifasciata (Geoffroy, 1785) [Tenthredo] (*Tenthredo lineata* Christ, 1791; *T. linearis* Klug, 1817; *T. alternans* Serville, 1823; *T. alternans* Lepeletier, 1823; *Strongylogaster iridipennis* F. Smith, 1874; *S. caucasicus* Schaposchnikov, 1885; *S. cretensis* Konow, 1887; *S. annularis* Matsumura, 1912; *S. lineata cypria* Benson, 1954). Host plant: Dennstaedtiaceae, Dryopteridaceae. Russia: **EP** (NW, C, E, NC), **UR**, **WS** (TM, NS, AL), **ES** (IR), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE, SE), Georgia, SW Asia, Iran, China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Sado).

Strongylogaster rubra Naito, 1980. Russia: **ES** (IR), **FE** (KU). – Korean Peninsula, Japan (Hok, Hon).

Strongylogaster secunda (Takeuchi, 1929) [*Pseudotaxonus*] (*Pseudotaxonus tertius* Conde, 1935; *P. secundus humeralis* Takeuchi, 1955). Host plant: *Osmunda japonica* (Osmundaceae). Russia: **FE** (PR, KU). – China (NE, SE), Japan (Hok, Hon, Shi, Kyu).

Strongylogaster struthiopteridis (Malaise, 1931) [*Thrinax*] (*Thrinax maura* Zhelochovtsev, 1988). Host plant: *Athyrium* spp., *Dryopteris* spp. (Dryopteridaceae), *Pteridium aquilinum* (Dennstaedtiaceae). Russia: **UR**, **WS** (KM, AL), **ES** (IR), **FE** (AM, PR, KA). – Europe (NE).

Strongylogaster verzhutskii Naito, 1990. Russia: **ES** (IR).

Strongylogaster xanthocera (Stephens, 1835) [Tenthredo] (*S. geniculata* Thomson, 1871; *S. desbrochersi* Konow, 1892; *S. desbrochersi lepticus* Konow, 1902). Host plant: *Dryopteris* spp., *Polystichum* spp., *Athyrium* spp. (Dryopteridaceae), *Pteridium*

aquinum (Dennstaedtiaceae). Russia: **EP** (NW, C), **WS** (AL), **ES** (IR), **FE** (AM, KH, PR). – Europe (WE, EE, NE, SE), China (NE, SE), Japan (Hon).

THRINAX Konow, 1885 (*Hemitaxonus* Ashmead, 1898; *Epitaxonus* MacGillivray, 1908; *Sahlbergia* Forsius, 1910; *Trearea* Malaise, 1947; *Canonarea* Malaise, 1947). Type species *Thrinax contigua* Konow, 1885. The larvae feed on the ferns. The genus is distributed in Holarctic and Oriental region. Number of species: World – 27; Palaearctic – 20; Russia – 7.

Thrinax angustata (Zhelochovtsev, 1951) [*Hemitaxonus*]. Russia: **FE** (KH, PR). – Korean Peninsula.

Thrinax athyrii (Naito, 1971) [*Hemitaxonus*]. Host plant: *Athyrium otophorum* (Dryopteridaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu).

Thrinax contigua Konow, 1885 (*Sahlbergia struthiopteridis* Forsius, 1910). Host plant: *Matteuccia* spp. (Onocleaceae). Russia: **EP** (NW), **ES** (IR), **FE** (PR, KU, KA). – Europe (NE), Japan (Hok, Hon).

Thrinax formosana (Takeuchi, 1928) [*Hemitaxonus*]. Russia: **FE** (PR). – China (SE).

Thrinax kamtchatica (Malaise, 1931) [*Hemitaxonus*]. Russia: **FE** (AM, PR, KA).

Thrinax paucipunctatus (Malaise, 1931) [*Hemitaxonus*]. Host plant: *Dryopteris* spp. (Dryopteridaceae). Russia: **ES** (IR), **FE** (KH, PR, KA). – Korean Peninsula, Japan (Hok, Hon).

Thrinax takeuchii (Naito, 1971) [*Hemitaxonus*]. Russia: **FE** (KU). – Japan (Hok, Hon).

Subfamily TENTHREDININAE

AGLAOSTIGMA W.F. Kirby, 1882 (*Laurentia* Costa, 1890; *Bivena* MacGillivray, 1894; *Homoeoneura* Ashmead, 1898; *Neopus* Viereck, 1910; *Macrophyopsis* Enslin, 1912; *Kincaidia* MacGillivray, 1914; *Astochus* MacGillivray, 1914; *Paralloma* Malaise, 1933; *Neurosiobla* Conde, 1935; *Laurentina* Malaise, 1937; *Stigmatosona* Malaise, 1945). Type species *Aglaostigma eburneiguttatum* W.F. Kirby, 1882. The larvae on herbaceous plants. The genus is distributed in Holarctic and Oriental region. Number of species: World – about 55; Palaearctic – 43; Russia – 15 from 5 subgenera.

Aglaostigma (Aglaostigma) amoorense (Cameron, 1876) [Tenthredo] (*Tenthredo amurensis* W.F. Kirby, 1882). Host plant: *Veratrum* spp. (Melanthiaceae).

Russia: **WS** (NS, KM, AL), **ES** (KR, IR, BR), **FE** (AM, KH, PR). – China (NC, NE), Korean Peninsula, Japan (Hon).

Aglaostigma (Aglaostigma) gibbosum (Fallén, 1808) [Tenthredo] (*Perineura alpina* Thomson, 1871; *Aglaostigma eburneiguttatum* W.F. Kirby, 1882; *Tenthredopsis novograblenovi* Malaise, 1931). Host plant: *Filipendula* spp. (Rosaceae). Russia: **EP** (N), **UR**, **ES** (IR), **FE** (PR, KA). – Europe (WE, EE, NE, SE).

Aglaostigma (Astochus) aucupariae (Klug, 1817) [Tenthredo] (*Tenthredo juvenilis* Serville, 1823; *T. juvenilis* Lepeletier, 1823; *Allantus collaris* Dietrich, 1868; *Laurentia craverii* Costa, 1890; *Macrophyia laticarpus* Kriechbaumer, 1891; *Aglaostigma aucupariae lacteore* Benson, 1968). Host plant: *Galium* spp. (Rubiaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS, KM), **ES** (IR, BR), **FE** (PR, KU). – Europe (WE, EE, NE), Georgia, Armenia, Turkey, China (Wei et al., 2006).

Aglaostigma (Astochus) fulvipes fulvipes (Scopoli, 1763) [Tenthredo]. Host plant: *Galium* spp. (Rubiaceae). Russia: **EP** (N, NW, C, E, S, NC), **WS** (KM, AL), **ES** (IR). – Europe (WE, EE, NE, SE), Georgia, Turkey, Central Asia, Kazakhstan.

Aglaostigma (Bivena) langei (Konow, 1894) [Rhoggastera] (*A. langei eichleri* Muche, 1975). Host plant: *Epilobium* spp. (Onagraceae). Russia: **EP** (NC). – Europe (WE, EE), Armenia.

Aglaostigma (Macrophyopsis) carbo (Malaise, 1931) [Macrophyopsis]. Russia: **FE** (PR).

Aglaostigma (Macrophyopsis) grosseseratum (Malaise, 1931) [Macrophyopsis]. Russia: **FE** (PR).

Aglaostigma (Macrophyopsis) nebulosum (André, 1881) [Macrophyia] (*Tenthredopsis schmiedeknechti* Konow, 1892). Host plant: *Filipendula* spp. (Rosaceae), *Impatiens* spp. (Balsaminaceae). Russia: **EP** (C, NC), **ES** (IR), **FE** (AM, PR, SA, KU). – Europe (WE, NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Aglaostigma (Macrophyopsis) occipitosum (Malaise, 1931) [Macrophyopsis]. Host plant: *Angelica polymorpha* (Apiaceae), *Petasites japonicus* (Asteraceae). Russia: **FE** (PR). – China (SE), Korean Peninsula, Japan (Hon, Shi, Kyu, Sado).

Aglaostigma (Macrophyopsis) ochraceum (Malaise, 1931) [Macrophyopsis]. Russia: **FE** (PR).

Aglaostigma (Macrophyopsis) tricolor (Malaise, 1931) [Macrophyopsis]. Russia: **FE** (PR).

Aglaostigma (Neurosiobla) malaisei (Conde, 1935) [Neurosiobla]. Russia: **FE** (PR).

Aglaostigma (Neurosiobla) sachalinense (Conde, 1935) [Neurosiobla] (*A. togashii* Zombori, 1973). Russia: **ES** (Zhelochovtsev, Zinovjev, 1996), **FE** (PR, SA). – Japan (Zinovjev, 1994).

Aglaostigma (Neurosiobla) tertium Zinovjev, 1994. Russia: **FE** (KH, PR).

Aglaostigma sapporonicum (Matsumura, 1912) [Macrophyta] (*Dolerus biguttatus* Matsumura, 1912). Russia: **FE** (PR). – Japan (Hok, Hon).

ARMITARSUS Malaise, 1931. Type species *Armitarsus punctifemoratus* Malaise, 1931. The genus is distributed in East Asia. Number of species: World and Palaearctic – 7; Russia – 4.

Armitarsus albipes Malaise, 1931. Russia: **FE** (AM, PR).

Armitarsus minutus Zhelochovtsev, 1935. Russia: **FE** (AM, PR). – Korean Peninsula, Japan (Hok).

Armitarsus punctifemoratus Malaise, 1931. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (PR, SA). – Korean Peninsula, Japan (Hok, Hon).

Armitarsus semirufus Takeuchi, 1936. Russia: **FE** (SA). – Japan (Hok, Hon).

CONASPIDIA Konow, 1898. Type species *Conaspidea sikkimensis* Konow, 1898. The genus is distributed in East Asia and Oriental region. Number of species: World – 23; Palaearctic – 13; Russia – 3.

Conaspidea guttata (Matsumura, 1912) [Eriocampa] (*C. trifasciata* Malaise, 1931; *C. murotai* Togashi, 1984; *C. ishikawai* Togashi, 2005). Host plant: *Kalopanax septemlobus* (Araliaceae). Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Conaspidea hyalina Sato, 1933. Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu).

Conaspidea singularis (Malaise, 1931) [Eriocampa] (*Macrophya flavipes* F. Smith, 1874). Russia: **FE** (KH, PR). – Japan (Hok, Hon).

CORYMBAS Konow, 1903 (*Siobloides* Takeuchi, 1919). Type species *Corymbas koreana* Konow, 1903. The genus is distributed in East Asia and Oriental region. Number of species: World – 7; Palaearctic – 5; Russia – 2.

Corymbas aperta (Takeuchi, 1919) [*Siobloides*]. Host plant: *Rhododendron* spp. (Ericaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu).

Corymbas koreana Konow, 1903. Russia: **FE** (PR). – China (SE), Korean Peninsula.

LAGIDINA Malaise, 1945. Type species *Macrophya irritans* F. Smith, 1874. The genus is distributed in East Palaearctic and Oriental region. Number of species: World – 8; Palaearctic – 6; Russia – 1.

Lagidina platycerus platycerus (Marlatt, 1898) [Tenthredo] (*Tenthredo platyceros* Konow, 1899). Host plant: *Iris laevigata* (Iridaceae), *Viola* spp. (Violaceae). Russia: **FE** (KU). – Japan (Hon, Shi, Kyu, Tsushima).

MACROPHYA Dahlbom, 1835 (*Zalagium* Rohwer, 1912; *Pseudomacrophya* Enslin, 1913; *Paramacrophya* Forsius, 1918). Type species *Tenthredo montana* Scopoli, 1763. The genus is distributed in Holarctic and Oriental region. Number of species: World – about 260; Palaearctic – about 160; Russia – 46 (+ 1 ssp.) from 2 subgenera.

Macrophya (Macrophya) albicincta (Schrank, 1776) [Tenthredo] (*Tenthredo albipes* Geoffroy, 1785; *T. albipalpis* Schrank, 1802; *T. luctuosa* Lepetier, 1823; *T. lugubris* Serville, 1823; *T. luctuosa* Serville, 1823; *Macrophya leucopoda* Palma, 1861; *Tenthredo magnicornis* Eversmann, 1864; *Macrophya melanostoma* Rudow, 1871; *M. albicincta decipiens* Konow, 1884; *Perineura cripiae* De-Stefani, 1885; *Macrophya albicincta candidata* Enslin, 1918; *M. albicincta agnani* Pic, 1948; *M. albicincta berlandi* Pic, 1948). Host plant: *Valeriana* spp. (Caprifoliaceae), *Sambucus* spp., *Viburnum* spp. (Adoxaceae). Russia: **EP** (C, S, NC). – Europe (WE, EE, NE, SE), N Africa, Georgia, Armenia, Turkey, Iran.

Macrophya (Macrophya) albipuncta (Fallén, 1808) [Tenthredo] (*Tenthredo arbustorum* Pollich, 1781; *T. liciata* Eversmann, 1847; *Macrophya nivosa* Costa, 1894). Host plant: *Geranium* spp. (Geraniaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (KM, AL), **ES** (KS). – Europe (WE, EE, NE, SE).

Macrophya (Macrophya) annulata (Geoffroy, 1785) [Tenthredo] (*Tenthredo dorsigera* Rossi, 1790; *T. similis* Spinola, 1808; *T. neglecta* Klug, 1817; *Allantus dejectus* Norton, 1860; *Macrophya neglecta nigra* Konow, 1894; *M. annulata theresae* Pic, 1918). Host plant: *Potentilla* spp., *Rosa* spp., *Rubus* sp. (Rosaceae), *Sambucus* spp. (Adoxaceae), *Organum* spp. (Lamiaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS), **ES** (IR, BR, YA), **FE** (AM, PR). – Europe (WE, EE, NE, SE), Armenia, Turkey, Iran, Central Asia.

Macrophya (Macrophya) annulicornis Konow, 1904.

Host plant: *Sambucus* spp. (Adoxaceae). Russia: **UR, WS (AL), ES (IR, BR, ZB), FE (AM, SA)**. – Korean Peninsula.

Macrophya (Macrophya) annulitibia Takeuchi, 1933.

Russia: **FE (PR, SA, KU)**. – China (NE, NC, CC), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Macrophya (Macrophya) apicalis F. Smith, 1874.

Host plant: *Sambucus racemosa*, *S. sieboldiana* (Adoxaceae). Russia: **FE (KU)**. – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Macrophya (Macrophya) blanda (Fabricius, 1775)

[*Tenthredo*] (*Tenthredo ligustrina* Geoffroy, 1785; *T. cylindrica* Panzer, 1799; *T. albilabris* Klug, 1817; *T. lacrymosa* Lepeletier, 1823; *T. lacrymosa* Serville, 1823; *T. cognata* Fallén, 1829; *T. nyctea* Fischer von Waldheim, 1843; *Macrophya blanda brevicornis* Gradi, 1878; *M. albolapidaria* Kuznetzov-Ugamskij, 1927; *Tenthredo reductenotata* Pic, 1928). Host plant: *Rubus* spp., *Fragaria* spp. (Rosaceae). Russia: **EP (C, E, S, NC, CR), UR, WS (Zhelochovtsev, Zinovjev, 1996)**. – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Kyrgyzstan, Kazakhstan.

Macrophya (Macrophya) carbonaria F. Smith, 1874.

Host plant: *Sambucus racemosa*, *S. sieboldiana* (Adoxaceae). Russia: **FE (SA, KU)**. – China (CC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Awa-shima, Awaji-shima, Tsushima).

Macrophya (Macrophya) carinthiaca (Klug, 1817)

[*Tenthredo*]. Host plant: *Geranium* spp. (Geraniaceae). Russia: **EP (N, C), UR, WS (AL)**. – Europe (WE, EE, NE).

Macrophya (Macrophya) caucasica (Mocsáry, 1880)

[*Allantus*] (*M. prasinipes* Konow, 1891). Russia: **EP (NC)**. – Armenia.

Macrophya (Macrophya) chrysura (Klug, 1817)

[*Tenthredo*] (*M. albimacula* Mocsáry, 1881; *M. palidilabris* Costa, 1890). Host plant: *Daucus carota* (Apiaceae). Russia: **EP (S)**. – Europe (WE, EE, SE).

Macrophya (Macrophya) convexiscutellaris Muche, 1969. Russia: **EP (NC)**.**Macrophya (Macrophya) crassula** (Klug, 1817)

[*Tenthredo*] (*Tenthredo maculosa* Serville, 1823; *T. maculosa* Lepeletier, 1823; *Macrophya klugii* Snellen van Vollenhoven, 1869; *M. cora* W.F. Kirby, 1886). Host plant: *Sambucus* spp. (Adoxaceae). Russia: **EP (NC)**. – Europe (WE, EE, SE), Georgia, Armenia, Turkey.

Macrophya (Macrophya) diversipes (Schrank, 1782)

[*Tenthredo*] (*Tenthredo haematopus* Panzer, 1801;

T. ocreata Panzer, 1804; *T. rubripes* Drapiez, 1820; *T. corallipes* Eversmann, 1847; *Macrophya flavipes* Tischbein, 1852; *Tenthredo halensis* Aichinger, 1870; *Macrophya haemotopus immaculiventris* Costa, 1871; *M. eximia* Mocsáry, 1877; *M. caucasica* André, 1881; *M. rubripes* André, 1881; *M. saundersi* W.F. Kirby, 1886; *M. sanguinipes* Mocsáry, 1891; *M. dalmatina* Gasperini, 1891; *M. diversipes passerinii* Ghigi, 1905; *M. diversipes feminina* Enslin, 1913; *M. diversipes masculina* Enslin, 1913; *M. diversipes maculiventris* Enslin, 1913; *M. diversipes nigritarsis* Enslin, 1913). Host plant: *Fragaria* spp., *Rubus* spp. (Rosaceae). Russia: **EP (C, E, S, NC), UR, ES (TU)**. – Europe (WE, EE, SE), Georgia, Armenia, Turkey, Iran, Kyrgyzstan, Kazakhstan.

Macrophya (Macrophya) duodecimpunctata duodecimpunctata (Linnaeus, 1758) [*Tenthredo*] (*Tenthredo signata* Scopoli, 1763; *T. labiata* Geoffroy, 1785; *T. fera* Scopoli, 1786; *T. melanoleuca* Gmelin, 1790; *T. lugubris* Drapiez, 1820; *T. idriensis* Lepeletier, 1823; *T. albamacula* Lepeletier, 1823; *T. albamacula* Serville, 1823; *T. dolens* Eversmann, 1847; *T. curvipes* Gimmerthal, 1847; *Macrophya novemguttata* Costa, 1859; *M. luridicarpa* Costa, 1894; *M. duodecimpunctata nigrina* Konow, 1898). Host plant: Poaceae, *Carex* spp. (Cyperaceae). Russia: **EP (NW, C, E, S, NC), UR, WS (NS, AL)**. – Europe (WE, EE, NE, SE), N Africa, Georgia, Armenia, Turkey.

Macrophya (Macrophya) duodecimpunctata sodalitia Mocsáry, 1909. Host plant: *Carex* spp. (Cyperaceae). Russia: **FE (AM, KH, PR, SA)**. – Korean Peninsula, Japan (Hok, Hon).

Macrophya (Macrophya) erythrocnema Costa, 1859

(*Tenthredo femoralis* Eversmann, 1864). Russia: **EP (NW, C, E), UR**. – Europe (WE, EE, NE, SE), Armenia, SW Asia.

Macrophya (Macrophya) hamata caucasicola Muche, 1969. Russia: **EP (NC)**.

Macrophya (Macrophya) imitator Takeuchi, 1937.

Host plant: *Aster* spp. (Asteraceae). Russia: **FE (AM, PR, SA, KU)**. – Korean Peninsula, Japan (Hok, Hon).

Macrophya (Macrophya) infumata Rohwer, 1925

(*M. scutellata* Kuznetzov-Ugamskij, 1927). Host plant: *Sambucus racemosa* (Adoxaceae). Russia: **EP (E), UR, WS (KM, AL), ES (TU, IR), FE (AM, PR, SA, KU)**. – China (NE), Korean Peninsula, Japan (Hok, Hon).

Macrophya (Macrophya) kongosana Takeuchi, 1937.

Russia: **FE (PR)**. – Korean Peninsula.

Macrophya (Macrophya) koreana Takeuchi, 1937.

Host plant: *Isodon effusus* (Lamiaceae). Russia: **FE** (AM, PR). – China (NC, CC), Korean Peninsula, Japan (Hon).

Macrophya (Macrophya) maculitibia Takeuchi, 1933. Host plant: *Petasites japonicus*, *Parasenecio hastatus* (Asteraceae). Russia: **ES** (IR), **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi).**Macrophya (Macrophya) militaris** (Klug, 1817) [Tenthredo] (*Tenthredo schaefferi* Serville, 1823; *T. schaefferi* Lepeletier, 1823; *Macrophya lepeletieri* Costa, 1859; *M. militaris cabrerae* Konow, 1896; *M. militaris nigriscutis* Enslin, 1913; *M. militaris falsa* Pic, 1928). Host plant: *Rubus* spp. (Rosaceae), *Origanum* spp. (Lamiaceae). Russia: **EP** (S, NC). – Europe (WE, EE, SE), Turkey.**Macrophya (Macrophya) montana montana** (Scopoli, 1763) [Tenthredo] (*Tenthredo trifasciata* Geoffroy, 1785; *T. sulphurata* Gmelin, 1790; *T. melanochra* Gmelin, 1790; *T. tricincta* Christ, 1791; *T. notata* Panzer, 1799; *T. albimana* Lepeletier, 1823; *T. albimana* Serville, 1823; *T. laserpitii* Lepeletier, 1823; *Macrophya rustica scutellaris* Enslin, 1913; *M. rustica pleuralis* Enslin, 1913; *M. rustica martialis* Pic, 1925; *M. rustica luteonotata* Pic, 1925; *M. rustica kabyliana* Pic, 1929). Host plant: *Rubus* spp. (Rosaceae), *Alnus* spp. (Betulaceae). Russia: **EP** (NW, C, E, S, NC, CR), **UR**. – Europe (WE, EE, NE, SE), N Africa, Georgia, Armenia, Turkey, Iran, Turkmenistan.**Macrophya (Macrophya) nemesis** Muche, 1969. Russia: **EP** (NC).**Macrophya (Macrophya) ottomana** Mocsáry, 1881. Russia: **EP** (NC). – Armenia, Turkey.**Macrophya (Macrophya) postica** (Brullé, 1832) [Tenthredo] (*M. ratzeburgii* Tischbein, 1852; *M. histrionica* Snellen van Vollenhoven, 1878; *M. postica nigripileuris* Enslin, 1913; *M. postica luteomaculata* Pic, 1918). Host plant: *Fragaria* spp., *Rubus* spp. (Rosaceae). Russia: **EP** (NC, CR). – Europe (EE, SE), Georgia, Armenia, Turkey.**Macrophya (Macrophya) potanini** Jakovlev, 1891. Russia: **FE** (AM). – China (NC).**Macrophya (Macrophya) recognata** Zombori, 1979 (*M. cognata* Mocsáry, 1881). Russia: **EP** (NC, CR). – Europe (WE, EE, SE), Georgia, Armenia.**Macrophya (Macrophya) ribis** (Schrank, 1781) [Tenthredo] (*Tenthredo leucopus* Gmelin, 1790; *T. exalbida* Gmelin, 1790; *Macrophya bertolini* Cobelli, 1890; *M. ribis morvandica* Pic, 1948). Host plant:

Sambucus spp. (Adoxaceae). Russia: **EP** (NC). – Europe (WE, EE, NE, SE).

Macrophya (Macrophya) rufipes (Linnaeus, 1758) [Tenthredo] (*Tenthredo pavida* Fabricius, 1775; *T. dumetorum* Geoffroy, 1785; *T. multicolor* Geoffroy, 1785; *T. flavifasciata* Christ, 1791; *T. rufipes* Christ, 1791; *T. strigosa* Fabricius, 1798; *T. citreipes* Lepeletier, 1823; *T. citreipes* Serville, 1823; *Allantus ione* Newman, 1837; *Macrophya rufipes orientalis* Mocsáry, 1891; *M. rufipes muliebris* Enslin, 1913; *M. rufipes castiliensis* Enslin, 1914; *M. rufipes reductenotata* Pic, 1929; *M. rufipes diversereducta* Pic, 1929). Host plant: *Vitis* spp. (Vitaceae), *Agromonia* spp. (Rosaceae). Russia: **EP** (C, E, S, NC, CR), **UR**. – Europe (WE, EE, NE, SE), Armenia, Turkey, Turkmenistan.**Macrophya (Macrophya) sanguinolenta** (Gmelin, 1790) [Tenthredo] (*Tenthredo quadrimaculata* Fabricius, 1787; *T. picea* Gmelin, 1790; *Allantus sambuci* Panzer, 1803; *Tenthredo comma* Fallén, 1808; *Macrophya trochanterica* Costa, 1858; *Tenthredo poecilopus* Aichinger, 1870; *Macrophya quadrimaculata nigrifrons* Jakovlev, 1886; *M. quadrimaculata nigra* Jakovlev, 1888; *M. sanguinolenta borealis* Forsius, 1918; *M. sanguinolenta albitarsis* Enslin, 1918). Host plant: *Veronica* spp. (Plantaginaceae), *Senecia* spp. (Asteraceae), *Galeopsis* spp. (Lamiaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **ES** (IR), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Kazakhstan, Mongolia, China (NE, NC), Korean Peninsula.**Macrophya (Macrophya) sibirica** Forsius, 1918 (*M. sibiricola* Forsius, 1925). Host plant: *Sambucus* spp. (Adoxaceae). Russia: **WS** (AL), **ES** (IR), **FE** (KH, PR). – China (NE, CC), Korean Peninsula.**Macrophya (Macrophya) superba** Tischbein, 1852 (*Tenthredo erythropus* Brullé, 1832; *Macrophya erythropus croatica* Korlević, 1890; *M. flavipennis* Kriechbaumer, 1891; *M. erythropus fluminensis* Strobl, 1901; *M. superba nigricans* Enslin, 1913). Host plant: *Rubus* spp., *Fragaria* spp. (Rosaceae), *Euphorbia* (Euphorbiaceae). Russia: **EP** (NC). – Europe (EE, SE), Armenia, SW Asia.**Macrophya (Macrophya) teutona** (Panzer, 1799) [Tenthredo] (*Tenthredo aureatensis* Schrank, 1802; *Macrophya marginata* Mocsáry, 1881; *M. klugi* Konow, 1894). Host plant: *Euphorbia* spp. (Euphorbiaceae). Russia: **EP** (NC), **UR** (S). – Europe (WE, EE, SE), Turkey.

Macrophyia (Macrophyia) vacillans Malaise, 1931
(*M. vacillans punctifrons* Malaise, 1931). Host plant:
Ligustrum spp., Syringa spp. (Oleaceae). Russia: **FE**
(PR). – Korean Peninsula.

Macrophyia (Pseudomacrophyia) albitarsis Mocsáry,
1909. Russia: **FE** (KH). – Korean Peninsula.

Macrophyia (Pseudomacrophyia) crassuliformis
Forsius, 1925 (*M. brevilabris* Malaise, 1931; *M. brevi-
labris nigroscutellata* Malaise, 1931). Host plant:
?Ligustrum obtusifolium (Oleaceae). Russia: **FE**
(KH, PR). – China (Shinohara, 2015), Korean Pen-
insula, Japan (Hon, Shi).

Macrophyia (Pseudomacrophyia) dibowskii André,
1881. Russia: “Sibiria” (André, 1881), **FE** (AM).

Macrophyia (Pseudomacrophyia) minutissima Take-
uchi, 1937. Russia: **FE** (PR). – Korean Peninsula.

Macrophyia (Pseudomacrophyia) punctumalbum
(Linnaeus, 1767) [Tenthredo] (*Tenthredo erythropus*
Schrank, 1776; *T. punctum* Fabricius, 1781; *T. stel-
lata* Geoffroy, 1785). Host plant: Ligustrum spp.,
Fraxinus spp. (Oleaceae), Crataegus spp. (Rosaceae),
Quercus spp. (Fagaceae). Russia: **EP** (NW, C, S, NC,
CR). – Europe (WE, EE, NE, SE), Georgia, Armenia.

Macrophyia brunnipes André, 1881 (*M. bruneipes*
Dalla Torre, 1894). Russia: “Sibiria” (André, 1881).

Macrophyia coxalis (Motschulsky, 1866) [Dolerus]
(*M. ignava* F. Smith, 1874; *Emphytus japonicus*
W.F. Kirby, 1882; *Macrophyia discreta* Forsius,
1925). Host plant: Rosa spp. (Rosaceae). Russia:
FE (KU). – China (Wei et al., 2006), Korean Pen-
insula, Japan (Hok, Hon, Shi, Kyu, Sado, Awaji-
shima, Oki).

Macrophyia esakii (Takeuchi, 1923) [Pachyprotas-
sis] (*M. exilis* Takeuchi, 1933). Russia: **FE** (SA). –
Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Macrophyia timida F. Smith, 1874 (*M. nigra* Marlatt,
1898; *M. femorata* Marlatt, 1898; *M. nigrita* Enslin,
1910; *M. mikagei* Togashi, 2005). Host plant: Ligus-
trum spp., Syringa vulgaris (Oleaceae). Russia: **FE**
(PR). – China (Shinohara, 2015), Korean Penin-
sula, Japan (Hok, Hon, Shi, Kyu, Sado, Awaji-shima,
Tsushima).

Macrophyia tristis André, 1881. Russia: “Sibiria”
(André, 1881), **FE** (AM).

PACHYPROTASIS Hartig, 1837 (*Lithracia* Cam-
eron, 1902). Type species *Tenthredo rapae*
Linnaeus, 1767. The genus is distributed in Hol-
arctic, Oriental and Neotropical regions. Number

of species: World – about 200; Palaearctic – about
165; Russia – 17.

Pachyprotasis antennata (Klug, 1817) [Tenthredo]
(*P. antennata exannulata* Malaise, 1931). Host plant:
Senecio spp. (Asteraceae), Filipendula spp. (Rosa-
ceae), Fraxinus spp. (Oleaceae), Atropa spp. (Solana-
ceae), etc. Russia: **EP** (N, C, E), **UR**, **WS** (NS, KM,
AL), **ES** (IR, BR), **FE** (AM, PR, SA). – Europe (WE,
EE, NE, SE), Mongolia, China (NE, NC), Korean
Peninsula, Japan (Hok, Hon, Kyu, Sado).

Pachyprotasis elegans Takeuchi, 1956. Russia: **FE**
(KU). – Japan (Hok).

Pachyprotasis erratica erratica F. Smith, 1874 (*M. fla-
voventralis* Matsumura, 1912). Russia: **FE** (SA,
KU). – China (SE), Japan (Hok, Hon, Shi).

Pachyprotasis glabrata Malaise, 1931. Russia: **FE**
(PR). – Korean Peninsula.

Pachyprotasis laeviceps Malaise, 1931. Russia: **FE**
(PR). – Korean Peninsula.

Pachyprotasis limitaris Malaise, 1931. Russia: **FE**
(PR).

Pachyprotasis lineicoxis Malaise, 1931. Russia: **WS**
(Zhelochovtsev, Zinovjev, 1996), **FE** (PR). – China
(SE), Japan.

Pachyprotasis longicornis Jakovlev, 1891 (*Macro-
phyia nigrolineata* Matsumura, 1912; *Pachyprotasis
longicornis kuriharum* Malaise, 1931). Russia: **FE**
(SA, KU). – China (NC), Korean Peninsula, Japan
(Hok, Hon).

Pachyprotasis nigra Stroganova, 1978. Russia: **FE**
(CH).

Pachyprotasis nigronotata Kriechbaumer, 1874
(*P. formosa* Schmiedeknecht, 1881; *P. viridis* Bris-
chke, 1883). Host plant: Plantago spp. (Planta-
ginaceae), Mentha spp. (Lamiaceae), Geum spp.,
Alchemilla spp. (Rosaceae), etc. Russia: **EP** (NW,
C), **ES** (IR), **FE** (AM, KH, PR). – Europe (WE, EE,
NE), China (SE), Korean Peninsula.

Pachyprotasis pedatoria (Malaise, 1931) [*Macro-
phyia*]. Russia: **FE** (PR).

Pachyprotasis rapae (Linnaeus, 1767) [Tenthredo]
(*Tenthredo leucomelas* Strøm, 1768; *T. scripta*
Gmelin, 1790; *T. luctuosa* Schrank, 1802; *T. floricola*
Gravenhorst, 1807; *T. nigrofasciata* Eschscholtz,
1822; *T. duplex* Serville, 1823; *T. duplex* Lepeletier,
1823; *Macrophyia omega* Norton, 1867; *Synairema
americana* Provancher, 1885; *Rhogogaster sayi*
Rohwer, 1908; *Macrophyia obnata* MacGillivray,
1923; *Pachyprotasis rapae nigrosternum* Koch,

1984). Host plant: *Solidago* spp. (Asteraceae), *Scrophularia* spp. (Scrophulariaceae), *Fraxinus* spp. (Oleaceae), etc. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (BR, YA, ZB), **FE** (AM, PR, SA, KU, KA, MG). – Europe (WE, EE, NE, SE), Armenia, Turkey, Mongolia, China (Wei et al., 2006), Korean Peninsula, Japan (Hok, Hon), India, N America, Mexico.

Pachyprotasis sejensis sejensis Inomata, 1984. Russia: **FE** (KU). – Japan (Hon).

Pachyprotasis simulans (Klug, 1817) [Tenthredo] (*P. laevicollis* Thomson, 1871; *P. tenuis* Rudow, 1871). Host plant: *Scrophularia* spp. (Scrophulariaceae), *Solidago* spp., *Senecio* spp. (Asteraceae). Russia: **EP** (NW, C), **FE** (PR). – Europe (WE, EE, NE), Mongolia, China (NC).

Pachyprotasis variegata (Fallén, 1808) [Tenthredo] (*P. variegata tenebrosa* Malaise, 1931). Host plant: *Solanum tuberosum* (Solanaceae), *Digitalis* spp. (Plantaginaceae), *Leontodon* spp., *Leucanthemum* spp. (Asteraceae), etc. Russia: **EP** (N, C, E), **UR**, **ES** (BR), **FE** (AM, PR, SA, MG). – Europe (WE, EE, NE), Central Asia, Mongolia, China (NE), Korean Peninsula, Japan.

Pachyprotasis vicaria Malaise, 1931. Russia: **FE** (PR). – Japan (Hok).

Pachyprotasis zukaensis Inomata, 1970. Russia: **FE** (KU). – Japan (Hon).

PERINEURA Hartig, 1837 (*Synairema* Hartig, 1837; *Synaerema* Agassiz, 1848; *Perinevra* Agassiz, 1848; *Synaerema* Schulz, 1906). Type species *Allantus rubi* Panzer, 1803. The genus is distributed in East Asia; one species in the west of Palaearctic and one species in Oriental region. Number of species: World – 11; Palaearctic – 10; Russia – 2.

Perineura japonica Malaise, 1931. Russia: **FE** (PR, SA). – Japan (Hok, Hon).

Perineura rubi (Panzer, 1803) [*Allantus*] (*Tenthredo lividiventris* Fallén, 1808; *T. elegantula* Fallén, 1808; *T. delicatula* Klug, 1817). Host plant: *Rubus* spp. (Rosaceae). Russia: **EP** (NW, C, E). – Europe (WE, EE, NE).

RHOGOGASTER Konow, 1884 (*Rhogogastera* Konow, 1885; *Cytisodaster* Lacourt, 1997). Type species *Tenthredo viridis* Linnaeus, 1758. The larvae on the flowering plants. The genus is distributed in Holarctic and Oriental region. Number

of species: World – 38; Palaearctic – about 35; Russia – 13.

Rhogogaster chlorosoma (Benson, 1943) [Tenthredo]. Host plant: Dennstaedtiaceae, Salicaceae, Betulaceae, Rosaceae. Russia: **EP** (C, E), **UR**, **WS** (AL), **ES** (IR, YA), **FE** (SA, KU). – Europe (WE, EE, NE, SE), Turkey, Mongolia, Japan.

Rhogogaster convergens Malaise, 1931. Russia: **ES** (IR), **FE** (AM, KH, PR). – China (NE), Korean Peninsula, Japan (Hok).

Rhogogaster coryli Muche, 1973. Host plant: *Corylus* spp. (Betulaceae). Russia: **EP** (NC).

Rhogogaster genistae Benson, 1947 (*Rh. genistae viridifrons* Muche, 1973). Host plant: *Genista* spp., *Sarothamnus* spp. (Fabaceae). Russia: **EP** (NC). – Europe (WE, EE, NE, SE), N Africa, Turkey.

Rhogogaster magniserrula Viitasaari, 2015. Russia: **EP** (N). – Europe (NE).

Rhogogaster nigriventris Malaise, 1931 (*Tenthredo varipes* W.F. Kirby, 1882). Host plant: *Geranium* spp. (Geraniaceae), *Rosa* spp. (Rosaceae). Russia: **ES** (IR), **FE** (AM, KH, PR, SA). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Rhogogaster picta (Klug, 1817) [Tenthredo] (*Tenthredo breviuscula* Costa, 1859). Host plant: *Sarothamnus* spp., *Genista* spp., *Cytisus* spp. (Fabaceae). Russia: **EP** (C, E, S, NC), **ES** (TU, ZB). – Europe (WE, EE, NE, SE), N Africa, Georgia, Syria, Kazakhstan, Mongolia.

Rhogogaster polaris Lindqvist, 1964. Russia: **EP** (N), **ES** (IR, BR), **FE** (MG). – Europe (WE, NE).

Rhogogaster punctulata (Klug, 1817) [Tenthredo]. Host plant: Salicaceae, Betulaceae, Rosaceae, Oleaceae. Russia: **EP** (N, NW, C), **UR**, **WS** (NS), **ES** (KR, IR, BR, ZB). – Europe (WE, EE, NE, SE), Turkey, Mongolia, China (NC).

Rhogogaster scalaris (Klug, 1817) [Tenthredo] (*Rh. viridis* auct., nec Linnaeus; *Tenthredo pictipes* Förster, 1850; *Rhogogaster viridis melanonota* Enslin, 1912; *Rh. viridis nigroscutellata* Forsius, 1918; *Rh. viridis lapponica* Enslin, 1918; *Rh. chlorosoma podkumokensis* Muche, 1973; *Tenthredo carpatica* Zhelochovtsev et Zinovjev, 1988). Host plant: polyphage. Russia: **EP** (C, NC), **UR**, **WS** (KM, AL), **ES** (TU, BR), **FE** (KA). – Europe (WE, EE, NE).

Rhogogaster sibirica Enslin, 1912 (*Rh. kudianus* Rohwer, 1925). Russia: **ES** (IR), **FE** (PR).

Rhogogaster tsherepanovi Stroganova, 1988. Russia: **EP** (C), **WS** (NS), **ES** (KR).

Rhogogaster viridis (Linnaeus, 1758) [Tenthredo] (*Tenthredo dryas* Benson, 1943; *Rhogogaster similis* Lindqvist, 1959). Host plant: Salicaceae, Betulaceae, Onagraceae, Fagaceae, Rhamnaceae, Rosaceae, Fabaceae. Russia: **EP** (N, NW, C, E), **WS** (NS, AL), **ES** (IR, BR, YA, ZB), **FE** (PR, KU, KA, MG). – Europe (WE, EE, NE), Kazakhstan, Mongolia, China (NC), Korean Peninsula, SE Asia.

SCIAPTERYX Stephens, 1835 (*Eniscia* Thomson, 1870; *Sciopteryx* Cameron, 1882; *Sciapterina* Ushinskij, 1940). Type species *Tenthredo costalis* Fabricius, 1775. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 16; Russia – 9.

Sciapteryx caucasica Dovnar-Zapolskij, 1930. Russia: **EP** (NC). – Turkey.

Sciapteryx circassica Dovnar-Zapolskij, 1930. Russia: **EP** (NC). – Georgia, Armenia, Turkey.

Sciapteryx consobrina (Klug, 1816) [Tenthredo] (*Eriocampa marginata* Puls, 1870; *Allantus consobrinus zwickoviensis* Schlechtendal, 1873). Host plant: Adoxa spp. (Adoxaceae), Anemone spp., Ranunculus spp. (Ranunculaceae). Russia: **EP** (NW, C, S, NC). – Europe (WE, EE, NE, SE), Georgia.

Sciapteryx costalis costalis (Fabricius, 1775) [Tenthredo]. Host plant: Ranunculus spp. (Ranunculaceae). Russia: **EP** (C). – Europe (WE, EE, NE, SE).

Sciapteryx dovnari Ushinskij, 1940. Russia: **EP** (NC). – Georgia, Armenia.

Sciapteryx laeta Konow, 1891 (*S. laeta antennata* Muche, 1973). Host plant: Ranunculus spp. (Ranunculaceae). Russia: **EP** (NC). – Georgia, Turkey.

Sciapteryx montana Dovnar-Zapolskij, 1930. Russia: **EP** (NC).

Sciapteryx semenowi Jakovlev, 1886. Host plant: Euclidium spp., Capsella spp. (Brassicaceae). Russia: **EP** (S, CR). – Europe (EE).

Sciapteryx verticalis Muche, 1973. Russia: **EP** (NC).

SIOBLA Cameron, 1877 (*Encarsioneura* Konow, 1890; *Megasiobia* Dovnar-Zapolskij, 1930). Type species *Siobla mooreana* Cameron, 1877. The genus is distributed in Palaearctic and Oriental region. Number of species: World – about 75; Palaearctic – about 55; Russia – 12.

Siobla ferox (F. Smith, 1874) [Macrophyia] (*S. grandis* Matsumura, 1912). Host plant: Balsaminaceae, Polygonaceae, Amaranthaceae. Russia: **FE**

(PR). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Tsushima).

Siobla frigida (Mocsáry, 1909) [Encarsioneura]. Russia: **FE** (KH). – China (NE, SE).

Siobla grossa Malaise, 1931. Russia: **FE** (AM, PR).

Siobla jucunda (Mocsáry, 1909) [Encarsioneura]. Russia: **FE** (KH, PR, SA, KU). – Japan (Hok, Hon, Shi).

Siobla malaisei Mallach, 1933. Russia: **FE** (PR). – China (NE, CC).

Siobla ruficornis (Gimmerthal, 1834) [Allantus] (*Eriocampa ruficornis* Cameron, 1876; *Siobla sibirica* Malaise, 1931; *S. sibirica bergmani* Malaise, 1931; *S. ruficornis albicornis* Malaise, 1931). Host plant: Epilobium angustifolium (Onagraceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS, AL), **ES** (IR, BR, YA), **FE** (KH, PR, SA, KU, KA). – Europe (NE), China (NE), Korean Peninsula, Japan (Hon).

Siobla similis (Mocsáry, 1909) [Encarsioneura]. Russia: **FE** (KH, SA).

Siobla sturmii sturmii (Klug, 1817) [Tenthredo] (*Macrophya castanea* Jakovlev, 1888; *M. pacifica* F. Smith, 1874). Host plant: Impatiens spp. (Balsaminaceae), Rubus spp., Rosa spp., Prunus spp. (Rosaceae). Russia: **EP** (NW, C), **WS** (NS), **ES** (YA), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE), Korean Peninsula, Japan (Hok, Hon, Kyu).

Siobla takeuchii Shinohara, Wei et Niu, 2013. Russia: **FE** (KU). – Japan (Hok, Hon, Kyu).

Siobla venusta venusta (Konow, 1903) [Ercarsioneura]. Russia: **FE** (PR). – China (CC), Korean Peninsula.

Siobla villosa Malaise, 1931. Russia: **FE** (PR). – China (CC).

Siobla zenaida Dovnar-Zapolskij, 1930. Russia: **FE** (KH). – China (NE, CC), Korean Peninsula.

TENTHREDO Linnaeus, 1758 (*Allantus* Jurine, 1801; *Parastatis* W.F. Kirby, 1881; *Dipteromorpha* W.F. Kirby, 1882; *Labidia* Provancher, 1886; *Jermakia* Jakovlev, 1891; *Ischyroceraea* Kiær, 1898; *Rethrax* Cameron, 1899; *Fethalia* Cameron, 1902; *Peus* Konow, 1903; *Clydostomus* Konow, 1908; *Tenthredella* Rohwer, 1910; *Tenthredina* Rohwer, 1910; *Zamacrophyia* Rohwer, 1912; *Metallopeus* Malaise, 1934; *Jakovleviella* Malaise, 1937; *Adungia* Malaise, 1945; *Ebba* Malaise, 1945; *Propodea* Malaise, 1945; *Elinora* Benson, 1946; *Eurogaster* Zirngiebl, 1953; *Cuneala* Zirngiebl, 1956; *Elinopsis* Lacourt, 1986; *Cephaledo* Zhelochovtsev, 1988; *Maculedo* Zhelochovtsev, 1988; *Olivacedo* Zhelochovtsev,

1988; *Temuledo* Zhelochovtsev, 1988; *Zonuledo* Zhelochovtsev, 1988; *Murciana* Lacourt, 1988; *Absentia* Togashi, 1990; *Casipteryx* Taeger, 1991; *Paratenthredo* Taeger, 1991; *Dorhettenyx* Lacourt, 1997; *Endotethryx* Lacourt, 1997; *Sainiella* Lacourt, 1997; *Blankia* Lacourt, 1998). Type species *Tenthredo scrophulariae* Linnaeus, 1758. The larvae on various plants; often polyphages. Adults often found on the inflorescences of Apiaceae, Spiraea, and others; females of many species are predators. The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – > 900; Palaearctic – about 655; Russia – 158 (+ 13 ssp.) from 14 subgenera.

Tenthredo (Cephaledo) bifasciata diversipennis (Mocsáry, 1891) [Allantus]. Host plant: Asteraceae. Russia: EP (NC). – Georgia, Armenia, SW Asia.

Tenthredo (Cephaledo) bifasciata rossii (Panzer, 1803) [Allantus] (*T. bifasciata* Klug, 1817; *T. scissa* Klug, 1819; *T. rossii pigeoti* Pic, 1948; *T. rossica laeviceps* Hellén, 1955). Host plant: Sonchus spp., Hieracium spp. (Asteraceae). Russia: EP (NW, C). – Europe (WE, EE, NE).

Tenthredo (Cephaledo) bifasciata violacea (André, 1881) [Allantus] (*T. interjecta* Kuznetzov-Ugamskij, 1924). Host plant: Asteraceae. Russia: EP (C, E, S), WS (AL). – Europe (EE, SE), Kazakhstan.

Tenthredo (Cephaledo) caucasica caucasica Eversmann, 1847 (*Allantus moestus* Mocsáry, 1883). Russia: EP (S, NC). – Georgia, Armenia, SW Asia.

Tenthredo (Cephaledo) costata Klug, 1817 (*T. sareptana* Eversmann, 1847; *Allantus faustus* W.F. Kirby, 1882; *A. subcostatus* Jakovlev, 1888; *A. graecus* Konow, 1888; *A. parnasius* Konow, 1888; *A. violaceipennis* Costa, 1890; *A. kiefferi* Konow, 1899; *A. kiettereri ciliix* Enslin, 1910; *Tenthredo kiefferi lugubrata* Enslin, 1914; *Allantus costatus obscurus* Zirngiebl, 1937). Host plant: Chondrilla spp. (Asteraceae), Euphorbia spp. (Euphorbiaceae). Russia: EP (S, NC). – Europe (EE, SE), Georgia, Armenia, SW Asia, Iran.

Tenthredo (Cephaledo) excellens (Konow, 1886) [Allantus] (*T. annulata* Klug, 1817; *Allantus persa* Konow, 1888; *A. persa mandibularis* Enslin, 1910; *Tenthredo persa caja* Enslin, 1912). Russia: EP (S, NC), UR. – Europe (EE), Georgia, Armenia, Turkey, Iran, Turkmenistan.

Tenthredo (Cephaledo) neobesa Zombori, 1980 (*T. zonata* Fallén, 1808; *Allantus obesus* Mocsáry, 1880; *Tenthredo pseudorossii* Taeger, 1985). Host

plant: Hieracium spp., Sonchus spp. (Asteraceae). Russia: EP (E), UR, WS (NS, AL), ES (IR). – Europe (WE, EE, NE), Georgia.

Tenthredo (Cephaledo) segmentaria Fabricius, 1798 (*Allantus steckii* Konow, 1888; *A. stecki trimarginata* Pic, 1933; *A. stecki milliati* Pic, 1933). Russia: ES (TU, IR). – Europe (WE, EE).

Tenthredo (Cephaledo) violascens (Konow, 1886) [Allantus]. EP (NC). – Georgia, Armenia, Turkey.

Tenthredo (Dorhettenyx) jozana (Matsumura, 1912) [*Tenthredopsis*] (*T. fuscata* Enslin, 1920). Russia: WS (AL), FE (PR, SA, KU). – China (SE), Korean Peninsula, Japan (Hok, Hon, Shi).

Tenthredo (Elinora) aulica Enslin, 1912 (*Allantus nigritarsis* Konow, 1886). Russia: EP (NC).

Tenthredo (Elinora) caspia (André, 1881) [Allantus]. Russia: EP (S). – Europe (EE).

Tenthredo (Elinora) dahlii Klug, 1817 (*T. villosa* Brullé, 1832; *T. unicincta* Brullé, 1832; *Allantus xanthorius* Kriechbaumer, 1869; *Macrophyia hartigii* W.F. Kirby, 1882). Russia: EP (S, NC, CR), ES (BR, ZB). – Europe (EE, SE), Uzbekistan.

Tenthredo (Elinora) flaveola Gmelin, 1790 (*T. flavipes* Geoffroy, 1785; *T. rubiginosa* Gmelin, 1790; *T. dispar* Klug, 1817; *T. grata* Lepeletier, 1823; *T. grata* Serville, 1823; *Allantus rufocingulatus* Tischbein, 1852; *A. orientalis* Kriechbaumer, 1869; *A. galicensis* Niegabitowski, 1899; *A. flaveola delagrangei* Pic, 1925). Host plant: Bupleurum spp. (Apiaceae), Raphanus spp., Brassica spp., Sinapis spp. (Brassicaceae). Russia: EP (S, NC, CR), WS (Zhelochovtsev, Zinovjev, 1996). – Europe (WE, EE, NE), Armenia.

Tenthredo (Elinora) koehleri Klug, 1817 (*Allantus funereus* Palma, 1861; *A. koehleri scutellaris* Gregor, 1941). Host plant: Cardamine spp. (Brassicaceae), Geranium sanguineum, Robertianum spp. (Geraniaceae). Russia: EP (NC). – Europe (WE, EE, SE), Turkey.

Tenthredo (Elinora) longipes (Konow, 1886) [Allantus] (*Allantus shestoperovi* Ushinskij, 1936; *Cuneala tricolor* Zirngiebl, 1956). Russia: EP (NC). – Georgia, Armenia, Iran, Turkmenistan.

Tenthredo (Elinora) ornata (André, 1881) [Allantus] (*Allantus caucasicus* Mocsáry, 1880; *A. discolor* Konow, 1890; *A. mocsaryi* Enslin, 1910; *Tenthredo baja* Enslin, 1912; *T. camilla* Enslin, 1912). Russia: EP (NC). – Armenia, Turkey.

Tenthredo (Elinora) persica (André, 1882) [Allantus] (*T. coniensis* Enslin, 1914; *Allantus kareli* Muche,

- 1962; *A. kareli maculatus* Muche, 1962). Russia: **EP** (Lacourt, 1999). – Caucasus, Turkey, Iran.
- Tenthredo (Elinora) pubescens** (André, 1881) [*Allantus*]. Russia: **EP** (NC).
- Tenthredo (Elinora) radoszkowskii** (André, 1881) [*Allantus*] (*Allantus atratus* André, 1883; *A. confinis* Konow, 1886; *A. parviceps* Konow, 1898). Host plant: *Geranium* spp. (Geraniaceae). Russia: **EP** (S, NC). – Caucasus, Turkey, Iran.
- Tenthredo (Elinora) sabariensis** (Mocsáry, 1880) [*Allantus*] (*Allantus breviventris* Cameron, 1887; *A. morawitzi* Jakovlev, 1888; *A. sabariensis moravica* Gregor, 1941). Russia: **EP** (C, E, NC), **UR**. – Europe (EE).
- Tenthredo (Endotethryx) adusta** Motschulsky, 1866 (*T. fulva* Klug, 1817; *T. eversmanni* Ballion, 1869; *T. erratica* F. Smith, 1874; *T. fulva pallidiventris* Jakovlev, 1886; *Allantus moiwasamus* Matsumura, 1912; *Tenthredo urgaensis* Muche, 1965). Imago on *Heraclium* spp. and others Apiaceae. Russia: **EP** (C, E), **UR**, **WS** (NS, AL), **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KU). – Europe (EE, NE), Mongolia, China (NE), Korean Peninsula, Japan (Hok, Hon, Shi).
- Tenthredo (Endotethryx) campestris** Linnaeus, 1758 (*T. flava* Poda, 1761; *T. poecilechroa* Schrank, 1781; *T. flauicornis* Fabricius, 1781; *T. luteicornis* Fabricius, 1787; *T. mucronata* Gmelin, 1790; *T. flavidula* Christ, 1791; *T. umbellatarum* Panzer, 1806; *Tenthredella flavicornis temporalis* Enslin, 1912; *T. flavicornis pallior* Forsius, 1918). Host plant: *Aegopodium* spp. (Apiaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS, AL). – Europe (WE, EE, NE), Turkey.
- Tenthredo (Endotethryx) crassa** Scopoli, 1763 (*T. impura* Scopoli, 1763; *T. albicornis* Fabricius, 1781; *T. dealbata* Gmelin, 1790; *T. albata* Turton, 1802; *T. nebulosa* Serville, 1823; *T. nebulosa* Lepeletier, 1823). Host plant: *?Archangelica* spp. (Apiaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS), **ES** (KR). – Europe (WE, EE, NE, SE), Georgia, Kazakhstan.
- Tenthredo (Eurogaster) aaliensis** (Strand, 1898) [Pachyprotasis] (*Rhogogaster arctica* Kiær, 1898; *Tenthredo microps* Konow, 1903; *Rhogogaster kaszabi* Zombori, 1973). Imago on Apiaceae. Russia: **UR**, **ES** (IR, BR, ZB), **FE** (AM, MG). – Europe (WE, NE), Kazakhstan, Mongolia.
- Tenthredo (Eurogaster) convergenata** (Takeuchi, 1955) [*Tenthredella*]. Russia: **FE** (KU). – Japan (Hok, Hon, Shi).
- Tenthredo (Eurogaster) dealbata** Mocsáry, 1909 (*Tenthredella deaurata* Enslin, 1912). Russia: **WS** (AL), **ES** (IR), **FE** (AM, KH, PR). – Korean Peninsula.
- Tenthredo (Eurogaster) maculiger dioctrioides** (Jakovlev, 1891) [*Allantus*] (*Allantus rupico* Konow, 1908). Imago on Apiaceae, *Ranunculus* spp. (Ranunculaceae). Russia: **FE** (PR). – China (NC, SC), Nepal, India (NE).
- Tenthredo (Eurogaster) maculiger maculiger** (Jakovlev, 1891) [*Allantus*] (*Allantus incinctus* Konow, 1908; *Tenthredo maculigera camtschatica* Forsius, 1928). Imago on Apiaceae, *Ranunculus* spp. (Ranunculaceae). Russia: **WS** (AL), **ES** (TU, IR, BR), **FE** (KA, MG). – Mongolia, China (SW).
- Tenthredo (Eurogaster) mesomela** Linnaeus, 1758 (*T. annularis* Villers, 1789; *T. marginata* Christ, 1791; *T. explanata* Rudow, 1871; *T. bernardi* Konow, 1888; *Tenthredella mesomelas mesopleuralis* Enslin, 1912; *T. mesomelas atramentaria* Enslin, 1912; *Tenthredo mesomelas gigas* Malaise, 1931; *Tenthredella mesomelas reducta* Pic, 1940; *T. mesomelas flavoscutellaris* Pic, 1940; *T. mesomelas mediorufescens* Pic, 1940; *Tenthredo kaszabi* Muche, 1965). Host plant: *Polygonum* spp. (Polyfonaceae), *Heracleum* spp. (Apiaceae), *Ranunculus* spp. (Ranunculaceae), etc. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TK, NS, KM, AL), **ES** (KR, IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KU, KA, MG). – Europe (WE, EE, NE, SE), Armenia, Turkey, Mongolia, China (NE), Korean Peninsula, Japan (Hok, Hon, Shi).
- Tenthredo (Eurogaster) mioceras** (Enslin, 1912) [*Tenthredella*] (*T. mioceras* Benson, 1943; *T. mesomelas montana* Pasteels, 1946). Host plant: *Ranunculus* spp. (Ranunculaceae), *Heracleum* spp. (Asteraceae), *Dryopteris* spp. (Dryopteridaceae), etc. Russia: **EP** (NW, C, E), **UR**, **WS** (NS, AL), **ES** (BR). – Europe (WE, EE, SE), Kazakhstan, China (Wei et al., 2006).
- Tenthredo (Eurogaster) nitidiceps** (Takeuchi, 1955) [*Tenthredella*]. Russia: **FE** (KU). – Japan (Hok, Hon).
- Tenthredo (Eurogaster) obsoleta** Klug, 1817 (*T. arctica* Thomson, 1871). Host plant: *Plantago* spp. (Plantaginaceae). Russia: **EP** (C, E), **UR**, **WS** (KM, AL), **ES** (KR, IR, BR), **FE** (AM, PR). – Europe (WE, EE, NE, SE), China (Wei et al., 2006).
- Tenthredo (Eurogaster) opaciceps** (Takeuchi, 1955) [*Tenthredella*]. Russia: **FE** (SA, KU). – Japan (Hok, Hon).

Tenthredo (Eurogaster) sibiricola (Forsius, 1918)
[Tenthredella]. Russia: **FE** (KA).

Tenthredo (Eurogaster) stulta Jakovlev, 1891 (*Rhogogaster opacella* Mocsáry, 1909; *Tenthredella stulta bernardiformis* Enslin, 1927; *T. stulta temporalis* Enslin, 1927; *Tenthredo elisabethae* Muche, 1965). Host plant: probably polyphage. Russia: **WS** (AL), **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR, SA, KU, KA, MG). – Mongolia, China (NC), Korean Peninsula, Japan (Hok, Hon, Kyu).

Tenthredo (Eurogaster) tenuivaginata (Takeuchi, 1955) [Tenthredella]. Russia: **FE** (SA, KU). – Japan (Hok).

Tenthredo (Maculedo) cinctipleuris (Enslin, 1910) [Allantus]. Russia: **EP** (NC). – Georgia, Armenia, Turkey, Iran.

Tenthredo (Maculedo) maculata Geoffroy, 1785 (*T. unifasciata* Geoffroy, 1785; *T. zonata* Panzer, 1799; *T. succincta* Donovan, 1808; *T. equestris* Panzer, 1809; *T. latizona* Lepeletier, 1823; *T. latizona* Serville, 1823; *T. semseyi* Mocsáry, 1883; *T. andrei* Mocsáry, 1883; *Tenthredella maculata atricollaris* Enslin, 1912; *Tenthredo maculata mediobinotata* Pic, 1926; *T. maculata atroapicalis* Pic, 1926; *T. maculata quittardi* Pic, 1926; *T. maculata wagneri* Zirngiebl, 1940; *T. maculata collaris* Zirngiebl, 1940). Host plant: *Brachypodium* spp., *Dactylis* spp. (Poaceae). Russia: **EP** (C, S). – Europe (WE, EE, SE), Armenia, Turkey.

Tenthredo (Maculedo) trabeata Klug, 1817 (*T. palustris* Klug, 1817; *Perineura fulvitarsis* André, 1881; *Tenthredo atra nigrifemur* Zilahi Kiss, 1927; *T. marinovi* Vassilev, 1978). Host plant: Asteraceae, *Impatiens* spp. (Balsaminaceae). Russia: **EP** (N, C). – Europe (WE, EE, NE, SE).

Tenthredo (Maculedo) vestita André, 1881 (*T. caspica* Mocsáry, 1883; *T. laeta* Konow, 1886; *Allantus limbiferus* Mocsáry, 1891; *Tenthredella celsia* Enslin, 1912; *Tenthredo vestita stria* Enslin, 1920; *T. vestita striata* Enslin, 1920; *T. vestita strigata* Enslin, 1920). Russia: **EP** (NC). – Azerbaijan.

Tenthredo (Olivacedo) eduardi (Forsius, 1919) [Tenthredella] (*Tenthredella enslini* Forsius, 1918; *T. viridans* Benson, 1930; *Tenthredo vivida* Malaise, 1931; *T. pappi* Zombori, 1978). Russia: **FE** (AM, PR). – China (Wei et al., 2006), Korean Peninsula, Japan (Hon, Kyu).

Tenthredo (Olivacedo) fuscoterminata Marlatt, 1898. Russia: **FE** (AM, KH, PR). – China (NE, SE), Korean Peninsula, Japan (Hon, Shi, Kyu).

Tenthredo (Olivacedo) nigrolateralis Malaise, 1931. Russia: **FE** (PR).

Tenthredo (Olivacedo) olivacea olivacea Klug, 1817 (*T. dissimilans* Kincaid, 1900; *Tenthredella olivacea nigrovittata* Enslin, 1912; *Rhogogastera reliqua* MacGillivray, 1919; *Rh. respersus* MacGillivray, 1923; *Rhogogaster viridis montana* Betrem, 1933; *Tenthredo olivacea sekeraei* Gregor, 1941; *T. olivacea bohemica* Gregor, 1941). Host plant: *Ranunculus* spp. (Ranunculaceae), *Plantago* spp. (Plantaginaceae), *Rubus* spp. (Rosaceae), and others. Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS, AL), **ES** (IR, BR, YA, ZB), **FE** (KA, MG). – Europe (WE, EE, NE), N Africa, Mongolia, China (NC), Korean Peninsula, N America.

Tenthredo (Olivacedo) olivacea takedae Matsumura, 1912. Host plant: *Ranunculus* spp. (Ranunculaceae), *Plantago* spp. (Plantaginaceae). Russia: **FE** (AM, PR, SA, KU, KA). – Korean Peninsula, Japan (Hok, Hon).

Tenthredo (Olivacedo) sedankiana Malaise, 1931. Russia: **FE** (PR). – China (NE).

Tenthredo (Olivacedo) subolivacea (Takeuchi, 1955) [Tenthredella]. Russia: **FE** (SA, KU). – Japan (Hok, Hon).

Tenthredo (Olivacedo) tamanukii (Takeuchi, 1936) [Tenthredella]. Russia: **FE** (SA, KU). – Japan (Hok, Hon).

Tenthredo (Olivacedo) viridatrix nippon Shinohara, 1994. Russia: **FE** (SA, KU). – Japan (Hok, Hon, Shi).

Tenthredo (Olivacedo) viridatrix viridatrix Malaise, 1931. Russia: **FE** (AM, KH, PR). – Korean Peninsula.

Tenthredo (Paratenthredo) monozonus (Kriechbaumer, 1869) [Allantus] (*Allantus dialeucus* Konow, 1898; *A. jugalis* Konow, 1898; *Tenthredo unicincta* Hellén, 1963). Russia: **EP** (NC, CR). – Europe (EE, SE), Caucasus, SW Asia.

Tenthredo (Paratenthredo) shaposhnikovi (Dovnar-Zapskij, 1930) [Allantus]. Russia: **EP** (NC).

Tenthredo (Paratenthredo) talyshensis Zhelochovtsev, 1988. Russia: **EP** (NC). – Azerbaijan.

Tenthredo (Propodea) fentoni W.F. Kirby, 1882 (*Jermakia spinifera* Mocsáry, 1909; *Tenthredopsis hakiensis* Matsumura, 1912). Host plant: *Euptelea polyandra* (Eupteleaceae). Russia: **FE** (KH, KU). – China (NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

- Tenthredo (Propodea) rufonotalis** Mallach, 1936
(Dipteromorpha ussuriensis Malaise, 1931). Russia: **FE** (PR). – China (NE, CC, SE), Japan (Hon).
- Tenthredo (Temuledo) brachycera** (Mocsáry, 1909)
 [Allantus] (*Allantus brachycerus guttator* Malaise, 1934; *Tenthredo daetekensis* Togashi, 1976). Russia: **FE** (AM, KH, PR). – China (NE, CC, SE), Korean Peninsula, Japan (Hon).
- Tenthredo (Temuledo) finschi finschi** W.F. Kirby, 1882 (*Allantus kohli* Konow, 1895; *Rhogogaster aerescens* Mocsáry, 1909). Imago on Apiaceae, Spiraea spp. (Rosaceae). Russia: **WS** (KM, AL), **ES** (IR, BR, YA), **FE** (AM, KH, PR, KA, MG). – China (NC, SW), Korean Peninsula, India, SE Asia.
- Tenthredo (Temuledo) finschi seguro** Takeuchi, 1956.
 Imago on Apiaceae, Spiraea spp. (Rosaceae). Russia: **FE** (SA, KU). – Japan (Hok, Hon, Shi, Sado).
- Tenthredo (Temuledo) flavipectus** (Matsumura, 1912) [Allantus] (*Allantus nigripectus* Matsumura, 1912; *Tenthredo xanthomelaena* Enslin, 1920). Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu).
- Tenthredo (Temuledo) hokkaidonis** (Malaise, 1931) [Allantus]. Russia: **FE** (KU). – Japan (Hok, Hon, Shi).
- Tenthredo (Temuledo) japonica** (Mocsáry, 1909)
 [Allantus] (*T. carpinata* Enslin, 1912). Russia: **FE** (KU). – China (Wei et al., 2006), Japan (Hon, Shi, Kyu).
- Tenthredo (Temuledo) kongauana** Rohwer, 1925
 (*T. uchidae* Takeuchi, 1927). Russia: **FE** (PR). – China (Wei et al., 2006), Korean Peninsula, Japan (Hon).
- Tenthredo (Temuledo) kudiana** Rohwer, 1925. Russia: **FE** (AM, PR).
- Tenthredo (Temuledo) nigropicta** (F. Smith, 1874) [Macrophyia] (*T. picta* Motschulsky, 1866; *Rhogogaster nipponica* Rohwer, 1910). Host plant: Pleioblastus spp. (Poaceae). Russia: **FE** (KU). – China (CC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).
- Tenthredo (Temuledo) notomelas** Enslin, 1920. Russia: **FE** (SA). – Japan (Hok, Hon).
- Tenthredo (Temuledo) ouralensis** (André, 1881)
 [Allantus] (*Allantus uralensis* Dalla Torre, 1894; *A. glesicornis* Konow, 1899; *Tenthredo soyoensis* Togashi, 1973). Russia: **ES** (IR, BR), **FE** (AM, PR). – Turkey, Korean Peninsula.
- Tenthredo (Temuledo) sapporensis** (Matsumura, 1912) [Allantus] (*Allantus leucosternus* Malaise, 1934). Russia: **FE** (SA, KU). – China (NE, NC), Japan (Hok).

- Tenthredo (Temuledo) scutellata** (Mocsáry, 1909)
 [Allantus] (*Allantus temuloides* Zhelochovtsev, 1935). Russia: **WS** (NS), **FE** (AM, KH, PR).
- Tenthredo (Temuledo) temula** Scopoli, 1763 (*T. bicincta* Linnaeus, 1767; *T. semicincta* Schrank, 1781; *T. amoena* Marquet, 1879; *Allantus irkutensis* Jakovlev, 1888; *Tenthredella temula uberior* Enslin, 1912; *T. temula pauperior* Enslin, 1914; *Tenthredo temula xanthaspis* Enslin, 1920; *T. celtica* Benson, 1953). Host plant: *Origanum* spp. (Lamiaceae), *Ligustrum* spp. (Oleaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (NS, AL), **ES** (IR, BR), **FE** (AM, PR). – Europe (WE, EE, NE, SE), Georgia, Armenia, Kazakhstan.
- Tenthredo (Temuledo) ussuriensis ussuriensis** (Mocsáry, 1909) [Allantus] (*Allantus andis* André, 1881; *Tenthredo abjecta* Enslin, 1912). Host plant: *Abelia* spp. (Caprifoliaceae). Russia: **FE** (AM, KH, PR). – China (NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).
- Tenthredo (Tenthredella) alboannulata** (Takeuchi, 1933) [Tenthredella] (*Tenthredella alboannulata kanoi* Takeuchi, 1936). Russia: **FE** (KU). – Japan (Hon, Shi).
- Tenthredo (Tenthredella) albopicta** Puls, 1870 (*T. nigroclypeata* Mocsáry, 1909). Russia: **EP** (NC). – Georgia, Armenia, SW Asia.
- Tenthredo (Tenthredella) amurica** Dalla Torre, 1894 (*T. amurensis* Konow, 1891; *Tenthredella ussuriensis* Forsius, 1918; *T. fagi nigerrima* Forsius, 1918; *Tenthredo konowi* Enslin, 1920). Host plant: *Petasites japonicus* (Asteraceae). Russia: **EP** (NW), **ES** (BR), **FE** (AM, PR, SA). – Europe (WE, NE).
- Tenthredo (Tenthredella) atra** Linnaeus, 1758 (*T. rufipes* Poda, 1761; *T. fuscipes* Gmelin, 1790; *T. obscura* Gmelin, 1790; *T. plebeja* Klug, 1817; *T. dispar* Klug, 1817; *T. relicta* Lepeletier, 1823; *T. scopolii* Lepeletier, 1823; *T. rejecta* Dalla Torre, 1882; *T. scotica* Cameron, 1882; *Tenthredella atra pseudomandibularis* Enslin, 1918; *T. atra pseudoscotica* Enslin, 1918; *T. atra schirmeri* Enslin, 1918; *T. atra orbitalis* Forsius, 1918; *Tenthredo atra transigens* Enslin, 1920; *T. atra nigrifemur* Endre, 1927; *T. atra vagabundica* Malaise, 1931; *T. atra masculina* Gregor, 1941). Host plant: *Mentha* spp. (Lamiaceae), *Plantago* spp. (Plantaginaceae), *Ranunculus* spp. (Ranunculaceae), etc. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS, AL), **ES** (IR, BR, YA), **FE** (KH, PR, KA, MG). – Europe (WE, EE, NE, SE), Kyrgyzstan, Kazakhstan, Mongolia.
- Tenthredo (Tenthredella) atrofasciata** Zhelochovtsev, 1939. Russia: **FE** (AM).

- Tenthredo (Tenthredella) balteata** Klug, 1817
(T. soror Zetterstedt, 1838; *Tenthredella balteata albimacula* Enslin, 1912; *Allantus surensis* Pic, 1939; *Tenthredo tschinggischanensis* Muche, 1965). Host plant: Hypericaceae, Rosaceae, Salicaceae, ferns and others. Russia: **EP** (N, NC), **UR**, **WS** (AL), **ES** (TU, KR, IR, BR), **FE** (KA, MG). – Europe (WE, EE, NE, SE), N Africa, Georgia, Armenia, SW Asia, Iran, Central Asia, Kazakhstan, Mongolia.
- Tenthredo (Tenthredella) basizonata** Malaise, 1938.
 Russia: **FE** (KU). – Japan (Hon, Shi, Kyu).
- Tenthredo (Tenthredella) bipunctula bipunctula** Klug, 1817. Host plant: *Senecio* spp. (Asteraceae). Russia: **EP** (NW), **WS** (NS). – Europe (WE, EE, NE, SE).
- Tenthredo (Tenthredella) bipunctula malaisei** (Takeuchi, 1933) [Tenthredella]. Host plant: *Senecio* spp. (Asteraceae). Russia: **FE** (SA, KU). – Japan (Hon).
- Tenthredo (Tenthredella) borea** Enslin, 1919 (*T. borea* Enslin, 1920; *T. stubbei* Koch, 1984). Russia: **EP** (N), **WS** (TM). – Mongolia.
- Tenthredo (Tenthredella) camtschatalis** (Enslin, 1927) [Tenthredella]. Russia: **FE** (KA).
- Tenthredo (Tenthredella) cockerelli** (Rohwer, 1925) [Tenthredella] (*Tenthredella bituberculata* Takeuchi, 1940). Russia: **FE** (AM, PR). – China (NE, NC, CC), Korean Peninsula.
- Tenthredo (Tenthredella) colon** Klug, 1817 (*Allantus obscurus* Panzer, 1803; *Tenthredo rudowi* André, 1881; *T. nigricollis* W.F. Kirby, 1882; *T. punctulata* Konow, 1887; *T. semicornis* Harrington, 1889; *T. unifasciata* Mocsáry, 1909; *T. colon nigriventris* Enslin, 1912; *Tenthredella cucullata* Enslin, 1912). Host plant: Dennstaedtiaceae, Ranunculaceae, Geraniaceae, Onagraceae, Salicaceae, etc. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (KM, AL), **ES** (IR, BR, YA), **FE** (AM, KH, PR, SA, KU, KA, MG). – Europe (WE, EE, NE, SE), Caucasus, SW Asia, Kyrgyzstan, Kazakhstan, Mongolia, Korean Peninsula, Japan (Hok, Hon, Sado), N America.
- Tenthredo (Tenthredella) contusa** (Enslin, 1912) [Tenthredella] (*T. lateralis* Mocsáry, 1909; *T. trialbata* Malaise, 1931). Russia: **FE** (AM, KH, PR). – Japan (Hon, Shi), SE Asia.
- Tenthredo (Tenthredella) crenata** (Enslin, 1912) [Tenthredella] (*T. fulvicornis* Mocsáry, 1909; *T. fulviventralis* Mocsáry, 1909). Russia: **ES** (BR), **FE** (AM, KH, SA). – Mongolia.
- Tenthredo (Tenthredella) cunyi** Konow, 1886 (*T. chyzeri* Mocsáry, 1891; *Tenthredella cunyi pleuritica*

- Enslin, 1912; *T. cunyi alboplagiata* Enslin, 1912). Russia: **ES** (IR, BR). – Europe (WE, EE).
- Tenthredo (Tenthredella) decens** Zhelochovtsev, 1939. Russia: **EP** (NW), **ES** (IR, BR, ZB), **FE** (KA).
- Tenthredo (Tenthredella) duplicata** Enslin, 1920 (*T. bimaculata* Konow, 1886). Russia: **EP** (NC). – Georgia, Armenia.
- Tenthredo (Tenthredella) eburata** Konow, 1900 (*Tenthredella rubrocaudata* Takeuchi, 1936). Russia: **EP** (NW, C, E), **UR**, **WS** (NS), **ES** (IR, BR), **FE** (PR). – Europe (NE), China (NE, CC), Korean Peninsula.
- Tenthredo (Tenthredella) eburneifrons** W.F. Kirby, 1882 (*T. lichtwardti* Konow, 1899). Russia: **WS** (AL), **ES** (BR, ZB), **FE** (AM, PR). – Europe (WE, NE), Kazakhstan, Korean Peninsula.
- Tenthredo (Tenthredella) erudita** (Kuznetsov-Ugamskij, 1927) [Tenthredella]. Russia: **FE** (PR).
- Tenthredo (Tenthredella) fagi** Panzer, 1798 (*T. pellicula* Klug, 1817; *T. facigera* Konow, 1899; *Tenthredella fagi melanaspis* Enslin, 1912). Host plant: *Pteridium aquilinum* (Dennstaedtiaceae), *Corylus* spp. (Betulaceae), *Sorbus* spp. (Rosaceae), *Angelica* spp. (Asteraceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS, AL), **ES** (IR, BR, YA), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE), Armenia, China (Wei et al., 2006), Korean Peninsula, Japan (Hok, Hon).
- Tenthredo (Tenthredella) ferruginea** Schrank, 1776 (*T. ferruginea* O.F. Müller, 1776; *T. rufipennis* Fabricius, 1793; *T. rufiventris* Panzer, 1799; *T. conspicua* Klug, 1817; *T. schrankii* Lepeletier, 1823; *Allantus laticinctus* Stephens, 1835; *Tenthredo rubecula* Eversmann, 1847; *T. prospera* Erichson, 1851; *T. gymandromorpha* Rudow, 1871; *T. leucocera* Mocsáry, 1909; *T. minuta* Mocsáry, 1909; *Tenthredella dentina* Enslin, 1912; *T. ferruginea leucaspis* Enslin, 1912; *Tenthredo ferruginea rufisternis* Enslin, 1920; *Tenthredella ferruginea frontalis* Pic, 1940; *Perineura sawai* Togashi, 2007). Host plant: Salicaceae, Betulaceae, Rosaceae, ferns, etc. Russia: **EP** (NW, C, E, NC), **UR**, **WS** (AL), **ES** (BR, YA), **FE** (AM, KH, PR, SA, KU, KA, MG). – Europe (WE, EE, NE), Armenia, Turkey, China (NE, CC, SE), Korean Peninsula, Japan (Hok, Hon, Sado), SE Asia.
- Tenthredo (Tenthredella) gifui** Marlatt, 1898 (*T. gifuensis* Konow, 1905; *T. filamentosa* Enslin, 1920). Host plant: *Stellaria* spp. (Caryophyllaceae). Russia: **FE** (SA). – Japan (Hok, Hon, Shi, Kyu).
- Tenthredo (Tenthredella) kurilensis** (Takeuchi, 1931) [Tenthredella]. Russia: **WS** (AL), **FE** (KU). – Japan (Hok, Hon).

- Tenthredo (Tenthredella) leleji** Taeger, Wei et Shino-hara, 2016. Russia: FE (SA). – Japan (Hok, Hon).
- Tenthredo (Tenthredella) livida** Linnaeus, 1758 (*T. dubia* Strøm, 1768; *T. lurida* Ph.L. Müller, 1775; *T. pellucida* O.F. Müller, 1776; *T. bipunctata* O.F. Müller, 1776; *T. annularis* Schrank, 1776; *T. albicornis* Geoffroy, 1785; *T. maura* Fabricius, 1793; *T. carpini* Panzer, 1799; *Allantus aterrimus* Stephens, 1835; *Tenthredella livida clara* Enslin, 1912; *T. livida rubripes* Forsius, 1918; *T. livida rubeola* Forsius, 1918). Host plant: Oleaceae, Lamioceae, Salicaceae, Caprifoliaceae, Onagraceae, Rosaceae, Betulaceae, Plantaginaceae, etc. Russia: EP (NW, C, E, S, NC), UR, WS (Zhelochovtsev, 1988), ES (KR), FE (AM, KA). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey.
- Tenthredo (Tenthredella) luteipennis** Eversmann, 1847 (*T. fallax* Mocsáry, 1880; *T. mocsaryi* André, 1882; *T. menetriesii* W.F. Kirby, 1882; *Tenthredella luteipennis obscuraria* Enslin, 1913). Russia: EP (S, NC). – Georgia, Armenia, SW Asia, Tadzhikistan.
- Tenthredo (Tenthredella) mandibularis** Fabricius, 1804 (*T. rufipes* Gmelin, 1790). Host plant: *Tus-silago farfara*, *Petasites* spp. (Asteraceae). Russia: EP (C, S), WS (NS). – Europe (WE, EE, NE, SE), Caucasus.
- Tenthredo (Tenthredella) moniliata** Klug, 1817 (*T. fuscicornis* Eschscholtz, 1822; *Allantus bimaculatus* Gimmerthal, 1836; *Tenthredo poecila* Eversmann, 1847; *T. flavidabris* Gimmerthal, 1847; *T. scita* Erichson, 1851; *T. lachlaniana* Cameron, 1878; *T. poecilopus* Mocsáry, 1880; *T. lachlaniana rubripes* Jakovlev, 1888; *T. lachlaniana immaculata* Jakovlev, 1888; *T. ruthena* Jakovlev, 1891; *T. forsi* Konow, 1908; *T. ruficornis* Mocsáry, 1909; *Tenthredella fuscicornis norvegica* Forsius, 1918; *T. moniliata flavoscutellata* Forsius, 1918; *Tenthredo moniliata immaculosa* Enslin, 1920; *T. moniliata paria* Enslin, 1920; *T. moniliata menyanthidis* Torka, 1929). Host plant: Menyanthaceae, Ranunculaceae, Asteraceae, Rosaceae, Betulaceae, etc. Russia: EP (NW, C, E), UR, WS (AL), ES (IR, BR, YA, ZB), FE (AM, KH, PR, SA, KU, KA, MG). – Europe (WE, EE, NE), Armenia, Mongolia, China (NE, NC, NE, SE), Korean Peninsula.
- Tenthredo (Tenthredella) oryssoides** Jakovlev, 1888 (*T. discophora* Konow, 1896; *T. discophora pullata* Konow, 1898; *T. bigemmis* Konow, 1903; *T. discophora rosea* Enslin, 1913). Russia: EP (NC). – Georgia, Armenia, Turkey.
- Tenthredo (Tenthredella) peninsularis** Malaise, 1931. Russia: ES (YA), FE (AM, KA).
- Tenthredo (Tenthredella) procera** Klug, 1817 (*T. gri-bodoi* Costa, 1894). Host plant: *Symphytum* spp. (Boraginaceae), *Petasites* spp. (Asteraceae). Russia: EP (C). – Europe (WE, EE).
- Tenthredo (Tenthredella) purpurea** Puls, 1870 (*T. koenigi* Konow, 1896). Russia: EP (NC). – Georgia, Armenia, SW Asia.
- Tenthredo (Tenthredella) rubricoxis** (Enslin, 1912) [*Tenthredella*] (*T. rufipes* Klug, 1817). Host plant: *Senecio* spp. (Asteraceae). Russia: EP (N), WS (TM, NS, KM), FE (PR, MG). – Europe (WE, EE).
- Tenthredo (Tenthredella) serradifera** Conde, 1935. Russia: FE (SA).
- Tenthredo (Tenthredella) silensis** Costa, 1859 (*T. lim-bata* Klug, 1817; *T. quadridens* Strobl, 1896; *T. lim-bata nigrifemur* Conde, 1934; *T. oraria* Zombori, 1973). Host plant: Lamiaceae, Ranunculaceae, Rosaceae, Liliaceae, etc. Russia: EP (NW, C, E), UR, WS (AL), ES (TU, IR, BR, YA), FE (KH, AM, SA, KU, KA, MG). – Europe (WE, EE, NE), Mongolia, Korean Peninsula, Japan (Hok, Hon, Sado).
- Tenthredo (Tenthredella) sobrina** Eversmann, 1847 (*Allantus semenowi* Jakovlev, 1891; *Tenthredo semenovi pleuronotata* Forsius, 1934). Russia: EP (C, E, S, NC), UR. – Europe (EE), Kazakhstan.
- Tenthredo (Tenthredella) solitaria solitaria** Scopoli, 1763 (*T. coryli* Panzer, 1799; *T. intermedia* Klug, 1817; *T. coryli albicolon* Klug, 1817; *T. icterica* Costa, 1894; *T. solitaria seeboldi* Konow, 1897; *Tenthredella solitaria rufoterminalata* Enslin, 1912; *T. solitaria rhe-nensis* Koornneef, 1935; *Tenthredo saxonica* Muche, 1968; *T. solitaria vitoshensis* Vassilev, 1973). Host plant: *Euphorbia* spp. (Euphorbiaceae). Russia: EP (NC, C). – Europe (WE, EE, SE), Armenia.
- Tenthredo (Tenthredella) solitaria xylota** (Jakovlev, 1891) [*Allantus*]. Host plant: *Euphorbia* spp. (Euphorbiaceae). Russia: WS (Zhelochovtsev, Zinovjev, 1996), ES (IR, YA), FE (PR). – Kyrgyzstan.
- Tenthredo (Tenthredella) stigma** (Forsius, 1918) [*Tenthredella*] (*T. amplicapitata* Zombori, 1974). Russia: FE (AM, SA). – Korean Peninsula.
- Tenthredo (Tenthredella) velox nigrofemorata** (Takeuchi, 1955) [*Tenthredella*]. Host plant: *Geranium* spp. (Geraniaceae). Russia: FE (SA, KU). – Korean Peninsula, Japan (Hok, Hon).
- Tenthredo (Tenthredella) velox velox** Fabricius, 1798 (*T. biguttata* Hartig, 1837; *T. leucostoma* Rudow, 1871; *T. gracilenta* Mocsáry, 1879; *T. sylvia*

- W.F. Kirby, 1882; *T. velox sibirica* Konow, 1903; *T. velox bisignata* Konow, 1908; *Tenthredella velox colonoides* Forsius, 1918; *Tenthredo velox alpina* Zirngiebl, 1937; *T. velox nigripleuris* Zirngiebl, 1937). Host plant: Polygonum spp. (Polygonaceae), Alnus spp. (Betulaceae), Salix spp. (Salicaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (NS, KM, AL), **ES** (IR, BR, YA), **FE** (AM, KH, PR, MG). – Europe (WE, EE, NE, SE), Mongolia.
- Tenthredo (Tenthredella) versuta** Mocsáry, 1909 [*Tenthredella hakonensis* Rohwer, 1910]. Russia: **FE** (SA). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu, Tsushima).
- Tenthredo (Tenthredina) cylindrica** (Rohwer, 1911) [*Tenthredina*] (*Conospidia umbrosa* Matsumura, 1912). Russia: **FE** (PR). – China (SE), Japan (Hok, Hon, Shi, Kyu).
- Tenthredo (Tenthredo) alaskana** (Enslin, 1910) [Allantus] (*Allantus heraclei* Kincaid, 1900). Russia: **ES** (YA). – N America.
- Tenthredo (Tenthredo) albiventris albiventris** (Mocsáry, 1880) [Allantus] (*Allantus trivittatus* André, 1881; *A. kussariensis* Konow, 1888; *A. lederi* Konow, 1890; *Tenthredo albiventris hostia* Enslin, 1912; *T. pallidula* Benson, 1930; *T. kerkesta* Dovnar-Zapolskij, 1930). Imago on Conium spp. (Asteraceae). Russia: **EP** (NC). – Europe (WE, SE), Georgia, Armenia, Turkey.
- Tenthredo (Tenthredo) arctica** (Thomson, 1870) [Enisia] (*Ischyroceraea hyperborea* Kiær, 1898). Host plant: Trifolium repens (Fabaceae); imago on Apiaceae and others. Russia: **EP** (N), **WS** (TM), **ES** (KR, BR, YA), **FE** (CH). – Europe (NE), N America.
- Tenthredo (Tenthredo) arcuata** Förster, 1771 (*Allantus arcuatus alpigena* Heller et Dalla Torre, 1883; *A. clypealis* Konow, 1888). Host plant: Trifolium spp. (Fabaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (TK, NS), **ES** (KR, YA, ZB). – Europe (WE, EE, NE, SE), Armenia, Turkey, Iran, Mongolia, China (Wei et al., 2006).
- Tenthredo (Tenthredo) arcuatoides** Muche, 1965. Russia: **ES** (IR, BR, YA, ZB), **FE** (AM, KH, PR).
- Tenthredo (Tenthredo) brevicornis** (Konow, 1886) [Allantus] (*T. cingulata* Fabricius, 1793; *Allantus arcuatus nitidior* Konow, 1888; *Tenthredo aegra* Enslin, 1912; *Allantus arcuatus vitoensis* Gregor, 1932; *Tenthredo acerrima* Benson, 1952). Host plant: Lotus corniculatus (Fabaceae). Russia: **EP** (C, NC), **ES** (IR, BR), **FE** (PR, KA). – Europe (WE, EE, SE), Georgia, Armenia, Turkey, Mongolia, China (NC).
- Tenthredo (Tenthredo) calvaria** Enslin, 1912 (*Allantus lateralis* Mocsáry, 1909). Russia: **WS** (NS), **ES** (BR, ZB), **FE** (AM, KH, PR). – Mongolia.
- Tenthredo (Tenthredo) devia** (Konow, 1900) [Allantus]. Host plant: polyphage. Russia: **EP** (N), **WS** (TM, AL), **ES** (TU, KR, BR, YA, ZB), **FE** (KU, KA, MG). – Europe (NE), Mongolia, Korean Peninsula, Japan (Hok, Hon), N America.
- Tenthredo (Tenthredo) erasina** Malaise, 1945 (*T. flavipleuris* Muche, 1986). Russia: **ES** (ZB), **FE** (AM, PR). – Mongolia, China (NE).
- Tenthredo (Tenthredo) fuscocostalis** Rohwer, 1925. Russia: **FE** (AM, KH, PR, SA). – Korean Peninsula.
- Tenthredo (Tenthredo) jacutensis** (Konow, 1897) [Allantus]. Imago on various flowers. Russia: **EP** (N), **WS** (TM), **ES** (KR, BR, YA, ZB), **FE** (AM, KH, PR, SA, MG). – Mongolia, Japan (Hok).
- Tenthredo (Tenthredo) korabica** Taeger, 1985. Host plant: polyphage. Russia: **EP** (NC), “Siberia” (Lacourt, 1999). – Europe (WE, EE), Turkey, Mongolia.
- Tenthredo (Tenthredo) liturata** (Mocsáry, 1886) [Allantus] (*Allantus reitteri* Konow, 1886; *Tenthredo reitteri egregia* Enslin, 1914). Russia: **EP** (NC). – Georgia, Armenia, Turkey.
- Tenthredo (Tenthredo) luteocincta** Eversmann, 1847 (*T. luteocincta virago* Enslin, 1913). Russia: **EP** (S). – Georgia, Armenia, Turkey.
- Tenthredo (Tenthredo) marginella fuscipennis** (Konow, 1886) [Allantus] (*T. marginella nigrior* Enslin, 1912). Russia: **EP** (NC). – Armenia.
- Tenthredo (Tenthredo) marginella marginella** Fabricius, 1793 (*T. sigma* Schrank, 1802; *T. succincta* Lepeletier, 1823; *T. succincta* Serville, 1823; *Allantus decipiens* Förster, 1844; *A. heraclei* Rudow, 1872; *A. omissoides* Jakovlev, 1891; *A. amaeus sabandus* Pic, 1925; *A. marginellus nigroscutellatus* Zirngiebl, 1942; *A. marginellus melanomerus* Zirngiebl, 1942). Host plant: Mentha spp. (Lamiaceae), Plantago spp. (Plantaginaceae), etc. Russia: **EP** (C, E), **UR**, **WS** (TK, NS), **ES** (KR). – Europe (WE, EE, NE, SE), Kyrgyzstan, Kazakhstan.
- Tenthredo (Tenthredo) mongolica** (Jakovlev, 1891) [Allantus] (*T. coreana* Takeuchi, 1927; *T. coreana nigripes* Takeuchi, 1927; *T. erasa* Malaise, 1945). Russia: **WS** (AL), **ES** (TU, BR, ZB), **FE** (AM, KH, PR). – Mongolia, China (NE, NC, CC), Korean Peninsula.

- Tenthredo emphytiformis** Malaise, 1931. Russia: FE (KH, PR, KU, KA). – China (Wei et al., 2006), Japan (Hok, Hon, Shi), SE Asia.
- Tenthredo erebia** (Kuznetsov-Ugamskij, 1927) [Tenthredella]. Russia: FE (PR).

- Tenthredo flavomandibulata** (Matsumura, 1912) [Tenthredopsis]. Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon).
- Tenthredo gracilis** (Forsius, 1918) [Tenthredella]. Russia: **FE** (PR).
- Tenthredo intercincta** (Malaise, 1934) [Allantus]. Russia: **FE** (PR). – China (NC).
- Tenthredo kotenkoi** Ermolenko, 1992. Russia: **ES** (ZB).
- Tenthredo longipennis** (Matsumura, 1912) [Allantus] (*T. grandiceps* Malaise, 1938). Russia: **FE** (SA, KU). – Japan (Hok, Hon, Shi).
- Tenthredo mitsuhashii** (Matsumura, 1912) [Macrophyia]. Russia: **FE** (SA, KU). – Japan (Hok, Hon).
- Tenthredo omega** (Takeuchi, 1936) [Tenthredella]. Russia: **FE** (SA, KU). – Japan (Hok, Hon, Shi).
- Tenthredo provida** (F. Smith, 1878) [Allantus] (*T. providus concolor* Malaise, 1945; *T. providus fletcheri* Malaise, 1945; *T. providus altaica* Stroganova, 1980). Russia: **WS** (AL). – China (NW), India (NW).
- Tenthredo providens** F. Smith, 1874 (*T. providentia* Enslin, 1920). Host plant: Oenanthe spp., Cryptotaenia spp., Peucedanum spp., Angelica spp. (Apiaceae). Russia: **FE** (KU). – Japan (Hok, Hon, Shi, Kyu, Sado, Awashima).
- Tenthredo pseudolivacea** Malaise, 1931. Russia: **FE** (PR).
- Tenthredo sibirica** (Kriechbaumer, 1869) [Allantus] (*T. spectabilis* Mocsáry, 1878; *Allantus cephalotes* Jakovlev, 1888; *Jermakia japonica* Rohwer, 1910; *Allantus bicinctus* Matsumura, 1912; *A. bistrigatus* Mallach, 1936). Host plant: Dasiphora spp. (Rosaceae), Ranunculus spp. (Ranunculaceae). Russia: **WS** (AL), **ES** (IR, ZB), **FE** (AM, PR, SA, KU). – Mongolia, China (NC, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu), SE Asia.
- Tenthredo tenuipennis** Malaise, 1931. Russia: **FE** (KH, PR). – China (NE, CC), Korean Peninsula.
- Tenthredo tumida tumida** (Mocsáry, 1909) [Allantus] (*Tenthredella excellens* Kuznetsov-Ugamskij, 1927). Russia: **FE** (AM, KH, PR). – China (NE, SE), Korean Peninsula.
- Tenthredo variicolor** Malaise, 1945. Russia: **FE** (PR). – China (SW), India
- Tenthredo xanthotarsus** Cameron, 1876. Russia: **WS** (AL), **FE** (AM, SA, KU). – Japan (Hok, Hon, Shi).
- Tenthredo yezoensis** Kumamoto, 1987. Russia: **FE** (SA). – Japan (Hok).

TENTHREDOPSIS Costa, 1859 (*Ebolia* Costa, 1859; *Thomsonia* Konow, 1884; *Eutenthredopsis* Enslin,

1913). Type species *Tenthredo tessellata* Klug, 1817. The larvae on Poaceae, less often on Cyperaceae, Juncaceae, Acoraceae. The genus is distributed in Palaearctic, mainly in west part; two species in Oriental region. Number of species: World and Palaearctic – about 60; Russia – 30 (+ 1 ssp.).

Tenthredopsis annuligera (Eversmann, 1847) [Tenthredo] (*Tenthredo albopunctata* Tischbein, 1852; *T. picticornis* Mocsáry, 1880; *T. basimacula* Mocsáry, 1880; *Tenthredopsis casia* Konow, 1898; *T. triforis* Konow, 1898; *T. quadrannulata* Konow, 1898). Host plant: Poaceae. Russia: **EP** (S, CR). – Europe (EE, SE).

Tenthredopsis auriculata (Thomson, 1870) [Perineura] (*Tenthredo sachalinensis* Matsumura, 1911; *Tenthredopsis camtschaticalis* Enslin, 1927; *T. camtschaticalis lucens* Enslin, 1927; *T. auriculata camtschatica* Forsius, 1928; *T. sachalinensis nigroluteatus* Takeuchi, 1936). Host plant: Calamagrostis spp. (Poaceae). Russia: **EP** (N, NW, E), **UR**, **WS** (TM), **ES** (IR, BR), **FE** (AM, KH, PR, SA, KA). – Europe (NE).

Tenthredopsis carinata carinata Malaise, 1931. Host plant: Poaceae. Russia: **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (TU, IR), **FE** (KA). – Europe (NE).

Tenthredopsis carinata japonica Takeuchi, 1956. Host plant: Poaceae. Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Tenthredopsis coquebertii (Klug, 1817) [Tenthredo] (*Tenthredo labiata* Serville, 1823; *T. labiata* Lepeletier, 1823; *T. rufimana* Spinola, 1843; *Perineura lusitanica* André, 1881; *Tenthredopsis nigricollis* Cameron, 1881; *T. conjungens* Kriechbaumer, 1884; *T. limbilabris* Kriechbaumer, 1884; *Thomsonia braunsii* Konow, 1884; *Tenthredopsis opulenta* Konow, 1887; *T. coqueberti brunneascens* Enslin, 1918; *T. coqueberti nigrata* Gregor, 1941). Host plant: Poaceae. Russia: **ES** (BR). – Europe (WE, EE, SE), China (Wei et al., 2006).

Tenthredopsis discrepans Konow, 1890. Russia: **EP** (NC). – Georgia, Armenia.

Tenthredopsis festiva Konow, 1890. Russia: **EP** (NC). – Armenia, Azerbaijan, Turkey.

Tenthredopsis friesei (Konow, 1884) [Thomsonia] (*Thomsonia laticeps* Konow, 1884; *Tenthredopsis korlevici* Konow, 1887; *T. arrogans* Konow, 1890; *T. nigroscutellata* Konow, 1904; *T. arrogans erythrocoele* Enslin, 1913). Host plant: Calamagrostis spp., Holcus spp. (Poaceae), Juncus spp. (Juncaceae).

Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (TM, KM), **ES** (IR). – Europe (WE, EE, NE, SE), Kazakhstan.

Tenthredopsis gracilis Jakovlev, 1891. Russia: **ES** (KR). **Tenthredopsis hungarica** (Klug, 1817) [Tenthredo]

(*T. sareptana* Konow, 1894; *T. hungarica atratilobis* Enslin, 1913). Host plant: Poaceae. Russia: **EP** (C, E, S, NC), **UR**, **WS** (KM). – Europe (EE), Kazakhstan, Mongolia.

Tenthredopsis jakowleffi Konow, 1896. Russia: **ES** (IR, BR).

Tenthredopsis kokuewi Jakovlev, 1891. Russia: **EP** (C).

Tenthredopsis lactiflua (Klug, 1817) [Tenthredo] (*T. lactiflua plaga* Enslin, 1913; *T. lactiflua liturata* Enslin, 1913). Host plant: Poaceae. Russia: **EP** (S), **WS** (Zhelochovtsev, Zinovjev, 1996), **ES** (TU, IR). – Europe (WE, EE), Georgia, Kazakhstan.

Tenthredopsis languida (Erichson, 1851) [Tenthredo]. Russia: **ES** (IR), **FE** (KH).

Tenthredopsis ligata Konow, 1903. Russia: **EP** (NC, CR). – Europe (EE).

Tenthredopsis litterata (Geoffroy, 1785) [Tenthredo] (*Tenthredo carbonaria* Linnaeus, 1767; *T. cordata* Geoffroy, 1785; *T. thoracica* Geoffroy, 1785; *T. varia* Gmelin, 1790; *T. flavipes* Christ, 1791; *T. cruciata* Christ, 1791; *T. dimidiata* Fabricius, 1804; *T. rubiginosa* Drapiez, 1819; *T. microcephala* Lepeletier, 1823; *T. microcephala* Serville, 1823; *T. caliginosa* Stephens, 1835; *T. femoralis* Stephens, 1835; *T. analis* Stephens, 1835; *T. orbitalis* Dietrich, 1868; *Tenthredopsis nigriceps* Cameron, 1881; *T. nigronotatus* Cameron, 1881; *Thomsonia thomsoni* Konow, 1884; *Tenthredopsis thomsoni concolor* Konow, 1887; *T. thomsoni nigripes* Konow, 1890; *T. pallida* Konow, 1896; *T. litterata bicolor* Enslin, 1913; *T. litterata melaena* Enslin, 1918; *T. litterata variana* Enslin, 1918; *T. litterata subcarpathica* Gregor, 1927; *T. carbonaria medionotata* Pic, 1948). Host plant: Dactylis spp., Agrostis spp., Calamagrostis spp. (Poaceae). Russia: **EP** (NW, C, E, S, NC), **UR**, **WS** (OM). – Europe (WE, EE, NE, SE), N Africa, Georgia, Turkey.

Tenthredopsis moscovita (André, 1881) [Perineura]. Russia: **EP** (C).

Tenthredopsis nassata (Linnaeus, 1767) [Tenthredo] (*Tenthredo alneti* Schrank, 1781; *T. perlata* Geoffroy, 1785; *T. apicalis* Geoffroy, 1785; *T. subulata* Gmelin, 1790; *T. melonorhoea* Gmelin, 1790; *T. napata* Turton, 1802; *Allantus tiliae* Panzer, 1803; *Tenthredo ambigua* Klug, 1817; *T. instabilis* Klug, 1817; *T. fulviceps* Stephens, 1835; *T. tristis* Stephens, 1835;

Perineura brevispina Thomson, 1870; *Tenthredopsis lividiventris* Cameron, 1881; *T. saundersi* Cameron, 1881; *T. inornatus* Cameron, 1881; *T. albomaculatus* Cameron, 1881; *T. dorsivittatus* Cameron, 1881; *Perineura scutellaris flavoguttata* Magretti, 1882; *Thomsonia josephi* Konow, 1884; *Th. obscura* Konow, 1884; *Th. raddatzi* Konow, 1884; *Th. elegans* Konow, 1884; *Tenthredopsis gibberosa* Konow, 1887; *T. fenestrata* Konow, 1890; *T. dorsalis biguttata* Konow, 1890; *T. dorsalis diluta* Konow, 1890; *T. raddatzi indocilis* Konow, 1890; *T. raddatzi dorsata* Konow, 1890; *T. raddatzi vittata* Konow, 1890; *T. raddatzi maura* Konow, 1890; *T. raddatzi inornata* Konow, 1890; *T. raddatzi sagmaria* Konow, 1890; *T. nassata rufata* Konow, 1890; *T. austriaca obscurata* Konow, 1890; *T. elegans nigronotata* Konow, 1890; *T. dorsalis tirolensis* Konow, 1892; *T. konowi* Strobl, 1896; *T. nassata pleurosternalis* Enslin, 1913; *T. parvula atripleuris* Enslin, 1913; *T. parvula atrilobis* Enslin, 1913; *T. parvula atrifemoribus* Enslin, 1913; *T. parvula rubriventris* Enslin, 1913; *T. parvula atramentaria* Enslin, 1913; *T. austriaca rufofemorata* Enslin, 1913; *T. austriaca albata* Enslin, 1913; *T. austriaca candida* Enslin, 1913; *T. nassata metapleuris* Enslin, 1913; *T. nassata trichroma* Enslin, 1913; *T. tristior* Morice, 1914; *T. inornata melanaspis* Enslin, 1918; *T. nassata nigerrima* Endre, 1927; *T. parvula nigribasis* Zirngiebl, 1937; *T. fenestrata quadripunctata* Gregor, 1941; *T. dubia scutellaris* Gregor, 1941; *T. nassata martialis* Pic, 1948; *T. nassata buyssonii* Pic, 1948; *T. virgineus* Muche, 1965; *T. coqueberti ulanbatorensis* Muche, 1965). Host plant: Poaceae, Cyperaceae. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS), **ES** (BR, ZB), **FE** (AM, PR, SA, KU, MG). – Europe (WE, EE, NE, SE), Georgia, Armenia, Turkey, Central Asia, Mongolia, China (CC), Japan.

Tenthredopsis nigella Konow, 1891. Russia: **EP** (NC). – Europe (SE), Caucasus, Turkey.

Tenthredopsis nigrescens Konow, 1897. Russia: **EP** (Lacourt, 1999). – Armenia.

Tenthredopsis ornata (Serville, 1823) [Tenthredo] (*Tenthredo neglecta* Serville, 1823; *T. ornata* Lepeletier, 1823; *T. neglecta* Lepeletier, 1823; *Perineura excisa* Thomson, 1870; *Thomsonia excisa binotata* Konow, 1884; *Tenthredopsis excisa atriscutis* Enslin, 1918). Host plant: Poaceae. Russia: **EP** (N, NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE, SE), Armenia.

Tenthredopsis ornatrix Konow, 1890. Russia: **EP** (NC). – Europe (EE), Armenia.

Tenthredopsis rufa Konow, 1890. Russia: **EP** (NC). – Georgia, Azerbaijan.

Tenthredopsis scutellaris (Fabricius, 1804) [Tenthredo] (*Tenthredo spreta* Serville, 1823; *T. dorsalis* Serville, 1823; *T. spreta* Lepeletier, 1823; *T. dorsalis* Lepeletier, 1823; *Tenthredopsis flavomaculatus* Cameron, 1881; *T. picticeps* Cameron, 1881; *Perineura scutellaris baldensis* Heller et Dalla Torre, 1883; *Tenthredopsis albipleuris* Konow, 1886; *T. puncticollis* Konow, 1890; *T. austriaca* Konow, 1890; *T. dubia* Konow, 1890; *T. parvula* Konow, 1890; *T. franki* Konow, 1890; *T. thornleyi* Konow, 1899; *T. puncticollis mediatra* Enslin, 1913; *T. flavomaculata centronigra* Enslin, 1913; *T. nassata intermedia* Hellén, 1943). Host plant: Poaceae. Russia: **EP** (NC). – Europe (WE, EE, NE, SE).

Tenthredopsis sordida (Klug, 1817) [Tenthredo] (*T. sordida atriventris* Enslin, 1913; *T. sordida pleuritica* Enslin, 1913). Host plant: Arrhenatherum spp., Lolium spp., Calamagrostis spp., Dactylis spp. (Poaceae), Carex spp. (Cyperaceae). Russia: **EP** (S). – Europe (WE, EE, NE, SE), Turkey.

Tenthredopsis sororia Konow, 1898. Russia: **EP** (NC). – Armenia, Azerbaijan.

Tenthredopsis stigma (Fabricius, 1798) [Tenthredo] (*Tenthredo dorsalis* Spinola, 1808; *T. histrio* Klug, 1817; *Tenthredopsis stigma genualis* Konow, 1890; *T. churchevillei* Konow, 1897; *T. stigma albonotata* Pigeot, 1917). Host plant: Elymus hispidus (Poaceae). Russia: **EP** (NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE, SE).

Tenthredopsis tarsata (Fabricius, 1804) [Tenthredo] (*T. opacipleuris* Stein, 1884; *Thomsonia hilleckeii* Konow, 1884; *Tenthredopsis wuestneii* Stein, 1884). Host plant: Brachypodium sylvaticum (Poaceae). Russia: **EP** (C, S). – Europe (WE, EE, NE, SE).

Tenthredopsis tessellata (Klug, 1817) [Tenthredo] (*Tenthredo ischiadica* Eversmann, 1847;

T. ischiadica Eversmann, 1864; *Perineura cylindrica* Rudow, 1871; *Tenthredopsis tessellata alboplagiata* Konow, 1890; *T. albata* Konow, 1904; *T. tessellata nigratipleuris* Enslin, 1913; *T. tessellata nigratilobis* Enslin, 1913; *T. tessellata nigratiscutis* Enslin, 1913). Host plant: Deschampsia spp., Dactylis spp., Lolium spp. (Poaceae), Aira spp. (Acoraceae). Russia: **EP** (C, E, S), **UR**, **WS** (TK, NS). – Europe (WE, EE, SE), Armenia, Turkey, Iran, Kazakhstan, Mongolia.

Tenthredopsis tischbeinii (Frivaldszky, 1877) [Tenthredo] (*Tenthredo hungarica* Tischbein, 1852; *Perineura konowi* Lethierry, 1887; *Tenthredopsis fischbeini exannulata* Strobl, 1901; *T. pisinna* Konow, 1903; *T. andrei atronotata* Pic, 1948). Host plant: Poaceae. Russia: **EP** (C, S), **WS** (AL), **ES** (TU, IR, BR), **FE** (AM, MG). – Europe (WE, EE, SE), Kazakhstan, Mongolia.

Tenthredopsis viridis Zhelochovtsev, 1941. Russia: **EP** (NC). – Armenia.

TIANMUTHREDO Wei, 1997. Type species *Tianmuthredo nigrodorsata* Wei, 1997. The genus is distributed in Oriental and Palaearctic regions. Number of species: World – 2; Palaearctic and Russia – 1.

Tianmuthredo davei Taeger et Kramp, 2017. Russia: **FE** (PR).

USSURINUS Malaise, 1931. Type species *Ussurinus insignicornis* Malaise, 1931. The genus is distributed in Palaearctic. Only two species.

Ussurinus insignicornis Malaise, 1931. Russia: **FE** (PR).

Ussurinus nobilis Saarinen, 1945. Russia: **EP** (N). – Europe (NE).

INFRAORDER SIRICOMORPHA
SUPERFAMILY PAMPHILIOIDEA

Head closed ventrally, the clypeus being folded back underneath and joined by its lateral arms to the post-genae behind; the result of this is a capsule with 4 holes in it. Mesosternum triangular in shape, clearly defined by sutures and with a presternal bridge in front. Abdomen strongly flattened dorsiventrally.

Male genitalia orthandrious (not twisted). Female sawsheath not exserted strongly. Larva oligopodous.

The superfamily is distributed in North hemisphere, mainly in Temperate zone. Number of taxa: World – 2 families, 2 subfamilies, 11 genera, more than 330 species; Palaearctic – 2/2/11/about 240; Russia – 2/2/10/111 (+ 3 ssp.).

8. FAMILY PAMPHILIIDAE

Very flat and broad species, 7-17 mm long, sun-loving and very fast on the wing. Antennae long, thread-like and many-segmented (18-24 segments). Fore wings with vein *Sc* free and *2r* present. At least the middle and hind tibiae have preapical spines.

The larvae live solitarily or socially. The larvae of the subfamily Cephalciinae feed on conifers, live in a web; the larvae of the subfamily Pamphiliinae feed on angiosperms, live in a web, or in a tube of a rolled leaf held by silk.

The family is distributed in Holarctic, Oriental and Neotropical regions, mainly in Temperate zone. Number of taxa: World – 2 subfamilies, 10 genera, about 300 species; Palaearctic – 2/10/>200; Russia – 2/9/99 (+ 3 ssp.).

Subfamily CEPHALCINAE

ACANTHOLYDA A. Costa, 1894 (*Acanthocnema* Costa, 1859; *Itycorsia* Konow, 1897). Type species *Tenthredo erythrocephala* Linnaeus, 1758. The larvae feed on the Pinus, Larix, Picea, Abies, Tsuga, Pseudotsuga (Pinaceae); singly or in groups weave nests from the web. The genus is distributed in Holarctic, Oriental and Neotropical regions; mainly in Holarctic. Number of species: World – > 70; Palaearctic – about 30; Russia – 8 (+ 1 ssp.) from 2 subgenera.

Acantholyda (Acantholyda) erythrocephala (Linnaeus, 1758) [Tenthredo] (*A. erythrocephala vittata* Enslin, 1918; *A. grangeoni* Riou, 1999). Host plant: Pinus spp. (Pinaceae); live in groups, often harm. Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (TK, NS, KM), **ES** (KR, IR, BR), **FE** (AM). – Europe (WE, EE, NE, SE), Kazakhstan, China (NE, NC), Korean Peninsula, N America.

Acantholyda (Acantholyda) flaviceps (Retzius, 1783) [Tenthredo] (*Lyda cyanea* Klug, 1808). Host plant: Pinus spp. (Pinaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (KM, AL), **ES** (KR). – Europe (WE, EE, NE, SE).

Acantholyda (Itycorsia) aglaia aglaia Zhelochovtsev, 1968 (*A. angarica* Ermolenko, 1969). Host plant: Picea spp. (Pinaceae). Russia: **WS** (KM), **ES** (KR, IR), **FE** (KH, PR). – Japan (Hon).

Acantholyda (Itycorsia) aglaia yezoensis Shinohara et Hara, 2000. Host plant: Picea spp. (Pinaceae). Russia: **FE** (KU). – Japan (Hok).

Acantholyda (Itycorsia) hieroglyphica (Christ, 1791) [Tenthredo] (*Lyda bimaculata* Taschenberg, 1861). Host plant: Pinus spp. (Pinaceae); live alone. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (NS, KM), **ES** (IR). – Europe (WE, EE, NE, SE), Caucasus, Kazakhstan.

Acantholyda (Itycorsia) laricis (Giraud, 1861) [*Lyda*] (*A. parvula* Zirngiebl, 1937). Host plant: Larix spp.

- (Pinaceae); often harm. Russia: **EP** (N, C), **UR**, **WS** (TK, AL), **ES** (IR, YA), **FE** (AM). – Europe (WE, EE, SE), China (NC), Japan (Hon).
- Acantholyda (Itycorsia) parki** Shinohara et Byun, 1996. Host plant: *Pinus koraiensis* (Pinaceae). Russia: **FE** (PR). – Korean Peninsula.
- Acantholyda (Itycorsia) pirica** Shinohara, 2000. Host plant: ?*Pinus pumila* (Pinaceae). Russia: **FE** (SA). – Japan (Hok).
- Acantholyda (Itycorsia) posticalis pinivora** Enslin, 1918 (*Tenthredo stellata* Christ, 1791; *T. pratensis* Fabricius, 1793; *Acantholida nemoralis magnini* Pic, 1944). Host plant: *Pinus* spp. (Pinaceae); often harm. Russia: **EP** (C), **UR**, **WS** (TK, NS, KM, AL), **ES** (YA, ZB). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia, China (NE, SE).
- CAENOLYDA** Konow, 1897 (*Dictyolyda* Semenov, 1934). Type species *Tenthredo reticulata* Linnaeus, 1758. The larvae feed on the *Pinus* spp. (Pinaceae). The genus is distributed in West Palaearctic. Number of species: World and Palaearctic – 2; Russia – 1.
- Caenolyda reticulata** (Linnaeus, 1758) [Tenthredo] (*Cephaleia clarkii* Jurine, 1807). Host plant: *Pinus* spp. (Pinaceae). Russia: **EP** (NW, C, E). – Europe (WE, EE, NE, SE).
- CEPHALCIA** Panzer, 1803 (*Cephaleia* Jurine, 1807; *Liolyda* Ashmead, 1898). Type species *Cephaleia arvensis* Panzer, 1803. The larvae feed on the *Pinus*, *Larix*, *Picea*, *Abies*, *Cedrus* (Pinaceae); singly or in groups weave nests from the web. The genus is distributed in Holarctic and Oriental region, mainly in Holarctic. Number of species: World – 43; Palaearctic – 30; Russia – 13 (+ 1 ssp.).
- Cephalcia abietis** (Linnaeus, 1758) [Tenthredo] (*Lyda hypothrofica* Hartig, 1834; *Cephaleia testacea* Gimmerthal, 1836; *Lyda klugii* Hartig, 1837; *L. scutellaris* Thomson, 1871; *L. semiflava* Matsumura, 1912; *Cephaleia mimica* Pic, 1948). Host plant: *Picea* spp. (Pinaceae); live in groups, harm. Russia: **EP** (N, NW, C, E), **UR**, **WS** (KM), **ES** (KR, BR, YA), **FE** (KH, PR, SA). – Europe (WE, EE, NE, SE), Mongolia, China (NE, NC), Japan (Hok).
- Cephalcia alashanica** (Gussakovskij, 1935) [Cephaleia] (*C. alashanica europaea* Beneš, 1976). Russia: **EP** (C). – Europe (WE, EE, NE), Mongolia, China (NC).
- Cephalcia alpina** (Klug, 1808) [Lyda] (*Lyda fallenii* Dalman, 1823; *L. abietina* Hartig, 1837; *L. annulata* Hartig, 1837). Host plant: *Picea* spp., *Larix* spp. (Pinaceae); live alone. Russia: **EP** (N, C), **WS** (TM, AL), **ES** (KR, IR, YA), **FE** (SA). – Europe (WE, EE, NE, SE), N Africa, China (NE), Korean Peninsula, Japan (Hok, Hon).
- Cephalcia arvensis** Panzer, 1803 (*Tenthredo signata* Fabricius, 1781; *Lyda irrorata* Dahlbom, 1835; *L. saxicola* Hartig, 1837; *L. adusta* Dietrich, 1868; *L. irrorata* Thomson, 1871). Host plant: *Picea* spp. (Pinaceae); live alone or in small groups. Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS), **ES** (KR, IR, YA), **FE** (PR, SA, KU). – Europe (WE, EE, NE, SE), Mongolia, China (NE, NC).
- Cephalcia erythrogaster** (Hartig, 1837) [Lyda]. Host plant: *Picea* spp. (Pinaceae); live alone. Russia: **EP** (NW, C). – Europe (WE, EE, NE), China (Wei et al., 2006).
- Cephalcia hartigii** (Bremi-Wolf, 1849) [Lyda]. Host plant: *Abies* spp., *Picea* spp. (Pinaceae). Russia: **EP** (NC). – Europe (WE, EE, SE), N Africa, Georgia.
- Cephalcia intermedia** Hellén, 1948. Russia: **EP** (N). – Europe (NE).
- Cephalcia koebelei** (Rohwer, 1910) [Cephaleia] (*C. baikalica* Verzhutskii, 1973). Host plant: *Larix leptolepis* (Pinaceae). Russia: **ES** (IR, YA). – Japan (Hok, Hon).
- Cephalcia lariciphila japonica** Shinohara, 1997. Host plant: *Larix leptolepis* (Pinaceae). Russia: **FE** (KU). – Japan (Hok, Hon).
- Cephalcia lariciphila lariciphila** (Wachtl, 1898) [Cephaleia]. Host plant: *Larix* spp. (Pinaceae). Russia: **EP** (N, C), **WS** (KM, AL), **ES** (TU, KR, IR, BR, YA), **FE** (PR). – Europe (WE, EE, NE, SE), China (NE, CC), Korean Peninsula.
- Cephalcia nigricoxae** (Matsumura, 1912) [Lyda]. Host plant: *Picea jezoensis* (Pinaceae); harmful to spruce forests in Hokkaido. Russia: **FE** (KU). – Japan (Hok).
- Cephalcia pallidula** (Gussakovskij, 1935) [Cephaleia] (*C. flavistigma* Lindqvist, 1962). Host plant: *Picea* spp. (Pinaceae). Russia: **EP** (N), **ES** (IR, YA), **FE** (PR, SA, KU). – Europe (NE), China (NE).
- Cephalcia sachalinensis** (Matsumura, 1911) [Lyda]. Host plant: *Picea* spp. (Pinaceae). Russia: **FE** (SA).
- Cephalcia variegata** (Takeuchi, 1930) [Cephaleia]. Host plant: *Pinus pumila* (Pinaceae). Russia: **FE** (SA, KU). – Japan (Hok, Hon).

Subfamily PAMPHILIINAE

CHRYSOLYDA Shinohara, 2002. Type species *Pamphilus leucocephalus* Takeuchi, 1938.

The genus is distributed in East Asia. Number of species: one species.

Chrysolyda leucocephala (Takeuchi, 1938) [Pamphilius]. Russia: **FE** (PR). – Korean Peninsula, Japan (Hok, Hon, Kyu).

KELIDOPTERA Konow, 1897. Type species *Lyda maculipennis* J.P.E.F. Stein, 1876. The genus is distributed in West Palaearctic. Number of species: one species.

Kelidoptera maculipennis (J.P.E.F. Stein, 1876) [Lyda]. Russia: **EP** (E). – Turkey.

NEUROTOMA Konow, 1897 (*Gongylocorsia* Konow, 1897). Type species *Tenthredo flaviventris* Retzius, 1783. The larvae feed mainly on the tree and shrub Rosaceae and Quercus (Fagaceae); single or in groups of leaves feeding, weave a web. The genus is distributed in Holarctic and Oriental region, mainly in Holarctic. Number of species: World – 22; Palaearctic – 13; Russia – 7.

Neurotoma atrata Takeuchi, 1930. Host plant: *Quercus acutissima* Fagaceae). Russia: **FE** (PR). – China (SE), Korean Peninsula, Japan (Hon).

Neurotoma fausta (Klug, 1808) [Lyda]. Russia: **EP** (CR). – Europe (WE, EE, SE).

Neurotoma iridescents (André, 1882) [Lyda] (*Cephalcia nigrocoerulea* Rohwer, 1910; *Neurotoma sorbi* Forsius, 1911; *Lyda nigricans* Matsumura, 1912; *Neurotoma nakayamai* Sugihara, 1933; *Pamphilius sajanicus* Stroganova, 1978). Host plant: *Prunus* spp., *Sorbus* spp., *Crataegus chlorosarca* (Rosaceae); live in groups. Russia: **EP** (N, NW), **ES** (KR, BR, YA), **FE** (PR, KU). – Europe (WE, NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Neurotoma mandibularis (Zaddach, 1866) [Lyda] (*Lyda parisiensis* Giraud, 1870). Host plant: *Quercus* spp. (Fagaceae). Russia: **EP** (CR). – Europe (WE, EE, SE).

Neurotoma nemoralis (Linnaeus, 1758) [Tenthredo] (*Tenthredo punctata* Fabricius, 1798; *Psen caprifolia* Schrank, 1802; *Lyda lucorum* Fallén, 1808; *L. drupacearum* Nördlinger, 1855; *L. maculifrons* Snellen van Vollenhoven, 1858). Host plant: *Prunus* spp. (Rosaceae); live in groups. Russia: **EP** (NW, C, E, S, NC), **UR**. – Europe (WE, EE, NE, SE), Kazakhstan.

Neurotoma saltuum (Linnaeus, 1758) [Tenthredo] (*Tenthredo flaviventris* Retzius, 1783; *Psen pyri*

Schrink, 1802; *Lyda albifrons* Fallén, 1808; *L. clypeata* Klug, 1808; *Tenthredo lutescens* Panzer, 1809; *Pamphilius dimidiatus* Latreille, 1812; *Lyda fasciata* Curtis, 1831; *L. fasciatipennis* Costa, 1864). Host plant: *Prunus* spp., *Malus* spp., *Crataegus* spp. and others Rosaceae; live in groups in a nest of cobwebs, sometimes harm. Russia: **EP** (C, S, NC, CR), **ES** (IR). – Europe (WE, EE, NE, SE), Armenia, Turkey, Korean Peninsula.

Neurotoma sibirica Gussakovskij, 1935 (*N. nemoralis obsoleta* Takeuchi, 1936). Host plant: *Sorbaria sorbifolia* (Rosaceae). Russia: **ES** (IR, YA, ZB), **FE** (AM, KH, PR, SA, KU). – China (NE), Korean Peninsula, Japan (Hok).

ONYCHOLYDA Takeuchi, 1938. Type species *Pamphilius viriditibialis* Takeuchi, 1930. The larvae feed on the *Rubus*, *Filipendula*, *Agrimonia* (Rosaceae), *Cornus* (Cornaceae); live alone and in groups, weave a web. The genus is distributed in Holarctic and Oriental region, mainly in Holarctic. Number of species: World – about 40; Palaearctic – 26; Russia – 11.

Onycholyda armata (Maa, 1949) [Pamphilius]. Russia: **WS** (TK), **FE** (KH, PR). – China (NE, SE), Korean Peninsula.

Onycholyda kumamotonis (Matsumura, 1912) [Lyda]. Host plant: *Filipendula kamtschatica* (Rosaceae). Russia: **FE** (SA, KU). – Japan (Hok, Hon, Kyu).

Onycholyda lucida (Rohwer, 1910) [Pamphilius]. Host plant: *Rubus* spp. (Rosaceae). Russia: **ES** (YA). – Japan (Hon, Shi, Kyu).

Onycholyda minomalis (Takeuchi, 1930) [Pamphilius]. Host plant: *Rubus parvifolius* (Rosaceae). Russia: without regions (Taeger, Blank, 2011). – Japan (Hok, Hon, Shi, Kyu).

Onycholyda nigroclypeata Shinohara, 1987. Russia: **FE** (KH, PR). – China (NE), Korean Peninsula.

Onycholyda rufofasciata (Norton, 1869) [Lyda] (*Lyda rufocincta* Cresson, 1880). Host plant: ?*Rosa* spp. (Rosaceae). Russia: **ES** (IR). – N America.

Onycholyda sertata (Konow, 1903) [Pamphilius] (*Pamphilius thomsoni* Malaise, 1921). Host plant: *Filipendula* spp. (Rosaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS, AL), **ES** (YA), **FE** (AM, KH, PR). – Europe (NE), China (NE), Korean Peninsula.

Onycholyda trigaria (Konow, 1897) [Pamphilius]. Russia: **EP** (NC). – Armenia, Azerbaijan, Iran.

Onycholyda viriditibialis (Takeuchi, 1930) [Pamphilius] (*Pamphilius tsherskii* Gussakovskij, 1935).

- Host plant: *Rubus crataegifolius*, *R. microphyllus* (Rosaceae); live in groups. Russia: **FE** (PR). – Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).
- Onycholyda yezoensis** Shinohara, 1987. Host plant: *Rubus parvifolius*, *R. idaeus* (Rosaceae). Russia: **FE** (SA, KU). – Japan (Hok).
- Onycholyda zinovjevi** Shinohara, 1987. Russia: **FE** (PR). – Korean Peninsula.
- PAMPHILIUS** Latreille, 1803 (*Lyda* Fabricius, 1804; *Anoplolyda* Costa, 1894; *Bactroceros* Konow, 1897). Type species *Tenthredo sylvatica* Linnaeus, 1758. The larvae feed mainly on Rosaceae and Betulaceae, others on Salicaceae, Sapindaceae, Caprifoliaceae, Fagaceae, Cornaceae and Juglandaceae; mostly monophages; live alone or in groups in rolled leaves. The genus is distributed in Holarctic and Oriental region, mainly in Holarctic. Number of species: World – about 115; Palaearctic – about 95; Russia – 56 (+ 1 ssp.).
- Pamphilius albopictus** (Thomson, 1871) [*Lyda*] (*Pamphilius altaicus* Gussakovskij, 1935; *P. viridipes* Achterberg et Aartsen, 1986). Host plant: *Prunus* spp. (Rosaceae). Russia: **EP** (N, C), **UR**, **WS** (KM, AL), **ES** (IR, YA), **FE** (KH, PR, KA). – Europe (WE, NE), Korean Peninsula.
- Pamphilius alnicola** Ermolenko, 1973. Host plant: *Alnus hirsuta* (Betulaceae). Russia: **FE** (PR, KU). – Japan (Hok, Hon).
- Pamphilius alnivorus** Shinohara, 2005. Host plant: *Alnus hirsuta* (Betulaceae). Russia: **ES** (YA), **FE** (KH, PR, SA, KU). – Japan (Hok, Hon).
- Pamphilius archiducalis** Konow, 1897. Host plant: *Alnus* spp. (Betulaceae). Russia: **FE** (SA, KU). – Japan (Hok, Hon).
- Pamphilius armeniacus** Shinohara, 1988. Russia: **EP** (NC). – Armenia.
- Pamphilius aucupariae** Vikberg, 1971. Host plant: *Sorbus* spp. (Rosaceae). Russia: **ES** (YA). – Europe (NE).
- Pamphilius balteatus** (Fallén, 1808) [*Lyda*] (*P. cingulatus* Latreille, 1812; *Lyda suffusa* Hartig, 1837). Host plant: *Rosa* spp., *Prunus* spp., *Spiraea* spp. (Rosaceae); live alone. Russia: **EP** (NW, C, E), **UR**, **WS** (NS), **ES** (IR, YA, ZB), **FE** (PR, SA, KU, KA, MG). – Europe (WE, NE, SE), Korean Peninsula, Japan (Hok).
- Pamphilius betulae** (Linnaeus, 1758) [*Tenthredo*] (*Tenthredo fulva* Retzius, 1783; *Lyda aurita* Klug, 1808). Host plant: *Populus* spp. (Salicaceae); live alone. Russia: **EP** (NW, C, E), **UR**, **WS** (NS, KM, AL), **ES** (IR, YA), **FE** (KH, PR, SA, KU, MG). – Europe (WE, EE, NE, SE), Turkey. **Pamphilius borisi** Beneš, 1972. Russia: **ES** (IR).
- Pamphilius brevicornis brevicornis** Hellén, 1948. Host plant: *Populus* spp. (Salicaceae). Russia: **EP** (N), **WS** (NS, KM), **ES** (IR), **FE** (PR, SA, KA). – Europe (WE, NE), Korean Peninsula.
- Pamphilius caucasicus** Gussakovskij, 1935. Russia: **EP** (NC). – Georgia.
- Pamphilius convexus** Shinohara, 1988. Russia: **FE** (KH, PR). – Korean Peninsula.
- Pamphilius coreanus** Takeuchi, 1938 (*Anoplolyda frontimacula* Malaise, 1943). Russia: **FE** (KH, PR). – Korean Peninsula.
- Pamphilius croceus** Shinohara, 1986. Russia: **FE** (PR). – Korean Peninsula.
- Pamphilius festivus** C. Pesarini et F. Pesarini, 1984. Host plant: *Populus* spp. (Salicaceae). Russia: **EP** (NW, C, S), **UR**, **WS** (NS, KM, AL), **ES** (KS, KR). – Europe (WE, EE, NE, SE).
- Pamphilius fumipennis** (Curtis, 1831) [*Lyda stigma* Stephens, 1835; *L. carpini* Brischke, 1892]. Host plant: *Corylus* spp., *Alnus* spp. (Betulaceae). Russia: **EP** (N, NW, C, E). – Europe (WE, EE, NE, SE).
- Pamphilius gyllenhali** (Dahlbom, 1835) [*Lyda*]. Host plant: *Salix* spp. (Salicaceae); live alone. Russia: **EP** (N, NW, C, E), **UR**. – Europe (WE, NE, SE).
- Pamphilius heecheonparki** Shinohara, 1998. Russia: **ES** (IR, YA), **FE** (KH, PR). – Korean Peninsula.
- Pamphilius hilaris** (Eversmann, 1847) [*Lyda*]. Host plant: *Rosa* spp. (Rosaceae). Russia: **UR**, **WS** (TK), **FE** (PR, KA). – China (CC), Japan (Hon).
- Pamphilius histrio** Latreille, 1812. Host plant: *Populus* spp. (Salicaceae); live alone. Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (NS), **ES** (YA). – Europe (WE, EE, NE, SE), Kazakhstan, Korean Peninsula, Japan (Hok).
- Pamphilius hortorum** (Klug, 1808) [*Lyda*] (*P. hortorum bicinctus* Benson, 1945). Host plant: *Rubus* spp. (Rosaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS, KM, AL), **ES** (IR, YA), **FE** (KH, PR, SA, KU, MG). – Europe (WE, EE, NE, SE), China (NE), Korean Peninsula, Japan (Hok, Hon).
- Pamphilius inanitus** (Villers, 1789) [*Tenthredo*] (*Tenthredo agrestis* Panzer, 1804; *Lyda fallax* Serville, 1823; *L. fallax* Lepeletier, 1823). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (NW), **ES** (YA). – Europe (WE, EE, NE, SE).

Pamphilius itoi Shinohara, 1985. Host plant: *Alnus hirsuta* (Betulaceae). Russia: **FE** (PR, KU). – Japan (Hok, Hon).

Pamphilius jucundus (Eversmann, 1847) [Lyda] (*Lyda arbuti* Zaddach, 1866). Host plant: *Fragaria* spp. (Rosaceae). Russia: **EP** (NW, C, E), **UR**, **WS** (NS). – Europe (WE, EE, NE).

Pamphilius kamikochensis Takeuchi, 1930. Host plant: *Prunus ssiori* (Rosaceae). Russia: **FE** (KU). – Japan (Hok, Hon).

Pamphilius kontuniemii Shinohara, 2003. Russia: **EP** (N, NW, NC). – Europe (WE, EE, NE, SE), Georgia.

Pamphilius kyutekparki Shinohara, 1991. Russia: **FE** (PR). – Korean Peninsula.

Pamphilius latifrons (Fallén, 1808) [Lyda] (*Lyda maculosa* Zaddach, 1866). Host plant: *Populus* spp., *Salix* spp. (Salicaceae). Russia: **EP** (N, C), **WS** (KM), **ES** (IR, BR, ZB), **FE** (PR, MG). – Europe (WE, EE, NE, SE), Kazakhstan.

Pamphilius leleji Shinohara et Taeger, 2007. Russia: **FE** (PR).

Pamphilius lethierryi (Konow, 1887) [Lyda]. Russia: **EP** (NC). – Europe (WE, EE, SE), Georgia, Armenia.

Pamphilius lobatus Maa, 1950. Russia: **FE** (PR). – China (NE), Korean Peninsula, Japan (Hok, Hon).

Pamphilius marginatus (Serville, 1823) [Lyda] (*Lyda marginata* Lepeletier, 1823; *L. bicolor* Herrich-Schäffer, 1833; *Tenthredo ratzeburgii* Ratzeburg, 1844). Host plant: *Corylus* spp., *Carpinus* spp., *Ostrya* spp. (Betulaceae). Russia: **EP** (C). – Europe (WE, EE, NE, SE).

Pamphilius masao Shinohara, 2005. Host plant: *Betula ermanii*, *Alnus maximowiczii* (Betulaceae). Russia: **FE** (SA, KU). – Japan (Hok).

Pamphilius maximus Shinohara, 1995. Russia: **FE** (PR). – Korean Peninsula.

Pamphilius montanus pulcher Shinohara, 1988. Host plant: *Sorbus* spp. (Rosaceae). Russia: **ES** (YA). – Korean Peninsula, Japan (Hok).

Pamphilius pallidus Shinohara, 1988. Russia: **FE** (PR).

Pamphilius pallipes (Zetterstedt, 1838) [Lyda] (*Lyda flavipes* Zetterstedt, 1838; *L. variegata* Zaddach, 1866; *Pamphilius pallidipes* Dalla Torre, 1894). Host plant: *Betula* spp., *Alnus* spp. (Betulaceae). Russia: **EP** (N, NW, C, E), **WS** (TK, NS, KM, AL), **ES** (BR, YA), **FE** (AM, KH, PR, KU, KA, MG). – Europe (WE, EE, NE), Iran, Kazakhstan, Mongolia, China (NE, NC), Korean Peninsula.

Pamphilius persicum MacGillivray, 1907. Russia: **EP** (NC). – Armenia, N America.

Pamphilius pictifrons Gussakovskij, 1935. Host plant: ?*Rosa* spp. (Rosaceae). Russia: **ES** (YA), **FE** (MG).

Pamphilius planifrons Beneš, 1976. Russia: **FE** (PR). – Korean Peninsula.

Pamphilius pugnax Konow, 1897. Russia: **EP** (NC). – Azerbaijan.

Pamphilius sapporensis (Matsumura, 1912) [Lyda] (*P. rugosus* Beneš, 1976). Host plant: *Filipendula kamtschatica* (Rosaceae). Russia: **FE** (SA, KU). – Japan (Hok).

Pamphilius stramineipes (Hartig, 1837) [Lyda] (*P. facetus* Konow, 1898; *P. stramineipes medialis* Enslin, 1917). Host plant: *Rosa* spp. (Rosaceae). Russia: **EP** (N, C, E, NC), **UR**, **WS** (TM, OM, NS), **ES** (KR), **FE** (SA, KU). – Europe (WE, EE, NE), Armenia, Japan (Hok).

Pamphilius sulphureipes sulphureipes W.F. Kirby, 1882 (*Anoplolyda viriditibialis aino* Takeuchi, 1936). Host plant: *Rosa* spp. (Rosaceae). **FE** (AM, PR, SA). – Korean Peninsula.

Pamphilius sylvaticus (Linnaeus, 1758) [Tenthredo] (*Tenthredo fulvipes* Retzius, 1783; *Cephalcia nemorum* Panzer, 1803). Host plant: *Sorbus* spp., *Crataegus* spp., *Prunus* spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM), **ES** (YA). – Europe (WE, EE, NE, SE), Turkey.

Pamphilius takeuchii Beneš, 1972 (*P. jucundus* Takeuchi, 1930). Russia: **FE** (PR). – Japan (Hok, Hon, Shi, Kyu).

Pamphilius tricolor Beneš, 1974. Russia: **EP** (N), **WS** (TM), **ES** (TU, KR, ZB), **FE** (KH, PR, KA, MG). – Korean Peninsula, Japan (Hok, Hon).

Pamphilius ussuriensis Shinohara, 1988. Russia: **FE** (PR).

Pamphilius vafer (Linnaeus, 1767) [Tenthredo] (*Tenthredo depressa* Schrank, 1781; *Psen alni* Schrank, 1802). Host plant: *Alnus* spp., *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E), **UR**, **WS** (NS, AL), **ES** (TU, IR, YA). – Europe (WE, EE, NE, SE), Georgia, Kazakhstan.

Pamphilius varius (Serville, 1823) [Lyda] (*Lyda varia* Lepeletier, 1823; *L. infida* Zaddach, 1866; *Pamphilius flavifrons* W.F. Kirby, 1882; *Lyda konowi* Jakovlev, 1891; *Anoplolyda engelhardtii* Dovnar-Zapolskij, 1930). Host plant: *Alnus* spp., *Betula* spp. (Betulaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (NS, KM), **ES** (KR, BR, YA), **FE** (AM, PR, SA, KU, KA). – Europe (WE, EE, NE, SE), Georgia,

- Kazakhstan, Korean Peninsula, Japan (Hok, Hon, Kyu).
- Pamphilius venustus** (F. Smith, 1874) [Lyda]. Russia: FE (Shinohara, 1988b). – Japan (Hok, Hon, Shi).
- Pamphilius virescens** Malaise, 1931. Russia: ES (IR), FE (KA). – Korean Peninsula, Japan (Hok).
- Pamphilius viridulus** Shinohara, 2001. Host plant: Prunus spp., Crataegus chlorosarca (Rosaceae). Russia: FE (PR).
- Pamphilius volatilis** (F. Smith, 1874) [Lyda]. Host plant: Prunus spp., Crataegus chlorosarca (Rosaceae). Russia: FE (PR). – Korean Peninsula, Japan (Hok, Hon, Kyu).
- Pamphilius zhelochovtsevi zhelochovtsevi** Beneš, 1974. Host plant: Rosa spp. (Rosaceae). Russia: FE (KH, PR). – Korean Peninsula.

Pamphilius zhelochovtsevi nipponicus Shinohara, 1993. Host plant: Rosa spp. (Rosaceae). Russia: FE (KU). – Japan (Hon).

Pamphilius zinovjevi Shinohara, 1988. Russia: FE (AM, PR). – Korean Peninsula.

PSEUDOCEPHALEIA Zirngiebl, 1937. Type species *Pseudocephaleia brachycercus* Zirngiebl, 1937. The genus is distributed in Palaearctic. Number of species: World and Palaearctic – 2; Russia – 1.

Pseudocephaleia praeteritorum (Semenov, 1934) [Dictyolyda] (*P. brachycercus* Zirngiebl, 1937; *Cephalcia pseudoreticulata* Zombori, 1967). Russia: WS (AL). – Europe (EE, SE), Caucasus, Turkey, China (Wei et al., 2006).

9. FAMILY MEGALODONTESIDAE

Flat-bodied flower-haunting species, very fast on the wing. Characterized by their many-segmented flabellate antennae, with flattened prolongations from the apices of the flagellar segments. Body very broad and flat, pamphiloid in form, with wasp-like colouring and yellowish-brown marked wings. The larvae live socially in webs on herbaceous plants – Apiaceae and Rutaceae.

The family is distributed in the Palaearctic and Oriental regions, but was rich and diverse group in the Mesozoic. Number of taxa: World and Palaearctic – 1 genus, 37 species; Russia – 1/12.

MEGALODONTES Latreille, 1803 (*Tarpa* Fabricius, 1804; *Megalodus* Rafinesque, 1815; *Melanopus* Konow, 1897; *Tristactus* Konow, 1897; *Rhipidioceros* Konow, 1897; *Forficulotarpa* Pic, 1918; *Tristactoides* Chevin, 1985). Type species *Tenthredo cephalotes* Fabricius, 1781. The larvae feed on the Apiaceae and Rutaceae; live in nests from cobwebs. The genus is distributed in Palaearctic and Oriental region. Number of species: World and Palaearctic – 37; Russia – 12.

Megalodontes cephalotes (Fabricius, 1781) [Tenthredo] (*Tarpa klugii* Leach, 1817; *T. spissicornis* Klug, 1824; *T. fuscipennis* Herrich-Schäffer, 1840). Host plant: Laserpitium spp., Libanotis spp., Peucedanum spp., Seseli libanotis (Apiaceae). Russia: **EP** (N, C, E), **UR**. – Europe (WE, EE, SE), Turkey.

Megalodontes eversmanni (Freymuth, 1870) [*Tarpa*] (*Tarpa loewii* J.P.E.F. Stein, 1876; *T. multicincta* Mocsáry, 1891). Russia: **EP** (NC). – Europe (SE), Caucasus, Turkey, Iran.

Megalodontes fabricii (Leach, 1817) [*Tarpa*] (*Tarpa megacephala* Klug, 1824; *T. redimita* Klug, 1824).

Russia: **EP** (C, S, E, NC, CR), **UR**. – Europe (WE, EE, SE), Turkey.

Megalodontes flabellicornis (Germar, 1825) [*Tarpa*] (*Tarpa exornata* Zaddach, 1866; *T. coronata* Zaddach, 1866; *T. albicincta* J.P.E.F. Stein, 1876; *T. speciosa* Mocsáry, 1877). Russia: **EP** (C, NC). – Europe (EE, SE), Georgia, Turkey.

Megalodontes flavicornis (Klug, 1824) [*Tarpa*]. Russia: **EP** (C, S, NC, CR). – Europe (WE, EE, SE), Caucasus, Turkey, Iran, Turkmenistan.

Megalodontes interruptus Gussakovskij, 1935 (*M. antoniae* Zombori, 1971). Russia: **ES** (IR). – Mongolia, China (NE).

Megalodontes medius Konow, 1897. Russia: **EP** (S, NC, CR). – Europe (EE), Azerbaijan, Turkey.

Megalodontes plagicephalus (Fabricius, 1804) [*Tarpa*] (*Tarpa flabellata* Eversmann, 1847; *T. plagicephala latialis* Manzone, 1893; *Megalodontes aquilus* Konow, 1902; *M. nigritegulis* Konow, 1904; *M. xanthocerus* Gussakovskij, 1935). Host plant: Peucedanum alsaticum, Seseli libanotis (Apiaceae). Russia: **EP** (C, E, S, NC, CR), **UR**, **WS** (OM, NS, AL). – Europe (WE, EE, SE), Georgia, Armenia, Kazakhstan.

Megalodontes quinquecinctus (Klug, 1824) [*Tarpa*] (*M. nitidus* Maa, 1949; *M. tsunekii* Togashi, 1973; *M. apakensis* Togashi, 1973). Russia: **EP** (CR), **ES** (BR, ZB). – Mongolia, China (NE, NC).

Megalodontes scythicus Zhelochovtsev, 1988 (*M. eversmanni* Gussakovskij, 1935). Russia: **EP** (S, NC, CR), **UR**. – Europe (EE), Kazakhstan.

Megalodontes spiraeae (Klug, 1824) [*Tarpa*] (*Tarpa pectinicornis* Klug, 1824; *T. ruthena* Jakovlev, 1888; *T. borealis* Jakovlev, 1891; *Megalodontes siberiensis* Rohwer, 1925; *M. coreensis* Takeuchi, 1927). Host plant: Sphallerocarpus gracilis (Apiaceae), Spiraea spp. (Rosaceae). Russia: **UR**, **WS** (NS, AL), **ES** (KS, KR, IR, BR, ZB), **FE** (AM, KH, PR). – Mongolia, China (NE, NC, SW), Korean Peninsula.

Megalodontes thor Taeger, 2002. Host plant: Peucedanum oreoselinum (Apiaceae). Russia: **EP** (Taeger, 2002), **UR**, **WS** (AL). – Europe (WE, EE), Kazakhstan.

SUPERFAMILY CEPHOIDEA

One recent family: Cephidae.

10. FAMILY CEPHIDAE

Slender insects, with a long cylindrical or laterally compressed body. Slow on the wing.

Head with hypostomal bridge separating oral cavity from occipital foramen. Antenna long and thread-like or slightly clavate, 16-30-segmented. Hind margin of pronotum almost straight, being nearly the shortest distance between the tegulae; mesonotum short, never extending in front of the tegulae; cenchri absent. Tibiae usually with preapical spines on the hind and middle legs; fore tibia with only one modified apical spur. Fore wings with the vein M joining Rs after Rs has left $Sc+R$. Abdomen constricted slightly at the apex of the 1st segment. Female ovipositor exserted and clearly visible from above. Male often with some of the apical sternites fringed or with patches of modified setae; male genitalia orthandrous, parameres continuous with parameral plates, devoid of muscles and apical cupping discs, and with aedeagus tubular.

The larvae internal borers in stems or twigs of herbaceous plants, shrubs and trees; lead a secretive way of life.

The family is distributed worldwide. Number of taxa: World – 2 subfamilies, 24 genera, about 165 species; Palaearctic – 1/16/120; Russia – 1/10/57.

Subfamily CEPHINAE

CAENOCEPHUS Konow, 1896. Type species

Caenocephus jakowleffi Konow, 1896. The genus is distributed in Holarctic and Oriental region. Number of species: World – 5; Palaearctic – 3; Russia – 2.

Caenocephus lunulatus (Strobl, 1895) [Cephus] (*C. jakowleffi* Konow, 1896). Russia: **ES** (IR). – Europe (WE, EE).

Caenocephus xanthopus Shinohara, 1999. Russia: **FE** (PR). – Korean Peninsula, Japan (Hon).

CALAMEUTA Konow, 1896 (*Monoplopus* Konow, 1896; *Haplocephus* Benson, 1935; *Ephemerocephus* Zhelochovtsev, 1968). Type species *Cephus filiformis* Eversmann, 1847. The larvae feed on the Poaceae. The genus is distributed in Holarctic and Oriental region. Number of species: World – 22; Palaearctic – 20; Russia – 10 from 2 subgenera.

Calameuta (Calameuta) bicornes Stroganova, 1976. Russia: **WS** (AL).

Calameuta (Calameuta) filiformis (Eversmann, 1847) [Cephus] (*Cephus elongatus* Snellen van Vollenhoven, 1858; *C. arundinis* Giraud, 1863; *C. marginatus* Kawall, 1864; *C. erberi* Damianitsch, 1866; *C. vagabundus* Mocsáry, 1886; *C. infernalis* Dovnar-Zapskij, 1926; *Calameuta atrata* Dovnar-Zapskij, 1931; *C. rugosa* Dovnar-Zapskij, 1931; *C. amurensis* Gussakovskij, 1935). Host plant: Phragmites spp., Arrenatherum spp., Elytrigia spp., etc. (Poaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (IR), **FE** (KH, PR). – Europe (WE, EE, NE, SE), N Africa, Caucasus, Asia Minor, Iran, Kyrgyzstan, Kazakhstan, China (NW).

Calameuta (Calameuta) filum (Gussakovskij, 1935) [Cephus]. Host plant: Poaceae. Russia: **EP** (C, E, S, NC), **UR**, **WS** (NS, KM, AL), **ES** (KS, KR, IR). – Europe (WE, EE, NE, SE), Uzbekistan, Kazakhstan.

Clameuta (Calameuta) gracilicornis (Konow, 1896) [Cephus]. Russia: **EP** (NC). – Armenia, Azerbaijan.

Calameuta (Calameuta) haemorrhoidalis (Fabricius, 1781) [Tenthredo] (*Astatus analis* Klug, 1803; *A. floralis* Klug, 1803; *Trachelus haemorrhoidalis* Jurine, 1807; *Cephus atripes* Stephens, 1835; *C. quadriguttatus* Costa, 1882; *C. variabilis* Mocsáry, 1886; *C. quadriguttulatus* Dalla Torre, 1894; *C. quadrisignatus* Costa, 1894; *C. haemorrhoidalis signifer* Konow, 1896; *C. pseudotabidus* Kokujev, 1910; *C. diversipes* Ghigi, 1915; *Trachelus syriacus*

Pic, 1917). Host plant: Poaceae. Russia: **EP** (S, NC, CR). – Europe (WE, EE, SE), Caucasus, Asia Minor, Turkmenistan.

Calameuta (Calameuta) idolon (Rossi, 1794) [*Ichneumon*] (*Cephus mittrei* Guérin, 1844; *C. bellieri* Sichel, 1860; *C. variegatus* J.P.E.F. Stein, 1876; *Monoplopus apicicornis* Pic, 1916). Host plant: species of Poaceae. Russia: **EP** (CR). – Europe (EE, SE), N Africa, Caucasus, Asia Minor.

Calameuta (Calameuta) pallipes (Klug, 1803) [*Astata*] (*Cephus phthiscus* Fabricius, 1804; *C. pusillus* Stephens, 1835; *C. immaculatus* Stephens, 1835; *C. cultarius* Hartig, 1837; *C. pallidipes* Dalla Torre, 1894). Host plant: *Phleum* spp. (Poaceae). Russia: **EP** (NW, C, S), **UR**, **ES** (KS). – Europe (WE, EE, NE), Asia Minor, Iran, Kazakhstan.

Calameuta (Calameuta) punctata (Klug, 1803) [*Astata*] (*Cephus pravei* Dovnar-Zapskij, 1926). Russia: **EP** (NC). – Europe (SE), Georgia, Turkmenistan.

Calameuta (Calameuta) sachalinensis (Takeuchi, 1938) [*Cephus*]. Russia: **FE** (SA). – China (SW).

Calameuta (Ephemerocephus) kuzini Zhelochovtsev, 1968. Russia: **WS** (AL). – Kazakhstan.

CEPHUS Latreille, 1803 (*Astatus* Jurine, 1801; *Peronistilus* Ghigi, 1905; *Pironistilomorphus* Pic, 1916; *Fossulocephus* Pic, 1917; *Pseudocephus* Dovnar-Zapskij, 1931). Type species *Sirex pygmaeus* Linnaeus, 1767. The larvae feed on the Poaceae. The genus is distributed in Holarctic and Oriental region. Number of species: World – > 40; Palaearctic – about 40; Russia – 20.

Cephus brachycercus Thomson, 1871 (*C. punctulatus* Konow, 1896; *C. brachycercus tibialis* Dovnar-Zapskij, 1926). Host plant: Poaceae. Russia: **EP** (NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (IR), **FE** (PR, SA, KU). – Europe (WE, EE, NE, SE), N Africa, Turkey, Uzbekistan, Kyrgyzstan, Kazakhstan, China (SW), Japan (Hon).

Cephus camtschatcalis Enslin, 1927. Russia: **FE** (KA).

Cephus daghestanicus (Dovnar-Zapskij, 1931) [*Pseudocephus*]. Russia: **EP** (NC).

Cephus excisus (Dovnar-Zapskij, 1931) [*Pseudocephus*]. Russia: **EP** (NC).

Cephus filippovi Zhelochovtsev, 1968. Russia: **ES** (ZB).

Cephus fumipennis Eversmann, 1847 (*C. carbonarius* Jakovlev, 1891). Host plant: *Agropyron* spp., ?*Phalaris* spp. (Poaceae). Russia: **EP** (NW, C, E, S, NC, CR), **UR**, **WS** (TK, NS, KM, AL). – Europe (WE, EE, NE, SE), N Africa, Caucasus, Turkey, Syria,

Tajikistan, Kazakhstan (SE), Mongolia, China (NW, CC, SW).

Cephus gracilis Costa, 1860 (*C. gracilis laterimaculatus* Strobl, 1901). Host plant: species of Poaceae. Russia: **EP** (S). – Europe (SE).

Cephus hyalinatus Konow, 1897. Host plant: species of Poaceae. Russia: **WS** (KM, AL), **ES** (KS, TU, KR, IR, BR), **FE** (AM, KH, PR, SA, KU, KA). – Mongolia, Korean Peninsula, Japan (Hok).

Cephus infuscatus Thomson, 1871 (*C. infuscatus* André, 1881; *C. andreae* W.F. Kirby, 1882). Host plant: *Phalaris arundinacea* (Poaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE), China (NE, CC).

Cephus nigrinus Thomson, 1871. Host plant: *Milium* spp., *Poa* spp. (Poaceae). Russia: **EP** (N, NW, C, E, NC), **UR**, **WS** (NS, KM, AL), **ES** (IR). – Europe (WE, EE, NE), Turkey, Syria, Iran, Kazakhstan.

Cephus nigripennis (Takeuchi, 1927) [*Eumetabolus*] (*Monoplopus japonicus* Forsius, 1928; *Cephus graminis* Maa, 1944). Host plant: *Elytrigia* spp., *Agropyron* spp. (Poaceae). Russia: **ES** (IR), **FE** (PR). – China (NE, CC, SE), Korean Peninsula, Japan (Hon, Shi, Tsushima).

Cephus parvus (Dovnar-Zapskij, 1931) [*Pseudocephus*]. Russia: **EP** (NC).

Cephus pseudopilosulus Dovnar-Zapskij, 1926. Russia: **EP** (NC), **WS** (AL).

Cephus pulcher Tischbein, 1852 (*C. luteomarginatus* Giraud, 1857). Host plant: *Agropyron* spp. and others (Poaceae). Russia: **EP** (S, NC, CR), **WS** (NS, KM, AL). – Europe (EE, SE), Turkey, Uzbekistan, Kazakhstan.

Cephus pygmeus (Linnaeus, 1767) [*Sirex*] (*Tenthredo polygona* Gmelin, 1790; *Banchus viridator* Fabricius, 1804; *Cephus subcylindricus* Gravenhorst, 1807; *C. leskii* Lepeletier, 1823; *C. flavisternum* Costa, 1882; *C. clypearis* Costa, 1894; *C. pygmaeus palaestinus* Pic, 1918; *C. tanaiticus* Dovnar-Zapskij, 1926). Host plant: *Agropyron* spp., *Avena* spp., *Phleum* spp., *Triticum* spp., etc. (Poaceae). Russia: **EP** (C, NC, CR), **UR**, **WS** (NS, KM, AL). – Europe (WE, EE, NE, SE), N Africa, Caucasus, SW Asia, Iran, Central Asia, China (CC); introduced into the N America.

Cephus rjabovi Dovnar-Zapskij, 1926. Russia: **EP** (S, NC).

Cephus sareptanus Dovnar-Zapskij, 1928. Russia: **EP** (S). – Kazakhstan.

Cephus spinipes (Panzer, 1800) [*Banchus*] (*C. cultratus* Eversmann, 1847; *C. pilosulus* Thomson, 1871;

C. pumilus André, 1881; *C. similis* Mocsáry, 1886; *C. affinis* Kokujev, 1910; *C. exilis* Kokujev, 1910; *C. pilosulus incompletus* Hellén, 1935). Host plant: Phleum spp., Dactylis spp. (Poaceae). Russia: **EP** (NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL). – Europe (WE, EE, NE, SE), N Africa, Armenia, Kyrgyzstan, Kazakhstan, China (NW).

Cephus tshettui Stroganova, 1981. Russia: **WS** (AL). **Cephus zahaikevitshi** (Ermolenko, 1971) [Pseudocephus]. Russia: **EP** (CR).

CHARACOPYGUS Konow, 1899. Type species *Characopygus moricei* Konow, 1899. The larvae feed on the Asteraceae. The genus is distributed in West Palaearctic. Number of species: World and Palaearctic – 4; Russia – 2.

Characopygus modestus Dovnar-Zapolskij, 1931. Russia: **UR**, **WS** (KM), **ES** (IR).

Characopygus scythicus Dovnar-Zapolskij, 1931. Host plant: Centaurea spp. (Asteraceae). Russia: **EP** (S), **UR**. – Europe (EE), Armenia, Turkey.

JANUS Stephens, 1829 (*Phylloecus* Newman, 1838; *Ephippionotus* A. Costa, 1860). Type species *Janus connectens* Stephens, 1829. The larvae in the branches of trees and shrubs of Rosaceae, Salicaceae, Fagaceae, Adoxaceae. The genus is distributed in Holarctic and Oriental region. Number of species: World – 26; Palaearctic – 13; Russia – 4.

Janus compressus (Fabricius, 1793) [Sirex] (*Cephus flaviventris* Förster, 1844; *Ephippionotus luteiventris* Costa, 1860; *Phylloecus eburneus* André, 1881; *Cephus foersteri* André, 1881; *C. balearicus* Kriechbaumer, 1894; *Janus foersteri ulmi* Pic, 1918). Host plant: Pyrus spp., Crataegus spp., Malus spp. (Rosaceae). Russia: **EP** (NC). – Europe (WE, EE, SE), N Africa, Turkey.

Janus cynosbati (Linnaeus, 1758) [Tenthredo] (*Lyda geoffroyi* Lepeletier, 1823; *Cephus femoratus* Curtis, 1830; *Phylloecus faunus* Newman, 1838; *Ephippionotus cephalotes* Costa, 1860; *Cephus melanarius* Mocsáry, 1891; *C. niger* Brischke, 1892). Host plant: Quercus pubescens, Q. robur (Fagaceae). Russia: **EP** (NW, C). – Europe (WE, EE, NE, SE), Turkey.

Janus formosus (Zhelochovtsev, 1935) [Cephus] (*J. orientalis* Gussakovskij, 1935). Russia: **WS** (NS, AL), **FE** (PR). – China (NE).

Janus luteipes (Lepeletier, 1823) [Cephus] (*J. connectens* Stephens, 1829; *J. bifrons* Newman, 1838; *Cephus emichi* Mocsáry, 1886; *Janus luteipes*

diversipes Pic, 1918). Host plant: Salix spp., Populus spp. (Salicaceae), ?Viburnum spp. (Adoxaceae). Russia: **EP** (NW, C), **FE** (PR). – Europe (WE, EE, NE, SE), N Africa, Georgia.

PACHYCEPHUS J.P.E.F. Stein, 1876. Type species *Pachycephus smyrnensis* J.P.E.F. Stein, 1876. The genus is distributed in West Palaearctic. Number of species: World and Palaearctic – 2; Russia – 2.

Pachycephus cruentatus cruentatus (Eversmann, 1847) [Cephus] (*P. caspicus* Dovnar-Zapolskij, 1931). Russia: **EP** (S, NC, CR). – Europe (EE), Caucasus, Turkey.

Pachycephus smyrnensis smyrnensis J.P.E.F. Stein, 1876 (*P. aeneovarius* Kohl, 1905; *P. brevis* Ghigi, 1915; *Spatulocephus sanctus* Pic, 1916). Russia: **EP** (NC). – Europe (WE, SE), N Africa, Armenia, Azerbaijan, SW Asia.

PHYLLOECUS Newman, 1838 (*Hartigia* Schiødte, 1839; *Cerobactrus* Costa, 1860; *Macrocepus* Schlechtendal, 1878; *Cephosoma* Gradl, 1881; *Adirus* Konow, 1899; *Paradirus* Dovnar-Zapolskij, 1931; *Hissarocephus* Gussakovskij, 1945). Type species *Phylloecus faunus* Newman, 1838. The larvae in the branches of Rosaceae. The genus is distributed in Holarctic, Oriental and Neotropical regions; mainly in Palaearctic. Number of species: World – about 30; Palaearctic – > 20; Russia – 9.

Phylloecus agilis (F. Smith, 1874) [Cephus] (*Hartigia draconis* Maa, 1944; *H. draconis bipunctata* Maa, 1944; *H. draconis collaris* Maa, 1944). Russia: **FE** (PR, SA). – China (CC, SE), Japan (Hon, Shi, Kyu).

Phylloecus coreanus (Takeuchi, 1938) [Hartigia]. Russia: **FE** (PR). – Korean Peninsula.

Phylloecus etorofensis (Takeuchi, 1955) [Hartigia]. Host plant: Rosa spp. (Rosaceae). Russia: **EP** (C, E), **WS** (NS, KM), **ES** (TU, YA), **FE** (KU). – Europe (NE).

Phylloecus linearis (Schrank, 1781) [Tenthredo] (*Cephus quinquefasciatus* Stephens, 1835; *C. major* Eversmann, 1847; *Macrocepus agrimoniae* Goury, 1912). Host plant: Agrimonia spp. (Rosaceae). Russia: **EP** (N, NW, C, E, S, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (IR, ZB). – Europe (WE, EE, NE, SE), N Africa, Georgia, Turkey, Kyrgyzstan, Kazakhstan.

Phylloecus niger (M. Harris, 1779) [Sirex] (*Astabus satyrus* Panzer, 1801; *Cerobactrus major* Costa,

1860; *Cephus brachypterus* Damianitsch, 1866; *C. glabellifer* Thomson, 1871; *Cephosoma syringae* Grall, 1881; *Phylloecus cruciatus* Costa, 1894). Host plant: Rubus spp. and others (Rosaceae). Russia: **EP** (S, NC, CR), **UR**, **WS** (NS, KM). – Europe (WE, EE, SE), N Africa, Armenia, Turkey, Syria, Iran, Kazakhstan, China (NC, CC).

Phylloecus pyrrha (Zhelochovtsev, 1968) [Hartigia]. Russia: **ES** (ZB).

Phylloecus sibiricola Jakovlev, 1891 (*P. cylindricus* Jakovlev, 1891; *Hartigia affinis* Dovnar-Zapolskij, 1931). Host plant: Rosa spp. and others (Rosaceae). Russia: **WS** (TK, NS, KM, AL), **ES** (IR), **FE** (AM, PR). – Kazakhstan, Mongolia.

Phylloecus viator (F. Smith, 1874) [Cephus] (*Macrocephus japonicus* Ghigi, 1915). Host plant: Rubus spp., Rosa spp. (Rosaceae). Russia: **FE** (PR). – China (NE, NC, SE), Korean Peninsula, Japan (Hok, Hon).

Phylloecus xanthostoma (Eversmann, 1847) [Cephus] (*Cerobactrus facialis* Costa, 1864; *Macrocephus ulmariae* Schlechtendal, 1878; *Phyllaecus giraudi* Schlechtendal, 1880; *Hartigia semenovi* Dovnar-Zapolskij, 1931; *H. jakovlevi* Dovnar-Zapolskij, 1931). Host plant: Filipendula spp. (Rosaceae). Russia: **EP** (S, E), **UR**. – Europe (WE, EE, NE), N Africa, Turkey.

STENOCEPHUS Shinohara, 1999. Type species *Stenocephus oncogaster* Shinohara, 1999. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 2; Palaearctic – 1; Russia – 1.

Stenocephus oncogaster Shinohara, 1999. Russia: **FE** (KU). – China (CC), Korean Peninsula, Japan (Hok, Hon).

SYRISTA Konow, 1896 (*Neosyrista* Benson, 1935). Type species *Cephus parreyssi* Spinola, 1843. The larvae in the branches of Rosaceae. The genus is distributed in Palaearctic and Oriental region. Number of species: World – 3; Palaearctic – 2; Russia – 2.

Syrista parreyssii (Spinola, 1843) [Cephus] (*Cephus orientalis* Tischbein, 1852; *C. spectabilis*

J.P.E.F. Stein, 1876; *Macrocephus robustus* Mocsáry, 1883; *Cephus parreyssi rufiventris* Jakovlev, 1888). Host plant: Rosa spp. (Rosaceae). Russia: **EP** (NC). – Europe (SE), Caucasus, SW Asia, Iran.

Syrista similis Mocsáry, 1904 (*Cephus subrufa* Matsamura, 1912; *Neosyrista japonica* Benson, 1935). Host plant: Rosa spp. (Rosaceae). Russia: **FE** (KU). – China (NC, CC), Japan (Hok, Hon, Shi, Kyu).

TRACHELUS Jurine, 1807 (*Astatus* Panzer, 1801; *Cepha* Billberg, 1820; *Ateuchopus* Konow, 1896; *Eumetabolus* Schulz, 1906; *Trachelastatus* Morice et Durrant, 1915; *Microcephus* Benson, 1935; *Neateuchopus* Benson, 1935). Type species *Sirex tabidus* Fabricius, 1775. The genus is distributed in Palaearctic; introduced into the Nearctic. Number of species: World and Palaearctic – 8; Russia – 5.

Trachelus libanensis (André, 1881) [Cephus] (*Cephus nigritarsis* André, 1881; *Ateuchopus armenius* Konow, 1896). Russia: **EP** (NC). – Georgia, Armenia, SW Asia.

Trachelus pallipes Stroganova, 1976. Russia: **UR**. – Kazakhstan (NW).

Trachelus tabidus (Fabricius, 1775) [Sirex] (*Sirex macilentus* Fabricius, 1793; *Cephus mandibularis* Serville, 1823; *C. nigritus* Serville, 1823; *C. mandibularis* Lepeletier, 1823; *C. nigritus* Lepeletier, 1823; *C. vittatus* Costa, 1875; *Calameuta johnsonii* Ashmead, 1903). Host plant: Triticum spp., Secale cereale, Hordeum spp., Avena spp. (Poaceae); dangerous pest. Russia: **EP** (S, NC, CR). – Europe (WE, EE, SE), N Africa, Caucasus, SW Asia; introduced into the N America.

Trachelus tigris (Benson, 1935) [Neateuchopus]. Russia: **EP** (S).

Trachelus troglodyta (Fabricius, 1787) [Sirex] (*Cephus mocsaryi* W.F. Kirby, 1882; *Astatus tenuicornis* Konow, 1902). Host plant: Secale cereale (Poaceae); dangerous pest. Russia: **EP** (NW, C, E, S, NC). – Europe (WE, EE, NE, SE), N Africa, Georgia, SW Asia, Kazakhstan.

SUPERFAMILY SIRICOIDEA

Head with hypostomal bridge separating oral cavity from occipital foramen behind; labrum spatulate. Pronotum short medially and emarginate behind; mesosternum triangular, usually with presternal bridge in front, though the sutures are usually obsolete. Male genitalia orthandrious; parameres articulating on the parameral plates and moved by special muscles, and with apical cupping discs. Female ovipositor strongly exserted. Larva of reduced oligopod type. The superfamily is distributed worldwide. Number of taxa: World – 2 recent families, 4 subfamilies, 40 genera, about 260 species; Palaearctic – 2/3/21/about 105; Russia – 2/3/9/41 (+ 1 ssp.).

11. FAMILY SIRICIDAE

Large insects, generally over 14 mm, with exserted ovipositors, and differing from all other Hymenoptera in their minute tegulae. Mouthparts with maxillary palp 1-segmented; labial palp 2- to 3-segmented, the last segment enlarged and bearing a large apical sensory cup, and the 1st segment not enlarged. Antennae setaceous, 17–30-segmented (4–8-segmented in *Teredon* Norton), with a long curved 1st segment at least as long as the 3rd. Neck short. Pronotum strongly emarginate behind. Mesonotum not divided transversely, but with a lateral lobe divided off each side of the scutum. Fore wings with the membrane corrugated at the apex and with a large apical appendicular cell. Tibiae without preapical spines, and front tibia with only one apical spur. Abdomen cylindrical and contracted at base of 1st segment, which is medially divided; last segment with a horn-like projection, called the cornus. The larvae are white with only vestigial thoracic legs. They live in the wood of coniferous and deciduous trees; generation is usually biennial. Many species are technical pests of wood.

The family is distributed worldwide. Number of taxa: World – 2 subfamilies, 11 genera, > 130 species; Palaearctic – 2/7/75; Russia – 2/5/20 (+ 1 ssp.).

Subfamily SIRICINAE

SIREX Linnaeus, 1760 (*Neuropachys* Heer, 1858; *Urocerites* Heer, 1867; *Paururus* Konow, 1896). Type species *Ichneumon juvencus* Linnaeus, 1758. The larvae feed on coniferous wood of Pinaceae. The genus is distributed in Holarctic and Oriental region; introduced into the Neotropical, Ephiopian and Australian regions. Number of species: World – 28; Palaearctic – 15; Russia – 6.

Sirex atricornis Kjellander, 1945. Russia: **WS** (NS). – Europe (NE).

Sirex cyaneus dux (Semenov, 1921) [Paururus]. Host plant: ?*Abies nordmanniana* (Pinaceae). Russia: **EP** (Benson, 1965a). – Europe (EE), Georgia, Armenia, Israel.

Sirex ermak (Semenov, 1921) [Paururus]. Host plant: *Pinus* spp., *Picea* spp., *Abies* spp., *Larix* spp. (Pinaceae). Russia: **EP** (C), **WS** (TK, NS, KM, AL), **ES** (KS, TU, IR, BR, YA, ZB), **FE** (AM, PR, SA, KU, KA). – Kazakhstan, Mongolia, China (NE).

Sirex juvencus juvencus (Linnaeus, 1758) [*Ichneumon*] (*Urocerus feisthameli* Brullé, 1832; *Sirex dubia* W.F. Kirby, 1882; *S. australis* W.F. Kirby, 1882; *S. neglectus* W.F. Kirby, 1882; *S. hirsutus* W.F. Kirby, 1882; *S. leseleuci* Tournier, 1890; *Paururus juvencus virago* Enslin, 1918; *P. sucineiceps* Koornneef, 1935; *P. juvencus maculata* Hellén, 1935). Host plant: *Pinus* spp., *Picea* spp., *Abies* spp., *Larix* spp. (Pinaceae). Russia: **EP** (N, C, E, NC, CR), **UR**, **WS** (TM, OM, TK, NS, KM, AL), **ES** (TU, KR, IR, BR), **FE** (KH, PR, SA, KA). – Europe (WE, EE, NE, SE), Georgia, Mongolia, China (NE, CC, SE), Japan (Hok, Hon), India; introduced into the N America and Australia.

Sirex mongolorum (Semenov et Gussakovskij, 1935) [Paururus]. Host plant: *Abies* spp., *Pinus* spp., *Picea* spp. (Pinaceae). Russia: **ES** (BR, ZB). – Mongolia.

Sirex noctilio Fabricius, 1793 (*S. melanocerus* Thomson, 1871; *Paururus atlantidis* Ghigi, 1909). Host plant: *Pinus* spp., *Picea* spp., *Abies* spp., *Larix* spp. (Pinaceae). Russia: **EP** (N, NW, C, E, NC, CR), **UR**, **WS** (NS, KM, AL), **ES** (TU, KR, IR, BR, YA), **FE** (AM, KH, MG). – Europe (WE, EE, NE, SE), N

Africa, Turkey, Kazakhstan, Mongolia; introduced into the N and S America, Australia, New Zealand, S Africa.

UROCERUS Geoffroy, 1762 (*Xanthosirex* Semenov, 1921; *Eosirex* Piton, 1940). Type species *Ichneumon gigas* Linnaeus, 1758. The larvae mainly feed on coniferous wood of Pinaceae. The genus is distributed in Holarctic and Oriental region; one species introduced into the Neotropical region. Number of species: World – 33; Palaearctic – 28; Russia – 6 (+ 1 ssp.).

Urocerus antennatus (Marlatt, 1898) [Sirex] (*Sirex ogumae* Matsumura, 1911; *S. antennatus immaculatus* Zirngiebl, 1937). Host plant: Abies spp., Pinus spp., Picea spp. (Pinaceae). Russia: **ES** (ZB), **FE** (PR, SA, KU). – China (NE), Korean Peninsula, Japan (Hok, Hon, Shi).

Urocerus argonautarum (Semenov, 1921) [Sirex]. Host plant: Abies nordmanniana, Picea spp. (Pinaceae). Russia: **EP** (NC). – Georgia, Turkey.

Urocerus fantoma (Fabricius, 1781) [Sirex] (*Sirex tardigradus* Cederhjelm, 1798; *Xanthosirex phantasma* Semenov, 1921; *Sirex augur pallida* Ermolenko, 1957). Host plant: Pinus spp., Picea spp., Abies spp., Larix spp. (Pinaceae). Russia: **EP** (NW, C), **WS** (TM, KM), **ES** (KR, IR, ZB), **FE** (PR). – Europe (WE, EE, NE, SE), Kazakhstan, Mongolia.

Urocerus gigas gigas (Linnaeus, 1758) [*Ichneumon*] (*Sirex marisca* Linnaeus, 1760; *S. hungaricus* Christ, 1791; *S. psylluis* Fabricius, 1793; *Urocerus lefebvre* Guérin, 1833; *Sirex faustus* Costa, 1894; *Urocerus gigas taiganus* Benson, 1943; *U. gigas luteogaster* Berland, 1947; *Sirex gigas montana* Ermolenko, 1957). Host plant: Pinus spp., Picea spp., Abies spp. and others (Pinaceae), Populus spp., Salix spp. (Salicaceae), Betula spp. (Betulaceae), etc. Russia: **EP** (N, NW, C, S, NC, CR), **UR**, **WS** (TM, TK, NS, KM, AL), **ES** (KS, TU, KR, IR, BR, YA, ZB), **FE** (AM, KH, SA, KA, MG, CH). – Europe (WE, EE, NE, SE), SW Asia, Kazakhstan, Mongolia, China (NC, NW), Korean Peninsula; introduced into the S America.

Urocerus gigas orientalis Maa, 1949. Host plant: Abies spp., Picea spp. and others (Pinaceae). Russia: **ES** (ZB), **FE** (SA, KA). – China (CC), Korean Peninsula, Japan (Hok).

Urocerus sah (Mocsáry, 1881) [Sirex]. Host plant: Juniperus spp. (Cupressaceae). Russia: **EP** (NC,

CR). – Europe (EE, NE), Azerbaijan, Turkey, Afghanistan, Kazakhstan; introduced into the N America.

Urocerus yasushii (Yano, 1917) [Sirex] (*Sirex umbra* Semenov, 1921; *Urocerus sachalinensis* Conde, 1935). Host plant: Picea spp. (Pinaceae). Russia: **ES** (ZB), **FE** (KH, PR, SA, KU). – China (NE), Korean Peninsula, Japan (Hon).

XOANON Semenov, 1921. Type species *Xoanon mysta* Semenov, 1921. The genus is distributed in East Asia and Oriental region. Number of species: World – 2; Palaearctic – 1; Russia – 1.

Xoanon matsumurae (Rohwer, 1910) [Sirex] (*X. mysta* Semenov, 1921). Host plant: Pinus spp., Picea spp., Abies spp. (Pinaceae). Russia: **ES** (BR, ZB), **FE** (PR, SA, KU). – China (NE, NC), Korean Peninsula, Japan (Hok, Hon, Shi).

Subfamily TREMICINAE

TREMEX Jurine, 1807 (*Xyloterus* Hartig, 1837; *Xyloecematum* Heyden, 1868). Type species *Sirex fuscicornis* Fabricius, 1787. The larvae feed the wood of deciduous trees. The genus is distributed in Holarctic and Oriental regions; one species was introduced into the Neotropical region. Number of species: World – 33; Palaearctic – 21; Russia – 5.

Tremex alchymista Mocsáry, 1886. Russia: **EP** (NC). – Europe (WE, EE).

Tremex apicalis Matsumura, 1912 (*T. propheta* Semenov, 1921). Host plant: Acer spp. (Sapindaceae), Prunus spp. (Rosaceae). Russia: **ES** (ZB), **FE** (SA). – China (NE), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

Tremex fuscicornis (Fabricius, 1787) [Sirex] (*Sirex struthiocamelus* Villers, 1789; *S. camelogigas* Christ, 1791). Host plant: Betula spp. (Betulaceae), Populus spp. (Salicaceae), Robinia spp. (Fabaceae), Acer spp. (Sapindaceae), Ulmus spp. (Ulmaceae). Russia: **EP** (NW, C, E, S, NC, CR), **WS** (TM, TK, NS, KM, AL), **ES** (BR, ZB), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE, SE), Armenia, Kazakhstan, China (NE, NC, SW, SE), Korean Peninsula, Japan (Hok, Hon); introduced into the S America.

Tremex magus magus (Fabricius, 1787) [Sirex] (*Sirex nigrita* Fabricius, 1787). Host plant: Betula spp. (Betulaceae), Populus spp. (Salicaceae). Russia: **EP** (C, E, S), **UR**, **WS** (KM, AL). – Europe (WE, EE, SE), Kazakhstan.

Tremex satanas Semenov, 1921. Russia: **ES** (BR), **FE** (PR).

XERIS Costa, 1894 (*Neoxeris* Saini et Singh, 1987).

Type species *Ichneumon spectrum* Linnaeus, 1758. The larvae feed on coniferous wood (Pinaceae, Cupressaceae). The genus is distributed in Holarctic, Oriental and Neotropical regions. Number of species: World – 16; Palaearctic – 8; Russia – 2.

Xeris malaisei Maa, 1949. Host plant: *Abies* spp. (Pinaceae), *Cryptomeria* spp. (Cupressaceae). Russia:

FE (PR). – China (NE), Korean Peninsula, Japan (Hok, Hon).

Xeris spectrum (Linnaeus, 1758) [Ichneumon] (*Sirex nanus* O.F. Müller, 1776; *S. emarginatus* Fabricius, 1793). Host plant: *Pinus* spp., *Picea* spp., *Abies* spp., *Larix* spp. (Pinaceae). Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TM, NS, KM, AL), **ES** (TU, KR, BR, ZB), **FE** (AM, PR, SA, KU). – Europe (WE, EE, NE, SE), Georgia, SW Asia, Kazakhstan, Japan (Hok, Hon, Shi, Kyu).

12. FAMILY XIPHYDRIIDAE

Large or medium insects 7–20 mm long. Antennae setaceous and 13–19 segmented, with a long curved 1st segment at least as long as 3rd. Neck long; cervical sclerites viewed from the side appear longer than broad. Mesonotum with a transverse furrow. Fore wings corrugated apically, and without an appendiculate cell; vein r_2+r_3 present, and base of Rs not angled sharply near its base, so that its basal portion is not in a line with M . Tibiae without preapical spines; front tibia with only one apical spur. Last abdominal segment without an apical horn-like projection.

The larvae white with only vestigial thoracic legs; and they bore in the wood of deciduous trees, mainly Betulaceae, Salicaceae and Ulmaceae.

The family is distributed worldwide, except of Afro-tropical region. Number of taxa: World – 2 subfamilies, 29 genera, about 150 species; Palaearctic – 1/14/50; Russia – 1/4/21.

Subfamily XIPHYDRIINAE

EUXIPHYDRIA Semenov et Gussakovskij, 1935.

Type species *Xiphydria potanini* Jakovlev, 1891. The larvae feed the wood of deciduous trees. The genus is distributed in East Asia and Oriental region. Number of species: World – 6; Palaearctic – 4; Russia – 2.

Euxiphidria amphybolia Sundukov, 2012. Host plant: *Phellodendron amurense* (Rutaceae), *Betula mandshurica* (Betulaceae), *Acer ukurunduense* (Sapindaceae). Russia: **FE** (PR, SA, KU).

Euxiphidria potanini (Jakovlev, 1891) [Xiphydria] (*Xiphydria ruficeps* Mocsáry, 1909; *X. ruficeps* Matsumura, 1912; *X. akazui* Matsumura, 1932; *X. maidli* Zirngiebl, 1937; *Euxiphidria subtrifida* Maa, 1944). Host plant: *Acer mono*, *A. mayrpii*

(Sapindaceae), *Betula ermanii* (Betulaceae). Russia: **FE** (KH, PR, SA, KU). – China (NE, NC, SW, SE), Korean Peninsula, Japan (Hok, Hon, Shi, Sado).

PLATYXIPHYDRIA Takeuchi, 1938. Type species *Platyxiphydria tipheriformis* Takeuchi, 1938. The larvae feed the wood of deciduous trees. The genus is distributed in East Asia; one species was introduced into the Oriental region. Number of species: World – 8; Palaearctic – 7; Russia – 1.

Platyxiphydria sikhotealinensis Sundukov, 2012. Host plant: *Tilia amurensis* (Tiliaceae). Russia: **FE** (PR).

XIPHYDRIA Latreille, 1803 (*Urocerus* Jurine, 1801; *Hybonotus* Klug, 1803; *Xiphydria* Panzer, 1806; *Xiphiura* Fallén, 1813; *Xiphydria* Norton, 1869; *Xiphidion* Provancher, 1875; *Konowia* Brauns, 1884; *Pseudoxiphydria* Enslin, 1911; *Apoxiphia* Maa, 1949; *Nasoxiphia* Maa, 1949). Type species *Ichneumon camelus* Linnaeus, 1758. The larvae feed the wood of deciduous trees. The genus is distributed in Holarctic and Oriental regions. Number of species: World – 36; Palaearctic – 22; Russia – 17.

Xiphydria alnivora Matsumura, 1927. Host plant: *Alnus hirsuta* (Betulaceae). Russia: **FE** (PR, KU). – Japan (Hok, Hon).

Xiphydria annulitibia Takeuchi, 1936. Host plant: *Alnus hirsuta* (Betulaceae). Russia: **FE** (SA, KU). – Korean Peninsula, Japan (Hok, Hon, Shi).

Xiphydria betulae (Enslin, 1911) [*Pseudoxiphydria*] (*Pseudoxiphydria markewitschi* Ermolenko, 1960; *Konowia guntionensis* Zombori, 1960). Host plant: *Betula* spp. (Betulaceae). Russia: **EP** (C, E), **UR**, **WS** (NS, KM, AL), **ES** (KR), **FE** (AM, KH). – Europe (WE, EE, NE, SE).

Xiphydria buyssoni Konow, 1903. Host plant: *Alnus hirsuta* (Betulaceae). Russia: **ES** (ZB), **FE** (PR). – Japan (Hon, Shi, Kyu).

Xiphydria camelus (Linnaeus, 1758) [*Ichneumon*] (*X. eborata* Konow, 1899; *X. jozana* Matsumura, 1927; *X. kawakamii* Matsumura, 1927; *X. kuccharonis* Matsumura, 1927). Host plant: *Alnus* spp., *Betula* spp. (Betulaceae), *Populus* spp. (Salicaceae), *Ulmus* spp. (Ulmaceae) and others. Russia: **EP** (N, NW, C, E, S, NC), **UR**, **WS** (TM, OM, TK, NS, KM, AL), **ES** (KS, KR, IR), **FE** (AM, KH, PR, SA, KU, KA). – Europe (WE, EE, NE, SE), Turkey, Kazakhstan, China (NE, NC), Korean Peninsula, Japan (Hok, Hon, Shi, Kyu).

- Xiphydria caucasica** Semenov et Gussakovskij, 1935. Russia: EP (NC). – Georgia.
- Xiphydria jakovlevi** Semenov et Gussakovskij, 1935. Host plant: Alnus hirsuta (Betulaceae). Russia: FE (PR, KU). – China (NE, CC, SE), Korean Peninsula.
- Xiphydria kastsheevi** Ermolenko, 1979. Russia: FE (PR).
- Xiphydria longicollis** (Geoffroy, 1785) [Tenthredo] (*Urocerus annulatus* Jurine, 1807). Host plant: Quercus spp. (Fagaceae), Betula spp. (Betulaceae), Acer spp. (Sapindaceae) and others. Russia: EP (C, CR). – Europe (WE, EE, SE).
- Xiphydria megapolitana** (Brauns, 1884) [Konowia]. Host plant: Betula spp. (Betulaceae). Russia: EP (NW, C), ES (BR), FE (PR). – Europe (WE, EE, NE, SE).
- Xiphydria ogasawarai** Matsumura, 1927. Host plant: Acer mayrii, A. mono (Sapindaceae). Russia: FE (PR, KU). – Japan (Hok, Hon).
- Xiphydria palaearctica** Semenov, 1921 (*X. jezoensis* Matsumura, 1927). Host plant: Alnus spp., Betula spp. (Betulaceae), Acer spp. (Sapindaceae), Ulmus spp. (Ulmaceae) and others. Russia: ES (IR), FE (PR, SA, KU). – China (NE), Korean Peninsula, Japan (Hok, Hon, Sado).
- Xiphydria picta** Konow, 1897 (*Konowia bifurcata* Maa, 1949). Host plant: Alnus spp. (Betulaceae). Russia:

- EP (NW, C, E, S, NC, CR). – Europe (WE, EE, NE, SE), Georgia, Kazakhstan.
- Xiphydria popovi** Semenov et Gussakovskij, 1935. Host plant: Alnus spp., Betula spp. (Betulaceae). Russia: ES (TU, ZB), FE (AM, KH, PR). – China (NE).
- Xiphydria prolongata** (Geoffroy, 1785) [Tenthredo] (*Sirex dromedarius* Fabricius, 1787; *Xyphidria fasciata* Lepeletier, 1823). Host plant: Betula spp. (Betulaceae), Salix spp., Populus spp. (Salicaceae), Ulmus spp. (Ulmaceae). Russia: EP (NW, C, E, S, NC, CR), UR, WS (TK, NS, KM, AL). – Europe (WE, EE, NE, SE), Azerbaijan, Turkmenistan, Kazakhstan, Mongolia.
- Xiphydria ribesii** (Zhelochovtsev, 1968) [Euxiphidria]. Host plant: Ribes spp. (Grossulariaceae). Russia: WS (TK).
- Xiphydria sulcata** Maa, 1949. Russia: FE (SA).
- XIPHYDRIOLA** Semenov, 1921. Type species *Xiphydriola amurensis* Semenov, 1921. The genus is distributed in East Asia. Number of species: World and Palaearctic – 2; Russia – 1.
- Xiphydriola amurensis** Semenov, 1921. Russia: FE (PR). – China (NE), Korean Peninsula.

INFRAORDER ORUSSOMORPHA
SUPERFAMILY ORUSSOIDEA

One family: Orussidae.

13. FAMILY ORUSSIDAE

Very rare insects, characterized by the insetrion of the antennae on the ventral aspect of the head, below the apparent clypeus and below the lower margins od the eyes; the antenna is 11-segmented and setiform in the male, but in the female is only 10-segmented, with the 9th segment unique in form, swollen and longer than any other segment; head behind with a hypostomal bridge separating the oral cavity from the occipital foramen; labrum spatulate. Pronotum strongly emarginate behind; mesosternum triangular without presternal bridge and with sutures obsolete. The wing-venation is reduced mostly to pigmented bands; there is no vein $2r$ in the fore wing and no cross veins $r-m$ or $m-cu$ in the hind wings. Male genitalia orthandrious; parameres continuous with parameral plates, without muscles and whitout apical cupping discs; aedeagus trough-like. Female sawsheath leveled, not exserted.

The Orussidae is a small family of parasitic wasps. Their biology is incompletely known, but the majority of the evidence bearing on the lifestyle of Orussidae indicates that they are idiobiont ectoparasites of wood-boring beetle larvae, primarily Buprestidae and Sirticidae and Xiphydriidae also (Vilhelmsen et al., 2013).

The family is distributed worldwide. Number of taxa: World – 2 subfamilies, 17 genera and about 90 species; Palaearctic – 2/5/about 20; Russia – 1/2/4.

Subfamily ORUSSINAE

ORUSSUS Latreille, 1797. Type species *Oryssus coronatus* Fabricius, 1798. The genus is distributed worldwide, except Neotropical region. Number of species: World – 28; Palaearctic – 14; Russia – 3.

Orussus abietinus (Scopoli, 1763) [Sphecius] (*Tenthredo degener* Christ, 1791; *Sirex vespertilio* Fabricius, 1793; *Oryssus coronatus* Fabricius, 1798; *O. albopunctatus* Gimmerthal, 1836; *O. hyalinipennis* Costa, 1860). Parasite of *Buprestis* spp. (Buprestidae). Russia: EP (C, S, NC, CR), UR, ES (IR, ZB). – Europe (WE, EE, NE, SE), Georgia, SW Asia, Iran, Kazakhstan.

Orussus coreanus Takeuchi, 1938. Russia: FE (AM, KH, PR, SA). – China (NE), Korean Peninsula.

Orussus rufipes Tsuneki, 1963. Parasite of *?Xiphydria ogasawarai* Matsumura, 1927 (Xiphydriidae). Russia: FE (KU). – Japan (Hok, Hon).

PSEUDORYSSUS Guiglia, 1954. Type species *Oryssus henschii* Mocsáry, 1910. The genus is distributed in Palaearctic. Number of species: World – 2; Palaearctic – 2; Russia – 1.

Pseudoryssus henschii (Mocsáry, 1910) [Oryssus] (*P. emanuelis* Guiglia, 1956). Russia: EP (Taeger et al., 2006). – Europe (WE, EE, SE), N Africa, NW Asia.
