PROCEEDINGS

of the

ENTOMOLOGICAL SOCIETY

of WASHINGTON

CONTENTS

- BRAILOVSKY, HARRY and ERNESTO BARRERA—Two new genera and four new species of Colpurini (Heteroptera: Coreidae: Coreinae) from New Guinea 424
- BROWN, JOHN W. and RICHARD L. BROWN—A new species of *Cryptaspasma* Walsingham (Lepidoptera: Tortricidae: Olethreutinae) from Central America, the Caribbean, and southeastern United States, with a catalog of the world fauna of Microcorsini 288
- COSTA, LUIZ A. A. and THOMAS J. HENRY—*Fulvius chaguenus* Carvalho and Costa (Heteroptera: Miridae: Cylapinae: Fulviini): Redescription and recognition of type specimens 417
- ETNIER, DAVID A., CHARLES R. PARKER, and IAN C. STOCKS—A new species of *Rhyacophila* Pictet (Trichoptera: Rhyacophilidae) from Great Smoky Mountains National Park, with illustrations of females of *R. appalachia* Morse and Ross and *R. mycta* Ross 396
- GAGNÉ, RAYMOND J., ALEJANDRO SOSA, and HUGO CORDO—A new Neotropical species of *Clinodiplosis* (Diptera: Cecidomyiidae) injurious to alligatorweed, *Alternanthera philoxeroides* (Amaranthaceae) 305
- HARRINGTON, RICHARD C. and JOHN C. MORSE—A new species of *Brachycentrus* Curtis (Trichoptera: Brachycentridae) from the southern Appalachian Mountains and variation in the caddisfly *B. spinae* Ross 453
- ISHIKAWA, TADASHI and SHÙJI OKAJIMA—A new species of the saicine assassin bug genus *Carayonia* Villiers (Heteroptera: Reduviidae) from Indochina 319
- KONSTANTINOV, ALEXANDER S. and BORIS A. KOROTYAEV—Sexual dimorphism and size of aedeagi in apionid weevils (Coleoptera: Apionidae) and flea beetles (Coleoptera: Chrysomelidae): Why some masculine males have small aedeagi 324
- MATHIS, WAYNE N. and TADEUSZ ZATWARNICKI—A revision of the shore-fly genus *Cressonomya* Arnaud (Diptera: Ephydriidae), with comments on species that have been excluded 249
- NICKLE, DAVID A.—Commonly intercepted thrips (Thysanoptera) from Europe, the Mediterranean, and Africa at U.S. ports-of-entry. Part II. *Frankliniella* Karny and *Iridothrips* Priesner (Thripidae) 438
- OCAMPO, FEDERICO C. and MIGUEL ANGEL MORÓN—Description of the third instar larva of *Hemiphileurus dispar* Kolbe (Coleoptera: Scarabacidae: Dynastinae: Phileurini) 412

(Continued on back cover)

THE
ENTOMOLOGICAL SOCIETY
OF WASHINGTON

ORGANIZED MARCH 12, 1884

OFFICERS FOR 2004

E. E. GRISSELL, *President*

JASON P. W. HALL, *President-Elect*

STUART H. MCKAMEY, *Recording Secretary*

HOLLIS B. WILLIAMS, *Membership Secretary*

JON A. LEWIS, *Custodian*

MICHAEL G. POGUE, *Treasurer*

JOHN W. BROWN AND DAVID G. FURTH, *Program Chairs*

JONATHAN R. MAWDSLEY, *Past President*

DAVID R. SMITH, *Editor*

Publications Committee

RAYMOND J. GAGNÉ

THOMAS J. HENRY

WAYNE N. MATHIS

Honorary President

DONALD M. ANDERSON

Honorary Members

WILLIAM E. BICKLEY

KARL V. KROMBEIN

RONALD W. HODGES

PAUL J. SPANGLER

MANYA B. STOETZEL

All correspondence concerning Society business should be mailed to the appropriate officer at the following address: Entomological Society of Washington, % Department of Entomology, Smithsonian Institution, Washington, D.C. 20560-0168.

MEETINGS.—Regular meetings of the Society are held in the Natural History Building, Smithsonian Institution, on the first Thursday of each month from October to June, inclusive, at 7:00 P.M. Minutes of meetings are published regularly in the *Proceedings*.

MEMBERSHIP.—Members shall be persons who have demonstrated interest in the science of entomology. Annual dues for members are \$25.00 (U.S. currency).

PROCEEDINGS.—The *Proceedings of the Entomological Society of Washington* (ISSN 0013-8797) are published quarterly beginning in January by The Entomological Society of Washington. POSTMASTER: Send address changes to the Entomological Society of Washington, % Department of Entomology, Smithsonian Institution, Washington, D.C. 20560-0168. Members in good standing receive the *Proceedings of the Entomological Society of Washington*. Nonmember U.S. subscriptions are \$60.00 per year and foreign subscriptions are \$70.00 per year, payable (U.S. currency) in advance. Foreign delivery cannot be guaranteed. All remittances should be made payable to *The Entomological Society of Washington*.

The Society does not exchange its publications for those of other societies.

**PLEASE SEE PP. 247-248 OF THE JANUARY 2004 ISSUE FOR
INFORMATION REGARDING PREPARATION OF MANUSCRIPTS.**

STATEMENT OF OWNERSHIP

Title of Publication: *Proceedings of the Entomological Society of Washington*.

Frequency of Issue: Quarterly (January, April, July, October).

Location of Office of Publication, Business Office of Publisher and Owner: The Entomological Society of Washington, % Department of Entomology, Smithsonian Institution, 10th and Constitution NW, Washington, D.C. 20560-0168.

Editor: David R. Smith, Systematic Entomology Laboratory, ARS, USDA, % Department of Entomology, Smithsonian Institution, 10th and Constitution NW, Washington, D.C. 20560-0168.

Books for Review: David R. Smith, Systematic Entomology Laboratory, ARS, USDA, % Department of Entomology, Smithsonian Institution, 10th and Constitution NW, Washington, D.C. 20560-0168.

Managing Editor and Known Bondholders or other Security Holders: none.

This issue was mailed 30 March 2004

Periodicals Postage Paid at Washington, D.C. and additional mailing office.

PRINTED BY ALLEN PRESS, INC., LAWRENCE, KANSAS 66044, USA

NOTE

Homonymy in the Coccinellidae (Coleoptera), or Something Fishy About
Pseudoscymnus Chapin

Edward Chapin (1962) discovered some anomalous characters in certain species of *Scymnus* from Japan while preparing a report on the lady beetles (Coccinellidae) of Micronesia. The species in question possess true trimerous tarsi and reduced antennae (only nine antennomeres) terminating in extraordinarily long setae. Chapin proposed the new genus *Pseudoscymnus* for these unusual lady beetles, based on *Scymnus hareja* Weise (type species) and five other species—*S. kurohime* Miyatake, *S. seboshii* Ohta, *S. sylvaticus* Lewis, *S. pilicrepus* Lewis and *S. quinquepunctatus* Weise—the last four included tentatively.

In the decades that followed Chapin's contribution, numerous additional species have been added to the genus, including the delightfully sibilant *Pseudoscymnus tsugae* Sasaji and McClure 1997, a Japanese species which has been introduced for control of woolly hemlock adelgid, *Adelges tsugae* Annand, in the eastern United States (McClure and Cheah, in press). Unfortunately, the name *Pseudoscymnus* Chapin is a junior homonym of *Pseudoscymnus* Herre 1935 (Vandenberg 2002). Herre's (1935) usage of the name for a genus of kitefin shark (Squaliformes: Dalatiidae) predates Chapin's by more than a quarter century (Mould 1999) and therefore has priority according to article 52.3 of the International Code of Zoological Nomenclature (ICZN) (International Commission on Zoological Nomenclature 1999).

***Sasajiscymnus* Vandenberg, new name**

Pseudoscymnus Chapin 1962: 50 (Type species: *Scymnus hareja* Weise 1879) (not Herre 1935, type *P. boshuensis* Herre).

Type species.—*Scymnus hareja* Weise 1879 (according to article 72.7 of the ICZN 1999).

Etymology.—The replacement name is composed of Sasaji + *Scymnus* (= a young animal, cub, whelp) masculine, and is dedicated to Hiroyuki Sasaji, a leading specialist in lady beetle systematics and an inspiration to all who wish to understand the evolution and diversity of this important group.

Remarks.—In accordance with articles 60.3 and 72.7 of the ICZN (1999), I propose *Sasajiscymnus* as a replacement name and objective synonym of *Pseudoscymnus* Chapin. The more than 50 named species (Yu and Montgomery 2000) currently considered to be in the genus *Pseudoscymnus* Chapin are hereby transferred to *Sasajiscymnus*. To maintain brevity, only the following **new combinations** are proposed herein: *Sasajiscymnus tsugae* (Sasaji and McClure), *S. kurohime* (Miyatake), *S. seboshii* (Ohta), *S. sylvaticus* (Lewis), *S. pilicrepus* (Lewis) and *S. quinquepunctatus* (Weise).

It is interesting to note that the name *Scymnus* also has entered into homonymy. It has been proposed at least twice as a generic name for a shark (*Scymnus* Cuvier 1816, type *Squalus americanus* Gmelin 1789, and *Scymnus* Quoy and Gaimard 1824, type *Scymnus brasiliensis* Quoy and Gaimard 1824), but senior status is held by the coccinellid genus *Scymnus* Kugelann 1794 (type *Scymnus nigrinus* Kugelann 1794, by subsequent designation of Korschefsky (1931)). Likewise, the binomial *Scymnus brasiliensis* appears as both a shark (*Scymnus brasiliensis* Quoy and Gaimard 1824, above, presently classified in *Isistioides*) and as a lady beetle (*Scymnus brasiliensis* Weise 1929, presently regarded as a

junior synonym of *Diomus seminulus* (Mulsant 1850) (Gordon 1999). According to Article 57.8.1 of the ICZN (1999), such homonymy between identical species-group names in combination with homonymous generic names established for different nominal genera is to be disregarded.
